"(g) Compliance with the terms and conditions of a permit issued in accordance with the requirements of this part shall be deemed compliance with all requirements of this Act that are explicitly addressed by such terms and conditions: *Provided, however*, That compliance with the terms and conditions of a permit issued in accordance with the requirements of this part shall not alter, modify, or otherwise affect the authority of the Administrator under section 303 (emergency powers) or the requirement to comply with any order issued under section 303.

"NOTIFICATION TO ADMINISTRATOR AND OTHER STATES

"SEC. 354. (a)(1)(A) Each permitting authority shall transmit to the Administrator a copy of each draft permit or draft permit modification release for public comment, including any compliance plan, and such other information as the Administrator may by rule require in order to carry out the Administrator's duties under the Act. Each permitting authority shall provide public notice, in accordance with regulations promulgated by the Administrator, of each permit or permit modification proposed to be issued or granted by the authority, and, except as provided under subparagraph (B), transmit a copy of each such proposed permit to the Administrator for review under subsection (b). Such notice shall include a concise description of the manner in which a proposed permit or permit modification does not implement or otherwise proposes to change the requirements of any applicable implementation plan.

"(B) A proposed permit shall not be required to be forwarded to the Administrator for review under subsection (b) if the permit only implements and does not change any material requirement of any applicable implementation plan (a 'codifying permit') and

the permitting authority so states in the public notice, unless—

"(i) the Administrator notifies the permitting authority, not later than the close of the public comment period, that the permit does not so implement without change all such requirements or is otherwise not in compliance with the requirements of this Act; or

"(ii) the final permit modifies any provision that was included in the proposed permit submitted for public notice.

In any case in which a proposed permit contains a provision that changes any material requirement of an applicable implementation plan or is otherwise not in compliance with the requirements of this Act, failure by the Administrator to notify the permitting authority under clause (i) of this paragraph shall be subject to an action under section 304(a)(2) of this Act: *Provided,* That no person may commence such a civil action unless such person has, in accordance with procedures established under section 351(b)(6) of this part, participated in the public comment process relating to the permit. In any action brought under this provision, pending a final decision in such action, the court shall have jurisdiction to entertain an application to maintain in effect the provisions of the applicable implementation plan that affect the source seeking the permit or permit modification.

"(2) The permitting authority shall provide notice of each permit or permit modification proposed to be issued by the authority and forwarded to the Administrator under this section, to any State that is susceptible to adverse air quality effects resulting from emissions that would be allowed under the permit.

"(3) The permitting authority shall provide an opportunity for each State that satisfies the condition set out in paragraph (2) of this subsection to submit written recommendations respecting issuance of the permit, including proposed terms and conditions for the permit. If any part of those recommendations is not accepted by the permitting authority, such authority shall notify the State submitting the recommendations and the Administrator in writing of its failure to accept those recommendations and its reasons therefor.

"(4) For purposes of paragraph (2), any State that is within fifty miles of a source that applies for a permit under this Act shall be deemed susceptible to adverse air quality effects resulting from emissions that would be allowed under the permit. The Administrator shall promulgate guidelines with respect to application of paragraph (2) in cases involving the emission and transport of specific pollutants that have the potential to affect air quality adversely in areas located further than fifty miles from the source of such pollutants.

"(b) No permit shall be issued, and no permit modification shall be granted, if the Administrator (1) within ninety days after receipt of the proposed permit or permit modification under subsection (a)(1)(A) of this section, or (2) within ninety days after receiving notification under subsection (a)(2), objects in writing to its issuance. Such objection may be based on the Administrator's determination that the proposed permit or permit modification is not in compliance with the applicable implementation plan or other applicable emission limitations, standards, or other applicable requirements of this Act. The Administrator shall object to the issuance of any proposed permit or permit modification that contains provisions which are not in compliance with the requirements of this Act. The Administrator shall provide with each objection a statement of the reasons for the objection, along with the terms and conditions which such permit or permit modification would include if it were to be issued by the Administrator. A copy of any objection and statement shall be provided to the applicant.

"(c)(1) If the permitting authority fails within ninety days after the date of the objection under subsection (b) to submit a permit revised to meet the objection, the Administrator shall promptly issue or deny the permit in accordance with the requirements of this part. No objection shall be subject to judicial review until the Administrator takes final action to issue or deny a permit under this subsection.

"(2) A failure by the Administrator to object to the issuance of a permit containing provisions that are not in compliance with the requirements of this Act shall be subject to an action under section 304(a)(2) of this Act: *Provided,* That no person may commence such a civil action unless such person has, in accordance with procedures established under section 351(b)(6) of this part, participated in the public comment process relating to issuance of the permit. In any action brought under this provision, pending a final decision in such action, the court shall have jurisdiction to entertain an application to maintain in effect the applicable provisions of the implementation plan that affect the source seeking the permit or permit modification.

"(d) The Administrator may, by regulation, require that specified modifications to requirements of the applicable implementation plan with respect to specified categories of sources (including any class, type, or size within such category) be made only through a revision to the applicable implementation plan.

"(e)(1) The Administrator shall, by regulation, require that if a permit applicant identifies the composition of emissions under the reasonably anticipated operating conditions of the permitted facility, the permit shall set forth the emission limitations, standards, and other requirements that would apply under all such reasonably anticipated operating conditions.

"(2) The Administrator shall, by regulation, require that emission limitations contained in permits, as well as other permit terms, provide the owner or operator of a facility the flexibility to make changes in the operation of the facility that might shift permitted emissions from one source to another within the same facility, as authorized by a permit, without the necessity for a permit modification: *Provided,* That the owner or operator provides the Administrator and the permitting authority with advance written notification specifying the proposed changes and the anticipated emissions effects of such changes not less than thirty days prior to making such changes: *Provided further,* That the permit includes such emission limitations, monitoring provisions, and other requirements as are necessary to assure that all permit requirements will continue to be enforceable. Changes in the operation of a facility that will cause an increase either in the rate at which emissions are allowed under a permit issued under this part, or in total emissions allowed by such permit shall not be authorized by the regulations promulgated to implement the preceding sentence.

"(f) If the Administrator finds that cause exists to terminate, modify, or revoke and reissue a State or local permit under this part, the Administrator shall notify the permitting authority of such finding. The permitting authority shall, within ninety days after receipt of such notification, forward to the Administrator under this section a proposed determination of termination, modification, or revocation and reissuance, as appropriate. The Administrator may extend such ninety-day period for an additional ninety days if the Administrator finds that a new or revised permit application is necessary, or that the permitting authority must require the permittee to submit additional information. The Administrator may review such proposed determination under the provisions of subsections (a) and (b) of this section. If the permitting authority fails to submit the required proposed determination, or if the Administrator objects and the permitting authority fails to resolve the objection within the period prescribed in subsection (c) of this section, the Administrator may, after notice and in accordance with duly promulgated procedures, terminate, modify, or revoke and reissue the permit.

"RELATION TO OTHER AUTHORITY

"SEC. 355. (a) Nothing in this part shall prevent an air pollution control agency from establishing additional permitting requirements not inconsistent with this Act.

"(b) Nothing in this part shall be construed to authorize the Administrator, or a State, or other permitting authority, to modify or revoke any allowance granted under title IV, or to alter or amend any provision of title IV or of section 111 or 112.

"(c) Permits issued under this part shall, to the maximum extent practicable, be coordinated and consolidated with all other permits required under this Act, including permits required under sections 112, 172, 173, and 408.

"(d) In promulgating any standard under section 111 or 112, the Administrator shall identify which sources or categories of sources (including any class, type, or size within such category) subject to such standard shall be subject to this part.

"(e) For the purposes of this Act, any permit properly issued or revised under this part shall become part of, and supersede any inconsistent portion of, the applicable implementation plan, and shall have the effect specified in section 353(g).".

DEFINITION OF EMISSION STANDARD OR LIMITATION

SEC. 502. Section 304(f)(1) of the Clean Air Act is amended to read as follows:

"(1) an emission limitation, standard of performance, or an emission standard, or a schedule or timetable of compliance that is currently legally enforceable;".

TITLE VI—ENFORCEMENT AND REAUTHORIZATION

SECTION 113 ENFORCEMENT

SEC. 601. (a) The heading of section 113(a) of the Clean Air Act is amended by replacing the words "FINDING OF VIOLATION" with the words "NOTIFICATIONS AND COMPLIANCE ORDERS".

(b) Section 113(a)(1) of the Clean Air Act is amended as follows:

(1) In the first sentence, after "finds that any person", insert the words "has violated or"; and following the words "shall notify the person" replace "in violation of" with "who violated".

(2) In the second sentence,

(A) strike the words "If such violation extends beyond the thirtieth day after the date of the Administrator's notification,"

and insert in lieu thereof the words "At any time after the expiration of thirty days following the date on which such notice of a violation is issued," and;

(B) strike all after "of such plan" and insert in lieu thereof the following: ", may issue an administrative penalty order under subsection (d), or may bring a civil action under subsection (b), without regard to the period of the violation (subject to section 2462 of title 28 of the United States Code). Nothing in this subsection shall preclude the United States from commencing a criminal action under section 113(c) without such notification for any such violation.".

(c) Section 113(a)(2) of the Clean Air Act is amended as follows:

(1) Insert the words "or approved permit program" after "applicable implementation plan" in the first sentence.

(2) Insert the words "or permit program" after "in which the plan" in the first sentence.

(3) Insert the words "or permit program" after "enforce the plan" in the first sentence.

(4) Insert the words "or permit program" after "enforce such plan" in the third sentence.

(5) Insert the words "or permit program" after "requirement of such plan" in the third sentence.

(6) Strike the "or" at the end of section 113(a)(2)(A), redesignate subparagraph "(B)" as "(C)", and insert the following new subparagraph (B):

"(B) by issuing an administrative penalty order under subsection (d) of this section, or".

(7) Insert the following new sentence at the end of section 113(a)(2): "Nothing in this subsection shall preclude the United States from commencing a criminal action under section 113(c) without such notification for any such violation.".

(d) Section 113(a)(3) of the Clean Air Act is amended as follows:

(1) Insert the words "has violated or" before the words "is in violation of" in the first sentence.

(2) Strike the words "section 111(e)" and all that follows down through "(relating to inspections, etc.), he" and insert in lieu thereof the following new language: "any other requirement of this title, title III, or title IV, including, but not limited to, a requirement of any rule, plan, order, waiver or permit promulgated, issued or approved under those titles or for the payment of any fee owed the United States under this Act, the Administrator".

(3) Strike the words "or he" before the words "may bring a civil action" and insert in lieu thereof the following words: "may issue an administrative penalty order in accordance with subsection (d), may".

(4) Insert ", or may bring a criminal action in accordance with subsection (c)" immediately before the period at the end of the sentence.

(e) Section 113(a)(4) of the Clean Air Act is amended by inserting at the end thereof: "An order issued under this subsection shall require the person to whom it was issued to comply with the requirement as expeditiously as practicable, but in no event later than one year after the date the order was issued, and shall be nonrenewable. No order issued under this subsection shall prevent the State, the Administrator, or a court in an action brought under section 304, from assessing any penalties nor otherwise affect or limit the State or the United States' authority to enforce under other provisions of this Act, nor affect any person's obligations to comply with any section of this Act, or a term or condition of any permit or applicable implementation plan promulgated or approved under this Act. Any order issued under this subsection shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. Such hearing shall not be subject to section 554 or 556 of title 5 of the United States Code, but shall provide a reasonable opportunity to be heard and to present evidence. In connection with any proceeding under this section, the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.".

(f) Section 113(a)(5) of the Clean Air Act is amended to read as follows:

"(5) Whenever, on the basis of any available information, the Administrator finds that a State is not acting in compliance with any requirement of the Act relating to the construction of new sources or the modification of existing sources, the Administrator may—

"(A) issue an order prohibiting the construction, modification or operation of any major stationary source in any area to which such provisions apply;

"(B) issue an administrative penalty order in accordance with subsection (d); or

"(C) bring a civil action under subsection (b)(5).

Nothing in this subsection shall preclude the Administrator from filing a criminal action under section 113(c) at any time for any such violation.".

(g) Section 113(b) of the Clean Air Act is amended to read as follows:

"(b) The Administrator shall, in the case of any person which is the owner or operator of a major emitting facility or a major stationary source, and may, in the case of any other person, commence a civil action for a permanent or temporary injunction, or to assess and recover a civil penalty of not more than $25,000 per day for each violation, or both, whenever such person—

"(1) has violated or is in violation of any requirement of an applicable implementation plan (such action shall be commenced (A) during any period of federally assumed enforcement, or (B) more than thirty days following the date of the Administrator's notification under subsection (a)(1) of a finding that such person has violated or is in violation of such requirement); or

"(2) has violated or is in violation of any other requirement of this title, title III, or title IV, including, but not limited to, a requirement of any rule, order, waiver, plan or permit promulgated, issued or approved under this Act or for the payment of any fee owed the United States under this Act; or

"(3) attempts to construct, modify, or operate a major stationary source in any area with respect to which a finding under subsection (a)(5) of this section has been made.

Any action under this subsection may be brought in the district court of the United States for the district in which the violation is alleged to have occurred, or is occurring, or in which the defendant resides, or where the defendant's principal place of business is located, and such court shall have jurisdiction to restrain such violation, to require compliance, to assess such civil penalty, to collect any fees owed the United States under the Act and any noncompliance assessment and nonpayment penalty owed under section 120, and to award any other appropriate relief. Notice of the commencement of such action shall be given to the appropriate State air pollution control agency. In the case of any action brought by the Administrator under this subsection, the court may award costs of litigation (including reasonable attorney and expert witness fees) to any party or parties against whom such action was brought if the court finds that such action was unreasonable.".

(h) Section 113(c) of the Clean Air Act is amended to read as follows:

"(c) CRIMINAL ENFORCEMENT.—

"(1) Any person who knowingly fails to pay any fee owed the United States under this Act shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than one year, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(2) Any person who negligently releases into the air any hazardous air pollutant listed pursuant to section 112 of this Act or any extremely hazardous substance listed pursuant to section 11002(a)(2) of title 42 of the United States Code, which release such person knows or reasonably should have known could place another person in imminent danger of death or serious bodily injury and who at the time negligently places another person in imminent danger of death or serious bodily injury shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than one year, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment. For any hazardous air pollutant listed pursuant to section 112 for which the Administrator has set an emission standard or limitation (by rule, in a permit that is in effect and was issued to the source under part B of title III, or in a temporary operating permit that is in effect and was issued to the source under section 112), or for which any other relevant standard or limitation regarding emissions into the ambient air of such pollutant has been set under this Act, a release of such pollutant from such source shall not constitute a violation of this paragraph unless it exceeds or is otherwise not in accordance with such standard or limitation.

"(3) Any person who knowingly violates any requirement or prohibition of this title, title III, or title IV, including but not limited to a requirement or prohibition of any rule, plan, order, waiver, or permit promulgated, issued, or approved under those titles shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code per day for each violation, or by imprisonment for not more than five years, or both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(4) Any person who knowingly—

"(A) makes any false material statement, representation, or certification in, or omits

material information from, or knowingly alters, conceals or fails to maintain or file, any notice, application, record, report, plan, or other document required pursuant to this Act to be either filed or maintained (whether with respect to the requirements imposed by the Administrator or by a State); or

"(B) fails to notify or report as required under this Act; or

"(C) falsifies, tampers with, renders inaccurate, or fails to install any monitoring device or method required to be maintained or followed under this Act;

shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code per day for each violation, or by imprisonment for not more than two years, or by both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

"(5)(A) Any person who knowingly releases into the air any hazardous air pollutant listed pursuant to section 112 of this Act or any extremely hazardous substance listed pursuant to section 11002(a)(2) of title 42 of the United States Code, and who knows at the time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, per day for each violation, or by imprisonment for not more than fifteen years, or by both. Any person committing such violation who is an organization shall, upon conviction under this paragraph, be subject to a fine of not more than $1,000,000 per day for each violation. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment. For any hazardous air pollutant listed pursuant to section 112 for which the Administrator has set an emissions standard or limitation (by rule, in a permit that is in effect and was issued to the source under part B of title III, or in a temporary operating permit that is in effect and was issued to the source under section 112), or for which any other relevant standard or limitation regarding emissions into the ambient air of such pollutant has been set under this Act, a release of such pollutant from such source shall not constitute a violation of this paragraph unless it exceeds or is otherwise not in accordance with such standard or limitation.

"(B) In determining whether a defendant who is an individual knew that the violation placed another person in imminent danger of death or serious bodily injury—

"(i) the defendant is responsible only for actual awareness or actual belief possessed; and

"(ii) knowledge possessed by a person other than the defendant, but not by the defendant, may not be attributed to the defendant;

except that in proving a defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to be shielded from relevant information.

"(C) The term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons.

"(D) The term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

"(6) For the purposes of this subsection, the term 'person' includes, in addition to the entities referred to in section 302(e), any responsible corporate officer.".

(i) Section 113(d) of the Clean Air Act is amended to read as follows—

"(d) ADMINISTRATIVE ASSESSMENT OF CIVIL PENALTIES.—

"(1) The Administrator may issue an administrative order against any person assessing a civil administrative penalty of up to $25,000, per day for each violation, whenever, on the basis of any available information, the Administrator finds that such person—

"(A) has violated or is violating any requirement of an applicable implementation plan (such order shall be issued (i) during any period of federally assumed enforcement, or (ii) more than thirty days following the date of the Administrator's notification under subsection (a)(1) of this section of a finding that such person has violated or is violating such requirement); or

"(B) has violated or is violating any other requirement of this title, title III, or IV, including, but not limited to, a requirement of any rule, order, waiver, permit, or plan promulgated, issued or approved under this Act or for the payment of any fee owed the United States under this Act; or

"(C) attempts to construct, modify or operate a major stationary source in any area with respect to which a finding under subsection (a)(5) of this section has been made.

The Administrator's authority under this paragraph shall be limited to matters where the total penalty sought does not exceed $200,000 and the first alleged date of violation occurred no more than twelve months prior to the initiation of the administrative action.

"(2)(A) An administrative penalty order under paragraph (1) shall be issued by the Administrator after opportunity for a hearing in accordance with sections 554 and 556 of title 5 of the United States Code. The Administrator may issue rules for discovery and other procedures for hearings under this paragraph. Before issuing such an order, the Administrator shall give written notice to the person to whom the order is to be issued of the Administrator's proposal to issue such order and provide such person an opportunity to request such a hearing on the order, within thirty days of the date the notice is received by such person. An administrative penalty order issued under paragraph (1) shall become final if no hearing is requested within thirty days or upon issuance of the order following the hearing provided for in this paragraph.

"(B) The Administrator may compromise, modify, or remit, with or without conditions, any administrative penalty which may be imposed under paragraph (d)(1).

"(3) The Administrator may implement through regulation, after consultation with the Attorney General, a field citation program for appropriate minor violations, which authorizes the issuance of field citations assessing civil penalties not to exceed $5,000 per inspection. During any six month period, the total penalty assessed under this paragraph for any single facility shall not exceed $25,000. Any person to whom a field citation is assessed may, within a reasonable time as prescribed by the Administrator through regulation, elect to pay the penalty assessment or request a hearing on the field citation. If a request for a hearing is not made within the time specified in the regulation, the penalty assessment in the field citation shall be final. Such hearing shall not be subject to section 554 or 556 of title 5 of the United States Code, but shall provide a reasonable opportunity to be heard and to present evidence. Payment of a civil penalty required by a field citation shall not be a defense to further enforcement by the United States or a State to correct a violation, nor shall it be a defense to liability for payment of the statutory maximum penalty pursuant to other authorities in the Act, if the violation continues.

"(4) Any person against whom a civil penalty is assessed under paragraph (3) of this subsection or to whom an administrative penalty order is issued under paragraph (1) of this subsection may seek review of such assessment or order in the United States District Court for the District of Columbia, or for the district in which the violation is alleged to have occurred, in which such person resides, or where such person's principal place of business is located, by filing in such court within thirty days following the date the administrative penalty order becomes final under paragraph (2), the assessment becomes final under paragraph (3), or a final decision following a hearing under paragraph (3) is rendered, and by simultaneously sending a copy of the filing by certified mail to the Administrator and the Attorney General. The Administrator shall promptly file in such court a certified copy, or certified index, as appropriate, of the record on which the administrative penalty order or assessment was issued within thirty days. Such court shall not set aside or remand such order or assessment unless there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or unless the order or penalty assessment constitutes an abuse of discretion. Such order or penalty assessment shall not be subject to review by any court except as provided in this paragraph. In any such proceedings, the United States may seek to recover civil penalties assessed under this section.

"(5) If any person fails to pay an assessment of a civil penalty or fails to comply with an administrative penalty order—

"(A) after the order or assessment has become final, or

"(B) after a court in an action brought under paragraph (4) has entered a final judgment in favor of the Administrator,

the Administrator shall request the Attorney General to bring a civil action in an appropriate district court to enforce the order or to recover the amount ordered or assessed (plus interest at rates established pursuant to section 6621(a)(2) of title 26, United States Code, from the date of the final order or decision or the date of the final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such order or assessment shall not be subject to review. Any person who fails to pay on a timely basis a civil penalty ordered or assessed under this section shall be required to pay, in addition to such penalty and interest, the United States' enforcement expenses, including but not limited to attorneys fees and costs incurred by the United States for collection proceedings,

and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 per centum of the aggregate amount of such person's outstanding penalties and nonpayment penalties accrued as of the beginning of such quarter.".

(j) Current section 113(e) of the Clean Air Act is deleted in its entirety and replaced with the following new sections 113(e) and 113(f):

"(e) PENALTY ASSESSMENT CRITERIA.—(1) In determining the amount of any penalty to be assessed under this section or section 304(a), the court shall take into consideration (in addition to such other factors as justice may require) the size of the business, the economic impact of the penalty on the business, the violator's full compliance history and good faith efforts to comply, the duration of the violation as established by credible evidence (including evidence other than the applicable test method), payment by the violator of penalties previously assessed for the same violation, the economic benefit of noncompliance, and the seriousness of the violation. The court shall not assess penalties for noncompliance with administrative subpoenas under section 307(a), or actions under section 114 of this Act, where the violator had sufficient cause to violate or fail or refuse to comply with such subpoena or action.

"(2) A penalty may be assessed for each day of each violation. For purposes of determining the number of days of violation for which a penalty may be assessed under subsection (b) or (d)(1) of this section, or section 304(a), or an assessment may be made under section 120, where the Administrator or an air pollution control agency has notified the source of the violation, and the plaintiff makes a prima facie showing that the conduct or events giving rise to the violation are likely to have continued or recurred past the date of notice, the days of violation shall be presumed to include the date of such notice and each and every day thereafter until the violator establishes that continuous compliance has been achieved, except to the extent that the violator proves by a preponderance of the evidence that there were intervening days during which no violation occurred or that the violation was not continuing in nature.

"(f) MONETARY AWARDS.—The Administrator may pay an award, not to exceed $10,000, to any person who furnishes information or services which lead to a criminal conviction or a civil judicial or administrative judgment of liability for any violation of this Act enforced under this section. Any officer or employee of the United States or any State or local government who furnishes information or renders service in performance of an official duty is ineligible for payment under this subsection. An authorized contractor acting as a representative of the Administrator shall be considered an employee of the United States for purposes of this subsection. The Administrator may, by regulation, prescribe additional criteria for eligibility for such an award.".

COMPLIANCE CERTIFICATION

SEC. 602. (a) Section 114(a)(1) of the Clean Air Act is amended by—

(1) inserting ", on a one-time, periodic or continuous basis" immediately before "to (A) establish and maintain";

(2) inserting ", audit procedures," immediately before "or methods, (D)";

(3) inserting "procedures or" immediately before "methods, at such locations,";

(4) inserting "during such continuous periods" immediately before ", and in such manner as the Administrator";

(5) striking "and" immediately before subparagraph (E); and

(6) redesignating subparagraph (E) as (G) and inserting the following new subparagraphs: "(E) keep periodic or continuous records on control equipment parameters, production variables or other indirect data when direct monitoring of emissions is impractical, (F) submit compliance certifications in accordance with section 114(a)(3); and".

(b) Section 114(a) is amended by adding the following new paragraph:

"(3) The Administrator shall in the case of any person which is the owner or operator of a major stationary source, and may, in the case of any other person, require enhanced monitoring and submission of compliance certifications. Compliance certifications shall include (i) identification of the applicable requirement that is the basis of the certification, (ii) the method used for determining the compliance status of the source, (iii) the compliance status, (iv) whether compliance is continuous or intermittent, (v) such other facts as the Administrator may require. Compliance certifications and monitoring data shall be public information. Submission of a compliance certification shall in no way limit the Administrator's authorities to investigate or otherwise implement the Act.".

(c) Section 307(b)(1) is amended by inserting "or revising regulations for enhanced monitoring and compliance certification programs under section 114(a)(3) of this Act," immediately before "or any other final action of the Administrator".

CONTRACTOR INSPECTIONS

SEC. 603. (a) Section 114(a)(2) of the Clean Air Act is amended by inserting "(including an authorized contractor acting as a representative of the Administrator)," immediately before "upon presentation of his credentials".

(b) Section 114(c) is amended by striking ", except that such record," and all that follows in the subsection and inserting ". Any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) shall be considered an employee of the United States for purposes of the provisions of section 1905 of title 18. Nothing in this subsection shall prohibit the Administrator or an authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports or information to other officers, employees or authorized representatives of the United States (including any authorized contractor acting as a representative of the Administrator), or to any State concerned with carrying out this Act, or when relevant in any proceeding under this Act.".

ADMINISTRATIVE ENFORCEMENT SUBPOENAS

SEC. 604. Section 307 of the Clean Air Act is amended by redesignating subsection (a)(1) as subsection (a), and, in that newly designated subsection, striking "or" before "section 202(b)(5)" and inserting "any investigation, monitoring, reporting requirement, entry, compliance inspection, or administrative enforcement proceeding under the Act (including but not limited to section 113, section 114, section 120, section 129, section 167, section 205, section 206, section 208, section 303 or section 306)," immediately after "section 202(b)(4) or 211(c)(3)".

EMERGENCY ORDERS

SEC. 605. (a) Section 303(a) of the Clean Air Act is amended by—

(1) striking "the health of persons, and that appropriate State or local authorities have not acted to abate such sources" and inserting "public health or welfare, or the environment";

(2) revising the second sentence to read, "If it is not practicable to assure prompt protection of public health or welfare or the environment by commencement of such a civil action, the Administrator may issue such orders as may be necessary to protect public health or welfare or the environment.";

(3) striking the last three sentences in their entirety; and

(4) inserting the following at the end of the subsection: "Prior to taking action under this section, the Administrator shall consult with appropriate State and local authorities and attempt to confirm the accuracy of the information on which the action proposed to be taken is based. Any order issued by the Administrator under this section shall be effective upon issuance and shall remain in effect for a period of not more than sixty days, unless the Administrator brings an action pursuant to the first sentence of this section before the expiration of that period. Whenever the Administrator brings such an action within the sixty-day period, such order shall remain in effect for an additional fourteen days or for such longer period as may be authorized by the court in which such action is brought.".

(b) section 303(b) of the Clean Air Act is amended by—

(1) striking "willfully" immediately after "Any person who" and inserting in lieu thereof "without sufficient cause";

(2) striking "$5,000" and inserting in lieu thereof "$25,000"; and

(3) inserting immediately before the period at the end of the sentence the following: ", be subject to imprisonment for not more than one year, or both".

CONTRACTOR LISTINGS

SEC. 606. Section 306(a) of the Clean Air Act is amended by—

(a) striking "(1)" after "section 113(c)"; and

(b) inserting at the end thereof: "For convictions arising under section 113(c)(4), the condition giving rise to the conviction also shall be considered to include any substantive violation of this Act associated with the violation of 113(c)(4). The Administrator may extend this prohibition to other facilities owned or operated by the convicted person.".

JUDICIAL REVIEW PENDING RECONSIDERATION OF REGULATION

SEC. 607. Section 307(b)(1) of the Clean Air Act is amended by adding at the end thereof the following: "A petition for reconsideration by the Administrator of any otherwise final agency action shall not render the action nonfinal for purposes of judicial review nor extend the time within which a petition for review may be filed, and shall not postpone the effectiveness of the agency action.".

CITIZEN SUITS AND PETITIONS

SEC. 608. (a) CIVIL PENALTIES.—(1) Section 304(a) of the Clean Air Act is amended by inserting immediately before the period at the end thereof: ", and to apply any appropriate civil penalties (except for actions under paragraph (a)(2)), including those pursuant to a consent judgment, payable to

the special fund as established in subsection (g), taking into account the factors listed in section 113(e)".

(2) Section 304(a) of the Clean Air Act is amended by adding the following new subsection:

"(g) PENALTY FUND.—Penalties received under subsection (a) shall be deposited in a special fund in the United States Treasury for licensing and other services, which shall be available for appropriation, and remain available until expended for use by the Environmental Protection Agency to finance air compliance and enforcement activities.".

(3) Paragraph (2) of subsection 304(c) of the Clean Air Act is amended to read as follows:

"(2) In any action under this section, the Administrator, if not a party, may intervene as a matter of right at any time in the proceeding. A judgment in an action under this section to which the United States is not a party shall not, however, have any binding effect upon the United States.".

(b) UNREASONABLE DELAY AND NATURE OF VIOLATION.—Section 304(a) of the Clean Air Act, as amended by subsection (a), is further amended by—

(1) inserting "to have violated or" immediately preceding "to be in violation of" in paragraph (1);

(2) amending paragraph (2) to read as follows:

"(2) against the Administrator where there is alleged a failure to perform any act or duty under this Act which is not discretionary with the Administrator, including failures to act that violate one or more of the standards set forth in section 307(d)(9), or that violate the duty to object to issuance of a permit as set forth in section 354(b), or that constitute unreasonable delay, provided however that a failure to act does not include a written decision not to take action which the Administrator designates, within such decision, as a final action within the meaning of section 307(b)(1); or";

(3) inserting immediately before the period at the end of paragraph (3) the following: ", or of any condition of a temporary operating permit issued under section 112 or other permit issued under part B of title III.";

(4) inserting after "to perform such act or duty," the following: "or to compel agency action unreasonably delayed,"; and

(5) adding at the end thereof the following: "Where a provision of the Act mandates that the Administrator shall take specified action when certain preconditions are met, the court's power to compel the specified action under paragraph (2) shall not depend in any manner upon whether the Administrator has published in the Federal Register a proposed final determination that the threshold preconditions are met.".

(c) NOTICE TO THE GOVERNMENT.—Section 304(c) is amended by adding the following new paragraph:

"(3) Whenever any action is brought under this section the plaintiff shall serve a copy of the complaint on the Attorney General of the United States and on the Administrator. No consent judgment shall be entered in an action brought under this section in which the United States is not a party prior to forty-five days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator, during which time the government may submit its comments on the proposed consent judgment to the court and parties or may intervene as a matter of right.".

(d) DEFERRED ACTIONS.—Section 307(b) of the Clean Air Act is amended by adding the following at the end thereof:

"(3) Where a final decision by the Administrator undertakes to perform an action, but defers such performance to a later time, any interested person may bring an action at any time under section 304(a)(2) to compel such performance.".

(e) PETITIONS.—Section 307 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(h) PETITIONS.—(1) Any interested person shall have the right to petition the Administrator to issue, amend, reconsider, or repeal any regulation or order issued under the authority of this Act, unless such right is expressly limited by any other provision of this Act.

"(2) To the maximum extent practicable, within six months after receiving a petition, the Administrator shall publish in the Federal Register a finding as to whether the petition presents substantial information indicating that the petition has merit. In the event the petition is found not to present such information, the Administrator shall deny it and publish notice of such denial with notice of the finding required by the preceding sentence.

"(3) In the event the Administrator finds that the petition presents substantial information indicating that it has merit, the Administrator shall immediately undertake a review of the regulation or order that is the subject of the petition, and shall either grant or deny such petition within twelve months of the date of the Federal Register finding, except that in the case of a petition for reconsideration under section 307(d)(7)(B), the Administrator shall grant or deny the petition not later than twelve months after receiving such petition. In any case in which the Administrator grants a petition, the Administrator shall take final action in response to any such petition within a reasonable time.".

ENHANCED IMPLEMENTATION AND ENFORCEMENT OF NEW SOURCE REVIEW REQUIREMENTS

SEC. 609. Section 167 of the Clean Air Act is amended by—

(a) striking "the construction of a major emitting facility" and inserting in lieu thereof "the operation, construction, or modification of a major emitting facility"; and

(b) inserting at the end thereof the following: "Any order issued under this section shall be effective upon issuance and shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. Such hearing shall not be subject to section 554 or 556 of title 5 of the United States Code, but shall provide a reasonable opportunity to be heard and to present evidence. In connection with any proceeding under this section, the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.".

MOVEABLE STATIONARY SOURCES

SEC. 610. Section 302 of the Clean Air Act is amended by adding the following subsection:

"(q) STATIONARY SOURCE.—The term 'stationary source' means generally any source of an air pollutant except those emissions resulting directly from an internal combustion engine for transportation purposes.".

ECONOMIC IMPACT ANALYSES

SEC. 611. Section 312 of the Clean Air Act is amended to read as follows:

"ECONOMIC IMPACT ANALYSES.

"SEC. 312. (a) The Administrator, in consultation with the Secretary of Commerce, the Secretary of Labor, and the Council on Clean Air Compliance Analysis (as established under subsection (f) of this section), shall conduct a comprehensive analysis of the impact of the Act on the public health, economy, and environment of the United States. In performing such analysis, the Administrator should consider the costs, benefits and other effects associated with compliance with each standard issued for—

"(1) a criteria air pollutant subject to a standard issued under section 109;

"(2) a hazardous air pollutant listed under section 112, including any technology-based standard and any risk-based standard for such pollutant;

"(3) emissions from mobile sources regulated under title II of this Act;

"(4) a limitation under title IV of this Act for emissions of sulfur dioxide or nitrogen oxides;

"(5) a limitation under title V of this Act on the production of any ozone-depleting substance; and

"(6) any other section of this Act.

"(b) In describing the benefits of a standard described in subsection (a), the Administrator shall consider all of the economic, public health, and environmental benefits of efforts to comply with such standard. In any case where numerical values are assigned to such benefits, a default assumption of zero value shall not be assigned to such benefits unless supported by specific data. The Environmental Protection Agency should be required to assess how benefits are measured in order to assure that damage to human health and the environment are more accurately measured and taken into account.

"(c) In describing the costs of a standard described in subsection (a), the Administrator shall consider the effects of such standard on employment, productivity, cost of living, economic growth, and the overall economy of the United States.

"(d)(1) Not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator, in consultation with the Secretary of Commerce, the Secretary of Labor, and the Council on Clean Air Compliance Analysis, shall submit a report to the Congress that summarizes the results of the analysis described in subsection (a), which reports—

"(A) all costs incurred previous to the date of enactment of the Clean Air Act Amendments of 1990 in the effort to comply with such standards; and

"(B) all benefits that have accrued to the United States as a result of such expenditures.

"(e) Not later than twenty-four months after the date of enactment of the Clean Air Act Amendments of 1990, and every twenty-four months thereafter, the Administrator, in consultation with the Secretary of Commerce, the Secretary of Labor, and the Council on Clean Air Compliance Analysis, shall submit a report to the Congress that updates the report issued pursuant to subsection (d), and which in addition makes projections into the future regarding expected costs, benefits, and other effects of compliance with standards pursuant to this Act as listed in subsection (a).

"(f) Not later than six months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator, in consultation with the Secretary of Commerce and the Secretary of Labor, shall appoint an Advisory Council on Clean Air Compliance Analysis of not less than nine members (hereafter in this section referred to as the 'Council'.) In appointing such members, the Administrator shall appoint recognized experts in the fields of the health and environmental effects of air pollution, economic analysis, environmental sciences, and such other fields that the Administrator determines to be appropriate.

"(g) The Council shall—

"(1) review the data to be used for any analysis required under this section and make recommendations to the Administrator on the use of such data;

"(2) review the methodology used to analyze such data and make recommendations to the Administrator on the use of such methodology; and

"(3) prior to the issuance of a report required under subsection (d) or (e), review the findings of such report, and make recommendations to the Administrator concerning the validity and utility of such findings.".

AUTHORIZATIONS

SEC. 612. Title III of the Clean Air Act is amended by adding at the end thereof the following new section:

"(c)(1) There are authorized to be appropriated $120,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to make grants to the States pursuant to section 105. In addition there are authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1991, 1992, and 1993 to make grants to the States to prepare implementation plans as required by subpart 2, 3, or 4 of part D.

"(2) There are authorized to be appropriated $120,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to carry out the research and development activities authorized by sections 103 and 104 and other sections of this Act.

"(3) In addition to the sums authorized by paragraphs (1) and (2) there are authorized to be appropriated $250,000,000 for each of the fiscal years ending September 30, 1991, 1992, 1993, 1994, and 1995 to carry out the activities authorized under this Act.".

ASBESTOS IN SCHOOLS

SEC. 613. (a) Section 203(d) of title II of the Toxic Substances Control Act is amended by adding the following new paragraph at the end thereof:

"(7) EPA INFORMATION OR ADVISORY.—The Administrator shall, not later than thirty days after enactment of this paragraph, publish and distribute to all local education agencies and State governors information or an advisory to—

"(A) facilitate public understanding of the relative risks associated with in-place asbestos-containing building materials;

"(B) promote the least burdensome response actions;

"(C) describe the limited circumstances in which asbestos removal is necessary to protect human health; and

"(D) describe the relative risks associated with removal of asbestos-containing building materials.

Such information or advisory shall be based on the best available scientific evidence and shall be revised, republished and redistributed as appropriate, to reflect new scientific findings.".

(b) Title II of the Toxic Substances Control Act is amended by adding the following new section at the end thereof:

"ASBESTOS HEALTH EFFECTS STUDY

"SEC. 216. The Administrator in conjunction with the Health Effects Institute shall conduct a study to identify, characterize, and quantify risks to human health from exposure to each form of asbestos, including but not limited to the health effects of serpentine and amphibole fibers, and report to Congress within twenty-four months after enactment of this section. Not later than ninety days after completion and submission of such study, the Administrator shall report to Congress with recommendations for modifications or changes, if any, to statutory or regulatory requirements under this Act. Such recommendations shall be based on the findings of the study prepared under this section and such other information as the Administrator deems appropriate.".

SAVINGS PROVISIONS AND EFFECTIVE DATES

SEC. 614. (a) Except as otherwise expressly provided in this Act, no suit, action, or other proceeding lawfully commenced by the Administrator or any other officer or employee of the United States in his official capacity or in relation to the discharge of his official duties under the Clean Air Act, as in effect immediately prior to the date of enactment of this Act, shall abate by reason of the taking effect of the amendments made by this Act.

(b) All rules, regulations, standards, orders, deteminations, contracts, certifications, authorizations, delegations, notices, guidance, or other actions duly promulgated, issued, made, or taken by the Administrator pursuant to the Clean Air Act as in effect immediately prior to the date of enactment of this Act, and not suspended by the Administrator or the courts, shall continue in full force and effect after the date of enactment of this Act until modified or rescinded in accordance with the Clean Air Act as amended by this Act.

(c)(1) Except as otherwise expressly provided, the amendments made by this Act shall be effective on the date of enactment of this Act.

(2) The Administrator's authority to assess civil penalties under section 205(c) of the Clean Air Act, as amended by this Act, shall apply to violations that occur or continue on or after the date of enactment of this Act. Civil penalties for violations that occur prior to such date and do not continue after such date shall be assessed in accordance with the provisions of the Clean Air Act in effect immediately prior to the date of enactment of this Act.

(3) The civil penalties prescribed under sections 205(a) and 211(d)(1) of the Clean Air Act, as amended by this Act, shall apply to violations that occur on or after the date of enactment of this Act. Violations that occur prior to such date shall be subject to the civil penalty provisions prescribed in sections 205(a) and 211(d) of the Clean Air Act in effect immediately prior to the date of enactment of this Act. The injunctive authority prescribed under section 211(d)(2) of the Clean Air Act, as amended by this Act, shall apply to violations that occur or continue on or after the date of enactment of this Act.

(4) For purposes of paragraphs (2) and (3), where the date of a violation cannot be determined it will be assumed to be the date on which the violation is discovered.

TITLE VII—STRATOSPHERIC OZONE AND GLOBAL CLIMATE PROTECTION

SUBPART B REPEAL

SEC. 701. Part B of the Clean Air Act entitled "Ozone Protection", sections 150 through 159, is hereby repealed.

STRATOSPHERIC OZONE AND GLOBAL CLIMATE PROTECTION

SEC. 702. The Clean Air Act is amended by adding the following new title:

"TITLE V—STRATOSPHERIC OZONE AND GLOBAL CLIMATE PROTECTION

"FINDINGS

"SEC. 501. The Congress finds that—

"(1) the best available scientific evidence shows that manufactured substances, including chlorofluorocarbons and other substances covered by this title, are destroying stratospheric ozone, and significantly contributing to global climate change by enhancing the greenhouse effect and causing other atmospheric modifications;

"(2) no level of stratospheric ozone depletion or global climate change caused by human activities can be deemed safe;

"(3) stratospheric ozone depletion will lead to increased incidence of solar ultraviolet radiation in the troposphere and at the surface of the Earth;

"(4) increased incidence of solar ultraviolet radiation will cause increased rates of disease in humans (including increased rates of skin cancer, cataracts, and, potentially, suppression of the immune system), threaten food crops and marine resources, and otherwise damage the natural environment;

"(5) the Ozone Trends Report completed in March 1988 through the effort of over one hundred international scientists found undisputed observational evidence that the atmospheric concentrations of source gases important in controlling stratospheric ozone levels and aggravating the problem of uncontrolled global climate change (chlorofluorocarbons, halons, methane, nitrous oxide, and carbon dioxide) are increasing on a global scale as a result of human activities;

"(6) scientific expeditions and analyses have established that chlorine compounds derived from emissions of chlorofluorocarbons are responsible for destruction of the stratospheric ozone layer over the Antarctic and the surrounding oceans;

"(7) recent scientific reports indicate that a similar destruction of the ozone layer may occur over the Arctic region and that the same chlorine compounds found in the Antarctic region are present in areas of the Arctic ozone layer;

"(8) experimental laboratory studies and measurements of ozone depletion suggest that the chemical reactions responsible for destruction of ozone over Antarctica could operate in the aerosol layer of the stratosphere and would not be limited to the polar regions;

"(9) the Montreal Protocol on Substances That Deplete the Ozone Layer (the Montreal Protocol) provides a framework for all nations of the world to protect the Earth's ozone shield;

"(10) the control measures that are set forth in the Montreal Protocol (a freeze on the consumption of certain chlorofluorocarbons at 1986 levels in 1989 followed by a 20 per centum reduction in 1993 and an additional 30 per centum reduction in 1998, coupled with a freeze on the consumption of certain halons at 1986 levels in 1992) will allow atmospheric concentrations of chlorine to increase by at least a factor of two to three;

"(11) because of the worldwide recognition of the need to reduce significantly the use of ozone-depleting chemicals, United States chemical producers and chlorofluorocarbon and halon user industries should be encouraged to develop improved chemicals, products, and technologies that do not rely on chlorofluorocarbons and halons;

"(12) the Ozone Trends Report and other recent scientific studies have raised serious questions about the adequacy of the control measures that are set forth in the Montreal Protocol;

"(13) ozone depleting chlorofluorocarbons are also powerful greenhouse gases projected to be responsible for 15 to 25 per centum of global warming and, under the existing Montreal Protocol, 10 per centum of future warming;

"(14) stratospheric ozone depletion and global climate change from continued emissions of chlorofluorocarbons and other halogenated chlorine containing halocarbons with ozone depleting potential, and emissions of other gases, such as methane and carbon dioxide, imperil human health and the environment worldwide;

"(15) in order to stabilize and eventually reduce concentrations of chlorine and bromine in the stratosphere, to conserve the stratospheric ozone layer (an exhaustible natural resource), and to reduce the extent of global climate change—

"(A) emissions of chlorofluorocarbons and other substances covered by this title, including partially halogenated chlorine containing halocarbons with ozone depleting potential, should be terminated rapidly;

"(B) it is necessary to control international trade in substances covered by this title and products containing such substances; and

"(C) emissions of other gases, such as methane and carbon dioxide, should be controlled;

"(16) the highest priority must be given to developing and deploying safe and energy efficient products and technologies as substitutes for ozone depleting substances as rapidly as possible; and

"(17) the United States needs to develop and deploy safe, energy efficient substitutes to replace ozone depleting substances in order to demonstrate to the world its commitment to protect the stratosphere and to limit global climate change.

"OBJECTIVES AND NATIONAL GOAL

"SEC. 502. (a) The objectives of this title are to restore and maintain the chemical and physical integrity of the Earth's atmosphere, to protect human health and the global environment from all known and potential dangers due to atmospheric or climatic modification, including stratospheric ozone depletion, to provide for a smooth transition from the use of ozone-depleting chemicals to the use of safe chemicals, products, and technologies that do not threaten the ozone layer, and to reduce the generation of greenhouse gases in order to protect the Earth's ozone layer and to limit anthropogenically induced global climate changes by—

"(1) reducing significantly the production and emission into the atmosphere of pollutants caused by human activities;

"(2) promoting the rapid development and deployment of energy efficient alternatives to the use of chlorofluorocarbons and other substances covered by this title;

"(3) assuring that such alternatives reduce ozone depleting potential to the maximum extent possible and, at the same time, do not exacerbate the problem of human induced global climate change either directly as radiatively important trace gases or indirectly as substances that reduce the energy efficiency of products which incorporate or use such substances; and

"(4) promoting additional scientific research on atmospheric or climatic modification, including stratospheric ozone depletion, and on the known and potential adverse effects therefrom on human health and the global environment.

"(b) In order to achieve the objectives of this title, it is the national goal to eliminate atmospheric emissions of manufactured substances with ozone depleting potential as well as direct and indirect global warming potential, including chlorofluorocarbons and other halogenated chlorine or bromine containing halocarbons with ozone depleting and global warming potential, to reduce to the maximum extent possible emissions of other gases caused by human activities that are likely to affect adversely the global climate, and to provide for an orderly and equitable shift to alternative, safe chemicals, products, and technologies.

"DEFINITIONS

"SEC. 503. As used in this title, the term—

"(1) 'Administrator' means the Administrator of the Environmental Protection Agency;

"(2) 'household appliances' means noncommercial personal effects manufactured prior to January 1, 2015, including air-conditioners, refrigerators, and motor vehicles;

"(3) 'import' means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States;

"(4) 'manufactured substances' means any organic or inorganic chemical substances of a particular molecular identity, or any mixture, that has been manufactured for commercial purposes;

"(5) 'medical purposes' means medical devices and diagnostic products (including drugs, as defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321)) and drug delivery systems (A) for which no safe and effective substitute has been developed and, where necessary, approved by the Commissioner of the Food and Drug Administration (the Commissioner) and (B) which, after notice and opportunity for public comment, has been approved and determined to be essential by the Commissioner in consultation with the Administrator;

"(6) 'person' means an individual, corporation (including a government corporation), partnership, firm, joint stock company, trust, association, or any other entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof (including any interstate body), or of any foreign government (including any international instrumentality);

"(7) 'to produce' means to manufacture a substance from any raw material or feedstock chemical but does not include the manufacture of substances that are used and entirely consumed in the manufacture of other chemicals; and

"(8) 'substances covered by this title' means those substances which are known or may reasonably be anticipated to cause or contribute to atmospheric or climatic modification, including stratospheric ozone depletion, and are listed under subsections (a) or (b) of section 504 of this title.

"PART A—CONTROL OF CHLOROFLUOROCARBONS AND OTHER MANUFACTURED SUBSTANCES

"LISTING OF REGULATED SUBSTANCES

"SEC. 504. (a) PRIORITY LIST AND INITIAL LISTS OF SUBSTANCES TO BE PHASED-OUT.—Within sixty days after enactment of this title, the Administrator shall publish a priority list of manufactured substances which are known or may reasonably be anticipated to cause or contribute significantly to atmospheric or climatic modification, including stratospheric ozone depletion. The initial list shall include all fully halogenated chlorine or bromine containing halocarbons, including chlorofluorocarbon-11, chlorofluorocarbon-12, chlorofluorocarbon-113, chlorofluorocarbon-114, chlorofluorocarbon-115, carbon tetrachloride, halon-1211, halon-1301, and halon-2402.

"(b) OTHER REGULATED SUBSTANCES.—Simultaneously with publication of the priority list, the Administrator shall create a list of other manufactured substances which, in the judgment of the Administrator, are known or may reasonably be anticipated to cause or contribute to atmospheric or climatic modification, including stratospheric ozone depletion. The list of other substances shall be subject to monitoring and the limitations on production and use under section 508 of this title and shall include all partially halogenated chlorine containing halocarbons not listed under subsection (a), including hydrochlorofluorocarbon-22, hydrochlorofluorocarbon-123, hydrochlorofluorocarbon-124, hydrochlorofluorocarbon-141(b), hydrochlorofluorocarbon-142(b), and methyl chloroform. At least annually thereafter, the Administrator shall publish a proposal to add to the priority list under subsection (a) or the list under this subsection other manufactured substances which, in the judgment of the Administrator, meet the criteria set forth in the first sentence of subsection (a) or this section and warrant listing under subsection (a) or under this subsection. Within one hundred and eighty days of any such proposal, after allowing an opportunity for public comment, the Administrator shall promulgate a regulation adding each such substance to the appropriate list, unless the Administrator determines that such substance clearly does not meet the criteria set forth in the first sentence of subsection (a) or this subsection.

"(c) OZONE DEPLETION POTENTIAL, GLOBAL WARMING POTENTIAL, AND ATMOSPHERIC LIFETIME.—Simultaneously with publication of the lists or additions thereto under this section, and at least annually thereafter, the Administrator shall assign to each listed substance numerical values representing the ozone depletion potential of such substance, on a mass (per kilogram) basis, as compared with chlorofluorocarbon-11, the chlorine or bromine contribution of such substance, the global warming potential of such substance, and the atmospheric lifetime of such substance. Unless the Administrator promulgates regulations under this subsection setting forth a different value, the following ozone depletion factors shall apply for the following listed substances:

"Substance	Ozone depletion factor
chlorofluorocarbon-11	1.0
chlorofluorocarbon-12	1.0
hydrochlorofluorocarbon-22	0.05
chlorofluorocarbon-113	0.8
chlorofluorocarbon-114	1.0

"Substance	Ozone depletion factor
chlorofluorocarbon-115	0.6
hydrochlorofluorocarbon-123	0.02
hydrochlorofluorocarbon-124	0.02
hydrochlorofluorocarbon-141(b)	0.1
hydrochlorofluorocarbon-142(b)	0.06
carbon tetrachloride	1.06
methyl chloroform	0.15
halon-1211	3.0
halon-1301	10.0
halon-2402	6.0

"REPORTING REQUIREMENTS

"SEC. 505. (a) PRIORITY LIST.—Unless such information has previously been reported to the Administrator, within ninety days after enactment of this title, each person producing or importing a substance listed pursuant to subsection (a) of section 504 shall file a report with the Administrator setting forth the amount of the substance that was produced or imported by such person during calendar year 1986. Not less than annually thereafter, each such person shall file a report with the Administrator setting forth the production and importation levels of such substance in each successive twelve-month period until such person ceases production or importation of the substance. Each such report shall be signed by a responsible corporate officer.

"(b) OTHER REGULATED SUBSTANCES.—Within ninety days of the date on which a substance is placed on the list under subsection (b) of section 504, each person producing or importing such substance shall file a report with the Administrator setting forth the amount of the substance that was produced or imported by such person during the twelve months preceding the date of listing. Not less than annually thereafter, each such person shall file a report with the Administrator setting forth the production or importation levels of such substance in each successive twelve-month period until such person ceases production or importation of the substance. Each such report shall be signed by a responsible corporate officer.

"PRODUCTION PHASE-OUT OF SUBSTANCES ON THE PRIORITY LIST

"SEC. 506. (a) NATIONAL POLICY.—The Congress hereby declares it to be the national policy of the United States that the production and use of substances listed under subsection (a) of section 504 are to be reduced and eliminated as expeditiously as possible.

"(b) ACCELERATED SCHEDULE.—The Administrator shall promulgate regulations, after notice and opportunity for public comment, which control and reduce production of—

"(1) a substance listed under subsection (a) of section 504 more rapidly than the schedule provided under this title; or

"(2) a substance listed under subsection (b) of section 504 on a specific schedule not otherwise provided for in this title;

if (A) the Administrator determines that such revised or specific schedule (i) based on the latest assessments of information regarding the harmful effects on the stratosphere or climate which may be associated with a listed substance, may be necessary to protect human health and the environment or (ii) based on the availability of substitutes for a listed substance, is attainable, or (B) the Montreal Protocol is modified to include a schedule to control and reduce production or consumption of any such substance more rapidly than the schedule set forth in subsection (c) of this section or in regulations promulgated in accordance with this subsection. Any person may petition the Administrator to issue such regulations. The Administrator shall issue such regulations within one hundred and eighty days after receipt of any such petition, unless the Administrator determines that such regulations are not necessary and denies the petition. No less often than every eighteen months, the Administrator shall, in response to a petition or otherwise, either publish such regulations or a determination that such regulations are not necessary.

"(c) SCHEDULE.—In the absence of regulations promulgated in accordance with subsection (b) establishing earlier dates—

"(1) effective July 1, 1989, it shall be unlawful for any person to produce substances listed under subsection (a) of section 504 in annual quantities greater than the combined ozone depletion weighted amount of such substances produced by such person during calendar year 1986;

"(2) effective July 1, 1993, it shall be unlawful for any person to produce substances listed under subsection (a) of section 504 in annual quantities greater than 80 per centum of the combined ozone depletion weighted amount of such substances produced by such person during calendar year 1986;

"(3) effective July 1, 1998, it shall be unlawful for any person to produce substances listed under subsection (a) of section 504 in annual quantities greater than 50 per centum of the combined ozone depletion weighted amount of such substances produced by such person during calendar year 1986; and

"(4) effective July 1, 2000, it shall be unlawful for any person to produce any quantity of a substance listed under subsection (a) of section 504 unless such person has, in accordance with subsection (d), received prior authorization to produce such substance.

"(d)(1) EXCEPTION FOR MEDICAL PURPOSES.—Notwithstanding the prohibition set forth in subsection (c)(4) or in regulations promulgated in accordance with subsection (b), the Administrator, after notice and opportunity for public comment, shall authorize the production or importation of limited quantities of a substance listed under subsection (a) of section 504 solely for medical purposes if such authorization is determined by the Commissioner of the Food and Drug Administration, in consultation with the Administrator, to be necessary for medical purposes.

"(2) EXCEPTION FOR AVIATION SAFETY.—Notwithstanding the prohibition set forth in subsection (c)(4) or in regulations promulgated in accordance with subsection (b), the Administrator, after notice and opportunity for public comment, may authorize the production or importation of limited quantities of halon-1211, halon-1301 and halon-2402 solely for purposes of aviation safety if the Administrator of the Federal Aviation Administration, in consultation with the Administrator, determines that no safe and effective substitute has been developed and that such authorization is necessary for aviation safety purposes.

"(3) EXCEPTION FOR EXPORT TO DEVELOPING COUNTRIES.—Notwithstanding the prohibition set forth in subsection (c)(4) or in regulations promulgated in accordance with subsection (b), the Administrator, after notice and opportunity for public comment, may authorize the production of limited quantities of a substance listed under subsection (a) of section 504 solely for export to and use in developing countries that are parties to the Montreal Protocol on Substances that Deplete the Ozone Layer and are operating under Article 5 of such Protocol. Any production authorized under this paragraph shall be solely for purposes of satisfying the basic domestic needs of such countries.

"(4) CAP ON EXCEPTIONS.—Under no circumstances may the authority set forth in paragraphs (1), (2), and (3) of this subsection be applied to authorize any person to produce a substance listed under subsection (a) of section 504 in annual quantities greater than 10 per centum of that produced by such person during calendar year 1986.

"(e) IMPORTATION.—Any person who imports a substance covered by this title shall, for the purposes of this section and section 508 (control of other regulated substances), be deemed to have produced an equivalent amount of such substance on the date of such importation.

"PRODUCTION PHASE-OUT EXCEPTION FOR NATIONAL SECURITY

"SEC. 507. The President may issue such orders regarding production and use of chlorofluorocarbon-114, halon-1211, halon-1301 and halon-2402, at any specified site or facility as may be necessary to protect the national security interests of the United States if the President finds that adequate substitutes are not available and that the production and use of such substance is necessary to protect such national security interests. Such orders may include, where necessary to protect such interests, an exemption from any requirement contained in this title. The President shall notify the Congress within thirty days of the issuance of an order under this paragraph providing for any such exemption. Such notification shall include a statement of the reasons for the granting of the exemption. An exemption under this paragraph shall be for a specified period which may not exceed one year. Additional exemptions may be granted, each upon the President's issuance of a new order under this paragraph. Each such additional exemption shall be for a specified period which may not exceed one year. No exemption shall be granted under this paragraph due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. For the purposes of this section, the phrase 'national security interests of the United States' shall be deemed to include domestic production of crude oil and natural gas energy supplies on the North Slope of Alaska.

"CONTROL OF OTHER REGULATED SUBSTANCES

"SEC. 508. (a) NATIONAL POLICY.—The Congress hereby declares it to be the policy of the United States that the production and use of ozone depleting substances listed under subsection (b) of section 504 are to be monitored closely and controlled in such a manner as to assure that the production and use of such substances will not—

"(1) increase the peak chlorine loading that is projected to occur with interim chloroflurocarbon emission controls followed by a year 2000 global phase-out of all halocarbon emissions (the base case);

"(2) reduce significantly the rate at which the atmospheric abundance of chlorine is projected to decrease under the base case; or

"(3) delay the date by which the average atmospheric concentration of chlorine is projected under the base case to return to a level of two parts per billion, the highest

concentration at which repair of the Antarctic ozone hole may be possible.

"(b) MONITORING GROWTH IN PRODUCTION AND USE.—The Administrator shall monitor and not less often than every three years following enactment of this title submit a report to Congress on the production and use of substances listed under subsection (b) of section 504. Such report shall include data on domestic production compiled under section 505 and an estimate of worldwide production and use of such substances.

"(c) MONITORING ATMOSPHERIC CONCENTRATIONS OF CHLORINE.—The Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration shall monitor and not less often than every three years following enactment of this title submit a report to Congress on the current average tropospheric concentration of chlorine. Such reports shall include, under the base case as well as on the basis of current international and domestic controls on substances covered by this title, updated projections of—

"(1) peak chlorine loading;

"(2) the rate at which the atmospheric abundance of chlorine is projected to decrease after the year 2000; and

"(3) the date by which the atmospheric abundance of chlorine is projected to return to a level of two parts per billion.

"(d)(1) PHASE-OUT SCHEDULE FOR METHYL CHLOROFORM.—In the absence of regulations promulgated in accordance with subsection (b) of section 506 establishing earlier dates—

"(A) effective on the date of enactment of this title, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than that produced by such person during calendar year 1989;

"(B) effective January 1, 1996, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than 50 per centum of that produced by such person during calendar year 1989; and

"(C) effective January 1, 2000, it shall be unlawful for any person to produce any quantity of methyl chloroform.

"(2) PHASE-OUT SCHEDULE FOR OTHER REGULATED SUBSTANCES.—Except as provided in paragraph (1) of this subsection or in regulations promulgated to establish earlier dates—

"(A) effective January 1, 2015, it shall be unlawful for any person to introduce into interstate commerce or use any substance listed under subsection (b) of section 504 unless such substance—

"(i) has been used, recovered, and recycled;

"(ii) is used and entirely consumed in the production of other chemicals, or

"(iii) is used to maintain and service household appliances or commercial refrigeration and air-conditioning units manufactured prior to January 1, 2015;

"(B) effective January 1, 2015, it shall be unlawful for any person to produce any substance listed under subsection (b) of section 504 in annual quantities greater than that produced by such person during calendar year 2014; and

"(C) effective January 1, 2030, it shall be unlawful for any person to produce any substance listed under subsection (b) of section 504.

"(e) TECHNOLOGY STATUS REPORT IN 2010.—The Administrator shall review, on a periodic basis, the progress being made in the development of alternative systems or products necessary to manufacture and operate household appliances and commercial refrigeration and air-conditioning units without substances listed under subsection (b) of section 504. If, in the Administrator's judgment, as a result of technological development problems, the development of such alternative systems or products will not occur within the time necessary to provide for the manufacture of such equipment without such substances prior to 2015, the Administrator shall, not later than January 1, 2010, so inform the Congress.

"(f) EMERGENCY REPORT.—If, in consultation with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, the Administrator determines that the production and use of substances listed under subsection (b) of section 504 is projected to contribute to an atmospheric chlorine loading in excess of the base case projections by more than five-tenths parts per billion, the Administrator shall so inform the Congress immediately. The determination referred to in the preceding sentence shall be (A) based upon worldwide production and use levels extrapolated from domestic production and use levels and the domestic share of the worldwide market; and (B) in accordance with subsection (c) of this section, updated not less often than every three years.

"NATIONAL RECYCLING AND DISPOSAL PROGRAM

"SEC. 509. (a) The Administrator shall, not later than July 1, 1991, promulgate regulations establishing standards and requirements regarding the use of substances covered by this title. Such standards and requirements shall become effective not later than twelve months after promulgation of the regulations. Such regulations shall include requirements that (1) reduce the use and emission of such substances to the lowest achievable level and (2) maximize the recapture and recycling of such substances. Such regulations may include requirements to use alternative substances (including substances which are not covered by this title) or to minimize use of substances covered by this title.

"(b) The Administrator shall promulgate regulations establishing standards and requirements controlling the production or use of any manufactured substance that may, either directly as a radiatively important trace gas or indirectly as a substance that reduces the energy efficiency of products which incorporate or use such substance, exacerbate the problems of human induced global climate change.

"(c) The Administrator shall, before January 1, 1994, promulgate regulations establishing standards and requirements for the safe disposal of substances covered by this title. Such regulations shall include requirements that—

"(1) substances covered by this title that are contained in bulk in appliances, machines or other goods (including but not limited to refrigerators and air-conditioners) shall be removed from each such appliance, machine or other good prior to the disposal of such items;

"(2) any appliance, machine or other good containing a substance covered by this title in bulk shall not be manufactured or distributed in commerce unless it is equipped with a servicing aperture or an equally effective design feature which will facilitate the recapture of such substance during service and repair or disposal of such item; and

"(3) any product in which a substance covered by this title is incorporated so as to constitute an inherent element of such product shall be disposed of in a manner that reduces, to the maximum extent practicable, the release of such substance into the environment. If the Administrator determines that the disposal of any product covered by paragraph (3) would result in producing only marginal environmental benefits, the Administrator shall include in such regulations an exception for such product.

"(d) Effective January 1, 1992, it shall be unlawful for any person in the course of maintaining, servicing, repairing, or disposing of a household appliance or a commercial refrigeration or air-conditioning unit to knowingly vent or otherwise knowingly release or dispose of any substance used as a refrigerant in such appliance or unit and covered by this title in a fashion which permits such substance to enter the environment. De minimis releases associated with good faith attempts to recapture and recycle or safely dispose of any substance covered by this title shall not be covered by the preceding sentence.

"MOTOR VEHICLE AIR-CONDITIONING

"SEC. 510. (a) CERTIFICATION OF EQUIPMENT.—Within one year after the date of enactment of this title, the Administrator shall issue regulations which provide that on or after January 1, 1992, no person shall perform service for consideration on a motor vehicle air-conditioning system, including maintenance and repair services, unless such person uses equipment which is certified as meeting the standards set by the Society of Automotive Engineers for the extraction and reclamation of a refrigerant from motor vehicle air-conditioning systems by—

"(A) the National Institute of Standards and Technology,

"(B) the Underwriters Laboratories, or

"(C) an entity which the Administrator determines to be comparable to the entities described in subparagraphs (A) or (B).

"(b) SCHEDULE FOR ACQUISITION AND USE OF EQUIPMENT AND DOCUMENTATION OF SUCH USE.—(1) Within one year after the date of enactment of this title, the Administrator shall issue regulations establishing a phased schedule of deadlines by which the equipment described in subsection (a) shall be acquired by entities that perform service for consideration on motor vehicle air-conditioning systems.

"(2) In establishing the schedule under paragraph (1), the Administrator shall—

"(A) set an earlier deadline for any entity that performs service on a high volume of motor vehicle air-conditioning systems, as determined by the Administrator, and

"(B) require all entities that perform service for consideration on motor vehicle air-conditioning systems to have such equipment operational and in use for any such service performed on or after January 1, 1992.

"(c) DOCUMENTATION REQUIREMENTS.—Within one year after the date of enactment of this title, the Administrator shall promulgate regulations which require entities described in subsection (b)(1) to document the following on a form provided by the Environmental Protection Agency—

"(A) the number of motor vehicle air-conditioning systems repaired or otherwise serviced by such entity;

"(B) the amount and type of substances covered by this title that are purchased by such entity; and

"(C) the amount and type of substances covered by this title that are sold by such entity.

"(d) RESTRICTIONS ON THE SALE OF LISTED SUBSTANCES.—Effective January 1, 1992, it

shall be unlawful for any person to sell or offer for sale to any person or entity (other than a person or entity performing service for consideration on motor vehicle air-conditioning systems in compliance with subsection (a) of this section) any substance covered by this title that is suitable for use as a refrigerant in a motor vehicle air-conditioning system and is in a container which contains less than twenty pounds of such refrigerant.

"(e) RESTRICTIONS ON THE SALE OF MOTOR VEHICLE AIR-CONDITIONING SYSTEMS THAT USE CHLOROFLUOROCARBONS.—(1) Within two years after enactment of this title, the Administrator shall issue regulations establishing standards and requirements to assure that a minimum percentage of the motor vehicles manufactured in the United States and imported into the United States that are equipped with passenger compartment air-conditioning systems are equipped with systems that are not dependent on chlorofluorocarbon-12 as a refrigerant (or any substitute refrigerant with a comparable ozone depletion factor). Such regulations shall provide that, beginning with model year 1994, not less than 25 per centum of such motor vehicles are so equipped and, beginning with model year 1996, not less than 50 per centum of such motor vehicles are so equipped.

"(2) If the Administrator determines that, as a result of technological development problems, the development of alternative systems or products necessary to equip motor vehicle passenger compartments with air-conditioning systems that are not dependent on chlorofluorocarbon-12 as a refrigerant (or any substitute refrigerant with a comparable ozone depletion factor) will not occur within the time necessary to provide for compliance with paragraph (1) of this subsection, the Administrator shall so inform the Congress and propose alternative effective dates for this subsection.

"(3) DEMONSTRATION PROGRAMS.—At the request of any State, the Administrator, in consultation with a manufacturer or distributor of a product that uses alternative substances to CFC-12, may establish programs to demonstrate the technical feasibility and consumer acceptance of such alternative products in order to assist in the implementation of this subsection.

"(f) DEFINITION.—As used in this section, the term 'motor vehicle' has the meaning given for such term under section 102 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391(3)).

"NONESSENTIAL CONSUMER PRODUCTS CONTAINING CHLOROFLUOROCARBONS

"SEC. 511. (a) Effective twelve months after the date of enactment of this title, it shall be unlawful for any person to sell or distribute, or offer for sale or distribution, nonessential products that release substances listed under subsection (a) of section 504 into the atmosphere during use, including chlorofluorocarbon-propelled plastic party streamers and noise horns, chlorofluorocarbon-containing cleaning fluids for noncommercial electronic and photographic equipment, and other consumer products determined by the Administrator to be nonessential. Nothing in this section shall apply to products used for medical purposes, as defined in section 503(5) of this Act.

"(b) Effective January 1, 1994, it shall be unlawful for any person to sell or distribute, or offer for sale or distribution—

"(1) any aerosol product or other pressurized dispenser (other than a medical devise or diagnostic product, including drugs, as defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321) or a drug delivery system) which contains a substance listed under subsection (b) of section 504; or

"(2) any plastic foam product (other than a foam insulation product) which contains or is manufactured with a substance listed under subsection (b) of section 504.

"CERTIFICATION OF EQUIVALENT PROGRAMS

"SEC. 512. (a) IMPORTS.—(1) Effective twelve months after the date on which a substance is placed on the priority list under subsection (a) of section 504, it shall be unlawful for any person to import such substance or any product containing such substance unless the Administrator, in consultation with the Secretary of State (the Secretary), has published a decision, after notice and opportunity for public comment, certifying that the nations in which such substance or product was manufactured and from which such substance or product is imported are parties to and in compliance with the Montreal Protocol on Substances that Deplete the Ozone Layer. Effective July 1, 2000, it shall be unlawful for any person to import a substance listed under subsection (a) of section 504 or any product containing such substance unless the Administrator, in consultation with the Secretary, has published a decision, after notice and opportunity for public comment, certifying that the nations in which such substance or product was manufactured and from which such substance or product is imported have established and are fully implementing programs that require reduced production of such listed substance, and limit production of other substances covered by this title, on a schedule and in a manner that is at least as stringent as the reduction schedule for, and limitations on, domestic production which apply under this title. The prohibition on the import of any product containing a substance listed under subsection (a) of section 504 shall include, after notice and opportunity for public comment, any product which the Administrator has reason to believe may contain or is designed to contain or use such substance. The Administrator's decision that a product contains or is designed to contain or use such substance shall constitute a rebuttable presumption.

"(2) The President may, after notice and opportunity for public comment, prohibit the importation of any product that has been (A) made with a subtance listed under subsection (a) of section 504 and (B) manufactured in or exported from a nation that has not been certified under this section. The authority to prohibit the importation of any product made with a subtance listed under subsection (a) of section 504 shall include the authority to prohibit the import of any product which the President has reason to believe may have been made with such a substance. The President's decision that a product was made with such a substance shall constitute a rebuttable presumption.

"(b) CERTIFICATION OF NATIONAL PROGRAM.—The Administrator shall not certify any national program under the second sentence of subsection (a) unless it is determined that—

"(1) the Nation has adopted legislation or regulations which give the reduction schedule for each listed substance the force of law; and

"(2) the legislation or regulations include reporting requirements and enforcement provisions no less stringent than those specified in sections 505 and 515 of this title, and that the information contained in such reports is available to the Administrator and the Secretary.

"(c) REVOCATION.—At least annually, the Administrator, in consultation with the Secretary, shall review each certification made under this section and shall revoke such certification, after notice and opportunity for public comment, unless it is determined that the applicable conditions of subsections (a) and (b) remain satisfied and that the reduction schedule for each listed substance is in fact being carried out in such nations. Any such revocation shall take effect one hundred and eighty days after notice of the revocation has been published.

"(d) INVESTMENT AND EXPORT.—(1) Immediately upon enactment of this section, the President shall prohibit—

"(A) the export of technologies used to produce a substance listed under subsection (a) of section 504; and

"(B) direct or indirect investments by any person in facilities designed for or capable of producing a substance listed under subsection (a) of section 504 in nations not certified under this section.

"(2) Not later than January 1, 1992, and every two years thereafter, the President shall, after notice and opportunity for public comment—

"(A) determine whether there exists, for each class of products containing a substance listed under subsection (a) of section 504 or manufactured with a process that uses such substance, substitute products or manufacturing processes that do not rely on the use of such substances; and

"(B) promulgate regulations for each class of products for which a positive determination has been made under subparagraph (A).

Such regulations shall prohibit direct or indirect investments by any person in facilities designed for or capable of—

"(i) using a substance listed under subsection (a) of section 504 in nations not certified under this section in quantities that will increase use of such substance in any such nation, or

"(ii) manufacturing products that require the use of a substance listed under subsection (a) of section 504 in nations not certified under this section in quantities that will increase use of such substance in any such nation.

"(e) FOREIGN AID.—The President shall direct that no agency of the government provide bilateral or multilateral subsidies, aids, credits, guarantees, or insurance programs, for the purpose of producing any substance listed under subsection (a) of section 504.

"(f) DEFINITION.—For purposes of this section, methyl chloroform shall be deemed to be a substance 'placed on the priority list under section 504' and a substance 'listed under subsection (a) of section 504'.

"LABELING

"SEC. 513. (a) Not later than January 1, 1992, and every two years thereafter, the Administrator shall, after notice and opportunity for public comment—

"(1) determine whether there exists, for each class of products containing a substance listed under subsection (a) of section 504 or manufactured with a process that uses such substance, substitute products or manufacturing processes that do not rely on the use of such substances; and

"(2) promulgate regulations for each class of products for which a positive determination has been made under paragraph (1). Such regulations shall prohibit the intro-

duction or reintroduction into interstate commerce of any product containing such substance or manufactured with a process that uses such substance ninety days after promulgation of such regulations unless such product bears a label stating either of the following as appropriate:

"(A) 'Warning: This product contains (insert name of listed substance) a substance which harms public health and the environment by destroying ozone in the upper atmosphere and by disrupting the climate'.

"(B) 'Warning: This product is manufactured with (insert name of listed substance) a substance which harms public health and the environment by destroying ozone in the upper atmosphere and by disrupting the climate'.

"(b) The Administrator shall, after notice and opportunity for public comment, promulgate labeling requirements determined by the Administrator to be appropriate for products containing a substance listed under subsection (b) of section 504 or manufactured with a process that uses such substance.

"SAFE ALTERNATIVES POLICY

"SEC. 514. (a) POLICY.—To the maximum extent practicable, substances covered by this title shall be replaced by chemicals, product substitutes, or alternative manufacturing processes that reduce overall risks to human health and the environment.

"(b) REVIEWS AND REPORTS.—The Administrator shall—

"(1) in consultation and coordination with interested members of the public and the heads of relevant Federal agencies and departments, recommend Federal research programs and other activities to assist in identifying alternatives to the use of substances covered by this title as refrigerants, solvents, fire retardants, foam blowing agents, and other commercial applications and in achieving a transition to such alternatives, and, where appropriate, seek to maximize the use of Federal research facilities and resources to assist users of substances covered by this title in identifying and developing alternatives to the use of such substances as refrigerants, solvents, fire retardants, foam blowing agents, and other commercial applications;

"(2) examine in consultation and coordination with the Secretary of Defense and the heads of other relevant Federal agencies and departments, including the General Services Administration, Federal procurement practices with respect to substances covered by this title and recommend measures to promote the transition by the Federal Government, as expeditiously as possible, to the use of safe substitutes;

"(3) specify initiatives, including appropriate intergovernmental, international, and commercial information and technology transfers, to promote the development and use of safe substitutes for substances covered by this title, including alternative chemicals, product substitutes, and alternative manufacturing processes; and

"(4) maintain a public clearinghouse of alternative chemicals, product substitutes and alternative manufacturing processes that are available for products and manufacturing processes which use chemicals covered under this title.

"(c) ADDITIONAL MEASURES.—Notwithstanding any other provision of law, the Administrator shall require that—

"(1) any person who produces a chemical substitute for substances covered by this title shall provide to the Administrator all published and unpublished health and safety studies on such chemical substitute; and

"(2) any person who produces a chemical substitute for substances covered by this title shall notify the Administrator of such person's intent to introduce such chemical substitute into commerce not less than sixty days prior to such introduction.

"(d) FEDERAL PROCUREMENT.—

"(1) APPLICATION OF SECTION.—Each Federal agency or department shall comply with the requirements set forth in this subsection and any regulations issued under this section, with respect to any purchase or acquisition of an item where the purchase price of such item exceeds $10,000 or where the quantity of such items or of functionally equivalent items purchased or acquired in the course of the preceding fiscal year was $10,000 or more.

"(2) Within twelve months of enactment of this section, the Administrator of the General Services Administration (GSA), in consultation with the Administrator, shall develop a strategic plan for the procurement of substances as substitutes for those listed pursuant to section 504 (a) and (b) of this title.

"(3) No later than thirty-six months after enactment of this section, each agency or department of the Federal Government shall conform its procurement regulations and specifications to the strategic plan promulgated by the Administrator of the GSA or, if the Administrator of the GSA has not met the requirements of paragraph (2), to the requirements set forth in this subsection.

"(4) REQUIREMENTS FOR STRATEGIC PLAN.—

"(A) GENERAL.—The strategic plan referred to in paragraph (3) shall provide for Federal Government-private sector cooperation in research, development, and deployment of non-ozone depleting technologies, processes, and chemical alternatives to the ozone depleting substances listed in section 504 (a) and (b). The plan shall provide greater regulatory certainty regarding alternatives to ozone-depleting substances by hastening the identification, development and deployment of alternative technologies with maximal environmental benefit. To ensure maximal environmental benefit, the strategic plan shall seek to maximize the use of alternative materials, process modifications, product redesign and substitution in order to minimize the use of materials and substances, including energy, which contribute to stratospheric ozone depletion, the creation of tropospheric ozone, global climate change, or which have been identified by an agency as a probable or known human carcinogen, or a known animal carcinogen.

"(B) SPECIFIC.—The strategic plan shall identify alternatives to categorical uses of substances listed in section 504 which meet the general criteria of subparagraph (A). The categorical uses, referenced in the preceding sentence shall be: air-conditioning and refrigeration, solvents, rigid and flexible foam, fire extinguishers and other miscellaneous uses. The plan shall also include a list of persons and firms known to manufacture, sell, or utilize such alternatives.

"(5) PROCUREMENT PROGRAM.—Within thirty-six months after enactment of this section each agency or department of the Federal Government shall have in place an affirmative procurement program which will assure that future purchases of items known to use or be manufactured with substances listed in section 504 will, to the maximum extent practicable, conform to the requirements of this subsection. Each such procurement program shall, at a minimum, contain—

"(A) a preference program for alternatives which maximize the environmental benefit to be obtained by eliminating use of substances listed in section 504;

"(B) an agency promotion program to promote the preference program adopted under subparagraph (A); and

"(C) annual review and monitoring of the effectiveness of an agency's procurement program adopted in accordance with the requirements of this subsection.

"FEDERAL ENFORCEMENT

"SEC. 515. (a) COMPLIANCE ORDERS.—(1) Whenever on the basis of any information the Administrator determines that any person has violated or is in violation of any requirement of this title, the Administrator may issue an order assessing a civil penalty for any past or current violation, requiring compliance immediately or within a specified time period, or both, or the Administrator may commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

"(2) Any order issued pursuant to this subsection may include a suspension or revocation of any permit issued by the Administrator under this title and shall state with reasonable specificity the nature of the violation. Any penalty assessed in the order shall not exceed $25,000 per day of noncompliance for each violation of a requirement of this title. In assessing such a penalty, the Administrator shall take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements.

"(b) PUBLIC HEARING.—Any order issued under this section shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. In connection with any proceeding under this section the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

"(c) VIOLATION OF COMPLIANCE ORDERS.—If a violator fails to take corrective action within the time specified in a compliance order, the Administrator may assess a civil penalty of not more than $25,000 for each day of continued noncompliance with the order and the Administrator may suspend or revoke any permit issued to the violator.

"(d) CRIMINAL PENALTIES.—Any person who—

"(1) knowingly exceeds the production limits under section 506 (production phaseout for initial list) or section 508 (control of other regulated substances);

"(2) knowingly introduces into interstate commerce a substance that was produced in violation of section 506 or section 508;

"(3) knowingly imports a substance listed under subsection (a) of section 504, or a product containing such substance, in violation of section 512 (certification of equivalent programs);

"(4) knowingly exports technologies or invests in facilities in violation of section 512 (certification of equivalent programs);

"(5) knowingly vents or releases a substance into the environment in violation of

section 509 (recycling and disposal program);

"(6) knowingly introduces into interstate commerce a substance or product in violation of section 508 (control of other regulated substances), section 509 (recycling and disposal program), section 510 (motor vehicle air-conditioning), section 511 (nonessential consumer products), or section 513 (labeling);

"(7) knowingly omits material information or makes any false material statement or representation in any application, record, report, permit, or other document filed, maintained, or used for purposes of compliance with this title; or

"(8) knowingly produces, transports, distributes or uses any substance listed under section 504, or a product containing such substance, and who knowingly destroys, alters, conceals, or fails to file any record, application, report, or other document required to be maintained or filed for purposes of compliance with this title

shall, upon conviction, be subject to a fine in accordance with title 18 of the United States Code for each day of a violation, or imprisonment not to exceed two years, or both. If conviction is for a violation committed after a first conviction of such person under this subsection, the maximum punishment shall be doubled with respect to both fine and imprisonment.

"(e) CIVIL PENALTY.—Any person who violates any requirement of this title shall be liable to the United States for a civil penalty in an amount not to exceed $25,000 for each such violation.

"(f) VIOLATIONS.—Each day of violation of any requirement of this title shall, for purposes of this section, constitute a separate violation. In addition, for purposes of section 506 (production phase-out for initial list) and section 508 (control of other regulated substances), the production, introduction into commerce, or importation of each one hundred pounds of a substance listed under section 504 that is in excess of the production limits under section 506 or section 508 shall constitute a separate violation.

"JUDICIAL REVIEW OF FINAL REGULATIONS AND CERTAIN PETITIONS

"SEC. 516. Any judicial review of any final action of the Administrator pursuant to this title shall be in accordance with sections 701 through 706 of title 5 of the United States Code, except that—

"(1) a petition for review of any final action of the Administrator may be filed by any interested person in the Circuit Court of Appeals of the United States for the Federal judicial district in which such person resides or transacts business, and such petition shall be filed within ninety days from the date of such action or after such date if such petition is for review based solely on grounds arising after such ninetieth day; action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement; and

"(2) if a party seeking review under this title applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that the information is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Administrator, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Administrator, and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper; the Administrator may modify administrative findings as to the facts, or make new findings, by reason of the additional evidence so taken, and shall file with the court such modified or new findings and the Administrator's recommendation, if any, for the modification or setting aside of the original administrative order, with the return of such additional evidence.

"CITIZEN SUITS

"SEC. 517. (a) IN GENERAL.—Except as provided in subsection (b) or (c) of this section, any person may commence a civil action on his own behalf—

"(1) against any person (including (a) the United States, and (b) any other governmental instrumentality or agency, to the extent permitted by the eleventh amendment to the Constitution) who is alleged to have violated or to be in violation of any permit, regulation, condition, requirement, prohibition, or order which has become effective pursuant to this title; or

"(2) against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this title which is not discretionary with the Administrator.

Any action under paragraph (1) of this subsection shall be brought in the district court for the district in which the alleged violation occurred. Any action brought under paragraph (2) of this subsection may be brought in the district court for the district in which the alleged violation occurred or the District Court of the District of Columbia. The district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce the permit, regulation, condition, requirement, prohibition, or order, referred to in paragraph (1), to order such person to take such other action as may be necessary, or both, or to order the Administrator to perform the act or duty referred to in paragraph (2), as the case may be, and to apply any appropriate civil penalties under section 515.

"(b) ACTIONS PROHIBITED.—No action may be commenced under subsection (a)(1) of this section—

"(1) prior to sixty days after the plaintiff has given notice of the violation to—

"(A) the Administrator; and

"(B) to any alleged violator of such permit, regulation, condition, requirement, prohibition, or order; or

"(2) if the Administrator has commenced and is diligently prosecuting a civil or criminal action in a court of the United States to require compliance with such permit, regulation, condition, requirement, prohibition, or order.

In any action under subsection (a)(1), any person may intervene as a matter of right. Any action respecting a violation under this title may be brought under this section only in the judicial district in which such alleged violation occurred or is occurring.

"(c) NOTICE.—No action may be commenced under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice to the Administrator that said plaintiff will commence such action. Notice under this subsection shall be given in such manner as the Administrator shall prescribe by regulation.

"(d) INTERVENTION.—In any action under this section the Administrator, if not a party, may intervene as a matter of right.

"(e) COSTS.—The court, in issuing any final order in any action brought pursuant to this section or section 515, may award costs of litigation (including reasonable attorney and expert witness fees) to the prevailing or substantially prevailing party, whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

"(f) OTHER RIGHTS PRESERVED.—Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or requirement or to seek any other relief (including relief against the Administrator).

"SEPARABILITY

"SEC. 518. If any provision of this title, or the application of any provision of this title to any person or circumstance is held invalid, the application of such provision to other persons or circumstances and the remainder of this title shall not be affected thereby.

"RELATIONSHIP TO OTHER LAWS

"SEC. 519. (a) Nothing in this title shall be construed to alter or affect the authority of the Administrator under any other provision of this Act or the Toxic Substances Control Act or to affect the authority of any other department or agency, or instrumentality of the United States under any provision of law to promulgate or enforce any requirement respecting the control of any substance, practice, process, or activity for purposes of protecting the stratospheric ozone layer or reducing the extent of global climate change.

"(b) Nothing in this title shall preclude or deny any State or political subdivision thereof from adopting or enforcing any requirement respecting the control of any substances, practice, process, or activity for purposes of protecting the stratospheric ozone layer or reducing the extent of global climate change.

"AUTHORITY OF ADMINISTRATOR

"SEC. 520. The Administrator is authorized to prescribe such regulations as may be necessary to carry out this title. If, in the Administrator's judgment, any substance, practice, process, or activity may reasonably be anticipated to affect the stratosphere and such effect may reasonably be anticipated to endanger public health or welfare, the Administrator shall promptly promulgate regulations respecting the control of such substance, practice, process, or activity.

"INTERNATIONAL COOPERATION

"SEC. 521. (a) The President shall undertake to enter into international agreements to foster cooperative research which complements studies and research authorized by this title, and to develop standards and regulations which protect the stratosphere consistent with regulations applicable within the United States. For these purposes, the President shall negotiate multilateral treaties, conventions, resolutions, or other agreements, and formulate, present, or support proposals at the United Nations and other appropriate international forums and shall report to the Congress periodically on efforts to arrive at such agreements.

"(b) The Administrator, in consultation with the Secretary of State, is authorized to support global participation in the Montreal Protocol on Substances that Deplete the Ozone Layer and to assist developing countries that are parties to the Protocol and

are operating under Article 5 of such Protocol.

"GRANTS

"SEC. 522. (a) The Administrator is authorized to establish and carry out a grant program through the Office of Air and Radiation for purposes of promoting the objectives of this title by: testing the basic properties of chemical substitutes; examining product redesign and technological innovations that would reduce, avoid, or eliminate chemical use in specific production processes; testing the applicability of possible substitutes in specific products; examining health, environmental, and safety issues related to the use of potential chemical substitutes; developing new technologies; improving the energy efficiency of new or modified technologies; monitoring environmental impacts; conservation; and other related purposes. Grants made under such program may be made to public and private entities, or combinations thereof, including consortia established expressly for the purpose of conducting research and related activities pursuant to this title.

"(b) Applications for grants under this title shall be submitted at such time and in such form and contain such information as the Administrator shall prescribe by regulation.

"(c) In making grants under this section, the Administrator shall consider, among other factors: the quantities of ozone-depleting chemicals or greenhouse gas emissions the proposed substitute, product or technology would replace; the timing of possible reductions with preference given to substitutes, products and technologies that will yield prompt reductions in demand for ozone-depleting chemicals covered by this title; the global climate implications of a proposed project; the likelihood of commercialization of the technology; the degree of public and private participation and support for a proposed project; the extent to which the results of the project will be accessible to the public; and the energy efficiency that would result from the project.

"(d) There are authorized to be appropriated to the Environmental Protection Agency such amounts as may be necessary to carry out the grant program pursuant to this section.

"PART B—METHANE ASSESSMENT

"OBJECTIVE AND NATIONAL GOAL

"SEC. 523. (a) The objective of this part is to identify and analyze options to reduce the risks of tropospheric ozone formation and global climate change by—

"(1) reducing global methane emissions sufficiently to assure that the atmospheric concentration of methane does not rise above current levels;

"(2) identifying and analyzing the relationships among methane and other atmospheric pollutants to determine the synergies that may be contributing to tropospheric ozone formation and global climate change;

"(3) promoting additional analyses of the factors causing methane concentrations to increase and of the sources of methane emissions and the opportunities for reducing such emissions; and

"(4) identifying emissions reductions options that are economically as well as environmentally advantageous.

"(b) In order to achieve the objective of this part, it is a national goal to—

"(1) reduce methane emissions associated with human activities in the United States;

"(2) stimulate international agencies to fund projects in developing countries that will reduce methane emissions;

"(3) stimulate other governments to implement measures to reduce methane emissions; and

"(4) in support of international efforts to reduce methane emissions, provide data regarding sources of methane emissions and options for reducing such emissions.

"INFORMATION COLLECTION

"SEC. 524. The Administrator is authorized to collect from persons responsible for the release of methane to the atmosphere during manufacturing, processing, resource recovery or distribution, waste management, or other economic activities information concerning such releases as may be necessary to complete the studies required by this part. Failure or refusal to provide such information in such form as the Administrator may reasonably require shall constitute a violation for purposes of section 515 of this title. To the extent information concerning methane releases is already being reported to a State or Federal agency and such information is available to the Administrator, the Administrator shall utilize such sources of information.

"ECONOMICALLY JUSTIFIED ACTIONS

"SEC. 525. Not later than September 30, 1990, the Administrator shall develop in consultation and coordination with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit a report to the Congress that identifies activities, substances, processes, or combinations thereof that could reduce methane emissions and are economically justified with or without consideration of environmental benefit.

"DOMESTIC METHANE SOURCE INVENTORY AND CONTROL OPTIONS

"SEC. 526. (a) Not later than September 30, 1990, the Administrator shall develop in consultation and coordination with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit to the Congress reports on:

"(1) Methane emissions associated with natural gas extraction, transportation, distribution, storage, and use. Such report shall include an inventory of methane emissions associated with such activities within the United States. Such emissions include, but are not limited to, accidental and intentional releases from natural gas and oil wells, pipelines, processing facilities, and gas burners.

"(2) Methane emissions associated with coal extraction, transportation, distribution, storage, and use. Such report shall include an inventory of methane emissions associated with such activities within the United States. Such emissions include, but are not limited to, accidental and intentional releases from mining shafts, degasification wells, gas recovery wells and equipment, and from the processing and use of coal.

"(3) Methane emissions associated with management of solid waste. Such report shall include an inventory of methane emissions associated with all forms of waste management in the United States, including storage, treatment, and disposal.

"(4) Methane emissions associated with agriculture. Such report shall include an inventory of methane emissions associated with rice production in the United States.

"(5) Methane emissions associated with biomass burning. Such report shall include an inventory of methane emissions associated with the intentional burning of agricultural wastes, wood, grasslands, and forests.

"(6) Other methane emissions associated with human activities. Such report shall identify and inventory other domestic sources of methane emissions that are deemed by the Administrator to be significant.

"(b) Not later than September 30, 1990, the Administrator shall develop in consultation and coordination with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit to the Congress a report that presents a plan outlining measures that could be implemented to stop the growth in atmospheric concentrations of methane from sources within the United States. This plan shall identify and evaluate the technical options for reducing methane emissions from each of the activities listed in subsection (a) as well as other activities or sources deemed by the Administrator to be significant and shall include an evaluation of costs. The plan shall identify the emissions reductions that must be achieved to prevent increasing atmospheric concentrations of methane. The plan shall also identify programs of the United States and international lending agencies that could be used to induce lesser developed countries to undertake measures that will reduce methane emissions and the resource needs of such programs.

"INTERNATIONAL STUDIES

"SEC. 527. (a) Not later than September 30, 1990, the Administrator shall develop in consultation and coordination with the Administrator of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit to the Congress a report on methane emissions from countries other than the United States. Such report shall include inventories of methane emissions associated with the activities listed in subsection (a) of section 526.

"(b) Not later than September 30, 1990, the Administrator shall develop in consultation and coordination with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit to the Congress a report that analyzes the potential for preventing an increase in atmospheric concentrations of methane from activities and sources in other countries. Such report shall identify and evaluate the technical options for reducing methane emissions from each of the activities listed in subsection (a) of section 526 as well as other activities or sources that are deemed by the Administrator to be significant and shall include an evaluation of costs. The report shall identify the emissions reductions that must be achieved to prevent increasing atmospheric concentrations of methane. The report shall also identify technology transfer programs that could promote methane emissions reductions in lesser developed countries.

"NATURAL SOURCES

"SEC. 528. Not later than September 30, 1992, the Administrator shall develop in consultation and coordination with the Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration, as well as the heads of other relevant Federal agencies and departments, and submit to Congress reports on—

"(1) methane emissions from biogenic sources such as (A) tropical, temperate and subarctic forests, (B) tundra and (C) freshwater and saltwater wetlands; and

"(2) the changes in methane emissions from biogenic sources that may occur as a result of predicted increases in temperatures and atmospheric concentrations of carbon dioxide.".

TITLE VIII—MISCELLANEOUS EXEMPTIONS

EXEMPTIONS FOR STRIPPER WELLS

SEC. 801. (a) IN GENERAL.—Notwithstanding any other provision of law, the provisions of title I of the Clean Air Act Amendments of 1990 relating to the regulation of areas designated under section 107 of the Clean Air Act, other than areas designated as severe or extreme pursuant to such section or part D of such title and the amendments made by such provisions, shall not apply with respect to the production of and equipment used in the exploration, production, development, storage or processing of—

(1) oil from a stripper well property, within the meaning of the June 1979 energy regulations (within the meaning of section 4996(b)(7) of the Internal Revenue Code of 1986, as in effect before the repeal of such section); and

(2) stripper well natural gas, as defined in section 108(b) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3318(b)).

TITLE IX—ASBESTOS ABATEMENT

AMENDMENTS TO TOXIC SUBSTANCES CONTROL ACT

SEC. 901. (a)(1) Section 206(a) (1) and (3) of the Toxic Substances Control Act (15 U.S.C. 2646) are amended by adding at the end of each the following: "or a public or commercial building,".

(2) Section 206(b)(1)(A)(i) of such Act is amended by inserting immediately before the period at the end thereof the following: "or who inspect for asbestos-containing material in public or commercial buildings".

(3) Section 206(b)(1)(A)(iii) of such Act is amended by inserting immediately before the period at the end thereof the following: "or public or commercial buildings".

(4) Section 207 of such Act (15 U.S.C. 2647) is amended by adding at the end thereof the following:

"(g) Any contractor who—

"(1) inspects for asbestos-containing material in a public or commercial building;

"(2) designs or conducts response actions with respect to friable asbestos-containing material in a public or commercial building; or

"(3) employs individuals to conducts response actions with respect to friable asbestos-containing material in a public or commercial building;

and who fails to obtain the accreditation under section 206 of this Act, or in the case of employees to require or provide for the accreditation required, is liable for a civil penalty of not more than $5,000 for each day during which the violation continues, unless such contractor is a direct employee of the Federal Government.".

(b) In exercising any authority under the Toxic Substances Control Act in connection with the amendment made by subsection (a) of this Act, the Administrator of the Environmental Protection Agency shall not, for purposes of section 4(b)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653(b)(1)), be considered to be exercising statutory authority to prescribe or enforce standards or regulations affecting occupational safety and health.

EFFECTIVE DATE

SEC. 902. Section 901 shall take effect upon the expiration of the twelve-month period following the date of the enactment of this Act. The Administrator may extend the effective date for a period not to exceed one year if the Administrator determines that accredited asbestos contractors are needed to perform school-site abatement required under the Asbestos Hazard Emergency Response Act (15 U.S.C. 2641), and such an extension is necessary to ensure effective implementation of section 203 of this Act.

TITLE X—SOLAR AND RENEWABLE ENERGY

INCENTIVES

SEC. 1001. (a) DEFINITION.—For purposes of this section, solar and renewable energy means photovoltaic, solar thermal, wind, geothermal and biomass technologies, or any other energy production technology, other than hydroelectric, recognized as "renewable energy" by the Department of Energy.

(b) FEDERAL RATE INCENTIVES.—(1) Within twenty-four months after enactment of this section, the Federal Energy Regulatory Commission shall complete a rulemaking to establish a demonstration program for regulatory incentives to promote and encourage solar and renewable energy. The regulatory incentives shall include—

(A) establishment of an incentive rate of return for solar and renewable energy development and distribution that recognizes their inherent risk; and

(B) allowance of a ten-to-twenty-year amortization period to recover the capital costs of solar and renewable energy technologies.

(2) The initial Federal Energy Regulatory Commission demonstration program shall be in effect for five years.

(3) At the end of the initial five-year demonstration program, the Federal Energy Regulatory Commission shall review the merits of the program and determine whether to extend such program, including the establishment of a permanent program.

(c) FERC PREAPPROVAL OF PRUDENCE FOR SOLAR AND RENEWABLE ENERGY TECHNOLOGY COSTS.—The Federal Energy Regulatory Commission shall establish a process for negotiating with potential developers of solar and renewable energy technologies to agree upon costs caps for future projects and preapproval of the prudence of expenses for those projects if the expenses fall within the agreed-upon cap.

(d) ENCOURAGEMENT OF STATE INCENTIVE PROGRAMS.—Because the use of solar and renewable energy is in the national interest, States, including their agencies and political subdivisions which regulate public utility rates and charges, are encouraged to provide additional incentives for their implementation. Those incentives may include, but are not limited to—

(1) preapproval of recovery of capital costs and other expenses, within reasonable bounds agreed upon before project construction; and

(2) rapid amortization of solar and renewable energy expenditures.

TITLE XI—MISCELLANEOUS PROVISIONS

CLEAN AIR STUDY OF SOUTHWESTERN NEW MEXICO

SEC. 1101. The Administrator shall conduct a study of the causes of degraded visibility in southwestern New Mexico. The Administrator, in consultation with the Secretary of State, is encouraged to cooperate with the Government of New Mexico, other Federal agencies, and any other appropriate organizations in conducting the study. Nothing in this section shall be construed as contravening or superseding the provisions of any international agreement in force for the United States as of the date of enactment of this section, or any relevant Federal statute.

IMPACT ON SMALL COMMUNITIES

SEC. 1102. Before implementing a provision of this Act, the Administrator of the Environmental Protection Agency shall consult with the Small Communities Coordinator of the Environmental Protection Agency to determine the impact of such provision on small communities, including the estimated cost of compliance with such provision.

RESEARCH, INVESTIGATION, TRAINING, AND OTHER ACTIVITIES

SEC. 1103. Section 103 of the Clean Air Act is amended—

(1) by amending subsection (c) to read as follows:

"(c) In carrying out subsection (a), the Administrator shall conduct a program of research, testing, and development of methods for sampling, measurement, monitoring, analysis, and modeling of air pollutants. Such program shall include the following elements:

"(1) Consideration of individual, as well as complex mixtures of air pollutants and their chemical transformations in the atmosphere.

"(2) Development of improved monitoring and modeling techniques to increase understanding of the sources of ozone precursors, ozone formation, ozone transport, regional ozone trends, and physicochemical interactions of ozone with other pollutants. Emphasis shall be placed on those techniques which—

"(A) improve the ability to inventory emissions of volatile organic compounds contributing to urban air pollution, including anthropogenic and natural sources; and

"(B) improve the ability to identify and evaluate region-specific prevention and control options for ozone pollution.

"(3) Efforts to ensure the comparability of air quality data collected in different States and in different nations.

"(4) Periodic reports to the Congress which evaluate and assess the effectiveness of air pollution control regulations and programs using monitoring data collected pursuant to this subsection.";

(2) by amending subsection (d) to read as follows:

"(d)(1) The Administrator shall conduct a research program on the short- and long-term effects of air pollutants, including wood smoke, on human health. In conducting such research program the Administrator—

"(A) shall conduct studies, including epidemiological, clinical, and laboratory studies, as necessary to identify and evaluate effects of air pollutants on human health;

"(B) may utilize, on a reimbursable basis, the facilities of existing Federal scientific laboratories and research centers; and

"(C) shall consult with other appropriate Federal agencies to ensure that similar research being conducted in other agencies is coordinated and is not duplicative.

"(2) In conducting the research program under this subsection, the Administrator shall develop methods and techniques necessary to identify and assess the risks to human health from both routine and accidental exposures to individual air pollutants and combinations thereof.";

(3) by amending subsection (f) to read as follows:

"(f) In carrying out the provisions of subsection (a), the Administrator shall conduct a research program to improve the understanding of the causes, effects, and trends of natural resource damage from air pollutants. Such program shall include—

"(1) identification of regionally representative and critical ecosystems for research;

"(2) evaluation of risks to natural resources exposed to air pollutants, including characterization of the causes and effects of chronic and episodic exposures to air pollutants and determination of the reversibility of such effects;

"(3) development of improved atmospheric dispersion models and monitoring systems and networks for evaluating and quantifying exposure to and effects of multiple environmental stresses associated with air pollution;

"(4) evaluation of the effects of air pollution on water quality, including assessments of the short- and long-term ecological effects of acid rain and other atmospherically derived pollutants on surface water (including wetlands and estuaries) and ground water;

"(5) evaluation of the effects of air pollution, including acid rain, on forests, biological diversity, soils, materials, crops, and other terrestrial systems exposed to air pollutants; and

"(6) estimation of the ecological damages and their associated costs which have occurred as a result of exposure to air pollutants."; and

(4) by inserting at the end thereof the following new subsections:

"(g) Not later than one hundred and twenty days after the date of the enactment of this subsection, the Secretary of Energy shall report to Congress on plans and procedures for entering into contracts and cooperative agreements with other Federal agencies, and private, public, and academic research organizations for use of the Liquefied Gaseous Fuels Spill Test Facility.

"(h)(1)(A) Not later than one hundred and eighty days after the date of enactment of this subsection the Secretary of Energy shall establish and operate an air toxics emissions program to conduct research, development and technology demonstration activities in cooperation with the Liquefied Gaseous Fuels Spill Test Facility in accordance with the provisions of this subsection.

"(B) Not later than one hundred and twenty days after the date of enactment of this subsection the Secretary of Energy shall prepare and submit a report to the Congress on plans and deadlines to be implemented in carrying out the program described in paragraph (1)(A).

"(2) The research, development, and technology demonstration activities described in paragraph (1)(A) shall include—

"(A) developing and implementing improved procedures to predict behavior of dense gases including the transport and fate of such emissions;

"(B) developing new and improved analytical monitoring methods;

"(C) investigating and evaluating response methods to control toxic air emissions-related emergencies;

"(D) researching and evaluating monitoring techniques to improve knowledge of threats to human health and the environment with emphasis on cross-media effects of such emissions;

"(E) testing, development and demonstration of alternative or innovative technologies which may be utilized to control, abate, or minimize air toxic emissions.

"(3) In carrying out the provisions of this subsection, the Secretary of Energy, in consultation with the Administrator of the Environmental Protection Agency, shall select at least two chemicals listed in section 112(b) of the Clean Air Act for research, development and technology demonstration activities pursuant to this subsection. The Secretary of Energy shall select two such chemicals annually for such activities. In selecting such chemicals, priority shall be placed on chemicals the Secretary of Energy determines pose the greatest threat to human health and the environment.

"(4) The Secretary of Energy shall make available to interested persons (including other Federal agencies and businesses) the use of the Liquefied Gaseous Fuels Spill Test Facility to conduct research and other activities in connection with the activities described in paragraph (2).

"(5)(A) In carrying out the provisions of this subsection, the Secretary of Energy is authorized to enter into contracts and cooperative agreements with, and make grants to, nonprofit entities affiliated with the University of Nevada and the University of Wyoming.

"(B) The agreement described in subparagraph (A) shall provide that such nonprofit entities—

"(i) may provide basic technical and management personnel; and

"(ii) shall provide permanent research institutes.

"(6) The research institutes described in paragraph (5) shall be authorized to make grants, accept contributions and enter into agreements with other entities to carry out the provisions of this subsection.

"(7) There are authorized to be a appropriated to the Department of Energy $3,000,000 for fiscal year 1991 and such sums as may be necessary for each fiscal year thereafter to carry out the provisions of paragraph (5). Such amounts shall remain available until expended.".

ORDERS FOR THURSDAY, APRIL 19, 1990

Mr. CRANSTON. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate recesses today it stand in recess until 10 a.m., Thursday, April 19; that the Journal of proceedings be deemed approved, that following the time for the two leaders or their designees under the standing order, there be 2 hours of morning business under the control of Senator NUNN for his and other members of the Armed Services Committee's usage, and that there then be a period for the transaction of routine morning business not to extend beyond 1 p.m., with Senators permitted to speak therein not to exceed 10 minutes each, during which time period Senators may eulogize Senator MATSUNAGA.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECESS UNTIL THURSDAY, APRIL 19, 1990, AT 10 A.M.

Mr. CRANSTON. Mr. President, pursuant to the provisions of Senate Resolution 271, I ask unanimous consent that the Senate stand in recess until 10 a.m., Thursday, April 19, 1990.

There being no objection, at 12:05 p.m., the Senate recessed until Thursday, April 19, 1990, at 10 a.m.

HOUSE OF REPRESENTATIVES—*Wednesday, April 18, 1990*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

In grateful appreciation, O God, we welcome a new day together with all its responsibilities and duties, with all the hopes and fears, with all the opportunities and trials. As we have been given another moment in time to be the people You would have us be, we pray that Your good Word would guide us in the way of justice and Your good spirit would show us the paths of reconciliation and healing in our lives and in the lives of those about us. Bless us this day, O God, and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Ohio [Mr. GILLMOR] please come forward and lead the House in the Pledge of Allegiance.

Mr. GILLMOR led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Kalbaugh, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment, a bill of the House of the following title:

H.R. 2334. An act to redesignate the Post Office located at 300 East Ninth Street in Austin, TX, as the "Homer Thornberry Judicial Building."

The message also announced that the Senate had passed a bill, joint resolutions, and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 2364. An act to authorize supplemental economic assistance to support democracy in Panama, Nicaragua, and sub-Saharan Africa, and for other purposes;

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week";

S.J. Res. 275. Joint resolution designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet";

S. Con. Res. 117. Concurrent resolution expressing the appreciation of Congress for the contributions of the Friends of the National Arboretum in providing for the preservation and public display of 22 of the original columns of the East Front Portico of the U.S. Capitol Building; and

S. Con. Res. 118. Concurrent resolution to authorize the printing of a brochure describing the history, design, and functions of the U.S. Capitol as the seat of the legislative branch of the Government.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1096) "An act to provide for the use and distribution of funds awarded the Seminole Indians in dockets 73, 151, and 73-A of the Indian Claims Commission."

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC,
April 5, 1990.

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5 of rule III of the Rules of the U.S. House of Representatives, the Clerk received at 9:40 a.m. on Thursday, April 5, 1990 the following message from the Secretary of the Senate: That the Senate passed without amendment, H.R. 3968 and H. Con. Res. 275.

With great respect, I am
Sincerely yours,
DONNALD K. ANDERSON,
Clerk, House of Representatives.
(By) DALLAS L. DENDY, Jr.,
Assistant to the Clerk.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bills on Friday, April 6, 1990:

H.R. 1048. An act to provide for the acquisition of data about crimes that manifest prejudice based on certain group characteristics;

H.R. 3968. An act to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations; and

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing.

HARRY TRUMAN AND LITHUANIA

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, the Berlin airlift, in response to the Berlin blockade, will go down in modern history as one of the most creative and courageous countermoves to the cynical squeeze play against the struggle of a city to survive.

The brave people of Lithuania deserve no less. The best insurance policy against the possible economic stranglehold over Lithuania is for the West to be ready with the full spectrum of nonmilitary assistance measures ranging from fuel to food and to opening of duty-free markets for Lithuania's products.

I call on the President to coordinate immediate action plans with the leaders of Europe to preserve the budding democracies of the Baltic States.

Of one thing I am sure, Mr. Speaker, Harry Truman would do no less.

NICARAGUA: WHAT IS LEFT FOR THOSE WHO CAME IN FIRST?

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, time is running out on the Sandinistas. They are supposed to turn over power to the incoming Chamorro government on April 25.

But they have given a new meaning to the term "transition government."

The Sandinistas make these 2 months after their election loss more like a continual spinning of the "Wheel of Fortune."

The list of prizes include:

A lifetime supply of amnesty for Sandinista officials for any crimes they might have committed over the past decade.

Ten thousand government homes for Sandinista officials currently occupying them.

Unlimited government assets to be sold at discount, such as broadcast stations and military equipment.

And all those prizes go to the second place winner.

One wonders what is left for those who came in first?

SUPPORT THE PRESIDENT'S CRIME PACKAGE

(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER. Mr. Speaker, I rise today to voice my opposition to the rule on H.R. 1236, and to urge my colleagues to join me in voting "no" on the previous question. It is not that I disapprove of the open rule on this bill, but that I disapprove of the way this House is spending its time.

H.R. 1236 is legislation that attempts to fix a problem that does not exist. Instead of working to overturn two Supreme Court decisions, we should be considering the President's crime package.

This crime package has been sitting idle in the Judiciary Committee for almost a year now. Meanwhile, according to the FBI, law enforcement agencies are solving only 17 percent of all murders, and while the number of violent crimes has increased 34 fold since 1950, the number of law enforcement officers has merely tripled. We need more man power, we need more prison space, and we need stiffer penalties. These are the issues we should be addressing today. Defeat the previous question and lets consider the Presidents anticrime package.

□ 1210

PRESERVE AMERICA'S HERITAGE THROUGH ADMINISTRATION ACTIONS

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, Teddy Roosevelt was perhaps the first environmental President, a title to which George Bush is now trying to lay claim. President Roosevelt was a man of action. He stood up against opposition and protected vast areas of our Nation's precious resources. After designating the Grand Canyon National Monument, President Roosevelt visited the area. He said "Do nothing to mar its grandeur." President Bush has taken his advice too literally and has done nothing.

Mr. President, actions speak louder than words! Not just a speech for Earth Day but action each and every day. Today the Grand Canyon is shrouded in a haze of air pollution and the President has done nothing but propose more studies. While President Bush aspires to sound like President Teddy Roosevelt, the drum major of his march of inaction is President Reagan.

Mr. Speaker, it is the Democratic Party that is leading today in establishing the great natural environmental legacy of lands for our Nation: parks, national forests, wildlife refuges, wild rivers, and wilderness areas. However, the survival of these national treasures for the 21st century is seriously threatened. Polluted air and water, toxic waste, and mindless development as well as a lack of sound management by the Federal Government pose the threat. Actions speak louder than words.

Democrats in Congress are continuing to fight to protect the very best of our public land heritage—

Expanding our national park system;

Protecting the last of our remaining rivers;

Preserving our last wilderness areas;

Protecting temperate rain forests and their unique biodiversity;

Preventing the dewatering of wild rivers, parks and wilderness areas; and

Protecting our parks and wilderness from air and water pollution and toxic wastes.

Too often these Democratic efforts are hindered by a simple lack of attention, endless pointless excuses to study an issue to death, or finally outright opposition from most of our Republican colleagues led by President Bush.

President Bush's administration has no position on protecting our remaining old growth forests when the circumstances demands a solution, not more excuses.

President Bush had hardly finished announcing his "no net loss" policy for wetlands when his own advisers fatally weakened wetland protections caving into developer opposition.

Despite a campaign pledge to expand and strengthen our Nation's park system, the President still has not sent Congress a single new park proposal and is opposed to these proposed new national parks in the proposed California Desert Conservation Act.

The Grand Canyon remains shrouded in a haze of air pollution while the GOP administration procrastinates with more study.

Water development projects threaten to dry up national parks and wilderness areas, and yet the Bush administration refuses to use existing law to protect park and wilderness water and in fact oppose effort by Congress to enact new laws protecting wilderness water.

The Bush administration says "trust us" on the environment and opposes legislation to remove politics from the NPS after 10 years of unprecedented politicization of the park agency during the Reagan-Bush administration.

At a time when our Nation faces and astonishing budget deficit, they oppose our efforts to stop the "give away" of minerals from the public lands and to temper the subsidy of livestock grazing on public lands with conservation safeguards.

During the last decade of the Reagan-Bush administrations, the percentage of the Federal budget spent to protect America's cultural and natural resources and the environment was cut from a minimal 2 percent to a wholly inadequate 1 percent—yes, 1 percent. That's the low priority the GOP Bush administration has given the environment.

As I said before, during the 20th anniversary of Earth Day, actions speak louder than words. I urge the President to join with Congress, Democrats and Republicans, to turn his lip service of good intentions into actions which will preserve America's heritage for the 21st century.

H.R. 1236 NEEDS DOUGLAS AMENDMENT

(Mr. DOUGLAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOUGLAS. Mr. Speaker, today we are going to take up H.R. 1236, which is called the Price Fixing Prevention Act. I have an amendment that I will be offering that will do what the Supreme Court did in 1911, namely, to outlaw vertical price fixing. Vertical price fixing is when a manufacturer tells a retailer, "You must sell this product for this price." It has been illegal, under the Supreme Court opinion of Dr. Miles, since 1911. Unfortunately, H.R. 1236 does more than just codify that case.

H.R. 1236 goes on to overrule two other Supreme Court decisions, the Monsanto decision in 1984, and the Sharp decision in 1988. For that reason, the American Bar Association and the Justice Department, as well as America's electronics industry, urges a "no" vote on H.R. 1236.

It will confuse the law. It came out of our subcommittee on only a 9-to-6 vote. It came out of the full Senate Judiciary Committee on only a 7-to-6 vote. It will be vetoed, according to the Attorney General.

I urge Members to support my amendment to codify the Dr. Miles decision, but not to go on and overturn two other U.S. Supreme Court decisions in this complicated, tricky area of antitrust law.

EXPRESSING SORROW OF THE HOUSE AT THE DEATH OF HONORABLE SPARK M. MATSUNAGA, SENATOR FROM THE STATE OF HAWAII

Mr. GEPHARDT. Mr. Speaker, I offer a privileged resolution (H. Res. 377) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 377

Resolved, That the House has heard with profound sorrow of the death of the Honorable Spark M. Matsunaga, a Senator from the State of Hawaii.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That a committee be appointed on the part of the House to join a committee appointed on the part of the Senate to attend the funeral.

Resolved, That when the House adjourns today, it adjourn as a further mark of respect to the memory of the deceased Senator.

The SPEAKER. The gentleman from Missouri [Mr. GEPHARDT] is recognized for 1 hour.

Mr. GEPHARDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, several days ago this Nation lost a great patriot in the Congress, one of its most distinguished Members. A veteran of World War II, a public school teacher, a prosecutor, a skillful legislator, the Senator from Hawaii will be missed by his family, by his friends, and by this body.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS OF THE FUNERAL COMMITTEE OF THE LATE SPARK M. MATSUNAGA

The SPEAKER. Pursuant to House Resolution 377, the Chair appoints as members of the funeral committee of the late SPARK M. MATSUNAGA, the following Members on the part of the House:

Mr. AKAKA of Hawaii;
Mrs. SAIKI of Hawaii; and
Mr. MINETA of California.

ENVIRONMENTAL TRAIL OF SHAME

(Mr. WISE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, Earth Day is coming. Since President Bush likes to travel, we are preparing an environmental travelogue for him. Let Members now back that environmental RV out of the White House garage and put it on the road.

Unfortunately, this is not going to be any AAA trip-tick, but a national trail of environmental shame. I will trace the route for Members here.

First, we can take a brief foray to the Anacostia River, and then to the Chesapeake Bay which Congress has had to act to clean up. Then we head up north to Boston Harbor, where the promise of independence began. Unfortunately, that is the only promise that has been kept on Boston Harbor, in cleaning it up, since the President's campaign. Then we head across the country through the bad air in major cities, the Ohio Fernald plant, military bases needing toxic cleanup, we can take some pictures in scenic Colorado, but do not go too near Rocky Flats because the radiation will expose the film. As happy White House campers sally forth on Earth Day, do not forget the places that the Federal Government made impossible to camp.

Mr. Speaker, so that the vacationers will have to carry a Geiger counter and air meter when they travel, it is time to make Earth Day a reality.

SANDINISTAS LEAVE NICARAGUA IN SHAMBLES

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, one week from today, Violeta Chamorro will be inaugurated as President of Nicaragua.

This will be the culmination of one of the most dramatic and spectacular election victories ever won in this hemisphere.

But the Sandinistas have left the country in economic shambles. After 10 years of Communist mismanagement, Sandinista corruption, and the ravages of war, Mrs. Chamorro will inherit an empty shell.

The new government needs economic help. They will need to purchase oil immediately. They need seeds and fertilizer. They need access to spare parts.

At the beginning of this month, the House of Representatives did its part in helping Nicaragua by voting for $300 million in aid.

But I am sorry to report that the other body has not followed through on our action.

A failure to act in a timely manner is a form of congressional mismanagement. A failure to act because of petty, partisan considerations is a form of congressional dereliction of duty.

I urge the other body to act and act now to help freedom in Nicaragua. There is no reason for delay. There is no excuse for inaction.

MILITARY TOXICS

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, I rise to draw the attention of my colleagues to the growing environmental threat posed by toxics leaching from our military bases into both the surface and ground water all across the country.

Over the years, this problem of toxics at military facilities has escalated from a few thousand sites nationwide at a few hundred bases to one that now includes over 14,000 sites on more than 1,500 installations in every corner of the Nation.

The number of military sites on the Environmental Protection Agency's national priorities list, the list of the most contaminated hotspots in the country, has also grown dramatically. Last year alone, EPA added 34 new military facilities to this list of the Nation's worst dumps.

On the watch of the Bush administration cleanup, progress continues at an abysmally slow rate. DOD's latest survey revealed that the Department has completed cleanups at only 287 or .02 percent—far less than 1 percent—of the more than 14,000 military toxic sites.

Mr. Speaker, the environmental President should start cleaning up the Federal backyard first. It will take more than lipservice to solve this problem. We need a commitment to hold these Federal facilities to the same standard as the private sector and most of all we need sufficient cleanup dollars to make real progress.

□ 1220

TRIBUTE TO THE LATE HONORABLE J. KENNETH ROBINSON

(Mr. SLAUGHTER of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLAUGHTER of Virginia. Mr. Speaker, I rise today to pay tribute to J. Kenneth Robinson, a former Member of this body and my predecessor, a man who served in the House of Representatives with distinction and courage.

J. Kenneth Robinson of Winchester, VA, died on Sunday, April 8, 1990. He was 73.

Kenneth served as a Member of the House for 14 years. He was the ranking member of the House Permanent Select Committee on Intelligence. He also served with uncommon distinction as a member of the Appropriations Committee.

Kenneth Robinson left a legacy of service and accomplishment to this Nation that few men in longer lifetimes have been able to approach. He

gave close to 30 years of service to his community, Virginia, and to our country.

To Kit, Kenneth's wife of 43 years, and the family, please know that we share the loss you feel and we extend our deepest sympathy.

Mr. Speaker, on May 2 I plan to offer a 60-minute special order to remember Kenneth Robinson and to reflect upon his life of achievement.

CLEANUP OF ANACOSTIA RIVER AN ENVIRONMENTAL MUST

(Mr. HOYER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, as Earth Day 1990 approaches, we are all looking at the environmental necessities in our areas of the country. Today I rise to discuss an environmental nightmare literally in the Capitol's backyard.

The Anacostia River runs less than a mile from here, straight down Pennsylvania Avenue. It feeds into the Potomac River and, ultimately, the Chesapeake Bay. The watershed for the river includes a good portion of my district of Prince Georges County, Montgomery County, and, of course, the District of Columbia.

Mr. Speaker, the Anacostia River is a disgrace. It is, unfortunately, one of the dirtiest rivers in the United States. But, surprisingly, its dirt is not due to any point source—no specific factory or no water waste treatment plant, but zinc, lead, and copper run into the Anacostia each year from erosion and flooding.

Mr. Speaker, we in Congress have begun to right this wrong. Last year we appropriated $130,000 for a Corps of Engineers study on how to clean up the Anacostia. I am sure we will continue to fund this project, because it is absolutely essential for our region and for America.

Just yesterday, Mr. Speaker, a local group announced the formation of START—"Stop Trashing the Anacostia River Today."

Mr. Speaker, Carly Simon wrote a song for the 1988 movie, "Working Girl," and she called it "Let the River Run." In it she said, "Let all the dreamers wake the Nation."

Mr. Speaker, let us together wake the Nation to the absolute essential nature and importance of cleaning up our environment for ourselves, for our children, and for the generations to come.

A SPECIAL TRIBUTE TO THE MEN AND WOMEN OF THE NATION'S FIRE AND EMERGENCY SERVICES

(Mr. WELDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WELDON. Mr. Speaker, I rise today to pay special tribute to America's domestic heroes, the 3 million men and women of this country who make up our fire and emergency services network.

Over the past year, Mr. Speaker, we have seen tragedies ranging from Hurricane Hugo to the earthquake in California, the responses to the air crashes in Sioux City and Long Island, nursing home fires in Virginia and Tennessee, and large loss fires recently in New York City and down in Miami, as well as thousands and even millions of other emergencies all across this Nation.

Those are the heroes that we will honor tonight, Mr. Speaker, and they deserve the appreciation and support of this body. Tonight we will honor them at a special banquet, the Second Annual National Fire and Emergency Services Dinner. I ask my colleagues to join Vice President Dan Quayle, the leadership of both political parties, and 2,000 leaders from across this country in this annual tribute to these unsung heroes.

ENVIRONMENTAL PROBLEMS OF THE GREAT LAKES VIE FOR ATTENTION

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, as this map so adequately presents to us, a journey across this Nation leaves a trail of tears, tears from broken promises, false promises, and political promises made and left, crashed like the oil tanker *Exxon Valdez* on the shores of the rocks, spilling its noxious wastes all across this country.

In my own backyard, the Great Lakes, we suffer today from the refusal of the administration to come to grips with the most pressing environmental threat to the world's largest supply of fresh water, and that is airborne toxics pollution. Ninety-three percent of the PCB's that fall in the Great Lakes come from hundreds of miles away; 96 percent of the lead falling in the Great Lakes today comes from industrial sources hundreds and thousands of miles away. Yet, while this Congress works hard and our Committee on Energy and Commerce reports a strong Great Lakes air toxics provision, the administration sleeps idly away, hoping that the problem will soon disappear.

No, Mr. Speaker, as we approach Earth Day, we have to understand that the Great Lakes, a source of fresh, renewing water upon which all growth and life depends, will only survive if in fact we work hard to preserve it and protect it.

REAL ESTATE LOAN-LOSS PROBLEMS THREATEN ECONOMIC STABILITY

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, I was not surprised to read in today's Washington Post that the epidemic of losses on real estate loans is spreading rapidly throughout the country.

The article quotes a study by an information service of Austin, TX, which claims future real estate loan-loss problems are likely to occur in places like my home State of Florida, southern California, and metropolitan Atlanta.

I was not surprised because I believe this problem can be attributed to the continuing S&L problem and Congress' inability to effectively solve this problem. Unless we can band together and present a reasonable long-term solution, I worry that we will threaten our Nation's economy.

The long-term economic stability of healthy S&L's and banks will be seriously affected unless we take some additional action.

Mr. Speaker, I urge all of my colleagues to read today's Washington Post article by Jerry Knight in the business section. It is an eye opening account of the growing problem at hand.

SUPPORT URGED FOR LEGISLATION TO PROTECT NEW MEXICO RIVERS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, in honor of Earth Day, many of our colleagues are rising to speak about serious environmental issues in our States. New Mexico has serious environmental problems. The House tomorrow will have the opportunity to act on one of those problems when it considers H.R. 644. This bill designates the East Fork of the Jemez and the Pecos Rivers as part of the National Wild and Scenic Rivers System.

The East Fork of the Jemez is threatened by a pumice strip mining operation on its banks. Pumice is a soft stone used for "Stonewashing" denim. In a very real sense, the pristine East Fork River is threatened by stonewashed jeans. American Rivers, the Nation's leading river conservation organization, has placed the East Fork on its 10 most endangered American rivers list.

Mr. Speaker, this bill is supported by the Forest Service, by public land owners, by the State of New Mexico, and by the New Mexico congressional delegation, and it will be voted on to-

morrow. It is an important piece of legislation.

It is also critically important that we recognize on Earth Day our endangered river systems. It is not just clean air or global warming; it is also important that we continue to protect our rivers across our country.

ENVIRONMENTAL PROCEDURES AT THE CAPITOL—SUPPORT URGED FOR CRIME PACKAGE

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I have been a little surprised this morning to hear some of our colleagues coming to the floor and complaining about the environmental procedures of Federal facilities. There is one group of Federal facilities that has absolutely no Environmental Protection Agency covering it, and that is the U.S. Capitol Building and the facilities of the U.S. Congress. We specifically exempt ourselves from all the environmental laws. Maybe some of the Members should address that as well as addressing their concerns to the President.

But I have another topic I would like to raise as well in my 1 minute. Later on this afternoon we will have a rule before us. Some of us are going to seek to defeat the previous question on that rule in order to try to bring to the floor the President's crime package.

When I was home, my constituents told me very flatly they want something done about crime. They are disgusted that Congress has had the President's crime package before us for almost 1 year and has done absolutely nothing. The Judiciary Committee can bring before us today a so-called price fixing bill which none of my constituents have talked to me about, but we cannot get out of that committee a crime package.

So we will seek today to defeat the previous question in order to make in order the President's crime package. That would bring before us capital punishment procedures, death penalties for drug kingpins, exclusionary rule reform, habeas corpus reform, prison construction, and increased penalties for the use of guns in crimes.

Mr. Speaker, it seems to me that is what we ought to be acting on, and we would ask the Members for their support.

ROCKY FLATS

(Mr. SKAGGS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKAGGS. Mr. Speaker, most people do not realize that the environmental mess at our nuclear weapons complex, including Rocky Flats in my district, is a national scandal involving costs almost as large as the S&L debacle.

Energy Secretary Watkins is finally making some serious and substantial efforts to clean up these sites. For the first time, there's some progress.

Sadly, the Bush administration refuses to give Secretary Watkins its full backing. At Rocky Flats alone, the 1991 Bush budget shortchanges cleanup and environmental programs by half: over $100 million.

Despite his proenvironment rhetoric, the President has proposed that we fully fund nuclear weapons production, but has put off cleaning up the nuclear weapons mess. The 1991 Bush budget would increase the nuclear weapons production budget by $869 million; it would underfund cleanup and waste management by nearly $500 million.

There is an important lesson to learn here as we approach Earth Day 1990.

We have to watch more than President Bush's lips. He's great at "greenspeak," but when it comes to finding "greenbacks" to clean up the nuclear weapons cesspools, it is a pretty limp performance.

□ 1230

MISSISSIPPI RIVER SAMPLE TELLS US WE ARE SUFFERING FROM POISONING

(Mr. ESPY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ESPY. Mr. Speaker, if our Nation went to get an Earth Day physical, we would have to take a blood sample from our Nation's most important artery, its most important vein, the mighty Mississippi River, and I am sorry to say, Mr. Speaker, that that sample would tell us that our Nation is suffering from blood poisoning of sorts, the poisoning of toxic and hazardous chemicals.

A water sample from the 2,300 miles of our Mississippi River, stretching from Minnesota on down to the Gulf of Mexico, reveals to us some of our greatest environmental ills. At least 468 million pounds of toxic chemicals are dumped into the river annually.

Mr. Speaker, this river is becoming a soup of chemicals. The mortality rates for the counties bordering the river are 3 percent higher than the rest of the Nation. The mortality rates from the counties from Kentucky on down are 14 percent higher than the rest of the Nation.

Mr. Speaker, with the passage of bills like the Clean Air Act, the Mississippi River Heritage Corridor Act and similar legislation, hopefully, when we celebrate Earth Day 20 years from now, we will be able to take a sample from the Mississippi River and at that time be able to give our country and our river families a cleaner bill of health.

THE CRIME CLOCK CONTINUES TO TICK

(Mr. ROHRABACHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROHRABACHER. Mr. Speaker, the story you are about to hear is true.

In the United States today, the crime clock continues to tick.

As Jack Webb used to say on Dragnet, let me give you some of the facts, just the facts:

There is a violent crime every 20 seconds.

There is one murder every 25 minutes.

One rape occurs every 6 minutes.

An aggravated assault occurs every 35 seconds.

How does the Democrat leadership address this problem? The Democrat-controlled Judiciary Committee, which has refused to act on the President's crime package, brings up a price-fixing bill instead.

Today Members have an opportunity to go on record in support of the President's crime bill. Members should vote "no" on the "previous question" when the rule on H.R. 1236 is considered, so we can bring the President's anticrime bill to the floor of the House for a vote.

While the crime clock ticks, the Democrats sit on their hands, refusing to act. Today, we will have a chance to do something about it.

THE WESTLY TIRE PILE IN MODESTO

(Mr. CONDIT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONDIT. Mr. Speaker, all across this country are reminders of ways in which we have failed to take care of our environment.

My district in California is no exception; in fact, we have one of the largest used tire piles in the country just sitting there in the central San Joaquin Valley. What does this tire pile add to the aesthetic value of the community—nothing. In fact, it detracts from it.

The Westly Tire Pile is composed of 45 million tires. That totals out to 80,000 tires per Member of Congress. This pile of tires is just sitting there, waiting for an accident to happen.

If this pile were to catch on fire, it would cover the San Joaquin Valley in oily smoke, contaminate ground water, cause evacuations of residents, and affect the abundance of agricultural

crops that feed this Nation and countries abroad.

But cleaning this pile up is not an easy task.

The State had to take the tire pile owners to court to get them to begin the cleanup. Now we have made some progress on this environmental monstrosity but it is not enough.

Federal, State, and local officials need to work together with industry and citizens to stop these environmental disasters from happening. We in Congress must be careful not to make ourselves part of the problem, by refusing to address the issue and act on it.

THE CONGRESSIONAL RECYCLING ACT OF 1990

(Mr. ANDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDERSON. Mr. Speaker, recently, while on a short walk to the Capitol, I could not help but notice several large waste cans filled to the brim with all sorts of trash: bottles, cans, cardboard boxes, and paper products of various dimensions. As I walked, I tried to imagine what America's municipal landfills look like when all this waste is dumped into them. Not a pretty sight, I am sure.

I began to wonder why it is that we do not recycle more of our waste than we do, and why it is that more people do not get involved with recycling as a business. Surely, with a heightened awareness among Americans that we can make better use of our solid waste, many entrepreneurs would jump at the chance to be pioneers in the recycling business. But maybe the problem is not finding enough people who want to recycle waste, but people who want to buy it. If we can get as many people to buy recycled material as we have producing it, we will be on our way to a much cleaner environment.

So we must find ways to enhance the market for recycled goods and it is Congress who must take the lead in this area.

That is why today I am introducing the Congressional Recycling Act of 1990. This bill will require the House of Representatives and Senate to use recycled paper and paper products to the greatest extent practical in their daily operations and increase their procurement of paper and paper products with the highest percentage of recycled content. This sends a clear message to the rest of the Nation that Congress is actively involved in addressing America's environmental concerns.

Mr. Speaker, with Earth Day fast approaching, and as the United States heads into the 21st century, we will face tremendous environmental challenges. Every citizen will have to become environmentally conscious if we are to protect our precious natural resources.

However, we cannot expect our citizenry to help us in areas such as recycling if we in Congress do not do it ourselves. So I ask my colleagues to please make Congress a leader and not a follower of the environmental movement by cosponsoring the Congressional Recycling Act of 1990.

□ 1240

RAPID POLITICAL CHANGES DEMAND PROMPT ACTION

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

Mr. CONTE. Mr. Speaker, I rise to commend the gentleman from Illinois [Mr. MICHEL], the Republican leader, on his statement.

Mr. Speaker, the issue we face at this moment is whether the U.S. Congress can respond adequately to the rapidly changing political face of the globe.

President Bush has shown he can, with his prompt proposal for aid to the new democracies of Central America. The House of Representatives has shown it can, by acting rapidly on H.R. 4404, the dire emergency supplemental that provides $870 million in foreign aid.

The question now arises—can the Senate respond? I join my leader and my President in urging quick action by the Senate on the pending supplemental appropriations bill.

Let us strike a quick blow for democracy.

INTRODUCTION OF WETLANDS NO NET LOSS ACT OF 1990

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, today I am introducing comprehensive national wetlands protection legislation, the Wetlands No Net Loss Act of 1990, which addresses the growing problem of wetlands loss.

Wetlands are immensely important to both the environmental and economic health of our Nation. They provide essential habitat for a great variety of wildlife including migratory birds, commercially and recreationally important finfish and shellfish, and many endangered and unique plant and animal species and communities. They provide a natural means of flood and erosion control by retaining water during periods of high runoff, thereby protecting against loss of life and property. And, finally, they enhance the water quality and water supply of the Nation by serving as ground-water recharge areas and nutrient traps.

Yet, in spite of these benefits, we are losing wetlands at the rate of almost one-half million acres each year. We do not adequately protect these limited resources, nor do we have a comprehensive Federal program to preserve them. Instead, we have a hodge-podge of efforts, both public and private, that does not adequately protect these assets while often placing burdensome costs on wetlands owners.

At the request of the U.S. Environmental Protection Agency, William K. Reilly, then president of the Conservation Foundation, convened the National Wetlands Policy Forum, chaired by Gov. Thomas H. Kean of New Jersey, to address major policy concerns about how the Nation should protect and manage its valuable wetlands resources. The forum, composed of legislators, environmentalists, developers, farmers and ranchers, and academic experts, sought to "develop sound, broadly supported recommendations on how federal, state and local wetlands policy could be improved." The efforts of the forum culminated in a report entitled "Protecting America's Wetlands: An Action Agenda." The Wetlands No Net Loss Act of 1990 is based upon the recommendations set forth in this report.

Despite its apparently clear title, "No Net Loss" of wetlands does not actually mean that development will be halted cold in its tracks. It does not mean that all growth will be stopped. However, it does mean that every attempt should be made to direct growth away from wetlands where possible, and to minimize the effects on wetlands where it is not possible to avoid wetlands. A third option, to be used only when the first two options are not possible, is to restore or create new wetlands to mitigate damages.

President Bush recognizes the importance of wetlands, and reportedly has made wetlands protection his top environmental priority. In a letter to Louisiana State Senator Ben Bagert, Jr., dated October 20, 1988, President George Bush, then Vice President and Presidential candidate, emphatically stated his views on the issue of wetlands loss:

> I share your concern about wetland erosion and congratulate you on your hard work to increase both public and governmental awareness of this issue. My own view is that wetlands are a tremendously valuable resource—as a habitat for fish and waterfowl, as a flood control device, and as a natural filter which helps create clean water. I have pledged a new national goal: no net loss of wetlands. We have been losing wetlands at a rate of half million acres a year, and we must protect what remains.

President George Bush further reiterated his position on wetlands in Sports Afield magazine—Washington Post, December 15, 1989:

My position on wetlands is straightforward. All existing wetlands, no matter how small, should be preserved.

The Wetlands No Net Loss Act of 1990 develops a sound national policy on how Federal, State, and local wetlands policy could be improved. To attain the President's goal, it creates incentives for the public and private sector for wetlands protection, improves management of Government-owned wetlands, and institutes effective and evenhanded regulatory programs to ensure that no type of wetland conversions are allowed without being reviewed. It also sets up a fund to develop and implement State plans and to acquire wetlands from the private sector, plus it calls on the Office of Technology Assessment to prepare a study of Federal policies that impact wetlands and Federal and State wetlands protection programs.

Comprehensive wetlands legislation is desperately needed if we are to preserve these areas for future generations. I hope my colleagues will join as cosponsors of this bill to implement the President's stated goal. Furthermore, I hope the various committees with jurisdiction will hold early hearings on this. Noble words are nice: action is better.

UNITED STATES SHOULD REJOIN UNESCO

(Mr. LEACH of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, the Department of State issued a congressionally required report yesterday which concludes that the United States should not rejoin the United Nations Educational, Scientific, and Cultural Organization [UNESCO]. I believe the Department of State has made a profound mistake.

The reasons for American withdrawal from UNESCO in 1984 are well known. My own view is that we overreacted to the feeble gibberings of leftist cranks abroad who wanted to radicalize the agency, as well as to the isolationist palaver of noisy ideologues at home who wanted the United States—the historic sponsor of the United Nations and the foremost champion of international law—to lead in emasculating the U.N. system.

The fact is that UNESCO is one of the least dangerous international institutions ever created. While some member countries within UNESCO attempted to push journalistic views antithetical to the values of the West and to engage in mindless Israel bashing, UNESCO itself never adopted such radical postures. The United States opted for "empty chair" diplomacy after winning, not losing, the battles we engaged in.

It is obvious to all that both the world and the United Nations are changing. Philosophically, the taproot of the profound changes taking place in the world is a historical recognition that it is the 200-year-old model of Jeffersonian democracy that provides the most revolutionary, adventuresome, and humane model for political and economic organization in recorded history. Politically, this means that as worldwide trends come, as they inevitably do, to be reflected in the institutions of the United Nations, American values will increasingly be vindicated.

The fact that the momentum of events is so overwhelmingly on our side has apparently been lost, however, on the pariah skeptics who remain philosophically manacled to an outdated past in their lonely dungeon outpost in the International Organization Affairs Bureau at the Department of State.

The fact is that, like other aspects of the U.N. system, UNESCO itself has shown substantial evidence of change and reform. The new Director General, Mr. Frederico Mayor, of Spain, has pledged to redirect UNESCO away from the controversial management style and half-baked theoretical projects that were identified with its previous chief, Mr. M'Bow.

Mr. Mayor has served notice that UNESCO under his leadership will not countenance toying with invasions into journalistic freedoms of expression.

Few countries are as protective of first amendment values as the United States. Mayor is prepared to carry the Western banner on this issue, but his, and more importantly, future directors' leadership options are diminished if the United States continues to play ideological games with one of the profoundest threads of American political philosophy.

The developing countries which comprise the majority of U.N. member nations, out of respect for the United States, acquiesced in the designation of a new leader and new management approach for UNESCO. For the United States to refuse to respond to such a positive gesture from centrist states implies insensitivity in this specific instance and will almost certainly undercut efforts of the United States to seek responsible accommodations in other fora on other issues.

Mr. Speaker, there is no reason the United States should not resume immediate membership and participation in UNESCO. It was nuts to get out and it is nuttier still not to rejoin. "Empty chair" diplomacy is an oxymoron.

A TRIBUTE TO RALPH D. ABERNATHY

(Mr. LEWIS of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Georgia. Mr. Speaker, I want to use this opportunity to reflect upon the life of a great individual. Our Nation has suffered a great loss in the death yesterday of Ralph David Abernathy. He was an American hero. He played a critical role in the American civil rights movement. His life epitomized the highest ideals and aspirations of the movement. Reverend Abernathy's commitment to justice and freedom inspired many of us who participated in the struggle for civil rights. I am deeply saddened by the loss of this great man.

I first met Reverend Abernathy in 1958 when I was a young man preparing to go to college. I traveled 50 miles from my home in Troy, AL, to Montgomery, AL, to meet with Reverend Abernathy and Dr. Martin Luther King, Jr. I was seeking their counsel because I had planned to try to become the first black student to attend all-white Troy State College. Reverend Abernathy hosted this meeting in the study of his church in Montgomery. I will never forget that spring day in 1958 because the meeting would change my life. It was the beginning of a long and beautiful relationship.

I soon became a disciple of the philosophy of nonviolent protest. I followed the example that Reverend Abernathy and Dr. King set during their leadership of the Montgomery bus boycott.

He and Dr. King were the "Movement's Twins." They were just young men in 1955 when they led the Montgomery bus boycott. They were young men leading—not just a community—but the Nation and the world. They were my heroes, my friends, and later, my colleagues in the struggle for peace, freedom, and fairness. If it had not been for Dr. King and Reverend Abernathy, I don't know what would have happened to me. They showed me and many others the power and moral authority of nonviolent protest.

As Dr. King's closest associate, Reverend Abernathy was embodiment of the spirit of the civil rights movement. He showed tremendous courage in standing up to the brutal system of segregation and racial degradation that had existed in the South. He was a fighter and a champion of justice.

Time and time again over our 30-year association, we marched together, we went to jail together, and we prayed together—all in the struggle for peace, freedom, and fairness.

I salute the life of Reverend Ralph D. Abernathy. He should be remembered as a great individual who served his fellow man with greatness.

PRESIDENT BUSH HAS KEPT HIS PROMISE ON THE ENVIRONMENT

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, we have heard a number of statements already and we will hear a few more from that side of the aisle, talking about our great President, George Bush.

You know, back in 1988 when there was a question of which Republican we would nominate to take the place of the great Ronald Reagan, many of us picked George Bush because he promised to put his emphasis as President on saving the environment. If any President has ever lived up to a promise, it is George Bush. He has put his weight behind raising the Environmental Protection Agency to Cabinet-level status, so that we will have an equivalent department to all the other industrialized nations around the world. He has put his backing behind the Environmental Protection Agency plan to rewrite the Clean Air Act, which is going to stop acid rain from coming into my Adirondack Mountains and my Catskill Mountains.

Now that we all agree that we have to concentrate on the environment, I expect everybody on that side of the aisle to join with everybody on this side of the aisle to unanimously pass the Clean Air Act so that we can stop acid rain once and forever.

"Thanks for putting your weight behind it, folks. We appreciate it."

THE ENVIRONMENT

(Mr. HOAGLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOAGLAND. Mr. Speaker, just the other day USA Today contacted me at my office and asked me what I personally was going to do to work for the environment as we begin this Earth Day celebration.

My answer was simple. I told them that I would do what my wife tells me to do, because my wife works to help teach our four children the value of preserving the environment for their generation and for future generations. Her attitude is that if we can teach our children responsible habits at an early age, they will carry those habits with them for a lifetime.

Barbara has two basic rules for our family. The first is to conserve energy, and the second is to have the children save for recycling whatever they can. Even though our children are very young, Barbara is attempting to teach them the importance of saving electricity. They know the less electricity we use, the less coal or oil we use, the cleaner the air and the water.

Now, of course, my wife's pet project is to save gasoline and therefore reduce air pollution by having me take the subway, so here I am, delivered to Congress by the Metro.

Mr. Speaker, we should all remember one simple saying when we think about the environment on Earth Day, and that is that we do not inherit the Earth from our parents, we borrow it from our children. We need to work hard to conserve energy and preserve the environment. Our future depends on it.

A TRIBUTE TO A YOUNG AMERICAN HERO

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute.)

Mr. APPLEGATE. Mr. Speaker, I, too, would like to pay tribute to an American hero, as the gentleman from Georgia [Mr. LEWIS] had mentioned about Reverend Abernathy, and I agree; but this one is a young fellow. His name is Ryan White. Ryan White died a few days ago because he was a hemophiliac and contracted AIDS. He was truly an American hero.

One thing about Ryan White is the fact that he did not like his celebrity status because he had AIDS. I do not think that was really the reason that he was projected as such. I think AIDS was a thrust which threw him out to the American people because he had been rejected by his own town and then accepted by another.

I think his celebrity status came as a result of his courage, his compassion, and his intelligence, and I think that people who heard Ryan White and heard him speak and speaking to young people, trying to get a message across, knowing that his days were numbered, I think will live as a tribute.

He truly is an American hero. He truly is my hero, and I only regret that I did not get a chance to know him, but he is at rest now. He will stand, though, for years to come as a symbol to many people in this country for those things for which he stood.

□ 1250

CRIME PACKAGE

(Mr. GOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSS. Mr. Speaker, when people across the country wake up in the morning, they generally are not thinking about price fixing. More likely, they are concerned about the seemingly endless litany of murders, rapes, robberies, and drug busts that dominate the days' news.

That is what the American people are upset about, the real, and very frightening threat of crime and drugs, not in some faraway place, but in their own communities.

There is no reason why this body should not be responding decisively to the legitimate concerns of the American public. It is time we started working on developing responsible, meaningful legislation to fight crime.

More than 10 months ago, President Bush sent us a comprehensive crime package, and we have not yet considered the issue. Instead, we have spent dozens of legislative sessions discussing technical matters that any one of us would rank lower on our list of priorities than fighting crime.

We have heard a lot of rhetoric about the need to get tough on criminals. But so far the President's crime package gathers dust. While we occupy ourselves too often with lesser matters.

EMPLOYER SANCTIONS

(Mr. BUSTAMANTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUSTAMANTE. Mr. Speaker, I join my colleagues from New Mexico and California today to express my concern about the employer sanctions provisions of the Immigration Reform and Control Act of 1986. It has been clear for some time now that these provisions have caused employment discrimination against minorities simply because individuals are perceived by potential employers as being "foreign." When I voted for immigration reform, I and many others expressed our concern that the employer sanction provisions could cause discrimination. We agreed to support the bill on the condition that Congress would revisit the discrimination issue in 3 years and remedy a problem if one had in fact developed. Recently, the General Accounting Office released a report confirming that employer sanctions had in fact caused widespread discrimination against U.S. citizens and legal residents.

I believe it is now the duty of Congress to respond swiftly and repeal these discriminatory provisions. Accordingly, I have cosponsored resolutions to repeal employer sanctions and I urge my colleagues on the Immigration Subcommittee to schedule hearings on the issue as soon as possible. Anything less than immediate action on this matter will constitute blatant neglect of a serious discrimination problem in this country. Hard-working Hispanic, Asian, and other minority citizens across the Nation urgently need our help. We must respond.

EARTH DAY

(Ms. KAPTUR asked and was given permission to address the House for 1

minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, this Sunday we will celebrate the 20th anniversary of Earth Day. Twenty years ago Americans demonstrated the concerns that we as a country have about our environment and, as a result, shortly thereafter major legislation passed this Congress.

The Clean Air Act amendments set air quality standards for our entire country. The Clean Water Act was enacted, and the Environmental Protection Agency was established. New emphasis was placed on the importance of protecting our environment and the health of our citizens.

This year Earth Day will be recognized throughout the world. During our recent delegation visit to central and Eastern Europe, we were overwhelmed by the environmental degradation apparent and in need of attention in that part of our world.

By contrast, in my home community of Toledo, OH, we can boast of being one of the leading environmentally conscious communities in America for resource recovery, recycling, and reuse.

Some of the jobs being created in my district directly flow from new environmental technologies. N-Viro Energy Systems in Toledo has taken the lead in utilizing byproducts to manufacture new products. For example, kiln dust and sewage sludge are combined to produce fertilizer that is safe and odorless. Plastics Technologies of Toledo is recovering copper, brass, and plastics for reuse and resale. Omni Source in Toledo is recovering precious metals, and Glasstech has invented new solar technologies and new glass products for the future.

Through global, local, and individual means, we can make significant changes and encourage a lifestyle which emphasizes conserving, recovering, reusing, and recycling our Earth's precious resources.

It is time to make our world a cleaner and safer place to live. After all, it is the only Earth we have.

BRIEFING REGARDING B-2 PROGRAM

(Mrs. BYRON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BYRON. Mr. Speaker, as cochairman of the Stealth Caucus, I would like to inform my colleagues of an upcoming series of briefings regarding the B-2 program.

Mr. Speaker, the purpose of these briefings is quite simple. As Members of Congress, we will soon be faced with the difficult decisions affecting our national security, and the Stealth Caucus would like to provide all Members with a forum for gathering as much information on the B-2 program as they deem necessary to make the tough choices for the future.

Those of us on the Committee on Armed Services are divided on this issue. How can we make a decision without knowing the facts?

This Friday we will have a beginning, and the Air Force will come and be available to discuss the cost aspects of the B-2 program. I encourage Members and their staffs to take advantage of this opportunity, especially in light of the different cost figures that are now being cited by various groups.

While this briefing will concentrate on the cost, we will later at an available date discuss the mission and then also the Stealth technology.

I urge my colleagues to take advantage of this opportunity.

CHESAPEAKE BAY

(Mr. CARDIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. CARDIN. Mr. Speaker, 20 years ago, the Chesapeake Bay was still considered the world's richest estuary with unparalleled fisheries. But long-term environmental misuse started taking its toll. The underwater grasses began to disappear, and the fisheries declined. Fish once plentiful, such as the striped bass, began to vanish. Bay-wide cleanup programs to control the increased usage and abuse of the bay did not exist.

In 1975, bay watch programs began after the EPA was commissioned to study the loss of the grasseries, toxic contamination of the bay, and oxygen loss.

In 1987, the Federal Government, along with Maryland, Virginia, the District of Columbia, and Pennsylvania signed the Chesapeake Bay Agreement which pledged to establish a cleanup policy to restore the bay's natural resources.

The past 20 years have brought a new awareness, and with it a new commitment to preserve the Chesapeake. But the more we learn about the bay, the greater is our understanding of its fragility. The Chesapeake Bay has greatly improved over the past decade, but this is truly a war we have just begun to fight. We must move forward with stronger regulations to avoid environmental neglect, because once we have lost our resources to neglect, they cannot be recovered.

FLORIDA KEYS ESPECIALLY VULNERABLE TO POSSIBLE OIL SPILL

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, on Earth Day weekend, the President is going to Islamorada to enjoy the clear ocean waters and pristine beaches of the famous Florida Keys.

Yet even as he enjoys the unique natural beauty of these waters, he seems intent on risking their destruction. The President has time and again refused to support a permanent ban on offshore oil drilling in the Florida Keys.

Although he has visited the keys, the President is evidently not familiar with them. Evidently he does not realize that because of the keys' sandy and porous soil, unique coral reefs, and swirling currents, the keys would never, I repeat, never recover from an oilspill.

The delicate coral reefs would be blackened and die. The porous beaches would be irrevocably soiled and would literally have to be hauled away. Water currents would play havoc with any futile cleanup effort, spreading the spill across the entire region. In short, the keys would stand no chance.

Mr. Speaker, I hope the President can visualize blackened beaches, damaged reefs, and dead fish and water fowl. I hope he can also visualize the complete ruination of an economy which depends on the environment. Because unless he acts, that is what the President may find next time he visits the keys.

MERGERS AND BUYOUTS CRIPPLE MAIN STREET

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I am not going to speak on a galactic issue such as peace in Europe, or acid rain, or global warming. But I am speaking to a topic of great importance to Louisville, KY, my hometown and congressional district.

Without so much as a "fare thee well," on Monday, Hess's Department Store, Inc., an Allentown, PA, corporation, shut down its Hess' store in downtown Louisville, KY, after 83 years of operation at that location—perhaps the most important spot in the downtown area of Louisville.

This is no knock on Pennsylvania that Allentown is the home headquarters of Hess. But absentee ownership encouraged by leveraged buyouts, by the merger mania that we have seen for the last 10 years, makes for bloodless, insensitive, and callous business operations.

□ 1300

Why, for example, would any Pennsylvania corporation, or a Wyoming corporation, or any other corporation, care about the heritage and traditions

of Louisville, KY, or care about our esthetics?

Congress may not be able to fill the vacant building at Fourth and Muhammad Ali, Mr. Speaker. It may not be able to take down the kraft paper in the windows and open for business next Monday. But certainly Congress should look at our tax laws or any other laws on our books which somehow encourage and give advantages to those who would merge and buyout and consolidate. These mergers and buyouts may add wealth to Wall Street, Mr. Speaker, but they are killing the wealth of Main Street, or, as in my case in Louisville, killing the wealth of Fourth Avenue.

OFFSHORE WOODBURNING

(Mr. PALLONE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PALLONE. Mr. Speaker, in the district that I represent, located along the New Jersey shore, public support for environmental protection is at least as strong, and possibly stronger, than in any other region of our country. The quality of the coastal environment where my constituents live is vital to their quality of life, and in many cases, their livelihoods.

That is why I would like to address at this time a unique threat to the waters of the Jersey shore: The practice of burning wood collected from New York Harbor on open barges at a site 17 miles offshore from some of our most popular bathing beaches. This practice, conducted under EPA permits, results in half-charred timbers landing in the coastal waters, creating a threat to navigation for small private vessels, posing a danger to swimmers, and cluttering our beaches. The fumes from the burn process include creosote and other toxic substances that harm the marine environment and the fish that are caught for human consumption.

At this time of supposedly great enlightenment about the need for protecting our environment, it is unacceptable that our EPA continues to permit this primitive, outdated, irresponsible, and unnecessary disposal practice. I have introduced legislation that would impose a firm deadline at the end of 1991, for when woodburning must be halted. But I am using this occasion to reiterate to the EPA that it is entirely feasible for this practice to be halted much sooner than that. Such a step by the EPA would send the signal that the ideals of Earth Day really do have meaning to our Nation's top environmental officials, the point that we are trying to make, now that Earth Day approaches over the next few weeks.

BUDGET PROCESS REFORM ACT OF 1990

(Mr. COX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COX. Mr. Speaker, Monday this week, April 16, was tax day. Millions of Americans paid over $1 trillion to keep our Federal Government and all of its bureaucrats and programs and debts paid up. Post offices around the country stayed open so that taxpayers could meet their midnight filing deadline.

No one in America likes to pay taxes, but there is not much question that most Americans take seriously our responsibility to do so by the April 15 deadline.

Here in the Congress, where we are responsible for spending that $1 trillion, there is no such sense of responsibility. April 15 here was also the deadline for the Congress to pass a budget. It has come and gone, and the Congress, as usual, has failed to do so.

Already the House has passed tens of billions of dollars of new spending, spending that was not included in the budget of the President. The Congress does not know where this money is coming from because the Congress does not have a plan. The Congress does not have a budget.

As a result of this slipshod congressional management of our budget process, interest on the national debt this year will accumulate more than all of the taxes paid by all of the people in California from where I come, and all of the taxes paid by all of the people west of the Mississippi.

It is time we cleaned up the budget mess. It is time we stopped breaking the law here in the Congress. Soon I will introduce the Budget Process Reform Act of 1990, with over 100 cosponsors in this House. Soon we will find out whether Congress is serious about its responsibilities to current and future generations of Americans.

SUNDRY DEFERRALS OF BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-170)

The SPEAKER pro tempore (Mr. MONTGOMERY) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three revised deferrals of budget authority now totaling $2,097,533,159.

The deferrals affect programs in Funds Appropriated to the President and the Departments of Defense and Health and Human Services. The details of the deferrals are contained in the attached report.

GEORGE BUSH.

THE WHITE HOUSE, *April 18, 1990.*

ANNUAL REPORT OF NATIONAL ENDOWMENT FOR THE HUMANITIES, FISCAL YEAR 1989—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

In accordance with the provisions of the National Foundation on the Arts and Humanities Act of 1965, as amended (20 U.S.C. 959(b)), I am pleased to transmit herewith the 24th Annual Report of the National Endowment for the Humanities for fiscal year 1989.

GEORGE BUSH.

THE WHITE HOUSE, *April 18, 1990.*

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Public Works and Transportation, which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, DC, April 5, 1990.

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, the House Committee on Public Works and Transportation approved the following resolutions on April 3, 1990:

11(b) RESOLUTIONS

Birmingham, Alabama, Metropolitan Area.
St. Louis, Missouri.
Beaver County, Pennsylvania.
Utica, New York.
Tallahassee, Florida.
Elberton, Georgia.
Kansas City, Missouri.
Washington, D.C.

The original and one copy of the authorizing resolution is enclosed.

Sincerely,

GLENN M. ANDERSON,
Chairman.

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3848, DEPOSITORY INSTITUTION MONEY LAUNDERING AMENDMENTS OF 1990

Mr. FROST, from the Committee on Rules, submitted a privileged report (Rept. No. 101-449) on the resolution (H. Res. 378) providing for the consideration of the bill (H.R. 3848) to require the appropriate Federal depository institution regulatory agency to revoke the charter of any Federal depository institution which is found guilty of a crime involving money laundering or monetary transaction report offenses and to require the Federal Deposit Insurance Corporation and the National Credit Union Administration Board to terminate the deposit insurance of any State depository institution which is found guilty of any such crime, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4380, SUPERCONDUCTING SUPER COLLIDER PROJECT AUTHORIZATION ACT OF 1990

Mr. FROST, from the Committee on Rules, submitted a privileged report (Rept. No. 101-450) on the resolution (H. Res. 379) providing for the consideration of the bill (H.R. 4380) to authorize appropriations for the Superconducting Super Collider, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PRICE FIXING PREVENTION ACT OF 1989

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 373 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 373

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1236) to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and which shall not exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the committee on the Judiciary, the bill shall be considered for amendment under the five-minute rule and each section shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from New York [Mr. SOLOMON], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 373 is a simple open rule providing for the consideration of H.R. 1236, a bill to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary. When the bill is considered for amendment under the 5-minute rule, the rule also provides that each section shall be considered as having been read. And, because this is an open rule, any amendment germane to H.R. 1236 will be in order when the bill is read for amendment.

Finally, Mr. Speaker, House Resolution 373 provides that at the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as having been ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. Speaker, H.R. 1236 is a proconsumer bill. The bill seeks to prohibit vertical price-fixing by establishing evidentiary standards for Federal civil antitrust claims based on resale price fixing. Price fixing is prohibited under the Sherman Anti-Trust Act, but since the early 1980's the Department of Justice has not pursued prosecution of such price fixing and the Supreme Court has handed down decisions which have created confusion as to the evidentiary standards to be applied in dealer termination cases. The Judiciary Committee is to be commended for bringing this important proconsumer legislation to the House for consideration, and I urge my colleagues to adopt the rule so that the House may proceed to the consideration of H.R. 1236.

□ 1310

Mr. Speaker, I reserve the balance of my time.

Mr. SOLOMON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1920, Warren G. Harding promised the Nation a "return to normalcy." In 1990, I am pleased to join the gentleman from Texas in returning this House to normalcy. This is a fully open rule for which I strongly urge support.

After the debacle of a couple of weeks ago, we can all be grateful to Chairman BROOKS of the Judiciary Committee for requesting an open rule, and to the Rules Committee for writing one. An open rule provides the House with the opportunity to debate H.R. 1236 in a fair and civilized manner. And so I urge support for the rule, confident in the hope that it does indeed signal a return to normalcy.

The bill itself, Mr. Speaker, is another story. H.R. 1236, it seems to me, falls into that category of a solution searching for a problem. This isn't the first bill we've had this year which fits that description, and I am sure it will not be the last.

In the words of the dissenting views signed by a number of Republicans on the Judiciary Committee, this bill is likely to create a legal situation that will do serious and costly harm to thousands of businesses.

Reading further in the dissenting views: This bill is "greatly expanding the risk of antitrust liability for routine, everyday decisions made by companies with respect to the distribution and marketing of the products they manufacture and sell."

I am also concerned that H.R. 1236 seems to address only one aspect of the relationship that exists between manufacturers, distributors, and consumers: namely, pricing. But it seems to me that the servicing of a product is equally as important in maintaining a clientele of customers for a given manufacturer and distributor.

The small business, the mom-and-pop stores, and all the others which have worked so hard to build such a clientele aren't frightened by the prospect of competition from the discount chains. These kinds of businesses know the value of loyalty—that much abused virtue. They know that there is more to building a successful business than merely offering a low price.

But, in my view, this bill does not take into account such realities in the marketplace. It is a short-sighted attempt to solve a problem when no such problem has been demonstrated to exist, at least it doesn't exist to the extent that would warrant the use of such a blunt instrument as H.R. 1236.

We should exercise caution whenever we consider passing a bill that holds the potential for opening the floodgates of litigation. This bill holds that potential—and for no good reason! This bill threatens to embroil legitimate businesses in costly litigation—court cases brought on the flimsiest of evidence for the narrowest of purposes. The bill in its present form is nothing but a lawyers income enhancement program. So if you want to line the pockets of lawyers with money, vote for the bill.

Mr. Speaker, the rule is a good rule which will permit us to amend the serious deficiencies in H.R. 1236.

However, Mr. WALKER of Pennsylvania will attempt to defeat the previous question in order to make in order an amendment containing the text of H.R. 3119, which is the President's anticrime package.

Mr. Speaker, I yield 5 minutes to the gentleman from Tennessee [Mr. QUILLEN], the ranking minority member of the Committee on Rules.

Mr. QUILLEN. Mr. Speaker, I rise in opposition to H.R. 1236, the Price Fixing Prevention Act.

I am not an antitrust lawyer, but H.R. 1236, seems inherently unfair to me. In essence, H.R. 1236 attaches a presumption of liability to a manufacturer just because one of its dealers complains about another dealers' pricing policies. If the manufacturer later terminates the complained-about dealer for any reason, however legitimate, he is going to face an antitrust suit and probably a full trial on the merits, just because a third party complaint exists in the files. Manufacturers cannot stop dealers from complaining about each other, any more than we can stop our constituents from complaining to us. I find this sort of potential liability, premised on nothing more pernicious than a manufacturer opening its mail, to be fundamentally unfair.

If a terminated dealer alleges a vertical price-fixing conspiracy, let that dealer carry its minimal burden of proof by showing at least a complaint, followed by termination, plus something more by way of direct or circumstantial evidence to indicate that an illegal conspiracy exists. The plaintiff in the Monsanto case made such a showing, based upon some additional evidence of conspiracy, and recovered over $10 million. Let's bear in mind that we are not talking about a situation that involves minimal financial exposure, plus a full opportunity to defend your conduct at trial. We are dealing with treble damage liability, plus the plaintiffs' attorney's fees. Moreover, since a conspiracy to fix resale prices is per se illegal, a manufacturer's only real defense is that it did not conspire. Especially in the circumstance of treble damages and a per se violation, I do not see any reason to infer such a conspiracy from the mere receipt of a dealer's complaint. There is not another law on the books I can think of which actively encourages the imposition of punitive sanctions for conduct which is both unavoidable and lawful. In short, I cannot believe that H.R. 1236 can be justified by its proponents as either necessary or fair. Very simply, the Monsanto decision should not be reversed.

Mr. Speaker, this legislation also reverses the Supreme Court's 1988 Sharp Electronics decision. Simply put, that decision reached the logical conclusion that in order to be liable for price-fixing, a defendant must be shown to have agreed on a specific price or price-level. An agreement to terminate a dealer on the basis of his pricing policy is not enough. Again, while I am not an antitrust lawyer, the wisdom of that decision is apparent to me.

Mr. Speaker, at issue today is no less than the freedom of our system of commerce to be flexible and responsive to the needs of consumers. Passing this legislation would take us a giant step backward. While the proponents of this legislation say this bill is necessary to prevent price fixing, we must all remember that vertical price fixing has been illegal since 1911. This bill is not necessary to do what is already the law.

I urge my colleagues to vote against this ill-conceived legislation.

□ 1330

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. FISH], the ranking Republican on the Committee on the Judiciary.

Mr. FISH. Mr. Speaker, this legislation is not only opposed by manufacturers and the various trade associations representing manufacturers, it is also opposed by a number of retail organizations. Further, H.R. 1236 is opposed by the American Bar Association and the nationally respected Antitrust Section of the City Bar Association of the City of New York.

I would like to point out, Mr. Speaker, that the American Bar Association and the City Bar have lawyer members that represent both plaintiffs and defendants in these types of antitrust cases. Therefore, I think it is particularly noteworthy that both these organizations unequivocally are opposed to H.R. 1236, because they are the most qualified to understand its real consequences.

My purpose for rising under the rule primarily, Mr. Speaker, is to have inserted in the RECORD letters from the two Federal Government antitrust enforcement agencies, the Department of Justice and the Federal Trade Commission. Both these letters are addressed to me. The letter from the Attorney General, of April 3, reads:

DEAR HAM: This letter is in response to your request for a restatement of the views of the Department of Justice on H.R. 1236, a bill that addresses alleged resale price maintenance agreements between manufacturers and distributers as a basis for treble damage claims under the antitrust laws. For the reasons discussed below, I and other senior advisers to the President would recommend Executive disapproval of H.R. 1236, if it reached the President's desk.

I would like to insert both this letter from the Attorney General, and a letter dated April 17, addressed to me, from the Federal Trade Commission, signed by Janet D. Steiger, Chairman.

The letters referred to follow:

OFFICE OF THE ATTORNEY GENERAL,
Washington, DC, April 3, 1990.

Hon. HAMILTON FISH, Jr.,
Ranking Minority Member, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR HAM: This letter is in response to your request for a restatement of the views of the Department of Justice on H.R. 1236, a bill that addresses alleged resale price maintenance agreements between manufacturers and distributors as a basis for treble-damage claims under the antitrust laws. For the reasons discussed below, I and other senior advisors to the President would recommend Executive disapproval of H.R. 1236, if it reached the President's desk.

Our serious concerns with the bill are as follows:

The freedom of a manufacturer unilaterally to decide whether or not to deal with a distributor is an essential part of our free enterprise system. H.R. 1236 would create a presumption of illegality for such conduct, forcing a manufacturer to prove his innocence or face penalties.

Contrary to the predictions of those who support overturning the *Monsanto* and *Sharp* decisions as contemplated by H.R. 1236, discounters are thriving under current laws.

Manufacturers rely on feedback from their distributors to ensure they are supplying the market with the goods and services that consumers want. H.R. 1236 could hinder this exchange of information, complicating this process.

Product expertise and exclusive distributorships actually benefit consumers. Manufacturers should be free to terminate dealers who don't provide adequate product service. H.S. 1236 could make this illegal.

The Office of Management and Budget has advised us that there is no objection to the submission of this report and that enactment of H.R. 1236 would not be in accord with the program of the President.

Sincerely

DICK THORNBURGH,
Attorney General.

FEDERAL TRADE COMMISSION,
Washington, DC, April 17, 1990.

Hon. HAMILTON FISH, Jr.,
Ranking Minority Member, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR REPRESENTATIVE FISH: The Federal Trade Commission is pleased to have this opportunity to comment on H.R. 1236. If enacted, the proposed legislation would codify the existing per se prohibition of minimum resale price maintenance. In addition, the legislation would modify existing evidentiary presumptions in vertical price restraint cases. Under the bill, a finder of fact would be allowed to find a vertical price fixing conspiracy on the basis of evidence that a supplier had terminated or reduced its sales to a discounting dealer and that complaints concerning the discounter from a competitor had been "a substantial contributing cause" for the supplier's action.

The Commission believes that current law is adequate to address anticompetitive uses of resale price maintenance and that the proposed legislation is therefore unnecessary. The Commission opposes codification of the per se rule because it believes that the courts should continue to have the

flexibility to interpret the antitrust laws in light of current economic understanding. The Commission also believes that the evidentiary standard embodied in the bill is likely to result in the condemnation of legitimate resale pricing policies that are adopted unilaterally by sellers.

CODIFICATION OF THE PER SE RULE

H.R. 1236 would enact into law the existing per se prohibition of minimum resale price maintenance. The legal treatment of this practice traditionally has been determined by the courts under section 1 of the Sherman Act. The broad mandate of section 1 has led to the development of a common law of antitrust, which has evolved over the years as the economic foundations of competitive practices have become better understood. We would expect this evolution to continue in the future, and current law gives the courts the flexibility to interpret the antitrust laws in light of contemporary understanding of competitive practices. This is a tradition from which consumers have benefitted. The Court has recently reaffirmed the applicability of the per se rule to resale priced maintenance,[1] and we have no reason to believe that it will retreat from this position in the foreseeable future. Nevertheless, codification of the per se rule would create an undesirable rigidity in the law.

The Commission believes that vertical restraints, including resale price maintenance, can often serve procompetitive purposes. Suppliers commonly impose such restraints to facilitate the delivery to consumers of a variety of services that enhance the value of products. These services include informing consumers of product features and attributes, servicing the product both before and after the sale, providing product display facilities, and promoting the product.

Suppliers may use vertical price restraints to induce dealers to educate consumers fully about their products. Because acquiring the necessary expertise and conveying the desired information to consumers can be costly, dealers may be reluctant to provide retailing services if consumers can receive these services from one dealer and then buy the product more cheaply from another dealer who does not provide the services. Although in the very short run some consumers may benefit from lower prices, consumers will be harmed in the longer term because dealers would be discouraged from providing the desired services.[2] Vertical price restraints can also prevent free riding on promotional activities and thereby facilitate interbrand competition.

Suppliers may also use vertical restraints to ensure that dealers provide valuable retailing services that may be invisible to consumers at the time of purchase. These services affect the quality of the product as it is received by consumers and, therefore, the reputation of its manufacturer or distributor. For example, some products may require handling procedures to prevent latent damage. By guaranteeing higher margins to retailers through vertical restraints, suppliers can provide an incentive to dealers to provide those services.

Two empirical studies prepared by economists on the staff of the Commission have concluded that vertical price restraints often promote efficiency in distribution. One study found that most observed uses of resale price maintenance involve small firms in relatively unconcentrated markets.[3] Because the ability to raise prices above the competitive level usually requires a concentrated market structure, this evidence suggests that vertical price restraints are commonly used to benefit consumers. A more recent study concluded that approximately 70 percent of litigated cases concerning vertical price restraints involved restrictions designed to prevent erosion of dealer services.[4]

Resale price maintenance may, of course, be an instrument for anticompetitive practices, such as when the practice is used to facilitate or police collusion at the manufacturer or dealer level. The most recent empirical study by an economist on the staff of the Commission concluded that vertical price restraints had an anticompetitive potential in 15 percent of litigated cases.[5]

The Commission intends to enforce the prohibition against resale price maintenance whether the prohibition is a product of judicial doctrine or legislation. Nevertheless, the Commission believes that codifying the per se rule will introduce an undesirable rigidity into the law.

THE PROPOSED EVIDENTIARY STANDARD

H.R. 1236 would broaden the definition of an unlawful price fixing conspiracy by allowing triers of fact to find a conspiracy when a complaint from a discounting dealer's competitor was "a substantial contributing cause" of a supplier's termination of or curtailment of supply to the discounter. We are concerned that this aspect of the legislation would interfere with the ability of suppliers to select the distributors with whom they will deal.

The antitrust laws have traditionally permitted sellers to take unilateral action to restrict pricing decisions by downstream distributors. This has been the law since the Supreme Court held in *United States* v. *Colgate & Co.*[6] that a seller acting alone is free to "exercise his own independent discretion as to parties with whom he will deal." Under Colgate, sellers have been able to terminate dealers who do not adhere to announced price schedules, so long as there is no agreement to fix resale prices. Colgate was reaffirmed by the Supreme Court in *Monsanto Co.* v. *Spray-Rite Corp.*[7] H.R. 1236 would effectively overrule this long-standing doctrine and allow juries to find an unlawful conspiracy merely because a supplier, acting unilaterally, had terminated a discounting dealer after receiving complaints from full-service dealers.

The current legislation has its genesis in bills introduced in the 100th Congress to overrule the Monsanto decision. The hearings on these bills disclosed a concern that Monsanto has erected an exceedingly difficult standard of proof for establishing conspiracies to set resale prices. An examination of the Monsanto decision, however, shows that it did not place an unreasonable burden on plantiffs.

Monsanto does not mandate the exclusion of evidence concerning complaints to suppliers from the competitors of discounting dealers. Rather, the decision holds that evidence of such complaints, standing alone, is insufficient to support a finding of a price fixing conspiracy.[8] The Court said: "We do not suggest that evidence of complaints has no probative value, but only that the burden remains on the antitrust plaintiff to introduce additional evidence to support a finding of an unlawful contract, combination, or conspiracy."[9] Indeed, the Court went on to affirm a finding of a resale price maintenance conspiracy on the basis of circumstantial evidence. Consequently, we cannot agree that Monsanto has unreasonably increased the burden of proof for plaintiffs seeking to establish such a conspiracy.[10]

Under H.R. 1236, a trier of fact may rely on evidence of dealer complaints concerning a discounter to find a conspiracy even when that evidence is not supported by other circumstantial evidence. The bill would require a court to submit a case to the jury whenever evidence would permit the jury to conclude that a supplier's receipt of a complaint concerning a discounter had been "a substantial contributing cause" of the discounter's termination.

The bill fails to recognize that suppliers and dealers may have a common interest in promoting various distribution services, and that suppliers may act in ways that benefit complaining dealers without any agreement or commitment to a joint course of illegal action. Suppliers may wish to eliminate discounting dealers because discounters, by failing to provide support services that suppliers want customers to receive and, instead, free riding on competing dealers who do provide such services, jeopardize the suppliers' product marketing plans. A decision to cut off a price cutter, even if prompted by a communication from a competing dealer, may therefore serve the interests of the supplier as well as those of the complaining dealer. When two firms take actions in their own self interest, as "agreement" should not be inferred merely because the actions are mutually beneficial. As the Commission observed in *General Motors Corp.*, 99 F.T.C. 564, 576 (1982), "Even in cases where direct action is taken by the supplier, and such action is precisely what is requested by complaining distributors, the inference of concerted action, 'a conscious commitment to a common scheme,' is not made automatically." Yet, under the bill a supplier would risk antitrust liability whenever it terminates or fails to provide all of the supplies requested by a dealer following the receipt of a complaint from another dealer. A jury would be free to find that such a complaint, merely by alerting the supplier to the discounting, was "a substantial contributing cause" of the termination.

It if possible that enactment of this bill could induce some manufacturers to integrate downward to lower distribution levels. This would enable them to ensure that consumers receive the necessary level of serv-

---

[1] See *Business Electronics Corp.* v. *Sharp Electronics Corp.*, 108 S. Ct. 1515 (1988).

[2] Certainly there are consumers who do not want or need higher levels of retail services, and some manufacturers will choose to serve them. H.R. 1236 would make it more difficult, however, for manufacturers to provide higher levels of these services to the consumers who want more service.

[10] The Monsanto rule was affirmed in *Business Electronics Corp.* v. *Sharp Electronics Corp.*, 108 S. Ct. 1515 (1988), which held that an agreement to terminate a discounter, in and of itself, does not establish an agreement to fix resale prices. We read Sharp only to require the submission of some evidence of an agreement on price, which Monsanto required as well.

ices, without incurring the risk of free riding or antitrust liability. Ironically, downward integration would harm those dealers that the bill is intended to protect.

CONCLUSION

The Commission is concerned that enactment of H.R. 1236 could stifle some procompetitive conduct and expose suppliers to antitrust liability for unilateral action that traditionally and appropriately has been protected from antitrust liability. For this reason, the Commission opposes enactment of this proposed legislation.

By direction of the Commission. Commissioner Strenio does not join in this letter. Commissioner Owen did not participate in this matter.

Sincerely,

JANET D. STEIGER,
Chairman.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding to me, and I rise to say that the open rule is certainly a very welcome thing to have on the floor, but we will attempt to defeat the previous question in order to try to get an amendment brought to the floor that would permit the President's crime package to be considered as a part of our effort here today.

Some Member may say, well, if we are dealing with the price fixing bill, why bring up the crime package now? First, the committee of jurisdiction on the crime package is the Committee on the Judiciary. They are active, they had the President's crime package before them for 10 months, and we have seen no activity whatsoever.

This is also an open rule. We often get bills out from the Committee on the Judicary that do not come out under open rules, and its seems appropriate to have an open rule to consider the crime package, because it is a fairly massive effort, and something that Members should have an opportunity to amend. We ought to have full debate, and the open rule makes sense there.

If the committee is not going to debate the issue of the crime and violence and deal with an issue that the American people regard as uppermost in their minds, it seems to me we ought to debate it on the floor. What we are trying to do is give the Members an opportunity to debate that very fundamental issue on the floor. I realize the schedule of the committee was impacted, of course, by illness of the chairman, the gentleman from Texas. We are glad to see him back and in fighting trim here again on the House floor. However, we are troubled that even though the chairman was not available for a period of time, and we understand that, the subcommittee of his committee have not acted on the President's crime package at this point. We feel as though the need for action on the crime package is now, and that this will give the Members an opportunity to reflect on whether or not they also believe that this is a priority. We do not want the American people to believe we have a priority of a price fixing bill, and not a priority of the crime package. So really, what we are asking Members to do is choose among which priority they regard as most important. If the Committee on the Judiciary is coming to the floor and bringing things to Members for debate, we think the real thing we ought to be debating in this Congress at this point is crime and violence. Let Members get the President's crime package to the floor.

Mr. MOAKLEY. Mr. Speaker, I yield myself 1 minute.

I am reading from the RECORD of the House of March 19, quoting the gentleman who just left the microphone. It says,

> Obviously, that would solve this problem if the Democrats were willing to bring a bill to the floor with an absolutely open rule so that we could take the language in the bill and modify it as a result of the work of the committee as a whole, and that would certainly be an acceptable way of dealing with the matter.

That is what we are doing, Mr. Speaker. We are bringing a bill to the floor with an absolutely open rule in order that the gentleman can amend it within the rules of the House.

Mr. SOLOMON. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I appreciate the chairman quoting me, and I would say to the gentleman from Massachusetts [Mr. MOAKLEY] that I said that, and that I am pleased it is an open rule. One reason for offering the motion to strike on the previous question, or the defeat of the previous question, is so that the crime package can be debated under the same open rule. It gives Members an opportunity to look at these issues and deal with them under an open rule.

I congratulate the committee for the open rule. We would like to expand it and make certain we get more subject matters out here under debate under the open rule, including crime.

Mr. SOLOMON. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, let me ask the gentleman from Massachusetts [Mr. MOAKLEY] a question on my own time.

The gentleman says that under this rule we could offer our amendment, right?

Mr. MOAKLEY. Mr. Speaker, if the gentleman will yield, I said under this rule you can offer any germane amendments.

Mr. DANNEMEYER. But that is the interesting key word "germane."

Mr. MOAKLEY. Of course, the gentleman is aware we operate under the germaneness of the House.

Mr. DANNEMEYER. That is a point I seek to make. The crime package we seek to bring to the floor for debate, if we offered to the rule that is a part of this package, the Parliamentarian, I suspect, would rule that it is not germane, we cannot bring it up.

Mr. MOAKLEY. The gentleman is absolutely——

Mr. DANNEMEYER. That is our whole point, why we want to defeat the previous question, so that we can offer a rule that would permit Members. After all, Democrats control this place and determine when we are going to take up what bill and under what circumstances they can write the rule. They can write a rule that waives all the points of order. They have done so repeatedly.

We will offer a rule that will permit Members to offer the crime package that is not germane to your price-fixing bill. That is why we want to defeat the previous question. Does the Member think that is a good idea?

Mr. MOAKLEY. If the gentleman is asking me a question, no, I do not think so. I think the gentleman should wait for the appropriate vehicle and bring the bill to the floor.

Mr. DANNEMEYER. We have been waiting for months, and as I say, the importance of this issue cannot be overemphasized for those people in the country that support capital punishment, and I am one.

As a Californian, I can tell Members what is happening in the courts of this country dealing with implementing capital punishment, is a tragedy, and it is bringing the entire administration of justice in America into disgrace. The case that I cite to emphasize this point is a fellow named Harris, who was convicted years ago for a heinous crime in San Diego County, CA, where he took the lives of a couple of young kids, snuffed them out. He went through the entire appellate process in the California court system, and this defendant, now sitting on death row in San Quentin, CA, on the eve of a recent execution was able to convince a member of the Circuit Court of Appeals of the Federal system in San Francisco to give a stay, not more than 2 or 3 weeks ago. This happened to be the third stay.

What we need, and it is part of the crime package that we want to bring to the floor of the House, is a reform of the habeas corpus proceeding so that after a person is convicted, with due process, in a State court, and a capital punishment is ordered, that person gets one shot and one shot only in the Federal court system by way of review.

That, to me, is all the due process that any person should be entitled to enjoy, and that is an indispensable essential part of the crime package that

we want to bring to the floor of the House.

□ 1330

Another essential part of it is the exclusionary rule. We have tried repeatedly over the past few years to modify the exclusionary rule so as to insert into the law a good faith requirement that when law enforcement obtains evidence in good faith, even though technically every "i" has not been dotted and every "t" has not been crossed, if good faith has been exhibited by law enforcement people, the evidence can be used, and we would then have the ability in criminal cases in the country to administer justice fairly.

Mr. Speaker, I ask for the defeat of the previous question so we can have a rule that would allow us to offer our amendment.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina [Mr. BALLENGER].

Mr. BALLENGER. Mr. Speaker, I would like to thank the gentleman for yielding this time to me, and I would like to say that we are going to debate a bill that will make vertical price fixing illegal. It is already illegal. All it is going to do is change it a little bit and make it easier for everybody to sue.

The people of this country today are worried to death about crime and drugs and everything else. The Judiciary Committee has the President's crime package in its fold, shall we say. I have a statistical analysis here from my home area of Charlotte, NC. This is what it says: "The risk a criminal will wind up in prison is less than half of what it was in 1950 * * *."

Those are FBI statistics. The people of the country today are worried about crime and drugs, and the only way we seem to be able to get any opportunity to ever approach the subject of the criminal system and the crime package the President has sent up is to defeat the previous question.

Mr. Speaker, I would just like to say that I would like to ask my colleagues to do that. Let us defeat the previous question and bring up the President's crime package.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. STEARNS].

Mr. STEARNS. Mr. Speaker, I also rise in support of the efforts of my colleague, the gentleman from Pennsylvania [Mr. WALKER], to defeat the previous question.

I think at this point my colleagues on this side are trying to make the statement that all of us go back to our home districts and we are continually asked, "Why don't we have the President's crime package on drugs?"

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield?

Mr. STEARNS. I am happy to yield to the gentleman from Massachusetts.

Mr. MOAKLEY. Mr. Speaker, the gentleman said they would want to make a statement. I ask, why did they not make it on the dire emergency supplemental bill with the Nicaraguan and Panamanian money in it? That happened 2 weeks ago, and they could have gotten the bill to the floor a lot quicker.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. STEARNS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

The problem, of course, is that that is an appropriation bill and we are not allowed to legislate on an appropriation bill. The chairman of the Rules Committee knows that.

We have the President's entire crime package here, and this is the Judiciary Committee. This is the committee of jurisdiction. I would suggest to the gentleman that he would probably regard it as inappropriate to bring a massive bill of the nature of the President's crime package on a supplemental appropriation bill as well.

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield?

Mr. STEARNS. I am happy to yield to the chairman of the Rules Committee.

Mr. MOAKLEY. Then I will yield the gentleman some more time if he needs it later.

Mr. STEARNS. I thank the gentleman.

Mr. MOAKLEY. Mr. Speaker, I think, since the gentleman on the other side is trying to waive the germaneness rule, you could have waived the rule on the dire emergency supplemental bill just as easily.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. STEARNS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Of course, but then the argument certainly would have been made that we are dealing with a supplemental appropriation bill that covers appropriations rather than the subject matter that we want to cover here, namely, crime and violence. That is in the Judiciary Committee's jurisdiction, and we think it is entirely appropriate to debate that under an open rule procedure, which is what we are asking to do today.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore (Mr. MONTGOMERY). The time of the gentleman from Florida [Mr. STEARNS] has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 2 additional minutes to the gentleman from Florida [Mr. STEARNS].

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman now yield?

Mr. STEARNS. I would just like to reclaim my time.

Mr. COLEMAN of Texas. Mr. Speaker, at the end of the gentleman's remarks, I would ask if he would consider yielding to me.

Mr. STEARNS. Yes, I would.

Mr. COLEMAN of Texas. I thank the gentleman.

Mr. STEARNS. Mr. Speaker, I think at this point this side of the aisle would just like to make the statement clear that by defeating the previous question we would have an opportunity to bring the President's proposal to the floor. It has been 9 months. Obviously you can have a baby in 9 months. It seems like on an important issue like crime and drugs we should be able to get this matter on the House floor here in this country.

So, Mr. Speaker, I support the defeat of the previous question, and I am now glad to yield to the gentleman from Texas.

Mr. COLEMAN of Texas. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, the gentleman says he wants to get it on the House floor without it going through the committee process; is that right?

Mr. STEARNS. I think what we want to do is to get this fully debated on the House floor.

Mr. COLEMAN of Texas. No, I would ask the gentleman to just answer my question. You want to avoid the committee process, is that not correct? You want to bring it on the House floor the way you want it, not the way the committee or the other members of the committee process would consider bringing it to the House floor?

Mr. STEARNS. Mr. Speaker, I would reclaim my time.

The SPEAKER pro tempore. The gentleman from Florida [Mr. STEARNS] has the time, and he reclaims his time.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. STEARNS. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, the gentleman from Texas seems to forget the fact that the President's crime package has been in the committee process now for 10 months. In other words, it has been buried in the committee, and we think it is time to unbury it.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield on that question?

Mr. WALKER. We think it should be brought to the floor rather than have it buried in the committee.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield, yes or no?

Mr. WALKER. This gentleman does not control the time.

Mr. STEARNS. I have the time, Mr. Speaker. I will finish, and then I will be glad to yield.

Mr. COLEMAN of Texas. Mr. Speaker, Mr. Speaker, will the gentleman yield to me, please?

Mr. STEARNS. I yield to the gentleman from Texas.

Mr. COLEMAN of Texas. Mr. Speaker, the gentleman says it has been there 10 months. I have had a bill that has been in the committee longer than that. It seems appropriate that the committee process should be permitted to work.

What you want is to bring the bill on the floor only as you want it, not going through the committee process where others have the right to bring up amendments and offer them and discuss them and debate them. Is that correct, yes or no?

Mr. STEARNS. Mr. Speaker, may I reclaim my time?

The SPEAKER pro tempore. The gentleman from Florida [Mr. STEARNS] reclaims his time, and the gentleman is recognized.

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield?

Mr. STEARNS. I yield to my colleague, the gentleman from California.

Mr. DANNEMEYER. Mr. Speaker, I say to my friend that we are here because, very simply, the chairman of the Judiciary Committee, as we know, has been ill, and we are glad to see him back. Aside from that, there has been ample time for the Judiciary Committee, of which this Member is a member, to consider this legislation, and it is buried there in the bottom of the box. That is the problem.

The SPEAKER pro tempore. The time of the gentleman from Florida [Mr. STEARNS] has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I think it is interesting that my colleagues, the gentleman from California and the gentleman from Florida, would come out here and say that this is the only way to get the bill to the House floor. It is pretty obvious that they do not understand the process. We have a committee process. A lot of bills stay in the committee longer than a lot of us would like them to. Yet you want to say, "We can avoid all that process, and I can get the bill on the House floor only the way I want the bill on the House floor."

What they ask for, I say to my colleagues, is anarchy. They think that everybody should bring a bill out only as they want it so all of us can spend all day or a week or a month debating the bill as we individually want them to debate it.

I think everyone fully understands the tomfoolery and trickery offered by the gentleman from Pennsylvania and his colleagues, the gentleman from California and the gentleman from Florida. What they are after is a process that permits them, and only them, the right and the prerogatives and the privilege of saying what gets on this floor and when it gets on this floor, with this previous question procedural vote.

So I would ask all my colleagues to stand up for what is right in the process and that is to let the system work.

If you want to change the way bills get to the House floor, I suggest amendments to the rules. I suggest to the minority that they make some serious proposals to the Rules Committee throughout the balance of the year, and perhaps they could finally accomplish something in the way it ought to be accomplished.

Mr. SOLOMON. Mr. Speaker, I yield myself such time as I may consume to try to bring things back down, cool things off, and bring a little comity back to the House.

Let me say to my good friend, the gentleman from Massachusetts [Mr. MOAKLEY], whom I deeply admire and respect, that before he came on the floor, I commended him for getting back on track with fair rules and open rules on this floor. But let me say to my good friend, the gentleman from Massachusetts [Mr. MOAKLEY], and my good friend, the gentleman from Texas, who just spoke, that we are simply going by the rules.

The rules allow for this kind of procedure to be offered. I just want to assure my good friend, the gentleman from Massachusetts [Mr. MOAKLEY], again that, yes, this is a fair rule and, yes, when I debated the rule earlier, I said it was a fair and open rule, and I urge support for the rule.

But there is a procedure which allows the gentleman from Pennsylvania [Mr. WALKER] to try to defeat the previous question in order to add something else to the rule. That is part of the House rules. As the gentleman from Texas said, if we want to change the rules, that is fine. I want to assure the gentleman from Massachusetts that if the motion of the gentleman from Pennsylvania [Mr. WALKER] fails or we do not defeat the previous question, I am going to support an open rule on this floor. I am going to vote yes, because the chairman of the Rules Committee was good enough to give us a fair rule on the floor.

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the chairman of the committee first.

□ 1340

Mr. MOAKLEY. Mr. Speaker, I wish the gentleman from New York [Mr. SOLOMON] would tell his membership how fair the rule is and, if they wanted to amend the rule, why did they not take a rule that was not so open and was not so fair and amend that rule, if that is the situation?

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman from New York [Mr. SOLOMON] for yielding, and, as my colleagues know, heaven forbid that someone would accuse me of tomfoolery and trickery on the House floor. However, Mr. Speaker, the reason for having it here under an open rule is because we think that it is the kind of subject that ought to be debated under an open rule, that when an issue as big as crime and with as many controversial issues are brought to the floor, it ought to be under an open rule. The Members ought to have an opportunity to have their full say on that kind of bill. That is exactly what we are proposing here.

Mr. Speaker, to the gentleman from Texas [Mr. COLEMAN] who suggested that what we ought to do is change the rules: The rules vote every year is by party line vote. We have offered reforms to the rules consistently out here on the first day, and I say to the gentleman from Texas, "and by party line you have always defeated every one of the reforms that we have offered."

Mr. Speaker, I would suggest to the gentleman from Texas [Mr. COLEMAN] that is not a real process. All he is doing——

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Mr. Speaker, I do not have the time.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman from New York [Mr. SOLOMON] yield to me to ask a question?

Mr. WALKER. Mr. Speaker, the gentleman from New York yielded to me.

Mr. SOLOMON. Mr. Speaker, I would reclaim my time and yield to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Speaker, the gentleman from Pennsylvania [Mr. WALKER] says that it is a party line vote. Why is that? I can answer the question.

Mr. Speaker, it is because a lot of times they have refused to participate in a number of issues, not the least of which has been the budget, in recent years.

I say to the gentleman from Pennsylvania, "your party has sat on its hands and done nothing many times,

but, when it comes to issues like this, you attempt to bring a bill before the House floor that has not been through the committee process, that has not had the opportunity for amendments and suggestions to be offered by our entire colleagues in the entire House on both sides of the aisle, I might say, in the committee, and so you want to bring a bill only the way you want to see the bill on the House floor, and then you say we should have an open rule and debate it."

Mr. Speaker, I ask the gentleman from Pennsylvania, "How long do you want to debate it?"

Mr. SOLOMON. Mr. Speaker, I want to reclaim my time.

Mr. WALKER. As long as necessary.

Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, the gentleman from Texas [Mr. COLEMAN] helps make my point when he brings the whole budget debate into it and so forth. The point is that there is not a fair process, the majority runs the rules process around here, and we are simply following the rules, and we are attempting to bring to the floor a bill which the majority of the American people want to see us deal with, and, if the committee had done it in timely fashion, we would not have to do this.

However, Mr. Speaker, the committee did not, so now we are trying it this way.

Mr. SOLOMON. Mr. Speaker, I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I would like to read a statement from the minority whip on the child care bill. It says:

> It would seem to me that the Democratic leadership owes it to the country to produce their version of child care on a Wednesday or Thursday and allow a weekend to intervene before rushing to a vote. It would be literally impossible for Members and for interested constituencies around the country to analyze a child care bill which did not come out of a committee and did not have a normal amount of time to be looked at.

Mr. Speaker, we had 1 hour's notice that this was going to be appended to this bill, and I think there is a question of fairness, but I just would hope that everybody would look into their own motives to see where that fairness issue really lies.

Mr. Speaker, I yield 4 minutes to the gentleman from New Jersey [Mr. HUGHES].

Mr. HUGHES. Mr. Speaker, I appreciate the gentleman from Massachusetts [Mr. MOAKLEY] yielding to me.

Mr. Speaker, I just hope that we can lower our voices a little bit and try to get down to the facts.

Frankly, I support the price fixing bill. It is a good bill. I think that anticompetitive behavior is inimical to our economy. There was a time when Republicans and Democrats both wanted to enforce our antitrust laws, and it is sad commentary that in the last 10 years we have lost ground, and the anticompetitive behavior throughout the country today is not in the national interest. I support it.

Now, Mr. Speaker, my colleagues may oppose it, and that is fine. I say to them, "You oppose the bill. You want to vote against the bill? Vote against the bill."

However, my colleagues, it is just fun and games to suggest that what we ought to do is debate the previous question so we can vote on a crime package.

Mr. Speaker, the suggestion has been made time and time again that the Committee on the Judiciary has not been working on the President's crime package; however those who make those statements do not know the facts. Let us bring to the floor some of the Members that serve, for instance, on my subcommittee, the committee which has a major portion of the President's crime package. The gentleman from Pennsylvania [Mr. WALKER] is not on the Subcommittee on Crime. If he were, Mr. Speaker, he would know that we have reported out some of the provisions of the President's crime package and they are awaiting full committee action.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I will yield to the gentleman from Pennsylvania in just a moment.

Mr. Speaker, it is unfortunate that our chairman was ill and we were not able to have full committee meetings and we have not been able to process some of those bills through the full committee. I regret that.

As my colleagues know, our chairman was very gravely ill for about 3 months, and even with that he worked very diligently from his hospital bed to try to keep things moving within the committee, but he was not present to hold full committee hearings. He is back, fortunately in good health, returning to good health, and we will be processing bills including the President's crime package.

However, Mr. Speaker, my colleagues know they are not going to amend the President's package by defeating the previous question. They want to offer the crime package of the gentleman from Florida [Mr. MCCOLLUM]. There is a difference because we are still waiting for the President to tell us, give us some language with regard to the death penalty provisions. I have held two hearings, two major hearings, on the death penalty alone, and that is not something we should debate here on the floor without working it through the committee process because, in addition to all the emotionalism involved, there are very serious constitutional issues involved as to whether or not we can, in fact, extend capital punishment to nondeath drug cases.

Mr. Speaker, there are some serious questions, and that is something we should consider very carefully.

Insofar as guns are concerned, we have reported out the firearms related amendments. In fact, it is awaiting full committee action. We have gone a little further than the President wants to go. We have, in addition to banning feeding devices of over 15 cartridges, we have done a number of other things. We have banned assault weapons that have no sporting purpose. We have just taken the President's criteria for imports, and we have extended that to the domestic manufacture of those assault weapons, and we have enhanced the penalty for those that carry those types of weapons in the commission of a crime.

We have passed out of the committee the after-care provisions, drug testing provisions.

In addition, Mr. Speaker, we have a number of other technical amendments that the President has recommended that are noncontroversial which are awaiting committee action.

Unfortunately, however, we have been sidetracked by other issues, including RICO reform and a whole host of other issues, such as attempting to develop a drug package that the leadership wants to move through the Congress. The Committee on the Judiciary has been acting diligently.

So, I say to my colleagues, "Don't argue here on the floor that the Judiciary Committee hasn't been working on the President's crime package because that's not so."

The SPEAKER pro tempore (Mr. MONTGOMERY). The time of the gentleman from New Jersey [Mr. HUGHES] has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 1 additional minute to the gentleman from New Jersey.

Mr. HUGHES. Where is my ranking Republican? Let the gentleman from Florida [Mr. MCCOLLUM] come out here and suggest, because he cannot, that we have not been working on the President's crime package. Mr. Speaker, it is not true.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, the fact is that the only thing the subcommittee of the gentleman from New Jersey [Mr. HUGHES] has reported out is the gun provision; is that not correct, that the rest of the package has not been reported; and, second, that other subcommittees, other than the committee of the gentleman from New Jersey, has this before it, and none of those subcommittees have reported any-

thing to the full committee? Is that not correct?

Mr. HUGHES. Mr. Speaker, that is absolutely not true. We have reported out some of the drug testing provisions, the after-care provisions. We are working on a number of other drug provisions which we are going to tack on to the bill, including those dealing with steroids. We have had a series of hearings. We have had other hearings scheduled on aspects of the death penalty provision. We are awaiting the President's language with regard to the death penalty provisions because there is a debate within the Justice Department over whether or not we can extend constitutionally, as my colleagues know, the death penalty or capital punishment in drug cases where death does not ensue. There are major constitutional issues involved.

The SPEAKER pro tempore. The time of the gentleman from New Jersey [Mr. HUGHES] has expired.

Mr. MOAKLEY. Mr. Speaker, I yield the gentleman from New Jersey an additional 2 minutes.

Mr. HUGHES. Mr. Speaker, the fact of the matter is that we are working on provisions of the President's crime package. I would say that probably two-thirds of the President's crime package is noncontroversial. There are some sentence enhancements which the committee is going to report out in short order, but we are now trying to tackle some of the more controversial provisions including the death penalty.

Mr. Speaker, for those who would suggest that we should write the death penalty statute on this floor, trying to navigate the constitutional mine fields that are out there in this fashion, just do not know what they are doing.

□ 1350

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I am happy to yield to my good colleague, the gentleman from California, who is a member of the Judiciary Committee and who has his own agenda on the price fixing bill, and we all know that.

Mr. DANNEMEYER. Mr. Speaker, let us put this issue in perspective. The Democratic Party that controls the House is opposed to implementing the death penalty in this country, and they will use any means they can within the rules to prevent its implementation. That is why you do not want to bring the issue of death penalty to a debate on the floor, is it not?

Mr. HUGHES. Not so, I say to my colleague, because he knows better. He knows that this chairman has reported out the death penalty out of the subcommittee.

I can tell you that if I have the votes, I am going to report out another death penalty after we have gone through the hearing process.

The gentleman from California has his own agenda with regard to price fixing, and I understand that; but don't play fun and games this way. Vote against it if you do not want to support price fixing. It is an open rule. If you want to amend it, amend it. If you do not like it after it is amended, vote against it, but do not try to fool us around here that you are doing it because you want to defeat the previous question and bring up something you cannot otherwise bring up on the floor. That is not so. It is not going to happen, and the gentleman knows it.

I would urge my colleagues at this point to vote for the rule. It is a good rule. It is an open rule, and then we will vote on the crime provisions after we report them out of the committee, after the gentleman from California, who serves on the committee, has an opportunity to work his will in the full committee.

Mr. SOLOMON. Mr. Speaker, I yield 1½ minutes to the gentleman from Missouri [Mr. HANCOCK].

Mr. HANCOCK. Mr. Speaker. I plan to vote "No" on the previous question in order to bring an amendment to the rule allowing H.R. 3119, the Anti-Crime Act of 1989, to be brought up for a floor vote.

The majority has ignored the President's plan to fight crime and drugs for almost a year now. They have instead spent this body's time bringing veto bait such as H.R. 1236 from the Judiciary Committee to the floor. Why can the House not address the real problems of crime and drugs at a time when it is so needed?

In this box are 350 letters from students of Logan-Rogersville Middle School in my district, addressed to the President expressing their concern about drugs and crime. These students are afraid of what lies ahead for them because Congress has refused to act on this issue. They don't care about vertical-price maintenance which the majority gives us to vote on today, they care about the threat of drugs and crime.

I urge my colleagues to join me to defeat the previous question so we can address a matter of urgent concern that effects all our citizens and especially our children.

Mr. Speaker, I include a letter previously referred to, as follows:

GREENE COUNTY SCHOOL DISTRICT,
Rogersville, MO, April 9, 1990.

President GEORGE BUSH,
White House Office, 1600 Pennsylvania Ave., Washington, DC.

DEAR MR. PRESIDENT: We're sure that you are wondering why you are receiving these letters from our school. Basically, we want to commend you on your efforts and work in trying to control the drug trafficking and the drug wars now taking place in South and Central America.

Our community is involved in the education and the prevention of the spread of drugs throughout this nation. The school and community of Rogersville is conducting a "Wise Choice Week." During this week, April 9-12, we will be hearing several speakers on the choices that will affect the futures of our students, as well as the future of this country. We decided to write these letters to commend you on your wise choices. Thank you for serving as such a good example for the students of Logan-Rogersville Middle School.

Sincerely,

THE STUDENTS OF LOGAN-ROGERSVILLE MIDDLE SCHOOL.

Mr. SOLOMON. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona [Mr. KYL].

Mr. KYL. Mr. Speaker, I think we need to make it very clear what we are trying to do here. We are not trying to disrupt the process that is so important to Members in this body, but rather to make it clear that the process just has not worked. The President's crime package was introduced on August 3, 1989. We have had plenty of time since that time to bring to the floor this most important piece of legislation. All of the public opinion surveys will show what we learned from visiting with our constituents back home, that the top problems in their minds in this country are drugs, drugs, violent crime, drugs, violent crime, in that order. That is what the people of this country are concerned about, not vertical price fixing. I know that is important to some people, but let us do the people's business in this body.

Now, there has been a legitimate point made that not all the details of the President's crime package have been worked out through the full committee process. We have plenty of time to bring that bill to the floor here under an open rule, take all the time we need to bring up whatever amendments people want to bring up, be it on guns, be it on the death penalty, people can bring whatever version of the death penalty they want. We can have debate on it as long as we want. There is nothing to prevent us from doing that.

What else are we doing around here? We do not have any other important legislation tomorrow, the next day, the following Monday, the following Tuesday. There is plenty of time. So let us do the people's business.

They are accusing us of being a do-nothing Congress this year. We have been a do-nothing Congress this year by and large. We have not acted on the most important piece of legislation that the President has sent to us, and we have not acted on the most important subject that the people of this country want us to deal with. That is why I urge my colleagues to defeat the previous question so we will have an opportunity to present a rule that would allow us to bring the crime package to the floor under an open rule where all these various issues can be debated. Let us do the people's business on the floor here in the peo-

ple's body and let the people's will be done.

I urge my colleagues to defeat the previous question for this purpose.

Mr. SOLOMON. Mr. Speaker, before the gentleman from Texas [Mr. BROOKS] speaks, let me just say that I sent the gentleman a get well card a number of weeks ago, welcoming him back, and saying there is an old slogan, 40 years ago the Marine Corps was looking for a few good men, and they found one in the gentleman from Texas [Mr. BROOKS].

So Mr. Speaker, let me reserve the balance of my time so that the gentleman can speak.

Mr. MOAKLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. BROOKS], the chairman of the Judiciary Committee.

Mr. BROOKS. Mr. Speaker, as one marine to another, I say to the gentleman from New York [Mr. SOLOMON], "Semper Fidelis."

Mr. Speaker, I would urge my colleagues to vote in favor of moving the previous question on the rule which will permit consideration of H.R. 1236, the Price Fixing Prevention Act. As we have previously noted, this is a straightforward open rule which will permit the House to consider, and if it should be its will, to amend the bill as reported by the Committee on the Judiciary. All members who proclaim themselves in support of procedures which allow the consideration of legislation in a fair and straightforward manner should demonstrate that support by voting to move the previous question at this time.

H.R. 1236 is an important piece of legislation which will protect the ability of citizens and businesses across this Nation to compete in an open economy without the threat of illegal conspiracies which are designed to drive low-cost competitors out of the market. The American people deserve to have this bill considered and voted on today, not encumbered by procedural maneuvers in an attempt to score political points.

The Committee on the Judiciary has pursued active and detailed review of numerous measures related to drugs and violent crime, including the President's proposals. Our Subcommittee on Crime has held several days of hearings on assault weapons and has ordered reported H.R. 4225, which the full committee will consider shortly. The Crime Subcommittee has also held hearings on death penalty related measures including proposals for the death penalty for drug kingpins. In addition, our Courts Subcommittee is considering the issue of changes in Habeas Corpus procedures following the issuance of the report by the commission headed by former Justice Lewis Powell.

In short, Mr. Speaker, the Judiciary Committee is fulfilling its responsibilities in the multiple areas of the law over which it has jurisdiction. The drug and crime measures that I have referred to are an important element of that responsibility. And, the measure we have before us today, the Price Fixing Prevention Act, is an important procompetition measure that will benefit all of our citizens.

Mr. Speaker, I would ask Members to support the previous question and adopt the rule; then we will take up the bill and pass it.

□ 1400

Mr. SOLOMON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just say that there will be an effort made to defeat the previous question so that we can bring up the President's anti-crime package dealing with capital punishment procedures, the death penalty for drug kingpins, prison construction which is so badly needed, and increased penalties for using guns in crimes. We need that bill on the floor of the House.

But let me also assure the Members who may not be on the floor that if this procedure does fail, if the previous question is agreed to, then I would urge every Member on this side of the aisle to vote for the open rule. And let me just also assure the chairman of the Committee on Rules about something. He was concerned 2 weeks ago, when he brought to this floor one of the worst rules we ever had in the history of the House, that I was going to remove him from my Christmas card list. Let me assure the gentleman that he never was removed, he is still on my Christmas card list, and I appreciate his support here.

Mr. Speaker, I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, fairness is a two-way street. I think the Committee on Rules tried to be very fair on this bill.

I remember on the child care bill that we gave an additional day notice to the Members on the other side of the aisle so that they could look at the bill. Today we come to the floor and we get a 1-hour notice that this 42-page bill is going to be put on a 4-page bill as an amendment.

I think when we are talking fairness, Mr. Speaker, just think about that. If we in the Committee on Rules find that an open rule is not enough for anybody, then maybe there is no point in using them anymore.

The gentleman proposes that the House defeat the previous question on the rule on H.R. 1236 which, as I said, is a 4-page antitrust bill, in order to offer an amendment to the rule which would permit H.R. 3119, a 42-page crime bill, to be offered as an amendment.

Mr. Speaker, the amendment is not germane, and if we reach that stage, the point of order will be made, and it is inconceivable that it would not be sustained. Indeed, the amendment is so nongermane that there is even some question whether its discussion constitutes a proper parliamentary debate.

I certainly will not question the motives of the authors of the amendment, but the oportunity they provide to the House is only a rhetorical one.

The House has before it a very important bill, Mr. Speaker, a bill to protect our constituents from anticompetive practices which force them to spend more money at the checkout counter.

A "yes" vote on the previous question is a vote to consider that bill today. A "no" vote leads only to more inaction.

Whatever side trails Members have been invited to take during this debate, Mr. Speaker, I can assure the Members, they are all dead ends.

Mr. Speaker, I move the previous question on the resolution.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 235, nays 157, not voting 41, as follows:

□ 1423

The clerk announced the following pairs:

On this vote:

Mr. AKAKA for, with Mr. THOMAS of California against.

Mr. OWENS of New York for, with Mr. STUMP against.

Mr. MOODY for, with Mr. LEWIS of California against.

Mrs. COLLINS for, with Mr. CRAIG against.

Mr. LEWIS of Florida, Mrs. ROUKEMA, and Mrs. BENTLEY changed their vote from "yea" to "nay."

Mr. BRUCE changed his vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to House Resolution 373 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1236.

□ 1424

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H.R. 1236) to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing, with Mr. SKAGGS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Texas [Mr. BROOKS] will be recognized for 30 minutes and the gentleman from New York [Mr. FISH] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas [Mr. BROOKS].

Mr. BROOKS. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I am pleased to bring to the floor the bill H.R. 1236, the Price Fixing Prevention Act of 1989—the very first piece of legislation that I introduced after becoming chairman of the Committee on the Judiciary at the beginning of the 101st Congress.

I chose this bill to begin my legislative chairmanship of a committee with far-ranging jurisdiction because the bill got to the very heart of our free enterprise system. It will safeguard the ability of individuals and businesses to compete in an open and free-moving economy without the threat of illegal conspiracies to drive competitors out of the marketplace. At a time when America is struggling to retain its world economic leadership, we must not stand by and allow price-fixing conspiracies to rob us of our greatest resource—the free enterprise spirit of the entrepreneur and innovator.

The bill reflects a congressional policy that most of us understandably take for granted. The economic crime of price fixing is absolutely repugnant to all of us—Democrat and Republican alike. But this practice is again proliferating because of the lax enforcement of our antitrust laws and two recent Supreme Court rulings that blatantly ignore longstanding congressional policy.

Exactly 100 years ago, our predecessors in this body saw the need for a competition policy that banned illegal restraints of trade. In 1890, Senator John Sherman stood up to the so-called economic Darwinists, stood up to the trusts, and helped pass a law that became the core of our antitrust laws to this very day. Those antitrust laws were based on principles of free enterprise and fair play, and they have been termed America's "economic bill of rights." The antitrust laws embody a philosophy that all should have a chance to compete if we are to prosper and enjoy the fruits of increased productivity and diversity of goods and services.

All seemed to go well with the enforcement of the antitrust laws until a series of recent events which made resale price maintenance an economic crime where offenders have no fear of sanctions. Due to lax enforcement and misguided judicial decisions, the antitrust prohibition against vertical price fixing lies in ruins in 1990.

Since 1981, the law against resale price maintenance has not been enforced by the Justice Department. No cases—none—have been brought, not a single one; and in a number of instances, several former heads of the antitrust division stated publicly and in appellate briefs that vertical price fixing might even be procompetitive.

This view of price fixing was so radical—so unbelievable—that all anticipated that there would be an immediate correction. But there was no change. By 1983, the Department of Justice went so far as to file amicus briefs with the Supreme Court to argue that vertical price fixing was not always illegal. The breaking point has been reached; Congress took immediate action.

Congress passed an appropriations rider forbidding the antitrust agencies from filing briefs that argued against clear congressional policy. This policy was clearly stated by the passage in 1976 of the Consumer Goods Pricing Act that repealed the so-called fair trade laws. These laws had permitted vertical price fixing to exist so long as it was confined within a single State.

To compound the Justice Department's failure to enforce the law, two recent Supreme Court decisions have gutted congressional policy in the area. One case, the Monsanto decision, erected a near-impossible evidentiary standard for retailers injured by conspiracies to even have the opportunity for their suits to be heard by a jury. A second case—the Sharp decision—stated that unless price fixers were so foolish as to establish a specified price by an explicit agreement, there was no such thing as price fixing.

H.R. 1236 is Congress' response to these developments. As the branch of government with the ultimate responsibility for antitrust policy, we cannot stand passively by any longer. Moreover, the bill is the product of extensive compromises that ensure that the right of businessmen to do business with whomever they choose is not affected—provided that a conspiracy is not involved.

Mr. Chairman, there is one final aspect of this issue that involves a touch of irony. In the past few weeks, we have read how the United States Trade Representative has triumphantly stated that we are not going to prevail upon the Japanese to open their marketplace to larger discount stores that will provide more goods—including American goods—to Japanese consumers. The administration considers this to be a major achievement of its so-called structural impediments discussions with Japan.

As the Deputy U.S. Trade Representative, S. Linn Williams wrote in March 19, 1990, issue of Economic Review:

> One need not wonder why foreigners believe that Japanese companies collude and have every reason to continue to collude. Collusion is profitable—and the bill is paid by foreign companies in the form of lost business, and by Japanese consumers in the form of higher prices (p.11).

Yet, as we attempt to break down the anticompetitive barriers of the Japanese markeplace through the emergence of discount stores, our own discount stores here in America are at great risk by price-fixing conspiracies in this country. Let's be consistent on what our policies are and what we value as Americans. If retail innovation and initiative are truly considered to be the hallmarks of our free enterprise system, then let's be certain they continue to flourish on these shores as well. I am gratified that yesterday 42 State attorneys general—Democrat and Republican alike—wrote to all of the Members endorsing H.R. 1236 for just these reasons.

Mr. Chairman, I ask for the Members' continuing support for this important initiative. I urge a vote for H.R. 1236 as ordered reported by the Committee on the Judiciary.

□ 1430

Mr. Chairman, I reserve the balance of my time.

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. MOORHEAD].

Mr. MOORHEAD. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, as a member of the Subcommittee on Economic and Commercial Law, I have listened to testimony and analyzed the implications of this legislation for the last two Congresses. Because of my concern regarding the bill's likely adverse effects, I have voted "nay" on no less than three different occasions. I remain convinced that this measure—in the form it comes to the floor of this House—would be economically counterproductive for our country.

First of all, H.R. 1236 is a direct attack on the venerable Colgate doctrine in antitrust law. Simply put, this legislation is an attempt to undermine the ruling of the Supreme Court in *U.S.* v. *Colgate*, 250 U.S. 300,307 (1919). That decision made it clear that a manufacturer has a lawful, recognized right to decide with whom it will do business. There is nothing in the antitrust laws that interferes with the right of a manufacturer or wholesaler to select their retail outlets. Manufacturers have a recognized right to establish their own distribution systems and can lawfully terminate poor performing dealers for nonprice reasons.

Second, and just as importantly, this year's version contains new language in section 4 that could be used to partially negate the 1977 Supreme Court decision in the GTE-Sylvania case. See: *Continental T.V.* v. *GTE-Sylvania, Inc.*, 433 U.S. 36 (1977). That decision, universally followed in the Federal courts, recognizes that nonprice requirements, placed by manufacturers on their retail outlets, are not per se violations of the antitrust laws. Instead, they are judged under the more flexible rule of reason standard.

Manufacturers have a right to establish quality requirements and service standards for their retail outlets. If a dealer doesn't advertise or promote the product, doesn't train his sales staff, doesn't provide adequate repair and warranty services, or doesn't stay within his assigned territory, then a manufacturer has a right to end that business relationship. As we all know, the sales success of a product depends upon its goodwill—its reputation for quality and reliability—and that, ultimately, depends upon the consumer's impression in the retail marketplace.

The language of H.R. 1236 is erroneous because it presumes a price-related motive in every dealer termination case. It obscures the clarity of the Colgate doctrine, and, unfortunately, it is intended to do so. The inference or presumption created by this bill assumes that a particular goal was in mind, when the identical facts could lead a reasonable judge or a reasonable juror to conclude otherwise.

Later on, when we are in the 5-minute rule, there will be a series of amendments offered that deserve favorable action by this House. These include amendments to be offered by the gentleman from New Hampshire [Mr. DOUGLAS], the gentleman from New York [Mr. FISH], and the gentleman from California [Mr. CAMPBELL], and myself. My amendment, which in the last Congress had been agreed to by the majority in the Judiciary Committee, would simply make the provisions of this bill prospective. It would be particularly unfair to overrule two recent Supreme Court decisions by statute and, in essence, change the rules in the middle of the game for persons and organizations already engaged in related litigation. If this House makes the unfortunate choice to adopt the Judiciary Committee version of H.R. 1236, at the very least we ought to make these radical changes to the antitrust laws apply only to cases brought on or after the bill's effective date.

As I have said on numerous occasions, since our subcommittee began consideration of this legislation in April 1987, it seems to me that the large discounters like K-Mart, Burlington Coat Factory, Fedco, Levitz, and others are doing extremely well. The fact is, their sales are climbing each year. Also, the number of discount outlets grows larger every year. It is the small, individual Main Street retailer that has been in business for many years that is struggling in my area of southern California and elsewhere. In fact, many of them have been forced out of business by the success of the discounters.

Vertical price fixing conspiracies are per se violations of the Federal antitrust laws and should be punished. That is already the law. But what the proponents of H.R. 1236 are asking Congress to do is confuse and obscure

the very clear distinction between illegal price-fixing conspiracies and legitimate, lawful business decisions. Congress should not be gerrymandering or micro-managing the antitrust laws so as to favor a particular class of litigants.

□ 1440

Mr. BROOKS. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from New Jersey [Mr. HUGHES], the chairman of the subcommittee.

Mr. HUGHES. Mr. Chairman, I rise today to support H.R. 1236, the Price Fixing Prevention Act of 1989. I would like to express my thanks to the chairman of the Judiciary Committee, Mr. BROOKS, for reintroducing this legislation that was passed by the House during the last Congress as H.R. 585. This legislation has now been approved by both the House and Senate Judiciary Committees, and we stand here today ready to move forward and resolve this issue once and for all.

Mr. Chairman, all of my colleagues in the House understand the need to uphold the antitrust principles first laid out in the Sherman Act. There is absolutely no place for price fixing or monopolies in the American marketplace. Competition has been the cornerstone of our economy, and we should not allow special interests to undercut competition in our domestic market while the world marketplace is becoming more competitive. This legislation will prevent price-fixing conspiracies while in no way limiting a manufacturer's or supplier's right to unilaterally require retailers or distributors to market a particular product at a certain price. What it does do is give competitive retailers the right to prevent their suppliers from cutting them off at the request of a competitor.

We all understand that horizontal price fixing—a conspiracy among retailers to avoid competition and inflate prices—is both legally and morally wrong in addition to being bad for our economy. We must not lose sight of the fact that vertical price fixing, also known as retail price maintenance, can produce the same result. Large retailers can conspire with distributors to prevent competitors from offering products at a lower price. The intent of Congress in the original Sherman Act was to prevent such conspiracies, and the courts correctly interpreted this intention for the first 94 years after passage of the Sherman Act.

Only during the last decade have American retailers and consumers lost their protection from vertical price fixing. Since 1981 the Department of Justice has adopted the view that vertical price-fixing cases should not be pursued. In addition, they have filed amicus briefs urging the Supreme Court to abandon the traditional reading of the Sherman Act and to require an impossibly high standard of evidence before even allowing a case to go to trial.

After the Supreme Court apparently responded to the arguments made by the Department of Justice—policy arguments that directly conflict with the explicitly expressed will of Congress—it ruled in the 1984 Monsanto case that victims of a conspiracy between a manufacturer and a rival dealer who complained about the victim's low prices must produce evidence that not only indicates a conspiracy, but precludes any other explanation of the defendant's action. Victims who cannot produce this "smoking gun" level of evidence find that their cases are subject to summary judgment and dismissed without a trial.

Congress has already acted to correct the interpretation of these statutes and the laissez-faire attitude of the Justice Department. The 99th Congress passed the vertical restraints guidelines resolution (H. Res. 303) to condemn the Department's guidelines that effectively eviscerated the Sherman Act restrictions against the vertical price-fixing. This language was included in a Department of Justice appropriations bill and signed into law by President Reagan. As I mentioned earlier, in the last Congress the House passed H.R. 585 under suspension of the rules, and H.R. 585 is nearly identical to the legislation before us today.

Ignoring previous court precedents, legislative history, and congressional intent as evidenced in the above legislation, the Supreme Court then went on to rule in the 1988 Business Electronics versus Sharp case that victims of vertical price fixing must supply evidence that a contract termination or other attempt at price fixing involved an explicit agreement to maintain a specific price for a product. In other words, victims of vertical price fixing have no hope of legal redress unless their evidence is equivalent to producing a signed agreement between the conspiracies to violate the law.

For example, if H.R. 1236 is not passed, let us suppose that a retailer could prove that a long relationship with a major supplier was terminated shortly after a larger competing chain of stores began carrying the supplier's products at a higher price, could prove that the larger retailer complained to the supplier about the low prices at the small store, and could prove that there were no independent reasons for termination of the supplier's contract—such as volume, distribution, and so forth. In light of the Supreme Court's ruling in the Sharp case, that retailer's case would be dismissed from court unless there was proof of the specific price that the supplier was conspiring to maintain.

Mr. Chairman, clearly a businessman in such a position has every right to have a case heard by a jury. We agreed to restore that right by passing H.R. 585 in the last Congress. The recent shift in interpretation of the evidentiary standards by the Supreme Court and the Department of Justice sends a loud and clear message to those seeking to fix prices: As long as you don't give the victims of your conspiracy a signed confession, you can get away with anything.

This practice hurts consumers, denies small businesses access to valuable products, and prevents efficient retailers from competing for customers by lowering their prices. Additionally, it is contrary to what Congress intended by enacting the Consumer Goods Pricing Act of 1976 as well as the vertical restraints resolution. In some instances, retailers can be forced out of business if they are denied access to popular products. To succeed in having such a case heard by a jury, a victim of this practice should certainly be required to prove that termination of a contract was in response to a complaint from a competitor about the plaintiff's low prices. But to ask him to also prove that any other explanation of the defendant's actions must be false is an absurd, double-barrelled evidentiary standard found nowhere else in the antiturst laws. What we therefore seek to do in H.R. 1236 is to restore a reasonable balance of the burden of proof between the defendant and the plaintiff.

Mr. Chairman, during the last Congress there was a great deal of concern that this legislation would open up the possibility of frivolous law suits, allowing merchants whose contracts are terminated for legitimate reasons to harass suppliers. Although I felt at the time that this concern was probably unjustified, I worked with Members and interested parties to develop an acceptable, explicit protection from frivolous suits for defendants in these cases. That amendment was included in the bill passed by the House 2 years ago, and the language of that compromise is found in section 2(a) of the act. I quote,

> Nothing herein shall preclude the court from entering judgment in favor of the defendant, at trial or prior thereto, if the court determines * * * that no such inference of concerted action can reasonably be drawn by a trier of fact.

This language is a good compromise that protects suppliers from frivolous legal expenses. We resolved this issue 2 years ago, and I hope that my colleagues will remember that and refuse to support any attempt to delay or weaken the bill that would force us to waste valuable time and hash this matter out once again.

Although erroneous charges have been made that the current bill is substantially altered from the previous legislation, H.R. 1236 differs from H.R. 585 only in the addition of a sen-

tence that was made necessary by the Supreme Court's 1988 Sharp decision. The only other difference in the new bill is an additional section 3 that explicitly limits the scope of the bill by restating the Sherman Act's requirement that a violation of the act must involve entering into an illegal contract, combination or conspiracy.

H.R. 1236 is an outstanding piece of legislation, and one that all who truly believe in free enterprise can support without reservation. I urge my colleagues to join me in voting for H.R. 1236 without amendment.

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Chairman, I rise in opposition to H.R. 1236. In my opinion, it is another harassment of private enterprise. There are enough laws on the books now to protect against price fixing. This legislation, if enacted, would only bring more lawsuits on individual companies; just because the plaintiff didn't like the way that company was doing business with them.

America now sues itself seven times more than the Japanese and three times the rate in Germany. This bill will only serve to increase that rate to even higher levels.

Some products require a trained sales and service force to ensure that those products are used properly. Manufacturers ought to have the right to insist on those standards. If a dealer or distributor fails to follow the guidelines set up to provide adequate sales and service, the manufacturer should have the flexibility to terminate that dealer. The action has nothing to do with price fixing. It has to do with the manufacturer trying to protect the reliability and good name of its product.

But this legislation would make it possible for those terminated dealers to bring suit. Juries could easily misinterpret a lawful and innocent business decision as a price fixing conspiracy, this is just not fair.

Current law is adequate. This bill would overturn the standards already in place and expose law-abiding manufacturers to the threat of lawsuit, when their only purpose was to protect the integrity of their products.

One manufacturer in my district said he has been able to beat the Japanese and Koreans by making a better product and selling it at a better price. But besides the foreign competition, he says, "I also have to fight my own Government because of legislation like this."

Let's continue to enforce current law and not pass the bill today. Let's preserve the freedom of manufacturers, large and small, to determine how their products are marketed and serviced.

I urge my colleagues to vote against the bill and to support the Douglas, Fish, or Moorhead amendments, if offered.

□ 1450

Mr. BROOKS. Mr. Chairman, I yield 2½ minutes to the distinguished gentleman from California [Mr. EDWARDS], chairman of the subcommittee.

Mr. EDWARDS of California. Mr. Chairman, I rise in strong support of H.R. 1236, the Price Fixing Prevention Act of 1989.

This bill is essential in furthering Congress' long-standing commitment to ensure vigorous price competition in the marketplace and to protect consumers from price fixing in all its pernicious forms.

We are here today because the Supreme Court, in its 1984 Monsanto decision and its 1988 Sharp decision, overturned many years of settled precedent in the price-fixing area. With these decisions, the Court has erected insurmountable barriers for private plaintiffs injured by anticompetitive price fixing behavior.

Today, under Monsanto, a plaintiff seeking to go to trial by jury must prove to the judge not only that there was a conspiracy to maintain a price level, but also that there are no explanations for the manufacturer's behavior that might justify a dealer's termination.

Today, under Sharp, a plaintiff must prove not only a conspiracy to terminate a dealer, but also an express agreement between the conspirators that establishes a specific price for the resale of goods and services.

With these decisions, the Court in effect has obliterated the antitrust remedy of private plaintiffs, except in the most blatant of price fixing cases.

Yet today, especially in the face of the Department of Justice's refusal to bring any resale price maintenance enforcement actions over the past 9 years, it is ever more imperative to preserve the ability of private plaintiffs to pursue antitrust remedies in this area.

We all know that conspiracies are not spelled out in every detail and signed on the dotted line by the price fixers. We all know that price agreements are often done with "a wink and a nod," not with a public contract between the price fixers.

Opponents of H.R. 1236 say it will create untold problems for honest businesspeople. Yet, this legislation does nothing more than remove the barriers to valid lawsuits which have been created by the Court in recent years.

The law as it was applied before Monsanto and Sharp was well understood by all concerned. It holds no deep surprises.

I might note that, in restoring pre-Monsanto and Sharp law, H.R. 1236 follows the approach which the State attorneys general steadfastedly have advocated and which has the staunch support of numerous consumer advocacy groups.

Like the so-called State fair trade laws which Congress overrode in 1975, the law under Monsanto and Sharp is stifling price competition and harming consumers. This is totally contrary to the purpose and design of our national antitrust laws.

The sad record of fair trade laws, which allowed legalized price fixing, demonstrates just how inflationary, anticompetitive, and costly resale price fixing is—with consumers bearing untold and unnecessary billions of dollars in added costs.

We know the harsh effect of price fixing on American consumers, especially on the poor and on those Americans living on fixed incomes. In the past, we in Congress repeatedly have done all we could to protect consumers against this.

Mr. Chairman, I urge my colleagues to support H.R. 1236 and to reject the weakening amendments which will be offered today. Once again, we can and we must act to preserve the benefits of price competition for consumers and for the general health of our economy.

Mr. FISH. Mr. Chairman, I yield 4 minutes to the gentleman from New Hampshire [Mr. DOUGLAS].

Mr. DOUGLAS. First of all, Mr. Chairman, I think we ought to clarify what it is that this bill does and what it is that we are all here to fix.

Let me say, first of all, that retail price fixing or retail price maintenance or vertical price fixing it is a process where the manufacturer says to its retailers or its distributors, "You can only sell this product at a certain price. You can't discount it."

That is illegal. We can have a suggested manufacturer's price, but they cannot fix the retail price. That is what retail or vertical price maintenance is all about, and we are against it. The Republicans are against it, and the Democarats are against it. The Supreme Court is against it, and in 1911, the U.S. Supreme Court said, "You can't do that under the Sherman Anti-Trust Act." The decision in the Doctor Miles medical case specifically said that retail price fixing is per se unconstitutional.

I am against retail price fixing, and I will be offering an amendment that will take the Supreme Court line in the Dr. Miles case and put it into the statutes so all of us can go on record against fixing prices in the marketplace.

But that is not what H.R. 1236 does. H.R. 1236 has on paragraph buried in it that takes the Dr. Miles language and puts it into the United States

Code. It then goes on in three other pages with inferences and evidentiary standards and a whole variety of misstatements of the law that overturn two Supreme Court opinions, the Monsanto opinion in 1984 and the Sharp Electronics opinion in 1988.

It is nice that on this Wednesday afternoon the U.S. Congress will come in here and, after the Supreme Court, since 1903 and since 1911 in the Dr. Miles case, has dealt with this area, say that we are somehow going to fix it ourselves because we do not think the Supreme Court got it right.

I think the Supreme Court has been in this game a long time, and that they did get it right. The reason I am concerned and why I am going to offer my amendment is that we are going to offer an amendment that we are in competitive battle with a lot of countries around the world, and if we look at those who oppose the bill, not my amendment but the bill, we see it is a very interesting lineup. It is the Department of Justice, it is the White House, it is the American Bar Association, and the American Bar Association and the Department of Justice do not always see eye to eye on a variety of issues. It is the Chamber of Commerce of the United States, the National Association of Manufacturers, but, more importantly, it is our electronics industry, our leading edge to fight international competition, that is on record as being against this bill. It is also the Microcomputer Industry Association, the Computer and Business Equipment Manufacturers Association, the Electronic Industries Association, the National Electrical Manufacturers Association, COMPAQ Computer, and IBM. And I could go on and on.

Now, the reason all these companies are concerned is that they want to be able to terminate a dealer who is not doing the warranty work, who is not doing what they promised the consumer, and if we are really concerned about the consumer, we should not vote for H.R. 1236 but we should vote for my amendment.

My amendment would merely outlaw retail price fixing, but it will not fool around with Supreme Court decisions that have been cooked and synthesized in the last nine decades as the Supreme Court has dealt with antitrust law.

Mr. Chairman, I have one final note. The discussion on the Department of Justice is a red herring. The very title of the bill says that it is to establish Federal civil antitrust claims, and that is all we are talking about, the kind of claims plaintiffs can bring in Federal court.

Mr. Chairman, I urge a "no" vote on H.R. 1236 in its present form and a "yes" vote on my amendment that I will shortly offer.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Kansas [Mr. GLICKMAN].

□ 1500

Mr. GLICKMAN. Mr. Chairman, I rise to enthusiastically support H.R. 1236, the Price Fixing Prevention Act of 1989. The antitrust laws were intended to maintain competition, not to maintain prices, and this legislation is needed to restore that intent of the law.

The invasion of the Federal courts and Justice Department by reactionary theorists during the last decade has resulted in an interpretation of the law that is anticonsumer and anticompetitive. We need to undo the damage and bring the focus of concern back to the consumer.

In the last 8 years, the administration has ignored the anticompetitve effects of vertical price pricing and declined to enforce the law. In addition, 2 years ago, the Supreme Court handed down a ruling that struck a blow at vigorous competition in the retail marketplace. The Court held, in Business Electronics Corp. versus Sharp Electronics Corp., that a manufacturer's decision to stop selling goods to a discounting retailer in response to another retailer's complaints about price cutting was not a per se violation of the Sherman Act. The basis for Justice Scalia's decision was the absence of an agreement to set a specific price or price level. What the majority classified as a vertical nonprice restriction was in fact a conspiracy to fix prices, and such conduct should be, per se, illegal under the Sherman Act.

The logic for this decision was lifted directly from the Justice Department's vertical restraints guidelines, which are not law or regulation, and which the House condemned in a resolution in the 99th Congress. That resolution said the Justice Department was wrong in stating that an agreement about a specific price was necessary to prove a per se violation of the Sherman Act. Ironically, the sponsor of that resolution, the gentleman from New York [Mr. FISH], will offer an amendment today that backs off considerably from his own resolution of the 99th Congress.

The combined effect of the Justice Department's inaction and the Supreme Court's confusion has been to make it easier for manufacturers to force discounters such as K-Mart, Walmart, Sam's, and Burlington Coat Factory to charge higher prices. Of course, this means ultimately that the consumer either pays a higher price at those stores or finds that certain manufacturer's goods are no longer available from discounters. Tens of millions of Americans, our constituents, shop at these discount stores, getting the benefit of lower priced goods not available to average Americans in years past.

Discounting is the purest form of competition and keeps the marketplace vital. The existence of brand name discounters not only makes goods available at a lower price at those stores, but it forces other retail competitors to lower their prices to compete, so all consumers benefit.

Under current law, as interpreted by the Supreme Court, a full-price retailer could go to a manufacturer and complain that Burlington Coat Factory's prices on x-brand raincoats is too low. It could threaten to stop carrying that line unless something was done. The manufacturer could then refuse to supply Burlington Coat Factory, as a result of the complaint about price competition. If Burlington sued, they would never get past a motion for summary judgment because they would not be able to show an agreement about a specific price or price level.

Such an outcome is a travesty. There is almost never a smoking gun in these cases. If there were, the defendants should also be convicted of incredible stupidity. In the same vein, the discounter would be extremely reluctant to bring a case because of the impossible evidentiary standard set up by the Supreme Court.

Amendments will be offered today that virtually gut the bill by changing the evidentiary standard it sets out. The heart of this bill is the ability to prove vertical price fixing without having to point to an agreement about a specific price or price level. The example I gave where a complaint about a discounter's prices result in termination of the discounter should be enough to sustain a case. Support for those amendments will undo the careful work and compromise embodied in this bill, and I urge my colleagues to vote against those amendments.

Seldom do we get an issue that is so clearly proconsumer. Vote for your constituents who can't afford to shop at full-price retailers by supporting H.R. 1236 and opposing weakening amendments.

Mr. FISH. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. CAMPBELL].

Mr. CAMPBELL of California. Mr. Chairman, there are a few points that should be clarified in the debate.

First of all, there are different kinds of price agreements. The first is where two groups together horizontally fix price; for example, the old oil trusts: One oil company and another oil company fix price. That is, per se, illegal, hurts the consumer, and no economist would stand for it. The other is where a manufacturer and a retailer have an arrangement suggesting what price will be charged. That is completely different, economically and legally.

Mr. Chairman, listening to my colleagues earlier, I heard it described that this has been settled law ever since the beginning of this century, the only change being when the Supreme Court issued Monsanto. That is not true. Since 1936, fair trade laws were permitted, and it was only in 1976, that fair trade was repealed. So, the Supreme Court has only had to deal with this issue, in modern times since 1976.

Mr. Chairman, what the Supreme Court did, immediately after that, in 1977, was to say, "Vertical agreements were different than horizontal. You can have a vertical agreement, which is an exclusive territorial, and yet you can't have a horizontal agreement, which is an exclusive territorial. One is governed by the rule of reason because it is vertical, the other, per se, because it's horizontal."

And when the Supreme Court got to the question of the price, they started with their 1911 opinion, that vertical price agreements were illegal but, in the Monsanto case said, "You know, we're going to be very careful before we infer that there's an agreement on price because that means per se is the test."

Mr. Chairman, I have heard the argument just recently by the gentleman from Kansas [Mr. GLICKMAN] that, if we adopt this legislation, discounters will be abolished, discounting will no longer be a practice. Actually the outcome is likely quite the opposite. If we abolish this practice presently whereby manufacturers suggest a price and whereby manufacturers try to preserve quality through the practices that we have been describing, the only way to guarantee that quality will then be to vertically integrate, to purchase your distributor.

When I was in private practice, I had the opportunity to represent Sealy Mattress Co., and they were in competition with Simmons and Serta, and they were losing because Sealy used distributors, while Serta and Simmons were vertically integrated.

In conclusion, I just urge my colleagues to recognize the differences in the law between vertical and horizontal practices. The Supreme Court has held those two to be different. Today we would establish the same rule for per se condemnation, and the result must be more lawsuits and, curiously, fewer independent distributors.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. FEIGHAN].

Mr. FEIGHAN. Mr. Chairman, I rise today to speak in support of H.R. 1236, the Price Fixing Prevention Act of 1989. This bill is a much-needed congressional clarification of antitrust law. It is a carefully crafted bipartisan bill which will protect consumers and clarify legal sanctions against vertical price fixing.

For most of the 1980's we endured an executive branch that was indifferent if not hostile to antitrust concerns. And while these concerns may seem legalistic or philosophical to some, they affect consumers each and every day. H.R. 1236 addresses the need to protect those businesses which provide discounted products to the American consumer. It codifies a longstanding judicial rule that vertical price restraints are per se illegal. This rule is nothing new; codification of it is. We need to make sure the courts know that Congress intends a strict interpretation of this doctrine. Vertical price restraints harm competition and they harm consumers.

As part of the per se rule, the bill clarifies congressional policy that a specific price is not the only means by which price fixing can occur. Congress established this principle when it passed House Resolution 303 in the 99th Congress. This measure, signed into law by President Reagan, affirmatively stated that the Justice Department's vertical restraint guidelines did not have the force of law and were "inconsistent with established antitrust law * * * in stating that vertical restraints that have an impact upon prices are subject to the per se rule of illegality only if there is an 'explicit agreement as to the specific price.'" Prices can be fixed in many ways, not only by mentioning a specific price. The damage to competition is just as severe and the cost to consumers is just as great.

H.R. 1236 also clarifies exactly what type of evidence is required to overcome a motion for summary judgment in a price-fixing case. This provision—virtually identical to the provision in the bill we passed last year—makes it clear that if a plaintiff can present evidence that a seller received a communication from a competitor and in response terminated the plaintiff, then the case must go to the jury to determine whether the law was violated. This provision is essential if we are to ensure that meritorious cases are not dismissed on summary judgment.

The bill, however, also includes a provision I offered last year as an amendment to H.R. 585, the predecessor to H.R. 1236, which reaffirms that the legislation is not intended to preclude summary judgments; it is intended only to ensure that legitimate price-fixing allegations reach a jury for judgment. This amendment was offered as a compromise developed in consultation with many current opponents of the bill, in light of assertions that the evidentiary standard in the bill went too far. I was very pleased to see that my amendment language was included in the legislation introduced this year by the distinguished chairman of the Judiciary Committee, Mr. BROOKS.

I would also like to commend the chairman on the exclusion of maximum price fixing from coverage by the bill. This exemption does not sanctify maximum price fixing, it merely does not subject it to per se illegality. Thus the judge in a maximum price-fixing case may choose which rule to apply. There are cases in which maximum prices are actually minimum prices in disguise. However there are also cases in which maximum prices are just that. Newspapers, for example, set maximum prices in order to maximize circulation. This makes economic sense only because newspapers have a second source of revenue: advertising. If prices are low and circulation is high, then ad revenue is greater. Everyone benefits: More people read newspapers at a lower cost per paper, advertisers pay more but get more for their money. I would not like to see maximum prices subject to a per se rule and thus preclude a judge from considering these types of procompetitive effects.

Mr. Chairman, I strongly support H.R. 1236. I am an original cosponsor and one of 23 members of the Judiciary Committee who voted to favorably report this bill. I think it is a balanced approach to protecting American consumers while not unduly restricting the rights of American firms to choose with whom they want to do business and under what conditions. I urge my colleagues to vote in favor of the bill without any weakening amendments.

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Chairman, I am very pleased to support this excellent bill, and I congratulate the gentleman from Texas [Mr. BROOKS] for bringing it forward.

Vigorous competition on the basis of price saves consumers billions of dollars a year and is a cornerstone of our free enterprise system. Congress recognized this when it repealed the Federal authority for State fair trade laws in 1975. The passage of H.R. 1236 will serve notice that the House of Representatives still believes it. The bill will give a fighting chance in court to a discounting retailer who is punished by the concerted actions of a manufacturer and competing dealers hoping to maintain high and unchallenged prices.

The Supreme Court's decisions in the Monsanto and Sharp cases and their progeny have significantly raised the burden of proof faced by a discounter. Since these decisions, instances have abounded of emboldened manufacturers putting pressure on discounters through the threat, often carried out, of a termination of supply. For example, a 100-year-old discount furniture company was cut off by several major suppliers without explana-

tion. And a general merchandise discounter was threatened with a supply cutoff by appliance, computer and toy manufacturers unless it increased catalog prices.

To combat these abuses, the bill would codify the 78-year-old rule that vertical price fixing is per se illegal and would modify or overrule Monsanto and Sharp to the extent necessary to establish uniform and fair evidentiary standards in dealer termination cases.

H.R. 1236 is a well-crafted, modest, but very important, legislative proposal. The bill has been improved over the last 2 years by benefit of the valuable suggestions of those who have argued against it. At every step of the way, reasonable modifications have been considered and included. Through the twists and turns of the legislative process, however, the bill has always remained true to its basic principles—price fixing hurts the economy and conspiracies to enforce it will not be tolerated.

I urge support and prompt passage for H.R. 1236.

□ 1510

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Chairman, I thank our chairman for his leadership on this issue and for yielding me this time.

Mr. Chairman, I rise in support of H.R. 1236. H.R. 1236 is vital to law enforcement efforts in this country. Blatant attempts by manufacturers to force higher retail prices have been proliferating since the Supreme Court decision in Sharp. Without an express agreement between a manufacturer and a full price retailer to set specific prices or price levels, enforcement efforts are hamstrung. Consumers are stuck paying higher prices, and businesses are unable to make their own, independent pricing decisions. Since Sharp, we are now witnessing situations effecting entire industries. Manufacturers, pressured by retailers with clout, are forcing discounters to either raise prices or be discontinued. Prices are never mentioned. They don't need to be. And activities that would have been clearly illegal—even criminal—10 years ago, can't be touched today.

Manufacturers are using some of the most egregious, blatant methods possible to force higher prices. Since it is easy to avoid express agreements detailing price levels but still get the desired effect—higher prices—the manufacturers and pressuring retailers are getting away with it. In some instances, manufacturers are requiring discounters that have relied on mail order that they can no longer take orders over the telephone—or that they must get proof that the customer resides in the same State as the discounter before a sale is permitted. In other instances, manufacturers have ordered discounters to clear certain stores of stock because full price retailers have been complaining—or be discontinued throughout the country.

Under current law, enforcement officials are virtually powerless to stop this type of anticompetitive behavior. H.R. 1236 would allow enforcement officials to take these cases to a jury which they cannot do now. That's an important point to note. All H.R. 1236 does is allow an enforcement official to get his case before a jury. It does not mandate a finding of illegality, it does not mean that someone is automatically culpable. All it does is help restore a previously existing balance that enables enforcement officials to have a fighting chance to preserve free competition in the marketplace. Free competition was and is the intent of our country's antitrust laws. H.R. 1236 will help restore that fundamental economic freedom.

Mr. FISH. Mr. Chairman, I yield 3 minutes to my colleague, the gentleman from New York [Mr. HOUGHTON].

Mr. HOUGHTON. Mr. Chairman, I oppose H.R. 1236, and I oppose it really for only one reason, that I believe as a former businessman that this is a "legal work program," and that it will hurt consumers.

Now, this is not the way the opposition positions this bill. Lots of us have lived and worked and sold under fair trade. Fair trade, as you remember, forced suggested prices through the system. Fair trade was outlawed in the seventies. This was a difficult period for adjustment for manufacturers, but it worked its way through, and most of all, it helped consumers. No longer was there as price straitjacket where there was little or no competition allowed.

Now, since 1975 the consumer now pays, if he or she wants it, the lowest price available in the competitive marketplace. This is fair. It provides good value. It is the best value of any country in the world and it protects the consumer.

Now, what H.R. 1236 does is not provide a better price for the consumer. How can it? We are the forces that promote that. What it does do is provide a better deal for the lawyers, making it easier to sue and to sue and to sue. And what will this do? It will hurt the consumer, because he or she will have to pick up the additional legal bills.

Second, it will hurt the younger and the smaller retailer or wholesaler because the manufacturers will not be able to take a chance on those younger people. It is just too risky.

What is happening to us? Well, with the abolition of the fair trade laws, the consumer is protected. He now can determine the price he wants to pay.

I am an old salesman, and as a salesman I believe the consumer is king, and if we are interested in king consumer, let us not pass H.R. 1236.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from West Virginia [Mr. STAGGERS].

Mr. STAGGERS. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong support of this proconsumer, procompetitive bill and congratulate Chairman BROOKS on his fine leadership in bringing it to the floor today.

This bill will make clear the standards of evidence necessary to establish unlawful vertical price fixing. It would also codify the per se rule established by the Supreme Court in 1911 which held that price restraints are automatically illegal, even if a specific minimum price is not established.

Until recently, the Supreme Court did not require that price fixers actually agree upon specific prices or price levels, so long as the clear purpose of the conspiracy was to suppress price competition.

To require that a specific price be agreed upon by the parties involved ignores the variety of indirect ways in which a retailer can conspire with a discounter to suppress price competition.

For example, in a market were every retailer sells at a 50 percent markup, except for one discounter who sells at a 25 percent markup, elimination of that discounter will, obviously, result in a complete lack of price competition.

My colleagues, vertical price fixing is contrary to our belief in the free market. It causes distortions and creates inefficiencies in the economy. It harms those members of our society who can least afford it—the price conscious consumer. Unfortunately, the Justice Department and the court have allowed long-standing and clear protection against price fixing to erode. To correct this adverse situation, we must pass H.R. 1236.

Mr. Chairman, my constituents need this bill. The retailers in Morgantown, WV, should have the freedom to set prices according to the market in their area. However, opponents of this legislation would argue that the local retailer should not have this freedom to compete; rather, the manufacturer should dictate prices at the local level. This bill would insure that efforts by manufacturers to pressure retailers to inflate prices will not be tolerated.

This bill is supported by consumer groups which characterize it as the most important consumer legislation to be addressed by Congress this term. Those who are at the forefront of enforcing antitrust laws, the State attorneys general, also are supporting the bill. I urge my colleagues to support the Price Fixing Prevention Act. Let's

not allow the term "suggested retail price" to become "mandated retail price."

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I commend the Judiciary Committee and its chairman, the gentleman from Texas [Mr. BROOKS] for bringing this important piece of legislation to the House floor.

H.R. 1236, which I have cosponsored, helps to insure that American consumers enjoy the benefits of price competition. Price competition is important in a market-oriented economy, and price competition together with strong antitrust enforcements have been the hallmarks of my party.

Congress has examined this issue frequently, Mr. Chairman. Over the last quarter of a century Congress on numerous occasions has addressed the question of whether retailers and consumers ought to have retail prices dictated to them. Each time our answer has been the same. No, retail price maintenance is wrong.

The sorry history of fair trade laws demonstrates clearly that price fixing is anticonsumer, anticompetitive and ought to remain per se illegal.

I have long been concerned with this issue, and I am convinced that Federal Government enforcement in this area is inadequate. I have come to the conclusion that we also need vigorous private enforcement of the law against retail price maintenance to ensure maximum competition in the marketplace. The Judiciary Committee bill serves this purpose: It provides the guidance that a private plaintiff needs to sustain a legitimate price fixing case and also affirms that resale price fixing is wrong and remains illegal per se.

This legislation is urgently needed. Court rulings have made it very difficult for a distributor terminated because it discounts to sue those who cause the illegal termination. We do not, of course, want to encourage frivolous lawsuits—and H.R. 1236 does not do that. Rather, this bill is a measured legislative effort to assure that legitimate suits involving anticompetitive resale price maintenance agreements to terminate discounting retailers will have a fair hearing on their merits. I urge support for the bill.

□ 1520

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the distinguished gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Chairman, I rise today in support of H.R. 1236. This bill is of critical importance to the consumers of this country.

By enacting this bill, Congress will be taking guard against unnecessary inflation. Inflation will be the inevitable result as full price retailers flex their economic muscle to get rid of their discount competition. Under the recent Supreme Court decision, Business Electronics Corporation versus Sharp Electronics, it is no longer illegal for manufacturers to stop supplying discount retailers solely on the basis of price complaints by a retail competitor, so long as no price or price level is specifically discussed. Yet this used to be illegal.

In areas where some retailers have already acted to get rid of their discount competition, consumers are forced to pay higher prices for the goods they used to be able to purchase at competitive prices. These higher prices hurt discount retailers, consumers and even manufacturers; they only benefit the full priced retailer who doesn't want to compete. The discount retailer is harmed by not being able to sell the goods which he wants to sell for the prices which he wants to charge. The consumer is harmed by having to pay higher prices for the same goods. Even the manufacturer is harmed because it is subject to threats from full priced retailers which it formerly could avoid.

In the Sharp case, Justice Scalia said that high prices mean better service for consumers. Mr. Scalia is denying consumers the choice as to how much service they want, need and can afford. Consumers I know want active and open retail competition to assure them that they are getting the best value for their money. They want a variety of stores offering different levels of service from which to choose. They also want stores which offer different shopping environments. On a day when they want to pamper themselves, shoppers can go to the full-priced department stores. On other days, they can utilize specialty discount stores or catalogs.

The economic theory that consumers benefit from fixed higher prices has already been tried and soundly rejected. The sorry history of the fair trade laws—State laws which until Congress overwhelmingly repealed them in 1975 allowed legalized price-fixing—clearly shows that resale price-fixing is inflationary and anticompetitive. Studies of the Department of Justice, cited in a 1969 Economic Report of the President, indicated that consumers would save $1.2 billion a year if that form of legalized price-fixing were eliminated. Updated for inflation, this figure came to 2.1 billion in 1975 when Congress overwhelmingly repealed State fair trade laws. Another Department of Justice study estimated that fair trade laws increased prices of fair traded goods 18-27 percent.

The terrible effects of price-fixing on American consumers, especially on the poor and those Americans on fixed incomes ought to be obvious—except, perhaps, to would be price-fixers.

Competition and consumer choice in the retail markets is a sign of a healthy thriving economy. Congress should act to perpetuate this vitality, rather than letting the Supreme Court and Justice Scalia take away the retail competition which is so important to our consumers.

These are the reasons, Mr. Chairman, why I urge my colleagues in the House to support H.R. 1236. Let's act to preserve the benefits of retail competition for our constituents.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. Mr. Chairman, I want to voice my strong support for H.R. 1236, a bipartisan bill introduced by the chairman of the Judiciary Committee, Mr. BROOKS, and supported by colleagues on both sides of the aisle on the committee.

In 1890, Congress passed the Sherman Act to prohibit "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States or with foreign nations * * *." Since 1911, the Supreme Court has stated that an agreement between a manufacturer and a retailer to set retail price is prohibited. However, during the past 8 years, the ability of retail outlets, particularly off-price discounters, to set their own prices has been threatened.

Antitrust law historically has protected retailers from agreements between others to keep them from discounting. Traditional antitrust law has recognized that agreements in restraint of trade usually must be proved by indirect circumstantial evidence. When a plaintiff presents evidence showing dealer complaints to a manufacturer, the absence of evidence by the manufacturer explaining legitimacy for the termination has been considered reasonable grounds for suspecting collusion between the manufacturer and the complainers. A manufacturer should be required to come forward with evidence to explain that its termination of a discount dealer was for some reason other than the complaints of other dealers about the price.

While reaffirming that it is still per se unlawful to agree to fix prices, in 1984, the Supreme Court introduced a confusing and difficult evidentiary standard for proving such agreements. This standard is one that undercuts Government enforcement and private challenges to anticompetitive conduct. In the Monsanto case, the Court held that the evidence most often relied upon by discounters—complaints by

dealers concerning price competition followed by termination by the manufacturer—as insufficient to permit a jury to find an antitrust violation.

Then, in 1988, the Supreme Court further eroded antitrust protection in the Sharp decision. Termination in response to complaints about lower prices from a competing dealer is not necessarily unlawful, the Court concluded, unless the manufacturer and the complaining dealer have agreed on a specific price level.

Let us look at the practical impact of these decisions: High-Brow Fashions sells its goods to both the Ritzy-Glitzy chain and to Rock Bottom Discounters. Ritzy-Glitzy does not like its competition and makes its views known to High-Brow by complaining that "Rock Bottom's prices are killing us." Anxious to keep Ritzy-Glitzy's business, High-Brow terminates its relationship with Rock Bottom. Consumers now must buy High-Brow fashions at Ritzy-Glitzy's upscale prices. Under Monsanto, Rock Bottom does not have an antitrust case.

To make matters worse, under Sharp, unless High-Brow and Ritzy-Glitzy agree on a specific price, Rock Bottom also is out of luck. As I read Sharp, High-Brow and Ritzy-Glitzy could discuss a price range—say "between $150 and $175 per unit"—and still be protected from the antitrust laws.

Mr. Chairman, let me remind my colleagues that Congress repealed the so-called Fair Trade laws in 1975 because it recognized that price-fixing increased consumer prices and was anticompetitive. Additionally, in recent years Congress clearly has been incensed at the lack of enforcement by Federal officials in growing price-fixing problems.

We must pass H.R. 1236 because it addresses the issue of evidence of anticompetitive activity. The bill permits a jury to draw reasonable inferences of conspiracy from the direct and/or circumstantial evidence presented at trial, thereby returning antitrust law to its position prior to Monsanto and Sharp.

H.R. 1236 establishes a violation of section 1 of the Sherman Act upon the presentation of evidence showing, first, coercion of a reseller to follow the pricing practices of a seller through the seller's cancellation of supplies, threats of termination, or other coercive acts; second, complaints by a competing reseller concerning price competition followed by any of the following acts by a seller: termination of the reseller or coercion of the reseller.

H.R. 1236 further codifies the long held per se rule and restores the notion that providing price-fixing does not require showing an agreement to set a specific price or price level. To any reasonable person, terminating a discounter for this pricing policy clearly is an attempt to fix prices at a higher level.

It is time for Congress to demonstrate clearly to the courts, the business community, and consumers that our commitment to price competition remains unwavering.

Mr. Chairman, the National Association of Attorneys General supports H.R. 1236 because it furthers the goal of the antitrust laws "to maintain a freely competitive environment in which all business ventures are given a reasonable and equal opportunity to succeed, guaranteeing consumers the best possible produce at the lowest possible price."

Last fall, Prof. Louis B. Schwartz of the Hastings College of Law wrote to Chairman BROOKS in support of H.R. 1236. As the author of the casebook "Free Enterprise and Economic Organization," Professor Schwartz understands the misinformation that has been circulated about H.R. 1236. He states:

> The issue is not whether manufacturers may "stop supplying products to distributors who fail to provide consumers with the services and information that manufacturers believe will be most responsive to consumer demand." The issue is whether manufacturers should be permitted to conspire with some distributors to require all distributers (sic) * * * to charge prices high enough to pay for such services. Surely believers in "the market," such as the Chicago-Schoolers purport to be, ought to rely upon the willingness of consumers to pay for available services by patronizing the full-service dealer.

Professor Schwartz also bursts the free rider bubble, the argument that discounters receive the benefit of advertising and other expenses of the manufacturers and nondiscount resellers. The free ride theory, he wrote:

> * * * falls of its own weight once one realizes that vertical restraints are often employed in connection with goods and services that typically are not serviced at all, e.g. gasoline, patent medicines. In many contexts, where the customer does not need information after the initial purchase by him, subsequent purchases from the same or other dealers add nothing to the buyer's information and he should not be required to pay for unneeded service.

Professor Schwartz also says:

> [I]t is a glaring fiction that a manufacturer who terminates a dealer in response to a competitor's price-cutting complaint is "seeking to discover the most effective way of distributing its products."

Insofar as the need to establish a price understanding between the manufacturer and the complaining dealer, Professor Schwartz makes an interesting real-world observation.

> If such a complaining dealer subsequently became a discounter, would the manufacturer's expectations be disappointed!

For these and other reasons, I support H.R. 1236 as reported by the Judiciary Committee.

Mr. FISH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this piece of legislation aptly demonstrates the fact that labels are one thing and what's really inside a particular package can be quite another. The title of this legislative package is, itself, a misnomer; perhaps, it should be labeled the Price Fixing Invention Act. I say this because H.R. 1236 would invent anticompetitive conspiracies out of innocent and lawful business decisions.

Mr. Chairman, the difficulty with this bill is in explaining its actual consequences in clear and readily understandable language. The antitrust terminology surrounding H.R. 1236 is certainly tedious and cumbersome dealing as it does with "resale price maintenance"—price and nonprice vertical restraints.

I shall attempt to explain in plain English why I have serious reservations about this legislation.

First of all, this is a bill that purports to fix a problem that does not exist. No one argues that manufacturers and retailers should be allowed to conspire and fix prices. Price fixing—both vertical and horizontal—is per se illegal right now! Vertical price fixing has been illegal since 1911 and we don't need a new statute to tell us what is already the law.

If the current legal climate is so negative, then why are the discount stores doing so well? Discount stores are thriving and the discounters are rapidly taking market share away from the department stores and the more traditional Main Street retail outlets.

Second, this bill is not proconsumer. In fact, in significant ways it is anticonsumer. For example, it would harm purchasers seeking products that require special servicing and marketing. If it is enacted, buyers will likely receive less warranty protection and repair service than is now the case. If you are purchasing a personal computer, a VCR, or a camera, for example, warranty and repair service is a vital element of the purchase.

Third, small independent retailers are also likely to suffer if H.R. 1236 is enacted. Because this bill would interfere with a manufacturer's current right to choose the retail outlets for its products, manufacturers may well opt to open their own distribution centers and retail outlets. Manufacturers are rightly concerned about the reputation and good will surrounding their products. And, make no mistake about it, product reputations are made in the retail marketplace.

The unilateral decision of a manufacturer—to select its own retail outlets—is currently protected by the Federal antitrust laws. *United States* v. *Colgate,* 250 U.S. 300, 307 (1919). But H.R. 1236 intends to change that by essentially overruling portions of

the "Colgate doctrine." What some proponents want from this legislation is more economic and legal leverage, so that they can force a manufacturer to sell its products to them.

Fourth, this legislation also means more lawsuits and more cases going to trial. Here again, this bill is intended to have that very effect. Antitrust litigation is by its nature lengthy and time-consuming. Typically, cases take years to resolve. What the advocates of H.R. 1236 know is that if these weak cases get by preliminary motions for early dismissal; that is, motions for summary judgment, then the timeframe itself will force manufacturers to agree to a monetary settlement. Meanwhile, the backlog of civil cases in our Federal courts will certainly worsen.

This legislation is not only opposed by manufacturers and the various trade associations representing those companies, it also is opposed by a number of retail organizations and the two antitrust enforcement agencies, the Department of Justice and the Federal Trade Commission. Further, H.R 1236 is also opposed by the American Bar Association and by the nationally respected antitrust section of the Association of the Bar of the City of New York.

Mr. Chairman, I read just one sentence from a letter of the Attorney General of the United States dated April 3, 1990, and addressed to me:

> For the reasons discussed below, I and other senior advisors to the President would recommend Executive disapproval of H.R. 1236, if it reached the President's desk.

Both the American Bar Association and the City Bar have lawyer members that represent both plaintiffs and defendants in these types of antitrust cases. So, I think it is particularly noteworthy that both of these organizations are unequivocally opposed to H.R. 1236—because they are the most qualified to understand its real consequences.

Perhaps the best way to demonstrate the practical unfairness of this legislation is to refer to a letter I received from a small manufacturer in Tennessee. He writes:

> It is difficult to understand why a manufacturer should be forced to sell to any retailer who wants his product, while the retailers have no obligation to buy from the manufacturer.

We can quote all the antitrust jargon and antitrust case law we want on both sides of this issue. But the fairness question posed by that small Tennessee manufacturer is the one that Congress really ought to consider.

If H.R. 1236, as reported by the House Judiciary Committee, is enacted into law, then Congress will have created a legal situation that will result in serious and costly harm to thousands of businesses—manufacturers and retailers—all across this country. The bill would establish a statutory presumption of unlawful price fixing and, as a result, weaken evidentiary standards in complex antitrust cases dealing with resale price maintenance. The bill would encourage plaintiffs to bring antitrust suits that would not be filed today.

Mr. Chairman, America already sues itself seven times the rate of Japan and three times the rate of Germany. The Federal antitrust laws award successful plaintiffs treble damages—three times actual damages. What the committee version of H.R. 1236 is about, Mr. Chairman, is adding to the cost of doing business in America, at a time that our Nation is being sorely tested in the international marketplace. If amendments to be offered by Congressmen DOUGLAS, MOORHEAD, CAMPBELL, and myself are not adopted, the correct vote—based upon legal fairness and sound national economic policy—is "no" on H.R. 1236.

□ 1530

Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. BROOKS. Mr. Chairman, I think we ought to act immediately to state clearly and once and for all that vertical price fixing is illegal, that it is not going to be tolerated, and will be subject to redress by injured parties. Any Member who is against vertical price fixing ought to vote against it. To say that one is against vertical pricing, but does not want to penalize anybody for that activity, is just like telling them, "Do not steal the money, but if you do, I am not going to do anything to you for stealing it."

It is just that bad. That is what the situation is. That is what we are determined to remedy now.

Mr. Chairman, I would ask wholehearted support for the bill, and I yield back the balance of my time.

Mr. SMITH of New Jersey. Mr. Chairman, I rise today to express my strong support for H.R. 1236, the Price Fixing Prevention Act of 1989. On very few occasions does legislation come before the House with such clear and direct implications for the consumer. Passage of this important bill, Mr. Chairman, is one such example. H.R. 1236 would provide a substantial boost to the buying power of American families and help drive illegal restraints of trade from the marketplace.

I am proud of the success of the free market system in our economy. We should be encouraging those businesses which compete by offering the lowest price to the buying public, we should not be supporting the legal roadblocks created by our courts. Price competition is what drives capitalist economies and spurs on business opportunities.

H.R. 1236 is designed to prohibit a practice that is totally contradictory to our traditional economic policies—the practice of vertical price fixing. By amending our Federal antitrust laws, H.R. 1236 will establish new evidentiary standards whereby a terminated retail distributor can bring a case against a manufacturer for conspiracy to fix prices. Furthermore, the legislation will codify current rules holding resale price maintenance agreements and vertical price fixing as per se violations of antitrust law.

There have been some questions and the effect passage of this measure may have on our business community. Specifically, concerns have arisen about the litigation which may be spurred by this bill. Since the Price Fixing Prevention Act will overturn the tight evidentiary standards created by the Monsanto and the Sharp decisions, I understand that it may be easier to bring suits alleging price fixing. However, before a judge or a jury can take such a case, the claimant must prove the substantial cause of this distributor being terminated was a result of a competitor's communication regarding price competition. Only legitimate cases, therefore, will get a hearing under this strict causation standard. Frivolous lawsuits must also face the traditional defense of summary judgment and the strong sanctions against spurious suits under rule 11 of the Federal Rules of Civil Procedure.

In conclusion, Mr. Chairman, I believe this sound legislation will arm consumers against inflationary price fixing and will bolster the legal protections available to those businesses which closely adhere to our antitrust laws and pursue energetic marketing and pricing strategies. As one of the bipartisan cosponsors of the bill, I join the numerous economists, law professors and antitrust experts in urging my colleagues to support the pasage of H.R. 1236.

Mr. KLECZKA. Mr. Chairman, the Price Fixing Prevention Act of 1989 (H.R. 1236) has my full support. Consumers, especially those on fixed or low incomes, owe Chairman BROOKS a debt of gratitude for bringing it to the House floor today.

Competition makes our American markets the envy of other nations. But the Supreme Court's decisions in the Monsanto and Sharp cases endanger the fair pricing standards of vital importance to our economy.

Unfortunately, the price-fixing agreements between certain manufacturers and retailers have flourished during the previous decade. Despite existing antitrust laws and nearly eight decades of case law documenting the ways in which price fixing can be anticompetitive, the Department of Justice has refused to press cases during the Reagan and Bush administration. To assist private parties injured by price-fixing schemes, H.R. 1236 would finally codify the ban against illegal pricing agreements.

Enactment of H.R. 1236 would also help prevent the American product distribution system from becoming rigidly controlled by cartels that set prices the market would not normally bear. Studies of this subject in the 1970's found that State laws which ease retail price fixing increased prices on some goods between 18 and 27 percent, and cost the consumer an additional $1.2 billion at the check out line. Our system of open competition, in which low-price and high-price retailers discipline each other, would clearly be strengthened by passage of this legislation.

Competition must be preserved at all levels of a manufacturing and distribution scheme to provide benefits to the consumer. H.R. 1236 takes a step toward protecting this principle by reversing the Court's recent limitations on fair commerce. This legislation deserves to become public law in 1990.

Mr. CONYERS. Mr. Chairman, I stand before you today to endorse H.R. 1236. This bill is critical to assuring that our senior citizens, many of whom live on fixed incomes, can benefit from retail price competition.

The Supreme Court, in the Monsanto decision and again in the Sharp decision, attacked the idea of retail competition, as when different retail outlets charge different prices for the exact same goods. Yet, retail competition is necessary for consumers to benefit from comparison shopping. Comparison shopping assures consumers that they are getting the very best value for their shopping dollars.

Our citizens who live on a fixed or low-income benefit from retail competition as it gives them access to goods they otherwise could not afford. Many senior citizens can enhance their quality of life by comparison shopping for their purchases. These important members of our communities have time to find the best value while making their purchases, and they have the incentive to stretch their shopping dollars. Thousands of senior citizens every year participate in bus tours to shop in places like North Carolina and New Jersey, which are known for their discount store industries.

Without this bill, however, our elderly consumers will find their shopping options limited. As more and more full-priced retailers exert their recently gained ability to get rid of their competition, the discount industry will change from a thriving vital industry, to one in which only the largest discount chains with a greatly limited supply of goods can survive. All the small, single store discounters will be put out of business by their competition. The elderly shopper will no longer have access to high quality goods at reasonable prices.

With all the financial pressures on our elderly citizens today, this body should act to protect their ability to comparison shop, to assure that those senior citizens who most need to stretch their shopping dollars to meet their needs can do so. Competition is a fundamental component of our economy and our consumers have the right to enjoy the benefits of free and open competition. Protecting our senior citizens from unnecessary infringements on their buying powers should be among the highest goals of this body.

For these reasons, Mr. Chairman, I urge my colleagues to join with me in supporting H.R. 1236 without amendment. This is the most important consumer protection issue which this body is likely to address this session.

Mr. BALLENGER. Mr. Chairman, this legislation would overrule two recent Supreme Court decisions—Monsanto and Sharp—affecting the antitrust law on resale price maintenance or vertical price fixing. This change would force manufacturers to deal with certain retailers or face threats and frivolous lawsuits from these retailers over alleged price fixing. As a practical matter, it shifts the burden of proof, in dealer termination cases, regarding alleged price fixing to the manufacturer, who must show that termination of a distribution agreement was not due to price fixing.

Vertical price fixing is automatically illegal under current law. Any retailer who is the victim of price fixing can sue the manufacturer. The penalties are severe. The Supreme Court decisions in question do not change the basic antitrust prohibition against price fixing. They merely clarify the law relating to price fixing by requiring the plaintiff to show at least some evidence that a price-fixing conspiracy actually occurred before the case is given to a jury. That is how it should be.

The market is fluid; manufacturers change distribution arrangements for a number of reasons. It is unwise to change the law to force a manufacturer to prove that every termination of a distribution agreement is not due to price fixing. This proposed change in the law would adversely affect consumers, and small businesses would find it more difficult to enter the market with new brands and products. Innocent manufacturers could be held liable under this legislation and would face costly legal bills defending their good name in court.

I urge my colleagues to oppose H.R. 1236.

Mr. GOODLING. Mr. Chairman, I rise in support of H.R. 1236, the Price Fixing Prevention Act of 1989. I want to congratulate Chairman BROOKS and Congressman HYDE and others for their time and effort in fashioning this legislation which rededicates the Federal Government to its longstanding opposition to resale price maintenance.

Resale price maintenance in its unvarnished form, is nothing more than price fixing and comes about when a manufacturer requires its distributors to agree to charge certain prices for goods or services and thereby eliminates price competition to the ultimate consumer.

As early as 1911, the Supreme Court struck down such a scheme as illegal per se in Dr. Miles Medical Company versus John Park and Sons. Justice Charles Evans Hughes concluded in that decision:

> The complainant having sold its products at prices satisfactory to itself, the public is entitled to whatever advantage may be derived from competition in the subsequent traffic.

This simple and effective rule has served us well for over three quarters of a century, and today we are merely reaffirming it.

The bill before us codifies this rule and clarifies some evidentiary ambiguities that have arisen since recent Court decisions in the Monsanto and Sharp decisions.

There is concern that the bill could result in juries misinterpreting and treating many innocent and completely lawful business practices as vertical price fixing. However, the legislation makes it clear that the plaintiff must prove there was a communication from a competitor of the claimant to the supplier regarding price competition and in response to the communication the claimant was terminated.

While I support additional amendments to address some of the other concerns of the business community, I am pleased with this particular legislation of what I consider a proconsumer and probusiness bill.

I urge my colleagues to join me in supporting H.R. 1236.

Mr. WISE. Mr. Chairman, I rise in support of H.R. 1236, the Price Fixing Prevention Act of 1989. This bill represents one of the most important consumer issues Congress will address this year. This legislation is necessary if American consumers are to have access to the large discount industry.

Since 1911 the antitrust laws have protected price competition by making vertical price fixing—agreements between manufacturers and dealers—an automatic violation of the antitrust laws. The laws against vertical price fixing are designed to protect retail price competition. The law has encouraged the growth of the discount industry by allowing smaller discount stores to compete with larger established stores by offering brand name merchandise at lower prices.

Two recent Supreme Court decisions, however, threaten this consumer advantage. The discounters' protection was seriously eroded in 1984 by the Supreme Court's decision in Monsanto. This ruling placed an incredible burden of proof on plaintiff-discounters claiming their supplies had been cut off by manufacturers because of full price retailers' complaints about price competition. Yet the 1988 ruling in Sharp cleared the way for anticompetitive conduct. In that case, a manufacturer stopped supplying calculators to a discount store after a retailer complained his prices were being undercut by the discounter. The Supreme Court ruled there was no price fixing because the manufacturer and the high priced retailer had not discussed a specific price to be maintained after the discounters' supplies were terminated. As long as manufacturers and retailers do not discuss a specific price or price level, they are free to fix prices with a wink and a nod.

The judicial fall out from the Sharp decision has already begun. Lower courts are dismissing cases where there is clear evidence of larger dealers coercing manufacturers to terminate rival discounters. Most recently, Kids "R" Us, a nationwide discounter of children's clothing, alleged that Macy's pressured two manufacturers of children's swimwear not to supply the discounter. The New York District Court ruled that although there was evidence of coercion on Macy's behalf and that Macy's had been acting to protect its own higher prices, there was no automatic antitrust violation because there was no agreement on a specific price or price level. With rulings like the Macy's decision, consumers are faced with fewer choices and are forced to pay higher prices. This is not how the American marketplace should operate.

In addition, more and more discounters are going out of business. To continue at this rate will inevitably mean an end to vigorous retail competition and force American consumers to buy most products at full retail price.

We should prove we are serious about preserving a principle of American capitalism—price competition—and that we care about consumer welfare by passing this antiprice-fixing, proconsumer bill.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill is considered under the 5-minute rule by sections and each section shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Price Fixing Prevention Act of 1989".

The CHAIRMAN. Are there any amendments to section 1 of the bill?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. DOUGLAS

Mr. DOUGLAS. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. DOUGLAS: Strike all after the enacting clause and insert the following language:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Price Fixing Prevention Act of 1990".

SEC. 2. PROHIBITION AGAINST RESALE PRICE FIXING.

In any civil action based on a claim arising under section 1 or 3 of the Sherman Act (15 U.S.C. 1, 3), and alleging a contract, combination or conspiracy to set, change or maintain prices, the fact that the seller of a good or service and the purchaser of such good or service entered into an agreement to set, change, or maintain the price (other than a maximum price) or such good or service for resale shall be sufficient to constitute a violation of such section."

Mr. DOUGLAS. Mr. Chairman, I wanted the amendment to be read because in fact it is only one sentence long. It also does what the gentleman from Texas [Mr. BROOKS] wants us to do and what I want us to do.

Today we ought to take the Doctor Miles decision of 1911 from the U.S. Supreme Court that says you should not have any retail price fixing under the Sherman Act, and it puts it in the United States Code. That is all we need to do today, take one sentence, codify the Doctor Miles case, and make it very clear that if you are going to allege a conspiracy to fix prices between a manufacturer and a seller of those products, you can get 300 percent of your damages.

So if the opponents of my amendment say that it somehow guts the antitrust laws, in fact what it does is to codify the Doctor Miles case and permit someone to go to court and get 300 percent, treble damages, if they prove that there was a fixing on retail prices.

One of the reasons that Apple Computer, a little company run by a guy in his thirties, Steven Jobs, and big old IBM are opposed to the other four pages of the Brooks bill is that it creates a lawyers' field day to get cases wrapped around the axle in Federal court. It overturns two U.S. Supreme Court decisions, whereas the Douglas amendment codifies, puts into the law books, the one decision we can all agree on, the Doctor Miles case.

Let me just finally point out there are reasons why manufacturers terminate dealers. Some dealers do not service the product. Some dealers do not live up to the warranty. Some dealers do not employ the salesmen that are properly trained to explain to the consumer how to use the product. Some do not adequately display the product or put it out in the proper place within the store.

There are a number of reasons why dealers get complaint letters against other dealers who are selling low but are not providing the service to the consumer.

What we ought to do is today go on record, for the first time since 1911, saying we are against price fixing. We are going to do that. We are going to pass the Douglas amendment, but we are not going to pass all this other stuff that the subcommittee narrowly on a 9-to-6 vote reported out, that the Senate Committee on the Judiciary only on a 7-to-6 vote reported out, and we are going to get to price fixing and price fixing only, and we are going to strip out of the bill all of the stuff that will have the lawyers in their platoons and squads hanging around courthouses for years, arguing over inferences and presumptions and what is a communication, all of the stuff that is a mess in the committee bill.

Mr. Chairman, I urge the adoption of my amendment.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

I want to first thank the gentleman from New Hampshire for having shown the courtesy of publishing his amendment in the CONGRESSIONAL RECORD of April 4, 1990. Nevertheless, I must vigorously oppose it, since it fails to address in any way the difficulties created by the two Supreme Court decisions that have gutted the very per se prohibition against vertical price fixing that he wishes to codify by his amendment.

The amendment would simply say that vertical price fixing is illegal. Fifteen years ago, that statement could have stood alone as an accurate restatement of congressional policy, especially given the legislative history of the Consumer Goods Pricing Act enacted in 1976. After that act—introduced at the urging of Presidents Nixon and Ford—injured plaintiffs could receive a jury trial if they could show a reasonable nexus between a price complaint from a rival dealer and a manufacturer that led to the discounter's termination. But no longer. The 1984 Monsanto decision has ensured that such cases will never get to the jury.

Similarly, in 1976, there was never any question that price fixing conspiracies rarely—if ever—involve the "smoking gun" practice of two conspirators getting together to set a specific price for all the world to see. But no longer. The 1988 Sharp decision now requires such proof—even though we in this body and the other body as recently as the 99th Congress passed a resolution (H. Res. 303) rejecting the requirement that a specific price be set. At that time, we emphasized that such a notion was too limiting and contrary to past congressional intent.

Thus, the amendment before us is unfortunately not adequate to deal with the conditions we face today. It would have indeed been appropriate in 1976. It would have equally been appropriate in 1980 when the antitrust laws were still being enforced. But in 1990, this statement of the law is insufficient. It would represent a denial of reality—the reality that vertical price fixing enforcement lies in ruins.

I would ask my colleagues to oppose the amendment.

□ 1540

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the amendment offered by my colleague from New Hampshire.

As this debate reflects, there are some very fundamental and serious problems with this legislation. As it is currently constituted, H.R. 1236 would legislatively overturn two recent Supreme Court decisions *Business Electronics Corporation* v. *Sharp Electronics Corporation*, 108 S.Ct. 1515 (1988), and *Monsanto* v. *Spray-Rite Service Corporation*, 465 U.S. 752 (1984). In addition, Section 4 of this year's version contains ill-advised language that might well be used to undermine the scope of the well-established Supreme Court decision in *Continental T.V., Inc.* v. *GTE-Sylvania, Inc.*, 433 U.S. 36 (1977).

I am of the view that the committee version of H.R. 1236 can only be counterproductive to the interests of both American business and the American consumer. What the Douglas amendment would do would be to provide the members of this House with the opportunity of going on record against vertical price fixing—or, as it is often called resale price maintenance—without accepting the more questionable aspects of this bill. If the Douglas amendment is adopted, H.R. 1236 would codify the per se rule against resale price maintenance for the first time. The bill, however, would no longer overrule the Supreme Court decisions that I referred to earlier.

The adoption of the Douglas amendment would be a sensible solution to the quandary posed by this bill. The House of Representatives would be on record against vertical price fixing without creating an unfair litigation situation for manufacturers and distributors.

I urge a favorable vote on the Douglas amendment.

Mr. SMITH of Florida. Mr. Chairman, I move to strike the requisite

number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to the amendment. This amendment would strike the two main provisions that the Committee on the Judiciary has labored so intensively to craft.

Section 2(a) is a provision that would modify the evidentiary standard set forth in the Monsanto case which would allow, under my former scenario, Ritzy Glitzy to cause the High Brow Manufacturing Co. to drop the others' sales, retail sales outlets; and that part of section 2(b) that would overrule the Supreme Court's holding in the Sharp case.

The purpose of the amendment is fairly plain. It would kill this bill.

For the past several years the committee has worked long and hard to study the law concerning vertical price fixing. The gentleman from New Hampshire was not a member of the committee for the time, up until this year, that we considered previous bills on vertical price fixing.

This is not an easy subject. It is not easy because there is a lot of consternation, there is a lot of previous antitrust law, there are a lot of case laws. But the bottom line is that we have looked at it, and we have worked on it, and we have attempted to understand the Department of Justice's enforcement attitudes, and the basis of those attitudes. We have had to grapple with the Supreme Court's decisions in this area, and to make judgments about the effect of those decisions.

We have heard from witness after witness after witness, representatives of a huge variety of potentially affected interests have met with us in committee, in offices, in the Halls to give us the benefit of their views and experience. We have held markups in the subcommittee and the full Judiciary Committee at which compromises have been reached, and the amendments of this nature and others have been considered and been rejected.

I set this forth because I think it is important, very important to understand that this legislation is not some radical idea, but is the product of a lengthy, bipartisan, considered effort by the Committee on the Judiciary to resolve a problem that plagues consumers in this country.

I also want to let my colleagues know that the language before the House is based on our findings that the law, as it currently exists, is unfair in many cases to plaintiffs in these lawsuits. In the Monsanto case the Supreme Court reasoned that a plaintiff could not prove a conspiracy by showing that he was terminated after a price complaint from one of his full-price competitors because there could be other innocent reasons that caused the termination. Fair enough.

Mr. DOUGLAS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Florida. Mr. Chairman, I will not yield until I have finished my statement.

Fair enough. There could be other reasons.

However, some of the language in the Monsanto case has been interpreted subsequently to mean that even when the plaintiff can establish a high degree of causation between the price complaint and his termination, he still cannot get his case to a jury unless he can produce evidence, evidence that must come from the files of the defendants and the mouths of the defendants' executives that refutes every other innocent explanation that the defendants' lawyers can come up with. So not only do you have to prove the positive, but you have to prove the negative, and it is impossible.

I think, and my colleagues on the committee have agreed with me, that this is too high a standard of proof for plaintiffs to bear. And those knowledgeable in the field have reached the same conclusion.

Writing in the Cornell Law Review, Prof. John Flynn found that "a striking feature" of the post-Monsanto cases was that more than half were decided by judges and not by juries in favor of the defendants. The professor commented that "the extensive and widespread use of summary judgment to terminate vertical restraint cases raises the question of whether some courts are infringing upon the rights to a jury trial."

According to a 1987 survey article in Antitrust, the magazine of the section of antitrust law of the American Bar Association:

> It is tempting to say that the only consistencies in these applications of Monsanto is that the defendants always win. That would be an overstatement. However, it is clear that the plaintiff rarely wins.

It is in response to these findings and findings made by the committee that we crafted the evidentiary section.

The CHAIRMAN. The time of the gentleman from Florida [Mr. SMITH] has expired.

Mr. SMITH of Florida. Mr. Chairman, I ask unanimous consent that I may have 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. DOUGLAS. I would object, Mr. Chairman. I asked the Member to yield and he would not yield, so I object to his request.

Mr. SMITH of Florida. The gentleman objects on an open rule to my request for 3 additional minutes?

Mr. DOUGLAS. The gentleman objected to my request that he yield.

The CHAIRMAN. Does the gentleman from New Hampshire reserve the right to object or does he object?

Mr. DOUGLAS. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. CAMPBELL of California. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from New Hampshire [Mr. DOUGLAS].

Mr. DOUGLAS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, it would have been my hope that we could have had a colloquy with my brother from Florida. Unfortunately, he has chosen not to yield.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS. I am glad to yield to the gentleman from Florida.

Mr. SMITH of Florida. Mr. Chairman, if the gentleman would have allowed me time to finish my statement, I would have been happy to yield and to engage in a colloquy. The gentleman obviously does not understand the rules in this House.

Mr. DOUGLAS. No, I understand the rules. The gentleman said he would not yield until he was done, and then when he wanted 3 more minutes. I can listen as well as understand the rules.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield further?

Mr. DOUGLAS. I will when I finish my statement.

Mr. SMITH of Florida. I was not finished with my statement.

Mr. DOUGLAS. I will yield as soon as I have made my point. My point is that in what the gentleman from Florida [Mr. SMITH] was talking about, and the confusion that he is trying to clarify allegedly in this bill is that one of the things a competitor can do to another competitor is send a communication to the manufacturer. He thinks that is a neat idea in this bill. It says a communication, and I remember as he said we took this up during the subcommittee as well as the full committee asking does this have to be an oral or a written communication, and that is not clear. The bill merely says a communication.

The bill also says that any communication from a competitor has to be merely a substantial contributing cause. There can be many contributing causes as to why a manufacturer chooses to let a dealer go.

□ 1550

But unfortunately that is going to mean more litigation, more confusion, because we are now dealing not with the primary cause for why someone was terminated because they were not providing service or they were not providing a warranty, merely a substantial cause out of many causes. That is why the language is so confusing. That is why Mr. SMITH and I agree it

is very complex, and that is why I stand by my amendment, which is very simple; it will codify the rule and solve our problem by outlawing price fixing without getting into the kind of colloquy that we could go on for days in nitpicking, very confusing lawyer phrases in this particular bill.

Mr. CAMPBELL of California. Mr. Chairman, I yield to my colleague from Florida if the gentleman from Florida [Mr. SMITH] wishes to speak.

Mr. SMITH of Florida. I appreciate it, but someone else will ask for time for me to finish my statement.

Mr. CAMPBELL of California. Mr. Chairman, I yield back.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of words and yield to the gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. I thank the gentleman for yielding.

If I may continue so that I can finish my statement.

Mr. Chairman, it is in response to these findings and findings made by the committee that we crafted the evidentiary section. The evidentiary section that we are considering today is the same as the one that passed the House last Congress under suspension of the rules with the bipartisan support of every member of the House Judiciary Committee and the acquiescence of many of the groups that are now opposing H.R. 1236. It was a compromise and reasonable provision then and it is a compromise and reasonable provision now. To strike it at this juncture would be completely inconsistent with the action that we took last Congress when we sent H.R. 585 to the Senate for approval.

I would only briefly address the portion of the amendment striking the section in H.R. 1236 overruling Sharp. H.R. 585 in the last Congress did not overrule Sharp because the Sharp decision had not been decided when we acted. We passed H.R. 585 in November 1987; the Supreme Court's decision in Sharp came down in May 1988. However, it is absolutely clear from looking at the legislative history and the committee report that it was our unanimous view that an agreement to terminate a discounter with the purpose and effect of eliminating price competition is a price-fixing agreement—whether or not there is a second agreement on a price or a price level. And so, in overruling Sharp, we are only doing what we were prepared to do unanimously before. If we were willing to do it then, we ought to be willing to do it now.

And to my colleague from New Hampshire, the antitrust laws which were passed over 70 years ago are laws which have grown up and are technical and they are lawyerlike and they have protected a lot of people because they are, and the gentleman, as a jurist, knows that. And to now discount the fact that this is a highly technical and lawyerlike piece of legislation and say we ought to "stop messing around with all that stuff, let's just get to my stuff," does a grave disservice to the amount of work that has been done on the antitrust laws which protect consumers in this country and have done so for the last 70 years.

Mr. Chairman, I thank the gentleman for yielding.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from New Hampshire [Mr. DOUGLAS].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. DOUGLAS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred ninety-five Members have answered to their names, a quorum is present, and

the Committee will resume its business.

RECORDED VOTE

The pending business is the demand of the gentleman from New Hampshire [Mr. DOUGLAS] for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. Under a previous ruling of the Chair, the time for this vote will be reduced to 5 minutes.

The vote was taken by electronic device, and there were—ayes 155, noes 242, not voting 36, as follows:

[Roll No. 71]

□ 1624

The Clerk announced the following pairs:

On this vote:

Mr. Thomas of California for, with Mr. Akaka against.

Mr. Lewis of California for, with Mr. Nelson against.

Mr. Stump for, with Mr. Dingell against.

Mr. Jenkins for, with Mr. Moody against.

Mr. Craig for, with Mr. Collins against.

Messrs. HOYER, CONTE, and UDALL changed their vote from "aye" to "no."

Mr. LIVINGSTON changed his vote from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any other amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

SEC. 2. EVIDENTIARY STANDARDS IN FEDERAL CIVIL ANTITRUST ACTIONS RELATING TO PRICE FIXING.

(a) In any civil action based on a claim arising under section 1 or 3 of the Sherman Act (15 U.S.C. 1, 3) and alleging a contract, combination, or conspiracy to set, change, or maintain prices (other than a maximum price), evidence that a person who sells a good or service to the claimant for resale—

(1) received from a competitor of the claimant a communication regarding price competition by the claimant in the resale of a good or service, and

(2) in response to such communication terminated the claimant as a buyer of a good or service for resale, or refused to supply to the claimant some or all of such goods or services requested by the claimant,

shall be sufficient to raise the inference that such person and such competitor engaged in concerted action to set, change, or maintain prices for such good or service in violation of such section. For purposes of this subsection, a termination or a refusal to supply is in response to a communication if such communication is a substantial contributing cause of such termination or refusal to supply. Nothing herein shall preclude the court from entering judgment in favor of the defendant, at trial or prior thereto, if the court determines on the basis of all the evidence and pleadings submitted by the parties, in accordance with the Federal Rules of Civil Procedure and the requirements of this subsection, that no such inference of concerted action can reasonably be drawn by a trier of fact.

(b) In any civil action based on a claim arising under section 1 or 3 of the Sherman Act (15 U.S.C. 1, 3), and alleging a contract, combination, or conspiracy to set, change, or maintain prices, the fact that the seller of a good or service and the purchaser of such good or service entered into an agreement to set, change, or maintain the price (other than a maximum price) of such good or service for resale shall be sufficient to constitute a violation of such section. An agreement between the seller of a good or service and the purchase of such good or service to terminate another purchaser as a dealer or to refuse to supply such other purchaser because of that purchaser's pricing policies shall constitute a violation of such section, whether or not a specific price or price level is agreed upon.

AMENDMENT OFFERED BY MR. FISH

Mr. FISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISH: On page 2, line 15, strike "price competition" and insert in lieu thereof "the specific price or prices charged."

On page 2, line 16, insert "requested termination of the claimant" after the comma and before "and".

On page 2, line 17, strike "in response to" and insert in lieu thereof "because of and in agreement with".

On page 3, line 7, strike "in response to" and insert in lieu thereof "because of".

On page 3, line 8, strike "a substantial contributing" and insert in lieu thereof "the major".

Mr. FISH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FISH. Mr. Chairman, this amendment would revise and clarify the language in H.R. 1236 dealing with the Supreme Court decision in Monsanto Co. versus Spray-Rite Corp.

My continuing concern has been that the language in H.R. 1236 is overly broad and would cover situations that do not, in fact, involve anticompetitive activities. A manufacturer can have valid, nonprice reasons for terminating a retail dealer. For example, a retail outlet may be terminated for not advertising a product as agreed upon, failure to provide adequate repair or warranty service, failure to hire trained sales or service personnel, failure to properly display the products of the manufacturer, or simply because its sales are poor. All these are legitimate nonprice reasons and terminations based upon those reasons in no way violate the antitrust laws.

Manufacturers have a right to be concerned about the impact that retail outlets can have on the reputation and good will that surrounds their products in the marketplace. My amendment is intended to prevent the possibility that a defendant-manufacturer could find itself carrying the burden of proof in an alleged antitrust conspiracy, even though its motives and actions had nothing to do with the price of the product or products in question. The fact is, that Congress shouldn't be micromanaging evidentiary standards in these complicated, fact-based cases at all.

Simply put, my amendment would require some preliminary showing of a conspiracy—an agreement—between the defendant-manufacturer and another dealer. So, before the plaintiff would be able to defeat a motion for summary judgment, there would have to be some evidence of a conspiratorial agreement. Further, my amendment would make it explicitly clear that the claimant's termination occurred because of that conspiracy. The conspiracy would have to be the major cause of the termination. Through these changes, the Fish amendment would resolve the confusion and concern prompted by the vague, ambiguous language currently contained in section 2(a) of H.R. 1236. My "major current" language is identical to language adopted by the Senate Judiciary Committee.

It is important to understand that when a price-fixing allegation is made under the antitrust laws—a plaintiff must show there was an agreement or conspiracy among two or more participants. Unilateral action is not a violation—"Colgate doctrine." A key problem with the language in this bill is that it probably will be interpreted as meaning that no preliminary proof of a conspiracy is necessary. I know of no instance where a court has found a Sherman Act—section 1 or section 3—violation without proof of a conspiracy. We should not imply that less would suffice in the cases covered by this legislation. The result of the language now in the bill could only be to prolong and extend unjustifiable litigation.

Under my amendment, an inference of price fixing could only be raised in a resale price maintenance termination or supply case if: First, the plaintiff-dealer can demonstrate evidence of a conspiracy early in the litigation; and second, a direct causal link between that conspiracy and the manufacturer's ultimate decision to terminate the dealer can be shown.

If Congress intends to legislate an evidentiary standard for dealer termination cases, then we cannot ignore the fundamental standard for proving a violation of section 1 or section 3 of the Sherman Act. In a price-fixing case there has to be some evidence of a common design—an agreement. My amendment would ensure legal consistency and firmness.

This amendment is supported by a number of trade associations including the National Association of Manufacturers, the Electronic Industries Association, the Chamber of Commerce of the United States, and the Computer and Business Equipment Manufactures.

I urge the adoption of my amendment.

□ 1630

Mr. BROOKS. Mr. Chairman, I rise to oppose the amendment. The evidentiary standard set out in section 2(a) represents the carefully crafted compromises which were worked out by the members of the Judicary Committee.

Our effort was to restore the balance of the evidentiary standard existing prior to the 1984 Monsanto decision. Monsanto created a near-impossible evidentiary burden for plaintiffs by requiring them not only to prove their own case at summary judgment but also to disprove the case of the defendants. Nowhere does that burden exist under the antitrust laws. Thus, section 2(a) simply returns to the evidentiary standard adopted by a majority of Federal circuit courts of appeal prior to the Monsanto decision—it does nothing to create a new standard.

The key to section 2(a) is its recognition that if a plaintiff can show that a price complaint from a rival dealer was a substantial contributing cause to his termination by a manufacturer, then he should at least be allowed to be heard by a jury on the merits of the case. However, the standard does nothing to influence the jury's ultimate determination about whether a price-fixing conspiracy occurred. This point is made absolutely clear in both the statute and the legislative history.

The word "substantial" was chosen because it has a readily understandable meaning in the law. The words "primary," "sole," or "exclusive" were not chosen because often there may be other reasons coexisting with a price fixing conspiracy scheme to terminate a dealer. In such a case, it may not be possible at the early pretrial stage of summary judgment to decide that the price-fixing reason was the sole or primary reason. That is for a jury as the trier of fact to decide.

The attempt to insert the word "agreement" is another instance of attempting to reopen the very issues that we put to rest during the compromise negotiations. To repeat one more time, section 2(a) is an evidentiary standard relating to what a plaintiff must show to get past summary judgment and receive a trial on the merits. At this stage, he does not have to prove the existence of an agreement—again, that is the ultimate question of fact for a jury to decide once a complete trial on the merits has been conducted.

Finally, to reassure everyone that nothing in the bill would alter the traditional conspiracy requirements under the Sherman Act, section 3 of the bill was included to make clear that concerted action must always be shown in vertical price-fixing cases, as in all antitrust suits.

Mr. Chairman, I want to mention one other matter that has been added to this amendment recently dealing with specific price. The relevant passage in the amendment was dealt within House Resolution 303, introduced in the first session of the 99th Congress by the gentleman from New York [Mr. FISH] for himself, the gentleman from New Jersey [Mr. RODINO], the gentleman from Illinois [Mr. HYDE], the gentleman from Texas [Mr. BROOKS], the gentleman from California [Mr. DANNEMEYER], the gentleman from California [Mr. EDWARDS], the gentleman from Ohio [Mr. SEIBERLING], the gentleman from Oklahoma [Mr. SYNAR], the gentleman from Kansas [Mr. GLICKMAN], and others. It was introduced by the very gentleman from New York [Mr. FISH] who is the sponsor of this amendment today. I think it is appro-

priate to quote from House Resolution 303 to demonstrate the inconsistency of this provision:

Whereas such Department of Justice policy guidelines are inconsistent with statements of congressional intent in stating that vertical restraints that have an impact on prices are subject to the per se rule of illegality only if there is an "explicit agreement as to the specific prices."

Both Houses of this Congress, the House and the Senate, adopted that resolution, which was then placed in an appropriations bill, passed by both Houses and signed by President Reagan.

I therefore must oppose this or any other amendment that would seek to impose the proposition that vertical price fixing can only be found where conspiracies set or maintain an exact or specific price.

Mr. CAMPBELL of California. Mr. Chairman, I move to strike the last word. I rise in favor of the amendment.

Mr. Chairman, hard as it is to believe, I am coming to the conclusion that not everybody finds resale price maintenance exciting or interesting. This is a very difficult lesson for me. I used to spend easily 2 weeks in class on the subject, and at the end of this topic I looked out over the students and saw them glazed-eyed, and nothing brought back that feeling as much as looking out over this body today, reaching the same conclusion.

Perhaps it is just as well that most of our colleagues here are not attorneys and do not find this of great interest, but there is one important distinction that an attorney would grant, and that is that getting to the jury is everything, particularly where you have the chance to get treble damages. If you can get to the jury, you have got a shot at the big spin, and no one can predict a jury, particularly when there are treble damages at stake.

So what we have in the law are various stopgaps that the normal case needs in order to prevent the big spin, taking the case to a jury on treble damages, the law establishes at least two stopgaps. One is the directed verdict motion, and the other is the summary judgment motion. What that does is give the judge a chance to say, "Wait a minute, you really do not have much of a case here, and we are not going to let you take your case to the jury for your turn at the big winnings." That is very sensible. The judge has control under existing law. If they did not have that, I predict, and I think I would be completely on safe ground in doing so, that every case would go to the jury, because there is nothing to lose. Why not bring a case and get it to the jury and try to get treble damages?

□ 1640

If this amendment passes, we will have the correct rule that allows bypassing summary judgment and bypassing the directed verdict only where there really is enough evidence to suggest that there is a price-fixing agreement, and that is just the point. Plaintiffs ought to have something to get past and in to the jury.

Without this amendment, all it takes to get to a jury and thereby get the chance at treble damages is proof that another distributor complained about you to the manufacturer on the topic of price, and that that was a cause, a substantial cause, but not the controlling cause, in your being terminated.

Those of my brothers and sisters in this body who have been in retail distribution will surely bear me out when I say there is not a distributor in America who has not at one time or another been complained against by a competing distributor. It is almost inevitable. It goes with the territory. Your distributor always is lowballing you on price, always cutting into your territory, always doing things that hurt your business. Now, if you have any familiarity with retail, I suggest, therefore, that to say one distributor gets to the jury merely by showing that another competitor complained is to say you almost always get to the jury and, as a result, we will have many, many more cases, many, many more large settlements in this area.

In conclusion, I want to point out something about the modest nature of the vice chairman's amendment, and that is that it does not overrule Sharp. This amendment by the gentleman from New York [Mr. FISH] does not try to change the language of the statute relative to the Sharp case. It only says that if one is going to get to the jury on this agreement issue, they have to have a little bit more than just that another person complained against you.

Sharp, bear in mind, was the case where the Supreme Court said one needed to prove more than just an agreement concerning price; they had to prove an agreement on the exact price.

For those of my colleagues who think that I applaud everything the Supereme Court has done to cut back antitrust, let me put on the record that I think that the Court got it wrong in Sharp, and if this bill merely reversed Sharp, I would support it.

Wisely, my colleague from New York does not attempt that in his bill. He leaves the bill on Sharp the way it was, but prevents something very important and worth preventing, the shot at the big spin, treble damages, merely on the fact that another distributor made a complaint about you.

I suggest to my colleagues that happens every day. If we are interested in many, many more lawsuits, if we are not troubled by the fact, as has been pointed out by my colleagues from Mississippi and New York, that America has seven times the litigation rate of Japan, then we would see no reason not to support the bill; if those things do concern us, then do not create an opportunity for wide-open litigation for treble damages, and support the amendment by the gentleman from New York [Mr. FISH].

Mr. SYNAR. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, let me start off to help some of our colleagues who may not have been following the debate on why we are here today in general.

Since 1911 vertical price fixing has been per se illegal under the antitrust laws. Price fixing between the manufacturer and the retailer to drive a competitor out of business is intolerable in an open and free market system, and I think both the Republicans and Democrats agree on that.

Mr. Chairman, we would not be here today, very honestly, had it not been for the Reagan administration's decision to abandon 70 years of enforcement of vertical price fixing in 1980 and their active assistance to the alleged price fixers.

In response to that, let me remind my colleagues what we did in this Congress. We passed a bipartisan resolution in 1985 condemning the administration's efforts. This resolution's chief sponsor was the gentleman from New York [Mr. FISH], who today is offering that amendment.

Let me remind my colleagues the history of that resolution by reading exactly what it stood for. The policy guidelines that were being used by the Justice Department "are inconsistent with established antitrust law." That resolution specifically criticized the administration's decision to apply that law when only a specific price agreement existed. We thought it was right then. We think it is right now.

The gentleman from New York [Mr. FISH] and this Congress knew that requiring specific price was an impossible standard in bringing any antitrust suits.

What the gentleman from California [Mr. CAMPBELL] just advocated is that the plaintiff would have to prove conclusively at the summary judgment that a conspiracy existed. That is what a jury should have to decide based upon the full disclosure of the merits.

At summary judgment, it should be the responsibility of the plaintiff to show that there was a likely cause of the termination of that price contract. What the gentleman from New York and, now, the gentleman from California would have us do is that they would basically have us make that decision before any of the witnesses, any of the evidence, any of the experts are brought into the court, and that would

go contrary to what we tried to do in 1985. That is why that resolution passed in a bipartisan fashion both in the House and in the Senate, and that is why it was signed by the President. Yes, the amendment by the gentleman from New York [Mr. FISH] offered today will require a specific price agreement in order that we basically allow this bill to change, and that amendment was specifically rejected by this Congress.

In conclusion, I think it is simply to say that if it was wrong to require a specific price agreement in the 99th Congress in a bipartisan fashion signed by the President, it is wrong to require today in the 101st Congress.

Mr. CAMPBELL of California. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I am happy to yield to the gentleman from California.

Mr. CAMPBELL of California. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, I wanted to put to the gentleman what his sense would be of what would be appropriate for what a plaintiff would need to show in order to make a summary judgment case go beyond summary judgment.

The form of my question is specifically this: Does the gentleman believe that all a plaintiff need show in order to escape a defense motion for summary judgment, defense motion for a directed verdict, is that another distributor complained to the manufacturer about that distributor's behavior on price?

Mr. SYNAR. Mr. Chairman, reclaiming my time it has to be, as the gentleman knows in this legislation, a substantial showing that there is a likely cause for termination of the price complaint. That is what we did in 1985. That is what we are trying to instate today, and it is no different than what we supported then, and what we think is right now.

Mr. CAMPBELL of California. If the gentleman will yield further, in his remarks he characterized my position as saying the proof has to be conclusive. I wonder if he would consider modifying that from the point of view of the need for the plaintiff merely to put into evidence something more than a complaint. The evidence of an agreement is not the conclusion of an agreement. I put to the gentleman and ask whether he would not more aptly have said the position I and the gentleman from New York [Mr. FISH] are advocating is that more evidence need be put in, that both of us, the gentleman from New York [Mr. FISH] and I, agree the fundamental decision is for the jury.

Mr. SYNAR. I do not mean to lecture the gentleman, who is a distinguished professor of law for many years, but I think the gentleman is aware that the civil rules of procedure govern a situation such as this, and this, combined with the legislative intent that it has to be a substantial showing, should remedy the gentleman's problem that a mere complaint alone could trigger this.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. SYNAR] has expired.

(At the request of Mr. FISH and by unanimous consent, Mr. SYNAR was allowed to proceed for 1 additional minute.)

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. I am happy to yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I just wanted to clarify something, that there is nothing in my amendment that is inconsistent with my sponsorship in an earlier Congress of the vertical guidelines resolution. That resolution recognized that a proof of price-fixing conspiracy was essential in these cases and that is the bottom line. That was the law then. It is the law now. We should require it in H.R. 1236.

□ 1650

Mr. SYNAR. Mr. Chairman, would the gentleman from New York [Mr. FISH] point to the resolution that this House passed in 1985 that included specific price as part of the agreement?

Mr. FISH. I have not got the resolution in front of me.

Mr. SYNAR. Well, I can tell the gentleman from New York that the resolution that the gentleman authored that was passed in a bipartisan fashion and signed by the President did not include specific price, and that this legislation and this amendment which the gentleman is offering today does include that. So that is substantially different than the original resolution.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. SYNAR. Mr. Chairman, I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, we just differ on that. My recollection is that the presumption was one would have to prove a conspiracy as one does in all antitrust law.

Mr. JAMES. Mr. Chairman, I would like to be recognized in support of the amendment. I am concerned specifically about the language in the statute. I will read from the bill itself. As I understand it, and this has been argued, all it would take is a complaint, and Members will have to read lines 14 through 18 which I will not read because they can read it for themselves, which establishes that which the gentleman from California [Mr. CAMPBELL] has so competently argued.

Mr. Chairman, I would like to add to that my concern about the specific language, the very specific language that I would like Members to read from lines 3 through 16 of the bill, which in essence says that an inference is drawn from the specific set of facts. Those lines are incompetently written to establish whether or not there is a cause of action as a matter of law. You will confuse the courts in the scenario and the situation more now than ever before with the language in the bill. You will have accomplished nothing but unending litigation as to what inference means when it does not talk in the technical language that is essential to establish what is a cause of action.

Mr. Chairman, it is rare that I have seen a piece of legislation so poorly drafted that leaves the question in the air as to what is the cause of action if an inference is the langauge of the laws of evidence, and it is only one part or one rule that helps establish admissible facts to establish the cause of action in the first place. But worse than that and more confusing than that, it allows you to establish for whatever your cause of action a specific inference.

Then it says a trial judge can turn around and rule that there are insufficient facts for the initial inference. It says on line 11, "If the court determines on the basis of all the evidence and pleadings submitted by the parties, in accordance with the Federal Rules of Civil Procedure and the requirements of this subsection, that no such inference of concerted action can reasonably be drawn by a trier of fact," he could discard it.

That is an anomaly. That is wiping out what you initially intended to say in the first place, that you would have a rule of evidence that would assist you, and you turn around and say the judge can pretend those facts were not proven and not let the jury hear the inference. Those are totally inconsistent.

But what is further inconsistent, if you are really trying to reestablish a cause of action, an inference alone would not do it. So you are going to have litigation again and again and again on whether or not there is a cause of action created by this specific set of facts.

Mr. Chairman, I am against the bill because it is incredibly poorly drafted and creates additional problems for both the retailer and the manufacturer. I am against the bill because it shifts the pendulum too far back over in the other dirction, even though you may be trying to correct the Monsanto decision.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FISH].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. FISH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were ayes 192, noes 204, not voting 37, as follows:

□ 1716

The Clerk announced the following pairs:

On this vote:

Mr. Craig for, with Mr. Ford of Tennessee against.

Mr. Lewis of California for, with Mr. Nelson against.

Mr. Jenkins for, with Mr. Moody against.

Mr. Stump for, with Mr. Dingell against.

Mr. Thomas of California for, with Mr. Akaka against.

Mr. GEJDENSON changed his vote from "aye" to "no."

Mr. HUCKABY changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any other amendments to section 2 of the bill?

If not, the Clerk will designate section 3.

The text of section 3 is as follows:

SEC. 3. RULE OF CONSTRUCTION.

Nothing in this Act shall be construed to change the requirement of the Sherman Act that a violation of section 1 or 3 of such Act may only be found upon a determination that the defendant entered into an illegal contract, combination, or conspiracy.

The CHAIRMAN. Are there any amendments to section 3?

If not, the Clerk will designate section 4.

The text of section 4 is as follows:

SEC. 4. RULE-OF-REASON STAND.

(a) IN GENERAL.—Nothing in this Act shall affect the application of the rule-of-reason standard to vertical location clauses or vertical territorial restraints under the antitrust laws.

(b) DEFINITION.—For purposes of subsection (a), the term "antitrust laws" has the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)).

The CHAIRMAN. Are there any amendments to section 4?

If not, the Clerk will designate section 5.

The text of section 5 is as follows:

SEC. 5. APPLICABILITY.

Section 2(a) of this Act shall not apply to civil actions commenced before the date of the enactment of this Act.

The CHAIRMAN. Are there any amendments to section 5?

AMENDMENT OFFERED BY MR. MOORHEAD

Mr. MOORHEAD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORHEAD: On page 4, strike lines 21-22 and insert the following in lieu thereof:

"With the exception of the first sentence in section 2(b), section 2 of this Act shall not apply to civil actions commenced before the date of enactment of this Act."

Mr. MOORHEAD. Mr. Chairman, when the predecessor of this bill was considered in 1987, I offered an amendment concerning the effective date of this legislation. It was my feeling at that time, and it still is my view, that the presumption and new evidentiary standards being established through this legislation should not apply to pending cases.

The Judiciary Committee, over the years, has had a traditional policy in favor of prospectivity only, and it would be unfair to existing litigants to potentially affect the outcome of their cases through legislative action. When I made these points in 1987, then Judiciary Committee Chairman Peter Rodino agreed with the principle of my amendment, and it was adopted on a voice vote. The language of my amendment eventually passed the full House of Representatives.

The language contained in section 5—entitled "Applicability"—is the same effective date provision that I offered in 1987. However, because of

changes made to other sections of the bill, particularly in section 2(b), the reference solely to section 2(a) no longer achieves my original purpose and intent. Section 2(b), of course, would overrule the Supreme Court's decision in *Business Electronics Corp.* v. *Sharp Electronics Corp.*, 108 S.Ct. 1515 (1988). Consequently, the amendment before you would substitute new language which simply says that both section 2(a) and that portion of section 2(b) which overrules the Supreme Court decision in Sharp would have prospective effect only.

It is my hope that this amendment—which parallels the intent of this House in the last Congress—will be adopted.

I urge the adoption of my amendment.

□ 1720

Mr. BROOKS. Mr. Chairman, I rise in opposition to this amendment. I want to say that I believe that I could agree to the amendment that the gentleman from California [Mr. MOORHEAD] has offered, with the understanding that this provision and this agreement does not in any way condone the view that vertical price fixing requires a specific price. I do not agree with that.

I think it was a rotten court decision, but because there was some possible unfairness to the people who foolishly operated under that bad ruling of the court in the last year, they would be exposed. I would not want them to be endangered unfairly.

Therefore, with that understanding, with these equitable considerations, and the fact that the gentleman from New York [Mr. FISH] has a big dinner date with his wife, a longstanding dinner engagement with his beloved wife, and I have one with mine, and that is another consideration along with the other equities. For that reason, I agree to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. MOORHEAD].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CAMPBELL OF CALIFORNIA

Mr. CAMPBELL of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CAMPBELL of California: At the end of the bill, add the following:

SEC. 6. DEFENSE.

It shall be a defense to an action described in this Act that the defendant was so small in the relevant market as to lack market power.

The CHAIRMAN. The gentleman from California [Mr. CAMPBELL] is recognized for 5 minutes.

Mr. CAMPBELL of California. Mr. Chairman, the amendment I offer would have been offered in the subcommittee of which I am now a member and in the Committee on the Judiciary itself, were I a member at the time of this bill's consideration. However, because my accession to the subcommittee and committee was late in this session of Congress, I did not have the opportunity to present it.

The amendment in its entirety is one sentence, which says that this law that we will be enacting today should allow a defense if you are small. That is it. It says that the defense shall be "that the defendant was so small in the relevant market as to lack market power."

The reason I offer this amendment is that we have had a fairly good discussion, I think, on what this legislation will lead to in terms of more lawsuits. We heard letters from small manufacturers and letters from retailers, from distributors who would be described as discount houses. The common point in the letters we have read today is that they were from small business persons who were worried about this law, or about the existing law that this statute would propose to change.

So I offer the following amendment: If we are speaking about a defendant who is so small in the market as not to have market power, would it not be sensible that these new rules not apply? The reason I suggest that is that we do have a risk of excessive litigation in America. As you may recall in the discussion earlier on the amendment by the gentleman from New York [Mr. FISH], I pointed out that as long as we have the right to go to a jury, and try for treble damages there is a tremendous club over the defendant.

There are those that think this is how plaintiffs should be positioned, relative to a defendant in this sort of case. However, not when the defendant is small, nor where the defendant is attempting to break into a market, shall we say, with a new product. We spoke a lot today about competition with the Japanese, with Europe. In that competition, bear in mind that a number of fields have already been lost to our foreign competitors. In the Silicon Valley that I represent, we hardly make memory chips anymore. American firms hardly make electronics anymore. So suppose an American firm wished to reestablish itself in this area and thought that to do so it would like to suggest how the product be sold, that it be sold to high quality outlets, that it be sold with a lot of demonstration of the qualities of the particular good.

These are reasons why it makes sense for the manufacturer to suggest that the distributor be an upscale, up market distributor. That is all I am suggesting. Give that small manufacturer the right to suggest that this new product, to get back into a market, be marketed through the upscale distributor. The danger with the present bill is that it applies across the board no matter how small a business is, even if the business does not have market power. If the defendant is a manufacturer that wants to pursue that form of selling and one distributor does not like it, and another calls up the manufacturer, that is it. That would be enough, as I read the bill, to go to a jury, with treble damages being the possible outcome.

So I offer this amendment. It provides for the small producer in the United States, the small American producer who wants to get back into a market, to establish a niche herself or himself who wants a quality image, an upscale distributor, or wants the manufacturer's product to be displayed at the point of sale with adequate service. For that purpose, I offer the amendment which reads:

It shall be a defense to an action described in this Act that the defendant was so small in the relevant market as to lack market power.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment, and I rise in opposition to any amendment that would somehow carve out an exception to the per se prohibition against price fixing, simply because the offender is small or possesses no great market power.

This is an absurd notion that never had any place in antitrust law. A per se offense is one which is very straightforward in application. If they commit the act, they will be held accountable, regardless of any justification they may attempt to assert. In other words, no mitigating factors in a per se offense, because the conduct is deemed so pernicious as to be without redeeming economic value.

□ 1730

Mr. Chairman, a market power exemption would be the equivalent of saying that insider trading is acceptable but only if you illegally trade 200 shares or less, or that Bonnie and Clyde should have been given leniency, that they should never have shot them because they were only robbing small banks in Kansas and Missouri.

For 100 years price fixing has applied to all entities, large and small. They violate our most basic tenets of a free and fair market system. This is not the time nor the vehicle for such radical notions to take root and undermine our commitment to free enterprise, at a time when we need to be at our competitive best.

Mr. Chairman, I urge opposition to the amendment.

Mr. FISH. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I will not take my full 5 minutes, but I do want to emphasize that this is the last amendment that will be offered this evening,

and that it is a small business amendment.

The amendment has been explained by my colleague, the gentleman from California, as one that will hopefully not subject small business persons to huge damage awards. The amendment offered by the gentleman from California [Mr. CAMPBELL] is endorsed by the American Federation of Small Business, by the National Office Machine Dealers Association, by the Illinois Small Business Association, and by the ABCD, the Microcomputer Industry Association.

Mr. Chairman, I would like to read from the letter to the gentleman from California [Mr. CAMPBELL] from the American Federation of Small Business dated April 2:

DEAR REPRESENTATIVE CAMPBELL: We oppose H.R. 1236 and support your amendments for Small Business. Dominance of the market in terms of power to set prices should be the test in Anti-Trust.

Mr. Chairman, I ask for a "yes" vote on my collegue's amendment.

Mr. CAMPBELL of California. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California.

Mr. CAMPBELL of California. Mr. Chairman, I thank my colleague for yielding.

I wish to make one clarifying point because I have been asked about it. The amendment to the statute is very simple. It refers to market power, and people have asked, what does that mean? That is a well established principle in antitrust law. If you want a rule of thumb, roughly 15 percent of the market is where the courts have said that above that you are approaching market power. But the point is that it has been litigated now for close to 100 years in antitrust cases, so it is quite well established.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. CAMPBELL].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. CAMPBELL of California. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 190, noes 199, not voting 44, as follows:

[Roll No. 73]

□ 1752

The Clerk announced the following pairs:

On this vote:

Mr. Thomas of California for, with Mr. Akaka against.

Mr. Stump for, with Mr. Moody against.

Mr. Lewis of California for, with Mr. Nelson against.

Mr. Craig for, with Mrs. Collins of Illinois against.

Mr. Houghton for, with Mr. Ford of Tennessee against.

Mr. McCLOSKEY changed his vote from "aye" to "no."

Mr. HENRY and Mr. ROBERT F. (BOB) SMITH changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. HENRY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have cosponsored the vertical price restraints legislation for several years, and I am a cosponsor of the bill before us today, H.R. 1236.

I cosponsored this legislation initially because of my concern that the Supreme Court's decision in the Monsanto case upset the important balance in commercial relations between manufacturers and retailers, between a manufacturer's right to unilaterally deal with whomever it wished to sell its products and a retailer's right, once the product is purchased, to sell it to whomever at whatever price it wished.

I am concerned, however, that the bill as presently before us would right the imbalance created by the Monsanto decision by creating an imbalance of its own, in the other direction.

If the Monsanto case puts too great an evidentiary burden on a retailer seeking to prove that it was cut off by a manufacturer for price fixing reasons, the legislation puts to great a risk on a manufacturer by allowing an inference of price fixing to be made too easily.

I intend to vote for the legislation today and let the Senate work its will on it, and hopefully achieve a better balance than I think the committee bill does. If that does not happen, then I will likely not support the bill when it comes back or in any attempt to override a Presidential veto, should it come to that point.

The CHAIRMAN. Are there further amendments to the bill? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. HOYER) having assumed the chair, Mr. SKAGGS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1236) to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing, pursuant to House Resolution 373, had reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. FISH

Mr. FISH. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. FISH. I am opposed to the bill in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FISH moves to recommit the bill, H.R. 1236, to the Committee on the Judiciary.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. FISH. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 235, noes 157, not voting 41, as follows:

[Roll No. 74]

□ 1813

The Clerk read the following pairs:

On this vote:

Mr. Hawkins for, with Mr. Jenkins against.

Mr. Akaka for, with Mr. Tauzin against.

Mr. Moody for, with Mr. Hayes of Louisiana against.

Mr. Nelson for, with Mr. Lewis of California against.

Mrs. Collins of Illinois for, with Mr. Thomas of California against.

Mr. Rinaldo for, with Mr. Stump against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 1236, the bill just passed.

The SPEAKER pro tempore (Mr. POSHARD). Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present, I would have voted "aye" on rollcall No. 69.

PERSONAL EXPLANATION

Mr. DURBIN. Mr. Speaker, due to a personal matter I was unable to be present on the floor during consideration of H.R. 1236, the Price Fixing Prevention Act. Had I been present, I would have voted yea on roll No. 69, on ordering the previous question; nay on roll No. 71, Mr. DOUGLAS' amendment; nay on roll No. 72, Mr. FISH's amendment; nay on roll No. 73, Mr. CAMPBELL's amendment; and yea on roll No. 74, passage of bill.

PERSONAL EXPLANATION

Mr. MILLER of Washington. Mr. Speaker, I was unable to be on the House floor when the House voted on H.R. 1236, the Price Fixing Prevention Act of 1989. Had I been here, I would have voted: "Nay," on ordering the previous question; "yea," on the Douglas amendment; "yea", on the Fish amendment; "yea," on the Campbell amendment; and "yea," on final passage on H.R. 1236, nothwithstanding the failure to adopt any of the preceeding amendments.

Mr. Speaker, I also supported Representative MOOREHEAD's amendment, which was adopted by voice vote.

PERSONAL EXPLANATION

Mrs. SAIKI. Mr. Speaker, I missed several rollcall votes while I was attending the funerals of Senator Spark Matsunaga and Mayor Bernard Akana. Had I been present for these votes, I would have voted as follows:

On rollcall 69, I would have voted "nay";

On rollcall 71, I would have voted "nay";

On rollcall 72, I would have voted "nay";

On rollcall 73, I would have voted "nay";

On rollcall 74, I would have voted "aye"; and

On rollcall 75, I would have voted "aye".

NATIONAL TOURISM WEEK

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 153) designating the third week in May 1990 as "National Tourism Week," and ask for its immediate consideration.

The clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. RIDGE. Mr. Speaker, reserving the right to object, I do so because there are a few Members who would like to speak on this matter.

Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Speaker, the U.S. Travel and Tourism Administration recently—February 1990—announced that tourism to the United States from foreign countries has become America's largest export. That is important in an era of big trade deficits.

International visitors are coming to our country in record numbers. Nearly 38 million foreign travelers visited this Nation in 1989 and the figures are expected to reach 43 million next year—1991.

With so much competition among nations, it is gratifying to know that our country and its magnificent resources attracts millions.

And, although I may be partial, travel in America ranks among the most beautiful and the most diverse of any country in the world.

Travel and tourism is second only to health services in private employment in the nation, 5.6 million jobs, that is more than all the manufacturing jobs in the top 4 industrial States—California, New York, Pennsylvania, and Texas. Yet manufacturing of trains, planes, and automobiles are essential to travel and tourism. Construction of roads and buildings also are stimulated by travel and tourism.

Direct employment generated by travel in the United States exceeds the population of 80 countries.

We are successfully marketing our treasures.

In the past 6 years, National Tourism Week has brought the economic, social, and cultural aspects of the travel and tourism industry to the American public.

I am proud to have been the sponsor of the first Tourism Week in 1984. Since then, we have annually designated the third week in May as National Tourism Week.

The Seventh Annual National Tourism Week, from May 13 to 19, has been selected to honor the travel and tourism industry for its many contributions to the economic and social vitality of this Nation.

This year's poster theme is "Tourism: A Vision of America." As hosts to the world, I would like to see as many people as possible have the opportunity to see America.

I urge my colleagues to support this Seventh Annual National Tourism Week to enhance awareness of the important role tourism serves in the American economy and urge you to travel the U.S.A. this summer and see the vision that is America.

Mr. RIDGE. Mr. Speaker, continuing my reservation, I yield to the gentleman from South Carolina [Mr. TALLON].

Mr. TALLON. Mr. Speaker, I would simply like to say that as chairman of the Congressional Travel and Tourism Caucus, it is my pleasure to speak to you and my colleagues about the seventh celebration of National Tourism Week.

Senate Joint Resolution 153 designates the week beginning May 13, 1990, as "National Tourism Week."

This resolution is an important vehicle to applaud the efforts of an industry that is vitally important, not only to my own State of South Carolina's economic, social and cultural well-being, but also to that of the Nation.

The tourism community includes millions of workers in hotels, entertainment, amusement parks, recreation, transportation, restaurants, and other tourist-related enterprises. All of these businesses combine to make a valuable contribution to the economic well-being of our country.

Today, as always, travelers from our own country and abroad benefit tremendously from the educational and cultural enlightenment of a travel experience. Tourism is vital to our way of life, and to the understanding and friendship among people of many lands.

To pay tribute to tourism for all its educational, economic, and recreational benefits, I urge today the passage of Senate Joint Resolution 153, commemorating National Tourism Week.

Mr. RIDGE. Mr. Speaker, continuing my reservation of objection, I yield to the gentleman from Virginia [Mr. PAYNE].

□ 1820

Mr. PAYNE of Virginia. Mr. Speaker, I thank the gentleman from Pennsylvania [Mr. RIDGE] and appreciate having this Senate joint resolution considered this afternoon.

Tourism is big business. Tourism last year accounted for some $350 billion in gross revenue in this country, 6.7 percent of our gross national product, the third largest retail industry in the country and the second largest in employment with nearly 6 million jobs created by tourism.

In addition to that, international tourism is America's largest export. Last year, in 1989 there were 39 million foreign visitors spending about $43.8 billion. Every 32 overseas visitors creates one new job in America. This business and these jobs are spread throughout our country and not a single State or area is excluded from this growth in this industry.

So in recognition of this industry and the nearly 6 million men and women who work hard every day to ensure that our visitors are being properly attended to and are being treated hospitably, I am very supportive of National Tourism Week as being proposed, and supportive of all that is being done by the tourism industry in the United States.

Mr. RIDGE. Mr. Speaker, continuing my reservation of objection, I simply would like to identify the primary and chief sponsor of House Joint Resolution 290, our colleague, the gentleman from Florida [Mr. NELSON].

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. POSHARD). Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 153

Whereas travel and tourism is the third largest retail industry and the second largest private employer in the United States, generating more than five million five hundred thousand jobs and indirectly employing another two million two hundred thousand Americans;

Whereas total travel expenditures in the United States amount to more than $313,000,000,000 annually, or about 6.4 percent of the Gross National Product;

Whereas tourism is an essential American export, as thirty-three million seven hundred thousand foreign travelers spend approximately $18,000,000,000 annually in the United States;

Whereas development and promotion of tourism have brought new industries, jobs, and economic revitalization to cities and regions across the United States;

Whereas tourism contributes substantially to personal growth, education, appreciation of intercultural differences, and the enhancement of international understanding and good will; and

Whereas the abundant natural and manmade attractions of the United States and the hospitality of the American people establish the United States as the preeminent destination for both foreign and domestic travelers: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on the second Sunday in May 1990 is designated as "National Tourism Week". The President is authorized and requested to issue a proclamation calling on the people of the United States to observe that week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time and was read the third time.

AMENDMENT TO THE PREAMBLE OFFERED BY MR. DYMALLY

Mr. DYMALLY. Mr. Speaker, I offer an amendment to the preamble.

The Clerk read as follows:

Amendment to the preamble offered by Mr. DYMALLY:

Page 1, in the first whereas clause beginning on that page, strike "five million five hundred thousand" and all that follows through "Americans" and insert in lieu thereof "five million nine hundred thousand jobs".

Page 1, in the second whereas clause beginning on that page, strike "$313,000,000,000" and "6.4" and insert in lieu thereof "$350,000,000,000" and "6.7", respectively.

Page 2, in the first whereas clause beginning on that page, strike "thirty-three million" and all that follows through "$18,000,000,000" and insert in lieu thereof "thirty-eight million three hundred thousand foreign travelers spend approximately $43,000,000,000".

The SPEAKER pro tempore. The question is on the amendment to the preamble offered by the gentleman from California [Mr. DYMALLY].

The amendment to the preamble was agreed to.

The Senate joint resolution was passed.

A motion to reconsider was laid on the table.

NATIONAL CRIME VICTIMS' RIGHTS WEEK

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 242) designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. RIDGE. Mr. Speaker, reserving the right to object, I do so in order to yield to my friend and colleague, the gentleman from Pennsylvania [Mr. GEKAS], who is the chief sponsor of this Senate joint resolution.

Mr. GEKAS. Mr. Speaker, I thank the gentleman for yielding and for bringing up this measure at a time when on the eve of the week that we are commemorating, the question of crime and crime victims is uppermost in the minds of not only the Members of Congress but in the minds of the American public generally.

Mr. Speaker, again I express my gratitude for this opportunity. Those of us who have over the years observed the scene in the American courtroom, especially in the last generation, know full well the drama that occurs there every single day. The most important element of those little dramas and some very severe dramas that unfold depict the victim of the crime as the most pitiable and most frustrated individual caught up in that process. We have seen it a thousand times, from the most serious victim, the person who is killed at the hands of a murderer, and the family members who are left to appear in the courtroom for one reason or another at the prosecution of the culprit who caused the death of their loved one, to the people involved in that whole atmosphere of havoc that has been wreaked by the killer, ranging down to a businessman who has been victimized time and time again on a series of bad checks, that kind of victimization of the American citizen is what we are trying to in effect say we must reduce, we must advocate for the crime victim and we must elevate the sense of dignity that those people who suffer at the hands of the criminals will have to sustain them as they go through life without any more the benefits of their loved one, and with that scar on their own tissues, and the scar on their own consciousness carried with them the rest of their lives.

I know that this is just a commemoration, but in a deeper sense that is the pledge of the Congress of the United States, that we will continue the war on crime, that we will continue to advocate for victims of crime, that we will do everything in our power statutorily, legislatively, and as individual members of society to curb the scourge of crime that is devastating our neighbors.

There are people throughout the society who are helping in this. For instance, just to put together this National Crime Victims' Rights Week, which begins April 22 through April 28, we have had the superb assistance of the Office for Victims of Crime of the U.S. Department of Justice, the National Victims Center, NOVA which is the National Organization for Victim Assistance, and of course MADD, Mothers Against Drunk Drivers. All four organizations have shown significant contributions in the war on crime, and we wish to thank them through the acknowledgment during this particular time, and also with our further pledge to them that we will continue their efforts every way we can.

I thank the Speaker, the Members of the House, the gentleman from Pennsylvania and the gentleman from California.

Mr. MICHEL. Mr Speaker, I rise today to offer my firm support for House Joint Resolution 464, which designates April 22 through April 28 as "National Crime Victims' Rights Week."

As my colleague from Pennsylvania, Mr. GEKAS, has pointed out, the victim is often the forgotten person in the criminal justice system. We must work harder to include victims in the criminal justice process, to support victims in times of crisis, and to acknowledge those advocates who already serve them.

This resolution reminds us of these critical necessities, and for that reason I support it. I would like to congratulate Mr. GEKAS for his work on this important resolution, and urge everyone to fully support House Joint Resolution 464.

Mr. RIDGE. Mr. Speaker, continuing my reservation of objection, I yield to the gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. Mr. Speaker, I thank the gentleman for yielding. I want to commend the gentleman from Pennsylvania [Mr. GEKAS] for bringing this issue to our attention.

For those of us who look at crime from a distance because we have not been personally affected, we always think it is the other person, not us, recently, and there is some humor to this, my wife went to have her car washed, and while she was paying for the car a thief just got into the car and drove away with a brandnew car. It did not even have permanent license plates and less than a thousand miles. I suspect that car is somewhere in Mexico or Guatemala now.

But what was ironic about this is that she had just left the court where she had testified in a preliminary hearing on two men who had stuck her up the week before at her doorstep, and she was on her way to attend a meeting for me in the district when she thought she ought to get the car cleaned, and that car was stolen right before the eyes of everybody there. The car was being vacuumed, and the thief just came up and pushed the two men who were vacuuming the car back, backed the car out because he could not go forward or sideways because of a wall, and drove off with the car.

So for the first time I really have experienced crime at my own doorstep and with my own automobile. And even though there is a slight amount of humor to this, I think it is a very serious issue.

I cannot let this opportunity go by, Mr. Speaker, without bringing to the attention of the Members of the House who want to eliminate these commemorative resolutions why they are so important. It gives us an opportunity to address issues in our constituencies, and to respond to legitimate requests of constituents to raise these issues. So I hope Members will recognize that when there might be an oddball commemorative here and there, they are usually sponsored by more than 218 Members, a majority of the House, and that is what democracy is all about. More specifically, they address very serious problems affecting us, and in my case affecting me right now.

Again I thank the gentleman. It is a pleasure to be back in my old job.

Mr. RIDGE. Mr. Speaker, it is a pleasure to be with my friend and colleague.

Mr. Speaker, I withdraw my reservation of objection.

Mr. GEKAS. Mr. Speaker, "What about the victim?" This is a question that has greatly concerned me throughout my career in public service, and it is a question which this House addressed when it passed National Crime Victims' Rights Week for April 22 through 28, 1990.

All of us are concerned about the level of crime—violent crime—in our society. Every day we read about it in the newspapers and every night we watch it on the evening television news. But with increased awareness and attention turning toward the battle against crime, there is often someone who is lost among the headlines, the sound bites and the "tough on crime" rhetoric. That someone is the victim of crime and the victim's family.

Mr. Speaker, the numbers are staggering. Thirty-five million Americans are victimized by crime each year, with 6 million falling prey to violent crime. At this rate the U.S. Department of Justice estimates that five out of six United States residents will be the victim or intended victim of crime during their lifetime. In 1988, according to information published by the Bureau of Justice Statistics, one in four American households—23 million families—were touched by either a crime of rape, robbery, assault, burglary, household theft, or motor vehicle theft. Unaccounted for in this statistic are the grim figures for homicide (20,675), fatalities from drunk driving (18,500) and child abuse (1,225). Nor does it include the catastrophic physical injuries incurred by those involved in drunk driving accidents or unreported domestic violence.

Nineteen eighty-nine also proved once again that crime does not pay—the victim does. Figures recently released by the Federal Bureau of Investigation show that in the past year murder rose 4 percent, aggravated assault was up 5 percent and forcible rape increased 1 percent.

The reasons for the burgeoning crime rate are complex and numerous. The solutions are even more elusive. But one thing is for certain: An overloaded court docket resulting in long pretrial periods, a seemingly endless appeal process, and reduced sentences because of prison overcrowding only compound the suffering of victims.

If the physical pain of a violent crime were not enough, the victim of a brutal assault also suffers through a myriad of emotional pain such as confusion, anger, fear, a sense of being alone, self blame, and helplessness. I know from my experience with victims that those who have never endured this agony cannot imagine it.

If the perpetrator is even caught, the court process worsens the crime by dramatizing and compounding the victim's ordeal. There is the courtroom process, the lineups, the cross-examination, the appeals, and the agonizing waiting. As this drama unfolds the victim of the crime is left feeling isolated and pitiable. By the time this is all over, the victim often feels more like the criminal. Of course, the hallmark of our judicial system is that all accused persons are innocent until proven quilty, but the nobility of that system is no solace to someone who has faced death, felt the impact of a bullet or piercing knife, or known the violation of a brutal assault.

Of course, the real answer is to win the war against a crime, a task easier said than done. However, while the battle to make our streets safe rages, we must make an effort to show concern for victims of crime. That is why I have introduced legislation to designate this week—April 22 through 28, 1990—as National Crime Victims' Rights Week. This week is a time to express support for crime victims, to acknowledge the advocates who serve them, and to endorse the rights of victims and their role in the criminal justice system.

This week was marked by candlelight vigils, balloon lifts, and conferences held by numerous victim advocacy organizations across the country. For instance the National Victim Center sponsored a candlelight vigil in New York City and held an awards ceremony at Texas Christian University, and the National Organization for Victim Assistance [NOVA] held its 10th annual forum for crime victims in Washington, DC.

The highlight of National Crime Victims' Rights Week was a White House Rose Garden ceremony in which President George Bush and Attorney General Dick Thornburgh honored seven people who have made outstanding contributions in assisting victims of crime. Among those honored were Howard and Constance Clery of Bryn Mawr, PA. The Clerys dedicated their lives to preventing future campus victimization since the murder of their daughter, Jeanne, in her dormitory room by a fellow student at Lehigh University in April 1986. They founded the nonprofit organization, Security on Campus, Inc., and spearheaded a national campaign to obtain passage of legislation mandating that colleges and universities be required to publish their violent crime and drug and alcohol offense statistics. Four States have adopted such legislation, and Federal legislation, Crime Awareness and Campus Security Act of 1989, has been introduced in both Chambers of the Congress.

Other award recipients included Milton Cole of Jamaica Plain, MA; Sandra Heverly, of Las Vegas, NV; Dean G. Kilpatrick of Charleston, SC; Emelia "Mimi" Olson of Fort Thompson, SD; and John Walsh of Fort Lauderdale, FL. As President Bush stated at the awards ceremony, these recipients "embody the power of volunteerism, the power of the physically challenged, and the power of a just cause—the campaign to build an America where every victim of every crime is treated with dignity and the compassion they deserve."

Mr. Speaker, many groups and individuals throughout the country were instrumental in securing the passage of National Crime Victims' Rights Week in the House of Representatives. My office had the superb assistance of the Office for Victims of Crime of the U.S. Department of Justice, the National Victim Center, NOVA, and MADD—Mothers Against Drunk Drivers. I would also like to thank the 236 Members of Congress who cosponsored the House resolution, House Joint Resolution 464, to designate this week as National Crime Victims' Rights Week. Their compassionate concern for the crime victim and the advocates who serve them assured the passage of the legislation.

The adoption of National Crime Victims' Rights Week by the Congress of the United States was a pledge to the citizens of this country that we will continue the war on crime, that we will continue to advocate for victims of crime, and that we will do everything in our power statutorily, legislatively, and as individual members of society to curb the scourge of crime that is devastating the people of this great Nation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 242

Whereas thirty-five million individuals in the United States are victimized by crime each year, with six million falling prey to violence;

Whereas the Department of Justice estimates that five out of six individuals will be the victim or intended victim of crime during their lifetimes;

Whereas many victims suffer severe psychological, physical, and emotional hardships as a result of victimizations;

Whereas the Nation must commit its collective energies to improving the criminal justice and social services response to victims;

Whereas injustice to crime victims must be redressed by implementing the recommendations proposed by the President's Task Force on Victims of Crime; and

Whereas, as a Nation committed to justice and liberty for all, efforts must be continued to remove the inequities victims face and to protect and restore individual rights: Now, therefore, be it

Resolved, That April 22 through April 28, 1990, is designated as "National Crime Victims' Rights Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the two Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

THE AUDIT, THE SUICIDE, AND THE WIDOW'S BATTLE

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. TRAFICANT. Mr. Speaker, Alex Council, a 49-year-old graduate of Wake Forest University, a husband, father, and grandfather, committed suicide.

Alex Council walked into the woods, he put a gun to his head and he killed himself because, he said in his own words, the IRS hounded him and his wife for $300,000 in back taxes, penalties, and interest that they did not owe.

As fate would have it, Kay Council won her case in court but what a bittersweet victory: Her husband is dead, the business is ruined, her credit destroyed, her family decimated.

Kay Council is left with $16 in her checking account.

What really grinds it in, she was at a Senate hearing about the IRS abuses and IRS Commissioner Goldberg walked right past her without one single word of apologies.

Mr. Speaker, I would like every Member to listen to the suicide note of Alex Council: "I have taken my life in order to provide capital for you to fight the IRS who has taken liens against our property illegally and is an agency of our government out of control. I love you dearly."

Mr. Speaker, this is a sad chapter in American history, it is a sad chapter when American people fear their own Government, and the Congress of the United States of America had done nothing more than provide fuel for this runaway agency.

I submit the following article for the RECORD:

THE AUDIT, THE SUICIDE AND THE WIDOW'S BATTLE

(By Megan Rosenfeld)

It was a rational suicide, she said, if there can be such a thing, Kay Council's husband, Alex, killed himself nearly two years ago at the age of 49, leaving her two eerily businesslike notes that she found when she came home from taking her mother to a bingo game. A postscript to one of the notes said she would find his body on "the north side of the house," where he lay with a bullet through his head.

Another, longer note referred her to a tape recording. "I suggest you transcribe it so that . . . you can more easily refer to the information," he wrote. He also urged her to move quickly to "obtain the required evidence of death from the authorities" so that she could get the money from his suicide-proof insurance policy. His death, he wrote, "was a simple business decision."

Kay Council blames his death on the Internal Revenue Service.

For more than four years before he walked into the woods near the house they'd built, the Councils had been fighting to prove they did not owe the IRS nearly $300,000 in penalties, interest and payment on a $70,000 investment in what turned out to be an invalid tax shelter. Six months after Alex Council's death that June evening, a U.S. District Court judge in North Carolina agreed with them—but by that time the victory was muted. The Councils' house-building business was nearly defunct, Kay Council's credit was nearly ruined, her house was on the block, she owed thousands in legal fees, and she had about $16 in her bank account.

And, of course, her husband didn't know they'd won.

"I don't know which is harder for people to talk about, suicide or [troubles with] the IRS," Council said last week. But recently she decided she would talk about it, she said, because there have been so many rumors back home in North Carolina about why her husband killed himself. And besides, she said, she is still mad. She came to Washington at the suggestion of the National Taxpayers Union to testify at a Senate committee hearing.

The Councils met when they both worked at the same mortgage insurance company in Greensboro, N.C.; she was a data processing manager and he was the vice president and controller of the company. She was a high school dropout with a GED diploma, and he had a degree from Wake Forest University. Both had married young and had two children each and were in the process of divorce when they met.

In 1973 Alex Council was offered a job in California running a new mortgage insurance company; it looked like the fresh start he wanted. Kay followed him to a suburb of San Francisco the next year and they were married. They bought a condo, then moved up to a house, and then to a bigger house, taking advantage of California's spiraling real estate values.

By 1978 the business was a success, and the Councils found themselves the happy recipients of a $300,000 bonus. They wanted to invest it in a way that would ensure their retirement and also minimize their tax liability. Their accountant suggested oil and gas leases and a tax shelter called Jackie Fine Arts, which involved buying the rights to reproduce paintings.

Investors in the company could receive a tax credit in the first year and a depreciation over the total investment during the term of the deal, according to 1980 news stories about Jackie Fine Arts. In addition, the Councils believed they could recoup their investment through the sale of lithographs made from the original paintings.

But in late 1979, after the Councils had claimed a $470,000 write-off for that year's taxes, the IRS announced that those seeking tax shelter at Jackie Fine Arts might find themselves under a leaky roof.

So the Councils expected to be audited and knew they might have to ante up. Indeed, an auditor contacted their accountant and during the next few years repeatedly asked for information that the Councils dutifully produced.

When neither they nor their accountant had received an official "notice of deficiency" by the time the statute of limitations ran out in May 1983, "we thought we were home free," said Council. But five months later they did hear from the IRS—not the notice, which would have given them a 90-day period to fight the assessment in tax court, but a bill for a tax of $115,895, a penalty of $5,795 and interest of $61,331.12, for a total of $183,021.12. As they tried unsuccessfully to find out what had happened to the original notice, which the IRS said it sent in April 1983 (one month before the statue of limitations expired), the interest meter continued to run until the total reached nearly $300,000.

"Prior to this bill, neither my accountant . . . nor I had received an audit report, a 30-day letter, a 90-day letter or any other notice of assessment," Alex Council said in an affidavit he filed in 1987. "The only communication I had received from the IRS since 1983 indicated receipt of my letters requesting the above information, bills threatening collection procedure, and notices of intent to levy on my assets."

Notices like this one, sent in 1985 and written in the urgent style the IRS favors:

"WE HAVE PREVIOUSLY WRITTEN TO YOU ABOUT THE FEDERAL TAX SHOWN BELOW. IT IS OVERDUE AND YOU SHOULD PAY THE TOTAL AMOUNT DUE IMMEDIATELY TO AVOID ADDITIONAL INTEREST AND PENALTIES.

"IF YOU CANNOT PAY THIS AMOUNT IN FULL, PLEASE WRITE OR CALL US IMMEDIATELY. . . . WE HAVE ENCLOSED A COPY OF PUBLICATION 568A, WHICH PROVIDES INFORMA-

TION ABOUT OUR COLLECTION PROCEDURES AND YOUR RIGHTS IN RELATION TO THEM."

Before receiving their first bill from the IRS and starting their lengthy legal battle, the Councils moved back to North Carolina. They wanted to be closer to her daughter and the child she was about to have, and Alex Council wanted to get into the construction business. "He had always been a coat and tie sort of man," said Kay Council. "Now he was in jeans and flannel shirts and couldn't have been happier."

They continued to correspond with the IRS. They asked for a copy of the notice the IRS said it had sent, and got it—two years later. The IRS maintained the original notice had been sent by certified mail, so the Councils asked for the certification number so they could check with the San Francisco post office. The IRS produced that in 1987, but all the paperwork except one list had been destroyed two years before in routine Post Office procedure.

That list, however, showed a curious error. The Councils' notice of deficiency had been slightly misaddressed. Instead of sending it to 71 Corte Del Bayo, Larkspur, Calif., the IRS sent it to 7+.

The IRS is prohibited by privacy laws from commenting about a specific case, but in its legal brief (which contained two typos itself), the agency's lawyer argued that "actual receipt of the notice is not required if the notice was properly mailed." During the district court trial in October 1988, the IRS called as witnesses the Councils' regular mailman, who said he might have delivered the misaddressed letter anyway, but he couldn't remember whether he had. The IRS also called the clerk who would have put the notice in the envelope, but she couldn't say for sure whether it had been in a window envelope (the address was correct on the actual notice) or mailed in a regular envelope.

The Councils' attorney, James M. Iseman Jr., produced two other persons' deficiency notices that were not mailed in window envelopes, and examples of other incorrectly typed addresses—including that of the Councils' accountant. He too never received the notice of deficiency.

But that was after the matter finally came to trial four months after Alex Council's death. Meanwhile, the IRS had, as a result of the 1979 audit, also audited the Councils' 1978 return, as well as the business returns for 1983, 1984 and 1985. A penalty of $6,821 was levied for 1978—as a result of the problems with Jackie Fine Arts—and was paid.

Council had borrowed money to build his first development of middle-class, suburban homes, sold them and then bought more land. They built a house for themselves first, taking out a $112,000 construction loan to do it, which they planned to convert to a standard mortgage once the development was built and sold. But in July 1987, the IRS placed a lien on the home, and the Council Development Co. began to crumble.

As a result of the lien, which lenders would discover in a routine credit check, mortgage insurance on the houses under construction was canceled, and Alex Council couldn't get the money he needed to keep his business afloat. They could not convert the construction loan on their own home to a mortgage because of the lien, and faced losing the house altogether when the loan came due.

"You get to the point where you expect them to walk in any day and take what you have," said Council. "We lived with that every day. But when they didn't, I came to believe that it was because they knew they were wrong."

In May 1988, the Councils celebrated their 14th wedding anniversary with a three-day trip. "We talked through the whole thing for three days," Kay Council said. "I said I could live with losing everything and having to start over, as long as we had each other. He let me think he felt that too."

That month they had what appeared to be a hopeful sign when the judge in U.S. District Court granted them an injunction against the IRS enforcing the lien. But instead of ruling that the IRS was wrong, as the Councils had hoped, the judge scheduled a trial and allowed the IRS more time to gather evidence.

"There was something so defeating about expecting an answer and getting another delay," she said. "That was a real downer. Of course the 60 days turned into October." By that time the Councils' net worth was about $15,000, she said, their business was stymied, their lives were consumed with their tax battle, and they could not see how to get out from under it all.

A month after their anniversary trip, Alex Council was dead.

In the shorter of the two notes he left, he wrote:

"My dearest Kay,

"I have taken my life in order to provide capital for you. The IRS and its liens which have been taken against our property illegally by a runaway agency of our government, have dried up all sources of credit for us. So I have made the only decision I can. Its purely a business decision. I hope you can understand that.

"I love you completely,

ALEX."

"He was the last person in the world people thought would kill himself," said his widow. "He was the one who always had a solution to any problem. . . . He loved life. This was a man who loved to learn—when he died he was taking a course at Wake Forest in the Constitution. He wanted to know everything, do everything, experience everything. We never fussed or fought. This was a man who never missed a day telling me he loved me, and never got up from my table without thanking me for a good meal. If two people were ever close to being one, it was Alex and me."

After her husband's death, Kay Council had the tape he left transcribed. It ran 15 pages and contained detailed instructions about everything he wanted her to do. Although Kay was a half owner of the construction business, she knew little about the details, she said. For example, she did not know that here husband did not have mortgage insurance.

After she got the $250,000 from his insurance policy (it had a clause that paid off for suicide after two years of premium payments), she tried to do what he wanted her to: keep the court case against the IRS alive, pay off bills, finish building the housing development, in debt.

"I was determined the IRS would not get one penny of Alex's money," she said. "Even if I had to burn it in my back yard. My lawyer said, 'Don't you know you could go to jail for that?' And I said I didn't care."

So she paid her credit card bills, bought herself a $70,000 "cracker box" town house with cash, gave her attorneys $15,000, and tried to run the construction business, which she found rough going. "I really didn't know about that part of the business," she said "What I had done was pick out the color of carpets and that kind of thing."

When the case came to trial, the IRS argued that since the Councils knew from their auditor that their deduction probably would not be allowed, they should have contacted the agency to find out what happened. The judge, in a sentence Council's friends love to quote, dismissed that notion sharply: The tax code "does not place upon plaintiffs the burden of hounding the IRS for delivery of a possible notice of deficiency." He also said that neither the Councils nor their accountant had any motive to falsely claim they had not received the notice, because they had no way of knowing whether the IRS would be able to prove it had sent it. He ordered the deficiency cancelled and the lien revoked.

But Kay Council's troubles were not quite over.

Knowing the construction loan on the house was coming due in March, she put the house up for sale. But in February of last year, one week before the closing, she learned the lien had not been removed by the IRS, and the sale was doomed. Her attorney arranged for the lien to be lifted under the condition he hold the net proceeds of the sale for 10 days. When she went to get the money from him, she said Iseman told her the money was owed to him and refused to release it until she had paid him $10,000 and a deed of trust for $3,000 on her town house.

Iseman says he understands that Council feels attorney's fees were high but that they didn't realize that bills had been mounting since 1985. Although the IRS had been ordered to pay attorney's fees, it did not pay them until two weeks ago—one week before Council was scheduled to tell a Senate committee about her experiences.

Council must pay the difference between the amount Iseman charged and the IRS paid as well as what is left from the other audit. She currently owes about $14,000, and she discovered, to her dismay, that it is her responsibility to convince credit bureaus that the lien has been removed and was improperly filed in the first place.

Kay Council speaks of herself as a woman who had to become tough or "lay down and die." In choosing to fight, she gained strength she never thought she could possess. But she doesn't know quite what to do with it.

Her victory last October was hollow, she said sadly. There was something missing in the dry legal language of the court decision and the dry legal handshakes of her attorney. When she came to Washington last week to tell Sen. David Pryor's committee about what had happened to her, she knew that IRS Commissioner Fred Goldberg was going to precede her at the witness table, and she wanted to meet him.

"I wanted him to shake my hand," she said. "What I wanted was for him to say he was sorry. That they made a mistake, and they were sorry. But he left before I even got near him."

INTRODUCTION OF LEGISLATION REQUIRING DOE TO REMOVE HAZARDOUS WASTE FROM ST. LOUIS AIRPORT SITE

(Mr. BUECHNER asked and was given permission to address the House

for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BUECHNER. Mr. Speaker, too often the business of politics is compromise—balancing the ideal between the feasible. But there are issues which do not lend themselves to compromise. The radioactive waste which currently exists in my congressional district is such an issue.

Last year I introduced legislation to help arrive at a reasonable solution to a long-standing problem—the safe disposal of radioactive waste left over from the development of the first atomic bomb stored near the St. Louis airport for the last 40 years.

My bill was designed to break an impasse between the Department of Energy and the city of St. Louis over the exploration of alternative sites for the waste. However, no such exploration has taken place and St. Louis recently transferred control of the property to the DOE for the express purpose of building a permanent facility on site. This transfer ignores the possibility of finding a more satisfactory solution and is an affront to the legitimate health and safety concerns of my constituents.

That's why today I am forced to introduce legislation directing the DOE to remove all contaminated material from the St. Louis urban area to a less populated and safer location.

Mr. Speaker, this is not an action I have taken easily; it is one to which I am compelled. I ask the support of my colleagues to help me end this nightmare which haunts my constituents and has compromised their safety and the environmental integrity of this area for more than two generations.

[From the New York Times, Mar. 24, 1990]

MOUNTAIN OF NUCLEAR WASTE SPLITS ST. LOUIS AND SUBURBS

(By Keith Schneider)

ST. LOUIS.—Nearly half a century after a company here began processing fuel for nuclear weapons, St. Louis and several western suburbs are battling over a new disposal plan for millions of cubic yards of dirt contaminated with uranium, thorium, radium, actinum and other radioactive elements that are polluting the water, soil and air.

Not even in Denver, where plutonium particles escaped from the nearby Rocky Flats Plant, or in Salt Lake City, where a pile of uranium wastes was recently moved from the city to the desert, has a major metropolitan area contended with radioactive wastes on the scale facing St. Louis.

"We have a million cubic yards of radioactive waste on this side of the Missouri River, a million and a half on the other side, and they don't know where to put the first cupful," said Kay Drey, a nuclear opponent here who is providing technical assistance to several suburban leaders. "This is the oldest radioactive waste of the atomic age, and there still is no safe place to put the stuff."

WE HAVE NO SAY

The Federal Government, which has spent a decade and $75 million studying the extent of the contamination, has not settled on a solution, but officials are leaning toward a plan that they say can accommodate half the waste: consolidating debris from a former uranium processing plant downtown and a handful of other sites onto 82 acres just north of Lambert International Airport in the suburb of Berkeley.

The City of St. Louis owns the land, which is divided into a site where some waste is already stored and an adjoining park that was closed in 1988 because of radiation in the soil.

Showing support for the Energy Department plan, St. Louis's board of Aldermen has voted to transfer ownership of the land to the department. But the Mayor of Berkeley, William Miller, wants all the wastes removed from the area: he is leading a campaign to collect signatures from 15,000 St. Louis voters and repeal the board's decision.

"It makes no sense at all to have this much hot dirt around so many people and so many businesss." Mr. Miller said in an interview. "Ultimately we're going to have the responsibility to watch this site. But we have no say in what's done here."

Mr. Miller's campaign has drawn support from the St. Louis County Municipal League, which represents more than 90 municipalities, and the mayors of Bridgeton, Hazelwood and eight other cities.

A POTENTIAL HEALTH HAZARD

The Energy Department's response to such concerns has hardly been reassuring. It has displayed a new candor about the risks that residents face, describing in a January report the extent of contamination around the metropolitan area, with special attention paid to the problem in Berkeley.

The radioactive waste near the airport, along the Berkeley-Hazelwood border, represents a potential health hazard to the general public," the authors of the report said. "There is no control of off-site contamination to prevent further spread of this material. The problem is magnified by the extensive commercial developments in this area.

The situation here is one of the most graphic illustrations of the enduring costs paid by an American community for its participation in the cold war. For 21 years, St. Louis was a vital link in the chain of production for atomic weapons because of a chemical process that the Mallinckrodt Chemical Works developed for purifying large quantities of uranium.

The company, one of the city's oldest industrial concerns, produced the uranium used at the University of Chicago on Dec. 2, 1942, to sustain the world's first nuclear chain reaction and for the atomic bombs that destroyed Hiroshima and Nagasaki in August 1945.

GOVERNMENT APPROVED DUMPING

Until 1966, Mallinckrodt processed uranium for nuclear weapons at its main plant along the Mississippi River in downtown St. Louis and in Weldon Spring, 25 miles to the west.

Under the cover of national security secrecy, the Government authorized the company to dump radioactive wastes quietly in the suburbs, including a 21-acre Berkeley field owned by St. Louis. It is that field and the 61-acre park across the street that the Government is considering for a permanent storage site.

David R. Bohm, an assistant city counselor for St. Louis, said the transfer of the land to the Government was subject to conditions. "For the Department of Energy to gain control of the land," he said, "they must agree that they will not charge the city for the cost of the cleanup. They must also agree not to put any other radioactive wastes there except those from three specific sites in the region."

The Energy Department has spent $75 million since 1977 to assess the extent of contamination here and to build several small projects at Weldon Spring to reduce water pollution. In the meantime, the estimated cost of cleaning up Mallinckrodt's two plants and controlling the wastes at the site abutting the airport has reached $1.4 billion and is certain to climb as more contamination is found.

And the department also acknowledges that even though it has settled on a possible solution new estimates of the size of the problem, inevitable court challenges and an array of other political hurdles mean that it is no closer to a permanent answer than it was when work began in the region 13 years ago. In 1981 the department estimated that there were 556,000 cubic yards of radioactive wastes in the St. Louis metropolitan area, roughly a fifth the current estimate.

"It's the most frustrating part of my life as a public official," said Mr. Miller, the 43-year-old Berkeley Mayor. "People are retiring on the money they're making off this. It's a multimillion-dollar wait-and-see."

DANGER DENIED IN 1946

The wastes became an issue momentarily in 1946, when newspaper reporters here asked questions about the trucks that were hauling dirt from the plant to land bordering the airport. The concerns disappeared after the Government and Mallinckrodt assured reporters that the wastes were "not radioactive or otherwise dangerous."

From 1946 to 1957, Mallinckrodt hauled wastes from its downtown processing plant and dumped them in shallow pits north of the airport. In some places in Berkeley and Hazelwood, along roads where waste spilled from trucks, the Energy Department has found radiation levels seven times normal. Uranium, thorium and radium have also been found in sediments in Cold Water Creek, which drains the Berkeley park and then flows to the Missouri River.

The park, where children and adults played softball for decades, was closed in 1988 because of the high radiation levels found in the soil. The Energy Department hopes to use the park as the site for a permanent bunker to store the wastes, which will remain radioactive for tens of thousands of years.

While the Government favors this plan as the most economic cleanup method, it is studying a variety of options and says it will not make a decision until 1994 or 1995. Further tests and studies are planned to determine the scope of the contamination.

PROBLEMS ACROSS THE RIVER

The problem is not Berkeley's alone. In 1957 Mallinckrodt transferred uranium processing to a new Government-owned plant across the Missouri River in Weldon Spring, and began dumping radioactive wastes and debris into a quarry on the site. Uranium processing was halted in 1966, but the accumulated wastes remain. Cleaning them up is now expected to cost $594 million. In 1979 the Energy Department estimated the Weldon Spring cleanup cost at $3.6 million.

And in downtown St. Louis, just south of the McKinley Bridge, the department found radiation levels in excess of Federal health guidelines inside 14 buildings at the Mal-

linckrodt chemical plant that are still in use.

A fourth contaminated site, the West Lake landfill, has been found about 10 miles west of Berkeley in Bridgeton.

Keith F. Pickett, a spokesman for the company, now called Mallinckrodt Inc. and owned by the International Minerals and Chemical Corporation, says the hazard to the company's workers is negligible because most of the contamination is confined to small spots. "The Department of Energy has assured us and our employees that there is no real risk," he said.

But some workers are worried. In 1980 a study by epidemiologists under contract to the Energy Department found an excessive number of deaths from cancer of the esophagus and leukemia among 2,731 white males who processed uranium for Mallinckrodt from 1942 to 1966. The researchers did not identify a cause of the cancers.

Scientists have long known that high levels of radiation, far above the levels at which the Mallinckrodt workers have been exposed, can lead to malignancies of the blood, bones and organs. At low levels the effect is much less certain, although a recent study by the National Academy of Sciences said low doses of radiation were more dangerous than was thought even five year ago.

"My concern is that we're getting doses that are bad and nobody wants to tell us," said Kathy Collins, a 38-year-old chemical operator at the plant." "The company doesn't want to talk about this because it's a skeleton in their closet. They hide behind the Energy Department which tells them there is no problem.

USIA SPENDING $60,000 ON UNITED STATES TOUR FOR RUSSIAN ANTI-SEMITES

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BURTON of Indiana. Mr. Speaker, today I was scheduled to meet with a USIA-sponsored foreign visitor. I canceled that meeting, and here's the reason.

Yesterday, the Washington Post carried a shocking story on its front page. The U.S. Information Agency, at a cost of $60,000 to the U.S. taxpayers, is sponsoring a tour of Russian anti-Semites to the United States. The mere idea of this boggles the mind. I am outraged that the USIA would have anything to do with such contemptible people. Anti-Semitism, which has caused so much death and suffering through the ages, has no place here in America.

What makes this matter even more infuriating, is the USIA's official response. Their spokesman justified this disgusting act by saying that not all our visitors have to share our views.

Mr. Speaker, I believe we ought to kick these so-called visitors, right in the rear end, right back to Russia. And I urge my colleagues to boycott the USIA until they resolve this matter.

The article referred to follows:

[From the Washington Post, Apr. 17, 1990]

SOVIET GROUP ON USIA TOUR INCLUDES ALLEGED ANTI-SEMITES

(By Judith Havemann)

The United States Information Agency is financing a month-long tour of the United States by a group of Soviet editors and writers associated with extreme Russian nationalist publications, some of whom have been accused of antisemitism.

Several leaders of American Jewish groups have criticized the USIA for bringing the group to this country. "Inviting these kinds of people from the Soviet Union with known antisemitic views is unacceptable and harmful," said Mark E. Talisman, director of the Washington office of the Council of Jewish Federations. "Sponsorship by the federal government is ludicrous and appears to smack of approval."

USIA spokesman Frank S. Johnson Jr. said, "I'm not in a position to confirm* * *whether they have antisemitic views or not. These people are Russian nationalists. That is why they were invited.

"This is the means available for the U.S. to transmit the value and advantage of a pluralistic society," he said. "Is the situation such that everybody has to agree with us before they can be invited?"

The delegation of Russian nationalists includes well-known figures in a movement that is apparently growing in strength in the Soviet Union, according to news reports from that country. Though the movement contains many different strains, its adherents share a suspicion of westernized liberals and an attachment to traditional Russian institutions and values. Many members of the movement have made antisemitic pronouncements.

Three of the eight members of the Soviet delegation are among 74 signatories to a letter published in Literaturnaya Rossiya that is viewed with great alarm by Jews in the Soviet Union. Literaturnaya Rossiya is edited by a fourth member of the delegation, Ernst Safonov.

The letter said: "It is precisely Zionism that is responsible for many things, including Jewish pogroms, for cutting off dry branches of their own people in Auschwitz and Dachau * * *." Zionists deliberately stirred up antisemitism so they could more easily emigrate to Israel or become refugees in the United States, it said.

In an inteview in Washington yesterday, Safonov said: "If you were to read the letter carefully* * *I think you would have noticed that the letter per se is not directed against the Jews," but against "Zionists." He called the letter "a cry of the writer's heart * * *. The treasures of Russian culture are in danger of extinction."

The three signers of the letter visiting the United States are Viktor Likhonosov, an author; Oleg Mikhailov, a scholar at the World Literary Institute in Moscow; and Stanislav Kunayev, chief editor of Nash Sovremennik (Our Contemporary).

In Nash Sovremennik last June, Kunayev wrote that the "Protocols of the Elders of Zion," an infamous antisemitic document concocted in Russia early in this century, was in fact a real document written by "an anti-human intelligence and an almost unnatural, santanic will." At another point in the article, Kunayev described "an immoral system by which publicists of Jewish origin use Russian surnames and write about the defects of the Soviet people."

In an interview here yesterday, Kunayev said hatred of Russia and Russians is now a theme of commentators who suggest that Russian characteristics are dangerous or that the Russian nationality ought to be annihilated. "Can we take it lying down?" he asked emphatically. "Can we be calm about it?"

Members of the delegation said they view accusations against them of antisemitism as "a small issue," as one put it—a diversion from more serious problems afflicting their country.

With "all the myriad unsolved calamities" facing the Soviet Union, Safonov said, journalists "have nothing better [to do] than beat this horse to death."

The Soviet visitors have been invited to speak at a seminar today at the Kennan Institute for Advanced Soviet Studies.

Daniel Abele, research associate at the institute, which is partially funded by the government, said the Kennan Institute agreed, at the request of the USIA, to "have these people give their presentation at the center. It's our view that it's important that a plurality of viewpoints are presented at the Kennan Institute."

"We realize that some of these people are editors of journals and newspapers which often have antisemitic articles presented there * * *. Some of these ideas are extremely dangerous, but we believe that it is important that people here in Washington become a little more aware of what is going on in the Soviet Union," Abele said.

"Government sponsorship of even one notorious antisemite is a travesty," said Martin A. Wenick, executive director of the National Conference on Soviet Jewry. "I don't believe a prestigious organization such as the Kennan Institute should be giving a platform to people who openly espouse antisemitic views."

The $60,000 trip will take the writers to Pittsburgh; Iowa City; Urbana, Ill.; Oxford, Miss.; San Francisco; Bozeman, Mont.; and New York City.

According to the USIA, the visit was proposed by the public affairs office of the U.S. Embassy in Moscow.

□ 1830

SIGNORE MARIO CASALINI AND CASALINI LIBRI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. FAZIO] is recognized for 5 minutes.

Mr. FAZIO. Mr. Speaker, I rise today to recognize the contribution to intercultural relations around the world made by Signore Mario Casalini, the proprietor and operator of Casalini Libri—a book dealership and bindery in Florence, Italy.

For over 30 years Sig. Casalini has committed himself to fostering cultural understanding through the distinguished profession of bookselling. Just one beneficiary of his efforts is the Library of Congress, whose Italian language collections are unsurpassed in the United States and are a great service to the Congress, scholars, and the general public. Sig. Casalini's lifetime of service through books was inherited from his forefathers. For many generations they have been printers and publishers in the magnificent city of Florence, which is in many respects the cultural capital of Italy. His services are not only in the areas of finding, acquiring, binding, and selling books, but also in his provision of essential bibliographic records for international scholarship. Through the efforts of Casalini Libri, li-

braries around the world benefit form bibliographic data on Italian publishing. For all practical purposes this data serves as the national bibliography of Italy.

Casalini Libri was established in 1958 by Mario Casalini at the request of several American university libraries which were seeking help in the acquisition of Italian publications. He was approached to perform this task because of his family's long association with the printing and publishing of scholarly and educational materials. For many years, he served as president of the publishing house, La Nuova Italia Editrice, and he also served as vice-president of the Italian Publishers' Association. Although the family has recently sold their publishing activities, the firm, Casalini Libri, specializes in the export of Italian publications to foreign libraries, including many university, public, and government libraries in the United States. Casalini Libri is the preeminent exporter of Italian publications. Family members who continue to play an active rule in the firm's export business include Mario's wife, Gerda, and two of their children, Barbara and Michele.

The Library of Congress has done business with Casalini Libri since the firm's earliest days. It is their exclusive supplier of current Italian books. During the 1989 fiscal year, they acquired 3,639 books, 7,381 serial pieces, and 426 other items such as microfilm, photos, music scores, maps, and sound recordings for a total of 11,446 pieces from Italy. Casalini Libri also fills the Library's needs for trade monographs and noncommercial publications that are not available through international exchange programs. Most of these items are acquired on blanket orders which provide monographs upon publication according to predetermined specifications.

Casalini Libri's cataloging information for Italian publications is the best, fastest, and most comprehensive produced in Italy. The Library of Congress and other U.S. academic libraries rely on this data for information about new Italian books. In fact, of all the European vendors, Casalini Libri has pioneered the process of dissemination of bibliographic data in machine readable form to libraries throughout the world.

Mr. Speaker, it is with pleasure that I recognize the lifelong efforts of Mario Casalini and his family in fostering cultural understanding and scholarship between Italy and the United States and internationally, as well. I'm sure I speak for all of us in wishing Sig. Casalini many more years of service to the Library of Congress and other U.S. libraries. We appreciate his good work on behalf of our Library.

A TRIBUTE TO THE LATE PETER KILBURN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, Peter Kilburn, an American that was taken captive in Lebanon in December 1984 and executed after 2 years in captivity, has not been given the recognition that his memory deserves.

It is for this reason that I would like to honor a man who dedicated his life to the betterment of the people of the world.

Yesterday, April 17, marked the fourth solemn anniversary of Mr. Kilburn's death, and I wish to recount some of the deeds of this educator, scholar, and man of peace.

Born on February 10, 1924, Peter Kilburn was a native Californian who called Lebanon his home after the mid-1960's. He had a formal background in library science and obtained his masters degree in that field from the University of California at Berkeley.

He served his country as a professional librarian in the U.S. Air Force at the base in Izmir, Turkey, during the mid-1950's and later assumed a similar civilian position at the American University in Lebanon.

It is in Lebanon that Mr. Kilburn found the cosmopolitan society and intellectual satisfaction that this eclectic lover of—as a close friend termed—"obscure and ridiculous things" craved. It was also in Lebanon that Mr. Kilburn so clearly displayed the generosity that best describes him.

After his death, his many friends recalled that Peter would often pay for student's educations and books, occasionally at the expense of his own well-being. Sometimes money that should have gone to pay for his own medication went for the payment of students' school requirements or just for the room and board of those that were in need. Peter further gave of himself by teaching English to the numerous people that asked for his help.

Often called the "forgotten hostage," Mr. Kilburn's confinement ended 4 years ago that terrible day in April when his body was found in the mountains outside of Beirut.

It is my sincerest wish that Mr. Kilburn's memory live on, not for the atrocity of his death, but for the absolute humanity that defined his life.

POLISH OFFICERS HONORED ON KATYN MASSACRE ANNIVERSARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. KLECZKA] is recognized for 5 minutes.

Mr. KLECZKA. Mr. Speaker, this month marks the 50th anniversary of the infamous Katyn Forest Massacre of thousands of captive Polish army officers by the Soviet secret police. In Wisconsin's Fourth Congressional District, this tragic event is being commemorated on April 22, 1990 by a mass at our Lady Queen of Peace Roman Catholic Church in Milwaukee and the showing of a documentary film on the massacre, obtained from the Library of Congress.

Following the September 1939 invasion of Poland by Nazi Germany and Soviet Russia, 300,000 Polish soldiers were captured by the Soviets after valiantly resisting overwhelming odds. Of these, approximately 15,000 were officers, who were separated from their troops, and placed in three special camps located in Starobielsk, Ostashkov, and Kozielsk, near the Katyn Forest. Over 90 percent of the remaining 285,000 Polish soldiers were killed by the Soviets during the war, often in slave labor camps.

The officers were held in the three camps from fall 1939 until spring 1940. The fate of those detained in Kozielsk, near the Katyn Forest, is best known because the German troops who later occupied the region publicized their plight in a big anti-Soviet propaganda campaign. Local Russian peasants testified that between January and April 1940 thousands of Polish officers were brought from the camp, interrogated in a nearby castle, and then taken into the forest with their hands tied behind their back to be shot in the head by Soviet soldiers, and left to die in mass graves.

The officers in the other two detention camps met equally brutal, if less well-documented, deaths. In all, over 15,000 Polish army officers, many of whom were professors, doctors, and community leaders in civilian life, were killed. Many historians believe the murders were intended to strip the Polish nation of its leadership so that the Soviet Union could more easily dominate it.

Poland suffered terribly as a result of the massacres and the war but it nevertheless survived; in the end, the Soviets were unable to subdue the Polish nation. Now, 50 years after this tragedy, Poland has regained its liberty and is adopting a democratic political system and a free market economy.

Emboldened by this new freedom, Poland helped force the Soviets on April 13, 1990 to admit responsibility for this atrocity, which had been blamed on the Nazis. While this long overdue acknowledgment of guilt is welcome, the Soviet Union still must offer compensation to Poland and the families of those killed, and still must punish those responsible for this crime. Only after this has been done can the massacred rest in peace.

ADRIANO MANOCCHIA'S EARTH DAY EXHIBIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mrs. LOWEY] is recognized for 5 minutes.

Mrs. LOWEY of New York. Mr. Speaker, I would like to draw the attention of my colleagues to a display of works by Andriano Manocchia which will be on display in the capitol rotunda of the New York State Capitol as part of the State's Earth Day commemoration. His lithograph, "A Waiting Game," will also be unveiled as the first New York State Audubon Society commemorative lithograph. Mr. Manocchia's stunning works show an intimate aspect of our natural heritage which serves to remind us all of just how beautiful our environment can be.

This display is especially appropriate as part of the Earth Day celebration. Earth Day is intended to renew the commitment of all citizens to work together toward the preservation of our precious environment. Mr. Manocchia's works encourage that commitment by realistically portraying endangered species, like the giant pandas, in their natural environments. One cannot help but feel the urgent necessity to protect these animals after viewing one of Mr. Manocchia's works.

Mr. Manocchia began his career in photojournalism while completing his B.A. degree at Pace University in New York. In 1973, he became the head photographer for the International Ladies Garment Workers Union [ILGWU]. During 5½ years at the ILGWU, he photographed Presidents Ford and Carter on several occasions. In 1976, he won a national first prize for his photo-essay on sweatshops in the back hills of Tennessee. During the Carter Presidential campaign, he was asked to cover the New York campaign tour.

In 1980, he devoted his time completely to the pursuit of his artistic talents. He became increasingly interested in depicting animals in their natural settings. He also became concerned about the problems that face wildlife, especially the high rate at which species are becoming extinct. His stated goal became to "leave some kind of record" of the way he saw these animals and their environments.

His works have been received with great acclaim. His limited edition prints of a giant panda and snow leopard were endorsed by the National Zoological Society. His painting of a bald eagle was chosen to commemorate the 200th anniversary of the U.S. Constitution by the bicentennial committee in Washington, DC. His work in oil titled "Fall Fishing," which was featured on the cover of Fly Fishing Heritage magazine, won the prestigious DuPont Annual Art Award for published art.

Mr. Manocchia's works are much more than mere pictures of exotic animals. They place the viewer on an intimate level with the subject. The viewer receives the feeling that he has actually fished in the mountain streams or experienced the presence of the giant panda along with the artist. The viewer understands the artist's desire to be much more than a spectator to the images which he paints. It is this sense of intimacy which makes him so popular with lovers of the environment and which makes his works such an appropriate part of Earth Day activities.

IN RECOGNITION OF NATIONAL MEDICAL RESEARCH DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. STOKES] is recognized for 5 minutes.

Mr. STOKES. Mr. Speaker, the week of March 26, 1990, marked the third annual observance of National Medical Research Day. Several of my own constituents were in town to mark this special occasion and to participate in the Advocacy/Mentor Conference sponsored by the National Health Council [NHC]. The National Health Council is comprised of 39 voluntary health agencies [VHA's] and the Pharmaceutical Manufacturers Association. These eminent organizations put aside their individual disease or disorder focuses to concentrate their collective energies on achieving stability and growth in our Nation's overall medical research enterprise.

National Medical Research Day, observed this year on March 27, is a tribute to our Nation's continued leadership, nationally and internationally, in the field of medical research. We must recognize and celebrate that status while also realizing that our Nation's predominance in medical research is threatened by the continuous downward trend in Federal funding for vital research-related activities. Each year our Nation spends more than $2,000 per person to treat health problems while the Federal Government expends only $35 per person for the medical research that could prevent those problems from occurring in the first place. In 1989, approximately $600 billion, more than 11 percent of the gross national product [GNP], was spent largely to treat illness. At the same time, only $8 billion in Federal support, or approximately one-third of 1 percent of the GNP, was devoted to research.

This discrepancy cannot continue if we have any hope for addressing the long-term health and well-being of all Americans. We must develop positive public policy that effectively promotes private sector research activities.

Mr. Speaker, no one can deny the critical role of medical research in enhancing the quality of life for people throughout the world. For example, advances in combatting such respiratory diseases as tuberculosis, emphysema and asthma have saved thousands of lives over the years. At the same time, however, knowledge of respiratory system development before and shortly after birth remains inadequate. Even tuberculosis, which we believed was well under control after the 1950's, has begun to haunt us again. In 1986, the steady downward trend in reported cases of TB stopped as reported cases of TB increased. Most public health authorities relate that reversal to the high incidence of TB in individuals infected with the human immunodeficiency virus [HIV], which causes AIDS. Experts conclude that, above all, an effective vaccine against tuberculosis offers the only realistic route to achieving the complete eradication of the disease. Can we afford to turn our backs on current and future research activities in this area? I think not.

Maintaining the priority status of medical research in the public and private sectors is good public policy. It is a sound investment yielding tremendous dividends. We can ill-afford to allow inadequate Federal funding or an environment that does not encourage a continued public-private partnership in medical research activities to jeopardize the discovery, diagnosis, and teatment of disease.

Let us use the observance of National Medical Research Day to reaffirm the commitment of Congress and the private sector to ensuring that this country's leadership in the world of medical research will continue and grow.

DUKE ELLINGTON DOLLAR COIN ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. ROYBAL] is recognized for 5 minutes.

Mr. ROYBAL. Mr. Speaker, today I am submitting the Duke Ellington Dollar Coin Act which would authorize the making of a $1 coin for general circulation that would bear the likeness of a truly honorable man Edward Kennedy "Duke" Ellington.

Though born in the era of rigid segregation, the Duke strove for a climate of equity and goodwill for all people. His orchestra was integrated throughout his long and illustrious career, his compositions embraced all races in good taste and style and his general appeal as a musician was broad.

As a goodwill ambassador to the world, the Duke was a tremendous source of credit to his country. His composition "Of God and Country" and his epic efforts toward war bonds sales during World War II bespeaks his devotion and patriotism.

The Duke was one of the most honored American musicians; composer, arranger, orchestra leader and conductor, receiving among his many citations, the Presidential Medal of Freedom, our country's highest civilian award, presented to him in 1969.

A dollar coin bearing the likeness of Edward Kennedy "Duke" Ellington is a fitting tribute to honor this great man. I urge my colleagues to cosponsor this bill.

H.R. 4552

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Duke Ellington Dollar Coin Act".

SEC. 2. LARGE $1 COINS BEARING LIKENESS OF DUKE ELLINGTON AUTHORIZED.

(a) LARGER $1 COIN AUTHORIZED.—Section 5112(a)(1) of title 31, United States Code, is amended to read as follows:

"(1) a dollar coin that is 1.5 inches in diameter and weighs 22.68 grams.".

(b) OBVERSE OF DOLLAR COIN TO BEAR LIKENESS OF DUKE ELLINGTON.—Section 5112 (d)(1) of title 31, United States Code, is amended by striking out the 6th sentence and inserting in lieu thereof "The obverse side of the dollar shall have the likeness of Edward Kennedy 'Duke' Ellington.".

VETERANS BUDGET, FISCAL YEAR 1991

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Indiana. [Mr. JONTZ] is recognized for 60 minutes.

Mr. JONTZ. Mr. Speaker, this evening I am taking this special order along with my distinguished colleagues, the gentlewoman from Indiana [Ms. LONG], from the Fourth District, the gentleman from Indiana [Mr. BURTON], from the Sixth District, to discuss a very important issue coming before the Congress, and that is our obligation to our Nation's veterans, and how we will attempt to meet that obligation in the budget that will soon be passed by this House for fiscal 1991.

I am hopeful that a number of colleagues will be able to join in this special order tonight to speak to the issues that are important to our Nation's veterans, to speak to our obligation to those men and women who have fought for our country and to express support for adequate funding for the very important programs that are administered through the Department of Veterans' Affairs to fulfill those obligations.

Mr. Speaker, I am very pleased to be able to yield at this point to the Member of the House who should most appropriately begin our special order, the gentleman who serves with distinction as the chairman of our Committee on Veterans' Affairs.

Mr. Speaker, since coming to the Congress, it has been my honor to serve on the Committee on Veterans' Affairs. All Members of this body and all veterans of our country know that no individual is a more capable spokesman for the veterans of our Nation, no individual exerts as much influence and leadership as the distinguished gentleman, the chairman of our House Committee on Veterans' Affairs, the gentleman from Mississippi [Mr. MONTGOMERY]. And I yield to the chairman at this time for his comments on this subject.

Mr. MONTGOMERY. I thank the gentleman for yielding and for the kind remarks which he expressed.

Mr. Speaker, I enjoy very much having the gentleman from Indiana, JIM JONTZ, serving on the Committee on Veterans' Affairs. He is a great member. He comes to all the meetings. He takes an active part. He has been very helpful to me and to the full committee as well as to our veterans and their dependents of this country.

JIM, I want to thank you and DAN BURTON, also from the great State of Indiana, for taking this special order tonight, as well as JILL LONG, also from the great State of Indiana, for taking the time tonight to talk about the budget that affects the 29 million veterans of this country, pertaining to medical care, education, insurance, home loans, across the spectrum of where our veterans are helped by the Congress and by this budget that we will talk about here in just a few minutes.

Mr. Speaker, the Committee on Veterans' Affairs has reported a VA budget for fiscal year 1991 which will help us correct some of the problems which have been accumulating in the veterans' benefits and health care delivery systems over the last few years. While our budget proposal will halt the erosion of services, it will not restore them to levels which veterans deserve and expect.

We have recommended a $729 million increase in budget authority above the level recommended by the President. This represents a 2-percent increase over the administration's proposal. We believe this is entirely reasonable. If accepted, the VA could provide health care to about the same number of veterans in fiscal year 1991 as it provided in fiscal year 1988. It is important to note that our request would just get us back to where we were 3 years ago, not to where we need to be.

The fiscal year 1991 budget proposal submitted by the White House is far better than anything we have seen in the past decade, but it is only a beginning. Over the past 10 years or so, we have received less-than-current-services budgets which allowed only 3 or 4 percent annual increases for inflation. The problem has been that medical inflation has been around 10 percent or more over the same period. What the Committee on Veterans' Affairs has recommended for fiscal year 1991 would cover inflation.

Even with the bright signs of a realistic budget out of The White House and a more visible and effective rule for the VA in Federal pie slicing and policymaking, much work remains. An aging veteran population will place quite a strain on the VA health care delivery system. By the turn of the century, two out of three males age 65 and older will be veterans. Accordingly, the demand for health care will increase dramatically.

There is a well-documented dire need for more direct care resources for our VA medical facilities. The current shortfall amounts to more than one-half billion dollars. On a patient level, this means continuing backlogs for outpatient and nursing care, closed beds, delayed equipment replacement, and loss of personnel.

Twenty thousand hospital beds are vacant because of inadequate resources and staff.

Modernization of facilities is not keeping pace. Many facilities are old and in need of repair or replacement. A VA-study of the 132 hospitals built before 1970—most of which are more than 35 years old—concludes that well over a billion dollars in construction funding is needed just to make necessary renovations and repairs. Some of these repairs concern safety or would make the facilities more functional. You have to have adequate facilities to maintain quality health care.

Medical equipment purchases, both new and replacement, are 3 years or more behind schedule.

Many eligible veterans in need of geriatric care—nursing home care, hospital-based home care, and other forms of extended care—are unable to obtain it.

Even if enacted, our budget proposal would not cure all of the problems veterans face today in trying to get care in many VA hospitals and most outpatient clinics. It is clear that for the remainder of this fiscal year some veterans will be denied care.

I am pleased that the VA has formed a blue ribbon commission to study our veterans' health care delivery system to determine how it can be restructured to provide more timely health care to all eligible veterans in need well into the next century. But restructuring alone won't do the job. There must be adequate financial support.

Other programs as well have suffered.

Some of our national cemeteries are not up to standard.

Since 1982, staffing levels for those employees in VA's 58 regional offices who are responsible for processing claims for disability, death and education benefits have fallen by 25 percent.

Some veterans must routinely wait 6 months to recieve a decision on claims for compensation and the backlog continues to grow.

A service-connected disabled veterans seeking vocational rehabilitation must wait about 100 days after filing an application before the VA can schedule the first job interview.

Further, many veterans are unable to obtain basic information about the benefits which Congress has provided. This is totally unacceptable.

Hopefully, this budget will begin to turn things around during the next fiscal year. But my point is that we are still a good distance from where we should be, even if the committee's proposal is enacted.

Veterans deserve a system which can deliver quality and timely services, something they have been unable to obtain in the last few years because of the drive to reduce the deficit. If the Budget Committee continues to reduce defense spending in order to have additonal funds to provide increases for domestic programs, then it's time to pay some attention to those who defended the country. No group is more deserving of benefits from the peace dividend than those who did the most to make it possible—our veterans.

□ 1840

Mr. JONTZ. Mr. Speaker, again I thank the chairman, the gentleman from Mississippi [Mr. MONTGOMERY] for participating this evening, and for his leadership on the House Committee on Veterans' Affairs. I know that the recommendations that the committee has forwarded to the Committee on the Budget were the result of a great deal of thought and a great deal of commitment to our Nation's veterans. I trust they will be very carefully considered by the Committee on the Budget in these next few days, as the important decisions are made.

Mr. Speaker, I yield such time as he may consume to the gentleman from Indiana [Mr. BURTON], one of the Members of this body who is joining me in sponsoring or holding this special order tonight, my friend and colleague and a neighbor to the south of my district, the representative from the Sixth District of Indiana, who is a member of the Committee on Veterans' Affairs. I thank the gentleman for his assistance in organizing this special order.

Mr. BURTON of Indiana. Mr. Speaker, I thank my colleague from

Indiana for starting the process toward having this special order tonight. It was a pleasure to work with him to get this organized. I also see another one of our colleagues from Indiana that will participate in this special order, so we have good representation from Indiana here tonight.

I am going to have to cut my remarks short because I have to go to a dinner, but I would like to point out that while the Veterans' Administration does an outstanding job in helping veterans overall, there are some weak points that need to be addressed, and need to be corrected.

In Indianapolis, we have a hospital called the Richard A. Roudebush Hospital, which has done a good job overall of taking care of the veterans' needs. However, I have been told of some glaring problems over the past few months that need to be corrected.

We had one patient who was a Vietnam veteran who is a paraplegic, and he had to go into a hospital for a very quick service. His problems required immediate attention. We went into the hospital, and they put him into a bed where the sheets had not been changed, and there was blood from the previous occupant of that room on the sheets and on the pillowcase. Now we all know the problem that we have with AIDS and other blood-borne diseases, and that is something that should never happen. In addition to that, the bedpans, I was informed, had not been properly cleaned, and he was in this bed under this condition for at least 2 or 3 days.

Now, those kinds of things should not occur. We say to our veterans who have served this country and served this country well that they deserve the best, the best treatment in ths hospitals, the best protection that we could possibly give them, and then we have a patient like this who has literally given part of his body to his country and he goes into the hospital and he is put into a bed that is not even clean. In addition to that, the staff treatment of this individual was not up to par, and we have investigated that.

I had one of my relatives contact me who has been undergoing severe depression because of military-related injury from the Korean war, and he was in this same facility. They had to take him from the Cold Springs Annex to the hospital downtown for an x ray, a CAT scan. They told him it was an emergency and they wanted to get them down there and get this CAT scan taken very quickly. They took him down in an ambulance, and when his wife got there, she was called and told he was being taken downtown. When his wife got there, they did not have any notification that he had been admitted, no evidence he was even in the hospital. She wandered upstairs looking for him, and found him outside the room where the CAT scan was to take place. He had been sitting there for an hour on an unattended stretcher. Nobody was there, and the man was in a semicomatose condition. He could have died. Then, they found out that the CAT scan had been broken down for 3 days before he was even brought down there. So there was no reason to bring him from the annex down to the hospital for the CAT scan because it could not be given in the first place.

These are just a couple of examples of the problems that they face at this hospital. I have talked to some of the doctors and the nurses—I am not at liberty to give their names out now, but there are real management problems at the facility. I talked to the chairman of the committee and informed him of my concerns, and after we conclude our research into the problems at the hospital, I will turn this over to the chairman of the committee and to the VA for complete investigation of the problem.

I am not trying to say the entire VA hospital program is in a shambles. I am not even saying that the Roudebush Hospital is in need of complete renovation as far as the administration is concerned there, but I am saying that there are problems at the VA hospital in Indianapolis, and there are problems at the VA hospital that have been brought to my attention in Marion. There are problems in other VA hospitals across this country. We need to address those problems and address them very quickly to make sure that our veterans get the best in health care.

RICHARD E. BAKER,
R.R. 1 Box 64,
Alexandria, IN, December 29, 1989.

Congressman DAN BURTON,
8900 Keystone at the Crossing, Suite 1050, Indianapolis, IN

Re.: Carry Jolliff

On August 17, 1989 Jenny Jolliff, Rosemary Bateman and myself arrived at VA Hospital at approximately 10:30 A.M. to pick up Carry Jolliff. Dr. Javed who was treating Mr. Jolliff was in a patients room next to Mr. Jolliff and as he left he bypassed Mr. Jolliff. Mr. Jolliff and myself followed Dr. Javed down to the nurses station and when Mr. Jolliff asked Dr. Javed if he could talk to him, Dr. told him to go back to his room and he would get to him as soon as he could. (this was said in a very abrupt way) Finally dr. came to the room, I stayed outside so I don't know what the conversation was. At this time Mr. Jolliff was released. We went down to the nurses station to get the release at which time we found everyone had went to lunch and left a housekeeper in charge. The housekeeper informed us we would have to wait until they returned from lunch to get the release. (this we did) When they returned and we were waiting for the release I observed them taking a patient for a test, whether this being the patient or not the employees at the desk were stating they had lost a patient and did not know where he was. We left the desk and went back up stairs on 3rd floor West to wait for Mr. Jolliffs medication for which he was to take home with him. We waited approximately 3 hours for this and from conversations I heard in the halls they hadn't found their lost patient yet. . . .

I believe in my heart we were given the run around because of Mrs. Jolliff's complaints about the housekeeping and the care that Mr. Jolliff received. We finally left the hospital at approximately 3:40 P.M.

Richard E. Baker

PATIENT, *W. 10th St. Veteran's Hosp.*
& Cold Springs Rd. Hosp.,
Indianapolis, IN., January 9, 1990.

Hon. Dan Burton,
6th District, 8900 Keystone Crossing, Indianapolis, IN

I am writing on behalf of my husband, who has been hospitalized since 11-16-89 at W. 10th St. Veterans Hospital, Indianapolis, IN. There have been some things which have happened recently and in the past which could have been life threatening.

My husband is what is considered a Brittle Diabetic, with all the complications, such as kidney failure, legally blind, neuropathy, temporal arteritis, high & low blood pressure, etc., in addition he has had several strokes (right side) and has developed Cripticosal Meningitis.

After this background, one occasion when visiting my husband on a Sunday afternoon, I went to his room and found him on oxygen, catheterized and I was unable to wake him, his color was very bad—I went to the nurse and asked what was wrong—she said . . . had developed pneumonia and had a problem with his kidneys and they could not wake him, she said she had called the Doctor. No one had called to inform me of a change in his condition. They came in to take a blood sugar check and it was low, they took it at least twice while I was waiting on the Doctor. When the Doctor finally came she could not arouse . . . either. I told her his blood sugar was too low and she disagreed, she said a blood draw had been made a couple hours prior and it was alright, on rechecking she found it had been low at that time, they were going to take him to intensive care but after giving him a shot they were able to rouse him somewhat. He does not remember the entire day. If I had not come in when I did and insisted his blood sugar was low, he could have gone into a comma and died. There is no excuse for this type of carelessness, plus the fact I was not informed of a change in his condition.

On Dec. 21st, 1989, my husband was transfered from W. 10th St. V.A. Hosp. to Cold Springs Rd. Hosp. for therapy, he has been boing treated for Meningitis since 11-16-89. The first drug they used caused considerable damage to his kidneys, now they are using another drug that seems to be helping, however, he has not had kidney function since the first medication. I feel they transferred him too soon, before he was able to participate in therapy. At time of transfer it was the Holidays, they were short of staff and as many patients they could get out the better, in fact, Cold Springs Staff said he was not expected till after Christmas. After arriving on Dec. 21st, on Dec. 25th he was sent to E.R. at 10th St. Hosp., with high blood pressure and a low grade fever. They decided he had a urinary tract infection and sent him back to Cold Springs after five hours in E.R., (with only two patients during that time). On Dec. 26th, I received another call from Cold Springs saying . . . had fallen out of his wheel chair

because of weakness on the right side. About 3:00 p.m. I went to see him and as I was getting off the elevator they were putting . . . on the elevator. I asked the attendant where he was taking him and he said to 10th St. Hosp. for a Cat Scan, I asked . . . what was going on and he said they felt he might have had a light stroke. I went to the nurse and asked what had happened, she said after observing him they noticed he had no strength on right side and could not use right hand to eat and when he tried to sit up he would fall to right and they were sending him to E.R. for tests and evaluation. After leaving Cold Springs Rd. I went directly to 10th St. V.A. Hosp. to E.R. and asked if . . . was there, they said he hadn't arrived yet but was expected. I told them he should be there because he left Cold Sprigns before I did, then I remembered what the attendant said about Cat Scan and said I would go up there. I went to Cat Scan, there was no one to be found in that wing of the Bldg., Cat Scan had been broke down since before Christmas, my husband was sitting in a wheel chair in the middle of the hallway, (unattended) where the attendant had dumped him. This was a man they suspected of having a stroke and who was leaning very heavily to right and could have fallen out of chair again if I had not arrived. I took him to E.R. and told them what happened and they took him right in. He was in E.R. for (6) hours before I was ever able to talk to a Doctor and he said he needed a Cat Scan but they couldn't do it because theirs was broke, he also said they needed to do other tests, I asked him why they didn't keep him at 10th St. Hosp. instead of sending him back and forth each day, he gave a very evasive answer (no reason). It was 12:30 p.m. before . . . was returned to Cold Springs R. I am not complaining about this incident for my husband alone but for all the other men who have to use the V.A. Hosp. There is no excuse for such carelessness and if I had not been there to care what happened to my husband it could have been very serious and even fatal. I am concerned about the men who have no one to care or speak up for them, for them it would have been whoever happened to come down to that wing of the Bldg.

On one occasion they forgot his breakfast (this is a diabetic who usually has low blood sugar in the mornings) after several reminders to the staff his breakfast was brought at 9:30 a.m. For a diabetic a regular meal time is a must because the insulin is given and then they are to eat. This carelessness could cause diabetic shock or even death. It should be stressed that all diabetic patients receive their meals at a regular time.

There are many caring people at the V.A. Hosp. and we appreciate those, and then there are those who seem to consider the Veteran a second class citizen. These are men who have fought for their country and deserve to be treated with dignity and respect. Most of them would not go to a V.A. Facility if they had any other choice, mainly because of the hours spent waiting in the various clinics and E.R. If you have an appointment for 8:00 or 9:00 a.m., you can plan on being there till at least about 4:00 p.m.

SINCERELY

□ 1850

Mr. BURTON. And if we do not, then shame on the Congress of the United States.

Mr. Speaker, I want to thank my colleague once again for taking this special order. I appreciate working with him on this matter.

Mr. JONTZ. Mr. Speaker, let me thank my colleague, the gentleman from Indiana [Mr. BURTON], for his contribution to our special order this evening. I think that the gentleman feels very strongly, as all of us on the Committee on Veterans' Affairs do, that every veteran in our country deserves the best possible care. The circumstances that the gentleman describes in Indianapolis certainly would be of concern to all the people of this country, and my hope is that the budget that we pass in the Congress this year will allow that facility and other VA facilities to make the improvements necessary to provide the highest quality care to every veteran who needs the attention.

Mr. Speaker, I yield now to my colleague on the Committee on Veterans' Affairs, the gentleman from Pennsylvania [Mr. RIDGE], who is a very capable spokesman on the committee for the interests of our Nation's veterans. As I yield to the gentleman, I want to express my thanks to him for his participation this evening in speaking to the important issues in the budget for the Department of Veterans Affairs.

Mr. RIDGE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, first of all, I want to thank the gentleman, as well as our colleague, the gentleman from Indiana [Mr. BURTON], who just left, and I want to express my thanks to the gentleman from Mississippi. I do not know whether we should call him "chairman" or "General MONTGOMERY," and perhaps we should call him both. I thank these gentlemen for their leadership in taking out this special order.

As a special note, I want to acknowledge publicly as a Vietnam veteran the work that the gentleman from Indiana [Mr. JONTZ] has done with regard to posttraumatic stress. The gentleman has taken a leadership role within the committee on this very important and sensitive issue. I say to the gentleman, you have addressed it with a compassion and a desire that we need, and as one man speaking, I believe, for many, let me say that we appreciate your leadership, and I know I will continue to work with you as you work your way through a very difficult and complex issue, not only financially but medically as well.

Mr. Speaker, I rise today in support of our Nation's veterans and to call attention to the 1991 budget for the Department of Veterans Affairs. I sense that one of the reasons that this special order is being conducted is as a gentle reminder hopefully to those who serve on the Budget Committee or on the Appropriations Committee that we have taken a look at the budget that was proposed by the administration, and we allowed it and approved the increase of in excess of $1 billion, but we thought there were vital, essential programs that needed more dollars. We are most hopeful that the $770 million that we have included in addition to the President's mark, with the leadership of Chairman MONTGOMERY and with the broad bipartisan support of Republicans and Democrats on the committee, will be the bottom line so they can start their deliberations from that point. We know that there will be no objection if any Member of the other committees choose to go above that figure or to exceed it. If they do, they will not hear any argument from those of us on the Committee on Veterans' Affairs.

Mr. Speaker, I will tell the Members as a member of the committee that I have been encouraged by the willingness of Secretary Derwinski to receive input not only from Members of Congress but, frankly, from people who matter even more, those men and women or those veterans who are affected by the actions of the Department and who have looked to the Department for different kinds of assistance. The Secretary has been in my congressional district, where he not only talked to veterans and service officers and organization representatives but had a closed door, very open and frank discussion with staff, nursing personnel, and the like to get a feeling for what it was they needed to continue providing quality health care in the VA medical center that is in my congressional district.

As I said before, we were encouraged by the President's public and financial recognition of the role and the importance of veterans with his addition of almost $1 billion to the budget. We are just hoping that the actions of the committee will carry to the rest of the House and hopefully over to the Senate, and that they will include the other $770 million which we added. Really we are not talking about new programs; we are not talking about anything fancy. This budget has been cut over the years. We have fine tuned it, and we found out we have to play catchup ball now, and again we implore those on the other committees to start with the Veterans' Committee's mark, with $770 million more than the President requested. While we appreciate that $1 billion, we want to start with the Veterans' Committee mark.

At a time when constraints on the Federal dollar are growing, I believe it is more important than ever to give our Nation's veterans the priority that they deserve in the budgetmaking process.

I might add that over the years I have always said that the cost of health care to veterans and the benefits that we give to disabled veterans is a continuing cost of defense. I know

for budget reasons and committee reasons and jurisdictional reasons, we have and should have a separate Veterans' Affairs Committee. But from my point of view, we have as much responsibility to those men and women who previously wore a uniform as we do to those who wear it today, particularly when it comes to those who have been engaged in battle and suffered loss of life or limb and require medical attention and require disability benefits. It is a continuing cost of defense, and it speaks loud and clear about what a country thinks of its veterans. It is clear over the years that we have held all of our veterans in very high esteem, but when we start looking at budget restraints, the last place we should be looking is at the program directed to those men and women who wore the uniform, who preserved the freedoms and opportunities that not only we in the country enjoy but that are enjoyed by millions of people elsewhere.

I might add, as I think of it in terms of a continuing cost of defense, that our modest and welcome increase of over $700 million is slightly over the cost of one B-2 bomber. I do not normally like to compare domestic programs with military programs because I do think sometimes we get into situations where we are comparing apples with oranges. But if we think of the continuing care for veterans as a continuing cost of defense, than I wonder where we would come out. I would hope that we would come out in defense of those hundreds and thousands of men and women who wore the uniform, who suffered disabilities, who require medical treatment, and who require disability payments, and that we would agree they are clearly worth one B-2 prototype bomber.

I say that many of us rhetorically claim that we must not balance the budget on the backs of our veterans. However, these words at times probably seem to ring hollow in the ears in some of the veterans who depend on the VA for benefits and for a small measure—not so much as financial security—in many instances, a small measure of sustenance, as well as those who seek care in VA medical facilities.

I think we have made great strides in providing care and benefits to our veterans. Much of that credit goes strictly to our chairman, General MONTGOMERY. However, during the same time the VA medical system has suffered in the past because of inadequate budgets that failed to keep pace with the soaring medical costs that our facilities must absorb. Medical costs are growing far in excess of the inflationary rate throughout the country. We see it in the private sector all the time, and yet people continually come back to the VA medical system and say, "You've got to do better at keeping your costs under control."

I think the VA has a system of cost containment that they can be very proud of. The point is that they have done just about everything they can in terms of management within the system, and now we need simply more dollars. The past is catching up with many of our facilities, and as our veteran population ages, it is evident that the VA will be dealing with new problems and new demands in an already overstretched budget.

I might add that in many cases the Veterans' Committee has authorized new programs and tried to help out, tried to reach out to the veterans population, to these men and women, and unfortunately many of these efforts have gone unfunded.

□ 1900

Mr. Speaker, I believe that there are a number of things that we can do to upgrade the status of our veterans facilities and to provide assurances that calls for help from those who defended our country will not go unheeded by Congress. Like many of my colleagues, I believe now is the time to address the issues faced by the Department of Veterans Affairs.

When Secretary Derwinski appeared before the committee to detail the plans to establish a VA commission on the future structure of veterans health care, I welcomed this initiative. As many of us regretfully acknowledge, it has been nearly 25 years since the last comprehensive review of VA medical operations. A study that aims to improve the delivery of medical services at our Nation's VA hospitals is certainly warranted, and I think we just leave it, that endorsement, simply to that limited amount. We know, and I am confident that any cost saving measures that Secretary Derwinski and this commission could identify would not be used to reduce the budget, would not be used to reduce any particular line item, but, if we can save some cost here, we can channel those resources into another area, and we all know, those of us who sit on the Committee on Veterans' Affairs, there is plenty of places we can channel new or old resources to.

So, Mr. Speaker, I think we have to keep a very open mind with regard to this initiative, the members of the committee, and Members of Congress and members of the veterans organizations, but let us see what they have to say. One of the things that we know is that they have to run a pretty tough test, a pretty tough political gauntlet, when they bring those programs, whatever they might be, to the Committee on Veterans' Affairs.

Mr. Speaker, when we attempt to guarantee our veterans an equitable share of the Federal budget, let us also make sure that this share is used wisely. Let us see to it that we compensate our doctors, dentists and nurses adequately so that their salaries are not woefully below their counterparts outside the VA. I do not think anybody on the committee thinks we will ever elevate them to the same level that exists in the private health care sector. It is pretty clear from my experience in northwestern Pennsylvania, when I walk through a VA medical center there, that when we have got trained professionals, nurses, pharmacists, physical therapists, and in the same community there are several other hospitals who are advertising for nurses, physical therapists and pharmacists, that we know very clearly that what keeps those men and women in a VA health care system is not the wages because, if they were looking for money, they could take their degrees and their uniform and move down the street. What I think keeps most of those people in the VA health care delivery system is an emotional commitment, a personal commitment, to caring for veterans. Although we will never be able to compete with the private sector completely, I think we ought to do all we can to raise the compensation to attract and retain as many of these professionals as we possibly can.

As I said before, I think we need to do more in the area of posttraumatic stress disorder, and I thank my colleague for his work in this particular area. Let us see to it that veterans are not turned away from outpatient care, that in-patient care is not denied, and the list can go on and on, and I know there are others to speak at this special order, so I will conclude my remarks without going further with an itemized list.

Mr. Speaker, we can begin to address the unique problems of our Nation's largest health care delivery system by supporting the budget proposed by the Committee on Veterans' Affairs. I think that is a great place to start.

As we witness the unbelievable events in Eastern Europe and in the Soviet Union, let us not forget the individuals who have enabled us to look upon these changes as a free and democratic nation. The thought occurred the other day that there are many people who are taking credit for what is going on in Eastern Europe and the Soviet Union, and clearly there are many people in institutions that deserve the credit. But rarely in any public discussion do I hear mention of World War I or World War II veterans and the men and women who this country sent over there, the men and women whose presence, whose fighting skills, whose commitment to freedom stood out through the entire 20th century, even to those countries that temporarily after World War II were locked up behind the Iron Cur-

tain. There is truly a better way to govern, there is truly a better way to live, and those Americans who wore those uniforms, those men and women who served in World War I and World War II in my mind deserve the kind of recognition that has been given to a lot of other people in Europe.

Mr. Speaker, I urge my colleagues to fully support the 1991 budget proposal, and I thank my colleagues, the gentleman from Mississippi [Mr. MONTGOMERY] and the gentleman from Indiana [Mr. JONTZ] for giving me the opportunity to participate in this special order.

Mr. JONTZ. Mr. Speaker, I want to thank the gentleman from Pennsylvania [Mr. RIDGE] for his very eloquent statement, and for his continuing contributions of the Committee on Veterans' Affairs and specifically for his support and cosponsorship of the posttraumatic stress disorder legislation. I want to underscore the importance of addressing all aspects of the VA budget and the medical budget in particular, but at the same time I want to note that we hope to be able to add some funds for posttraumatic stress disorder, that with the support of the chairman of our committee, the committee recommendation that the gentleman from Pennsylvania [Mr. RIDGE] spoke to includes some additional funding, and, after these many years, we are recognizing the extent of this problem and the importance of addressing it. I thank the gentleman from Pennsylvania for his help in that regard.

Mr. Speaker, I am joined this evening in sponsoring this special order by two of my colleagues from Indiana. No State has more members on the Committee on Veterans' Affairs than Indiana does. I think that speaks to the commitment of the people of our State to seeing that our obligations to our Nation's veterans are fulfilled.

I am very pleased to be joined by the gentlewomen from Indiana's Fourth District [Ms. LONG], my neighbor. She has been a member of our Veterans' Affairs Subcommittee since she came to the Congress, and it is a pleasure to work with her and have her support for this special order this evening, and I yield to her at this point.

Ms. LONG. Mr. Speaker, I am pleased to join my colleagues, Mr. BURTON and Mr. JONTZ, in sponsoring this special order on the Veterans' Affairs budget for fiscal year 1991. I have joined them this afternoon because I believe strongly that this Congress must address the needs of America's veterans. The budget we pass for this coming year, and in all the years that follow, should reflect the importance of our Nation's veterans.

These men and women risked their lives for our country. They made great sacrifices and did so willingly. My own father served in World War II. Fathers, sons, sisters and daughters have served and continue to serve in our Armed Forces, all of them willing to put their lives on the line for their country. Our Nation owes a great deal to each of these veterans.

That debt must be repaid with more than lip service. It must be repaid through the programs and the care that we provide our veterans. And if our veterans' programs are to be successful, they must receive the funding they need.

President Bush's proposed budget is a good start. For the first time in years, the administration has proposed a sizable increase in funding for the Department of Veterans Affairs. The $12.3 billion requested by the President for veterans' medical care represents an increase of almost $1 billion over the funding levels for fiscal year 1990. This is a victory for our veterans, who have been fighting for needed increases in the medical care budget.

But it is not enough. Even with this proposed increase, too many veterans will be without needed care. Too many will be unable to receive the attention they need when they need it. Too many will be forced to go to non-VA hospitals. America's veterans need more, and we on the house Veterans' Affairs Committee have attempted to ensure that they get more. We have recommended an additional increase of 2 percent in funding above the amount proposed by the President.

Now, a 2 percent addition to the budget will not work magic. It will not solve all the problems or provide all that is needed. But it will enable the DVA to provide care to about the same number of veterans in 1991 that it did in 1988. It will at least allow our veterans to make up the losses in care that they have suffered in the years since 1988. During those years, the number of patients for whom the DVA has been able to provide care has fallen steadily. It is time that we end this decline and begin to move forward. We need to increase the number of veterans helped by the system and improve the level of care they receive.

This is not the time to cut the benefits these men and women receive, or reduce the incentives that encourage highly qualified personnel to work in the DVA medical system. We should not cut the funding for medical and prosthetic research, as recommended by the President. Rather, we should increase it. This research greatly benefits our veterans, many of whom depend on prosthetic devices and all of whom can benefit from the medical advances created by research. Moreover, a quality research program helps to attract and retain doctors and other health care professionals into the veterans' health care system. In light of the difficulty that DVA has been having in recruiting and retaining doctors, nurses, and other personnel in the veterans' health care system, we should do everything possible to increase the attractiveness of the system. An increase in the DVA's medical and prosthetic research budget will encourage qualifed personnel to enter and remain in the veterans' health care system and will improve the care our veterans receive.

Medical care is not the only type of assistance that we as a nation should continue to provide to our veterans. The men and women who have served their country so honorably deserve the opportunity to provide a home for themselves and their families. For years they have been given that opportunity through the veterans' home loan program. Now the administration is proposing that, for the first time ever, veterans be required to make down payments in order to qualify for most of these loans. And the administration has proposed that the DVA increase the mortgage indemnity fee that is charged to certain veteran borrowers.

Both of these proposals are outrageous. There is no evidence that a down payment is needed or that it will improve the program. It is clear, however, that such a requirement will be very difficult for many veteran borrowers to meet. Many of the veterans who could under other circumstances benefit from the program would not be able to participate in it if a downpayment requirement were instituted.

Similarly, there is no evidence that an increase in the mortgage indemnity fee is needed or would in any way aid the Home Loan Program. The current mortgage indemnity fee was implemented only months ago, with the support of the Congressional Budget Office, which projected that such a fee would be sufficient to support the program. It seems far too soon for the administration to be proposing changes in a program that has barely begun. We should give this program a chance to get off the ground before considering any increase in the indemnity fee. Our veterans deserve the opportunity to provide a home for themselves and their families. Congress should oppose these two proposals and ensure that our veterans retain that opportunity.

There is no question that we face an uphill battle in the struggle to create a sensible Federal budget and reduce our soaring deficit. But that is no excuse for denying our veterans the services they need. We must bring the deficit under control. But we cannot, and must not, attempt to do so on the backs of our veterans.

□ 1910

Mr. JONTZ. Mr. Speaker, I want to thank my colleague from the Indiana Fourth District, Congresswoman LONG,

for her statement and her contribution this evening. I had the opportunity a couple years ago to visit the Fort Wayne VA Hospital. I am sure the Congresswoman has been back on several occasions since then. I know of her commitment to the veterans of her district and to the veterans of our entire country, and I thank her for her participation this evening in this special order.

Mr. Speaker, I want to summarize a few of the remarks which have been made this evening and add some personal words with regard to our proposed VA budget and again thank my colleages for their participation this evening, to bring to the attention of our colleagues here in the House the important issues which face us as the Budget Committee and then the Appropriations Committee make their decisions for the budget of the Department of Veterans Affairs.

Certainly the proposed fiscal year 1991 administration budget for the VA is the best veterans budget that I have seen in my 3 years in the Congress. I think to a large extent that is the result of the work of our new Secretary, Secretary Derwinski.

The Congress saw fit to make the Department of Veterans Affairs a Cabinet-level Department and to bring the Secretary of the new Department into the inner circle of the President's advisors. I think that we are seeing the benefits of that move.

At the same time, I would be remiss if I did not say that I believe that the improved budget recommendation from the administration this year is also the result of the efforts of veterans around this country, of the veterans' organizations working through the Congress and taking their case directly to the President and convincing our Nation of the importance of this obligation. I want to say thanks to those veterans for the sacrifices they have made, for their willingess to serve our country, and for their continuing contribution to our Nation through their organizations and as individuals.

The good news is that the President's spending blueprint for this coming year increases funding for veterans' health care programs by $1 billion to $12.3 billion out of a total VA budget of $31 billion for this next year.

Regretably, much of this new money will have to be used to make up for lost ground, to get programs back up to the service levels that existed several years ago and to simply account for the effects of inflation.

I believe that the veterans's budget could and should go a lot further than the administration proposal. The Veterans' Affairs Committee, as our chairman outlined earlier this evening, recognized this fact in February when it approved its own spending initiative which adds $722 million to the administration's proposal. Among the key committee additions were $96 million to restore funding for nursing home care to 1988 levels; $69 million to increase outpatient care; $40 million for medical research, and rejection of an administration proposal opposed by the committee and all the veterans groups that veterans be required for the first time ever to make down payments on VA guaranteed home loans.

This plan that the Veterans' Committee endorsed has been sent to the House Budget Committee which will be considering these recommendations soon.

The guidance for these additions came from hearings that our committee conducted in February where the major veterans groups at the national level made their recommendations about what is necessary to meet the needs of our Nation's veterans.

The independent budget for Veterans' Affairs prepared by the AmVets, the Veterans of Foreign Wars, and the Disabled American Veterans and the Paralyzed Veterans of America, called for a spending level of $13.4 billion, $1 billion higher than the administration proposal and $300 million higher than the final committee-approved plan.

This fourth independent budget proposed for the Department of Veterans Affairs was entitled, "The Price of Peace." These four organizations formulated and presented to the Congress the budget for veterans based on need, not based on OMB guidelines.

Eighteen other veterans groups and medical care associations have endorsed this independent budget proposal, which would be an increase of $1.1 billion over the administration's request. While our committee was not able to include all of the independent budget recommendations for medical care, we were able to increase the administration's proposal by $246 million and provide for overall increases of $729 million.

The independent budget I believe is right on target with their proposal for overall level of funding for VA programs. The VA has suffered from a decade of inadequate budgets. The budgets for medical care and research, for example, have lagged behind other Government health care programs in terms of funding over the last four fiscal years. While Medicare has had an average annual increase of 7 percent, Medicaid an average increase of 11 percent and health research programs a 12-percent increase, veterans health care has seen only a 4-percent annual increase, and veterans medical research has suffered from an average decline of almost 2 percent.

The independent budget groups in hearings which the Veterans' Affairs Committee held under the leadership of our distinguished chairman, the gentleman from Mississippi [Mr. MONTGOMERY] pointed out several medical care issues that were of concern to them. The growing evidence of the quality erosion in medical care delivery, the failure to change the medical care system to accommodate the needs of the growing elderly veterans population, the growing threat to the continuity and integrity of the VA's link to medical schools, confusing entitlements to health care and the failure to adequately identify or address medical care program funding deficits are all a part of this.

I might mention, Mr. Speaker, with regard to the issue of confusing entitlements to health care, legislation which this House passed to provide for access to outpatient care for our Nation's veterans on the same basis of the current entitlement for in-patient care. Last year I became aware of this problem when veterans were turned away from the Adam Benjamin Outpatient Clinic in Crown Point, IN, category A veterans, who are identified by the VA as the highest priority for medical care.

I was alarmed that the VA was turning away such veterans. I was under the impression that the law required all category A veterans to be served, and I found to my disappointment in fact a different standard exists for outpatient care than for inpatient care.

□ 1920

To the credit of this House and the leadership of the chairman, the gentleman from Mississippi [Mr. MONTGOMERY], this House did pass that measure to provide entitlement to all veterans for outpatient care on the same basis as inpatient care, and my hope is the other body will be able to pass the legislation this year.

I want to continue by saying that the proposals that came from the various veterans' groups in the independent budget would provide the resources necessary to meet these needs, veterans' needs, for hospital, outpatient, and nursing-home-care needs, to expand programs needed to care for aging veterans, and to provide adequate support for the flight against the growing AIDS epidemic so that funds are not diverted from the basic medical program of the VA to meet the growing AIDS workload.

Another chief concern of these groups that I might speak to briefly has been the handling of claims by the Veterans' Administration. The underfunding of the Veterans' Benefits Administration has caused a tremendous backlog in compensation and pension claims. Veterans have often had to wait for several months for benefits and are not receiving the attention they deserve because of underfunding.

I think this is a matter of concern to all the members of the Veterans' Com-

mittee and all of the Members of Congress, because we want to make sure that those veterans who fought for our country and who are entitled to these benefits are able to have their applications considered in a timely manner and receive the proper attention.

The Veterans' Committee recommendations to the Committee on the Budget include funding sufficient to increase staffing of benefits personnel by 577 in order to improve the quality and timeliness of services. I am hopeful that approving of this increase will help restore a higher degree of quality services to these veterans.

While I fully support the goals outlined in the budgets prepared by the committee and various veterans' groups and the independent budget, the proposal that we received from the administration and also the independent budget did fail in one other regard that I want to mention, to address a problem that has been a great concern of mine that the gentleman from Pennsylvania [Mr. RIDGE] spoke about earlier this evening, and that is care for posttraumatic stress disorder.

Posttraumatic stress disorder is a psychological readjustment condition that has occurred among all veteran populations but is particularly prevalent among Vietnam-era veterans. According to a study that the VA sponsored which was completed just a little over a year ago, only 1 in 10 veterans currently suffering from this combat-related condition has received treatment for PTSD from the Veterans' Administration.

During the committee consideration of the budget, I was able, with the support of my colleagues on the committee, to offer successfully an amendment to authorize some $7 million to fund the first phase of legislation I have introduced as H.R. 3037 to assist veterans suffering from posttraumatic stress disorder.

I want to add that my colleagues who participated this evening in this special order, the gentlewoman from Indiana [Ms. LONG], the gentleman from Pennsylvania [Mr. RIDGE], and many other Members of this House on the Committee on Veterans' Affairs and outside of the Committee on Veterans' Affairs have sponsored this legislation to bring to the attention of all of our Members the importance of addressing this issue.

The Subcommittee on Oversight and Investigations of the Committee on Veterans' Affairs under the capable chairmanship of my colleague, the gentleman from Illinois [Mr. EVANS], held a field hearing last September on services and benefits and treatment provided to Hoosier veterans suffering from PTSD, along with our colleague, the gentlewoman from Indiana [Ms. LONG], and we traveled to Huntington, IN, to hear from veterans and from officials of the Department of Veterans Affairs and from PTSD treatment professionals.

I want to commend the fine work of my colleague, the gentleman from Illinois [Mr. EVANS], for his leaderhip in conducting this hearing, and to commend the gentlewoman from Indiana [Ms. LONG] for her sponsorship, and also to thank our colleague, the gentleman from Indiana [Mr. MCCLOSKEY], from Indiana's Eighth Congressional District, for testifying at this hearing at Huntington.

We also held a forum on PTSD for Vietnam veterans at the 7th annual Vietnam veterans' reunion in Kokomo, IN, in my own district. There we heard from over 30 veterans on their personal experiences with PTSD, the problems they are encountering with the DVA, and we heard from their families. We listened to their recommendations on what we can do here in Congress to make sure these veterans are getting the treatment and services they deserve.

I would like to address for just a minute the question of how this problem has evolved. Homecomings and counsellings are usually furnished veterans with the transition from stress, even severe stress known as shellshock in World War I, and combat fatigue in World War II, but there was no homecoming for many Vietnam veterans, no debriefing, and very little counseling. Many veterans returned to our country in civilian dress, and the wounded were often returned fom a Vietnamese jungle to a stateside hospital within 24 hours.

While most Vietnam veterans readjusted back into civilian life without any problems, others had difficulty in reestablishing family ties, educational and employment careers, and simply placing their veteran experience in some understandable context.

Beyond the usual stresses of war, the Vietnam veteran was surrounded by many extraordinary circumstances, problems in distinguishing the enemy from the nonenemy, ambiguous objectives, widespread terrorism, and unusual brutality. Perhaps the greatest inhibiting factor was the extent of the national debate in this country about the value, the conduct, and the meaning of the war.

This left many of our Vietnam veterans alienated. Many did not join the veterans' service groups, and more stayed away from the Government and from the Veterans' Administration. As with many issues and problems surrounding the Vietnam war, posttraumatic stress disorder has been grossly misunderstood by the public.

At the forum we conducted on posttraumatic stress disorder, together with my colleagues, the gentlewoman from Indiana [Ms. LONG], and the gentleman from Illinois [Mr. EVANS], we heard from the wife of a veteran suffering from PTSD who told us about the lack of understanding by the public and by the media of this condition.

After her husband had put on his combat fatigues and put on camouflage face paint, he went out to the woods near their home to relive his Vietnam experience. The headline in the hometown paper the next day led the public to believe that he was some kind of terrorist and ignored the fact that this type of behavior was most likely attributable to posttraumatic stress disorder.

PTSD, unfortunately, was not even recognized formally by health professionals until 1980, a decade after many of our men and women veterans had left Vietnam. We find ourselves today understanding for the first time the extent of the number of veterans who are still suffering from this condition.

A long-awaited study undertaken by the Research Triangle Institute under contract with the Department of Veterans Affairs concluded just about a year ago that as many as 15 percent of Vietnam theater veterans are currently suffering from PTSD and another 11 percent have some effects of PTSD. This number, much higher than previously estimated, equals over 800,000 of the 3.1 million men and women who served in Vietnam. Over 479,000 men and women currently have full-scale PTSD. This study also showed that rates of instances of PTSD among Hispanic veterans and black veterans are considerably higher than among white veterans.

The RTI study has been confirmed by the findings of a study recently published in the March 2 edition of the Journal of the American Medical Association regarding the impact of military service during the Vietnam era.

Mr. Speaker, it is critical that we address the issue of PTSD, that we address the issues of concern to our Nation's other veterans in the budget this year, and I hope that the special order we have conducted this evening has made it possible for us to bring to the attention of our colleagues some of these issues.

At this time, with the remaining minutes that we have remaining, I yield to one of my colleagues, the distinguished gentleman from the State of Texas, Mr. LAUGHLIN, who is a strong supporter of the veterans of our Nation. I thank the gentleman for his appearance this evening to speak on behalf of the veterans of our country.

Mr. LAUGHLIN. Mr. Speaker, I want to thank the gentleman from Indiana for this opportunity to appear before the House as a veteran to speak on behalf of veterans. I thank the good Lord that I am one of those vet-

erans who has not needed veteran benefits.

I am here on behalf of many Americans who made the decision to serve our country at a young age. Most veterans make the decision to serve our country somewhere between the ages of 17 and 22.

□ 1930

Youngsters in our Nation that make that decision make it out of a true sense of commitment to our Nation, a true sense of patriotism. They make that decision as youngsters between the age of 17 and 22, not for the appearance it will give them when they get to be 45 years of age, or 48, as I am this year, standing before the public asking in the name of patriotism for a vote so that they can represent the people in Congress or the State legislature at the county courthouse. These youngsters make that decision because of a true commitment to our country.

I think it is remiss on the part of our country and I think it is a terrible statement on the part of the Members of this body if we turn our backs on the youngsters who served at a time when this Nation needed them to serve, whether it was in Korea or any of the great battlefields of World War II, and more particularly in Vietnam, where that service was not as popular as it was in other battlefields and other areas of combat.

So I am proud to stand before this House and urge my colleagues not to forget a commitment and not to forget the service that was rendered by these veterans who made that decision to serve when they were quite young, and who were making the commitment to serve this Nation with no alternative purposes of gain in the popular workplace or in the public arena where they were seeking seats.

I thank the gentleman from Indiana [Mr. JONTZ] for this opportunity. It is very gratifying to see our veterans who still express that commitment, and some of those have prosthetic devices, some are confined to wheelchairs, and others have maladies brought about by exposure to agent orange.

I think as a grateful nation we should not forget those grateful, committed, dedicated Americans known as the American veterans. I thank the gentleman very much for allowing me to share in this time.

Mr. JONTZ. Mr. Speaker, I want to thank the gentleman from Texas [Mr. LAUGHLIN] for his contribution this evening. The gentleman speaks very well to the obligation that we owe to the veterans of our Nation, and hopefully the budget that we will pass here in the House in the weeks to come will help us to fulfill that obligation.

Mr. Speaker, in concluding this special order this evening I want to take just a minute to say thanks to our Nation's veterans, and also to say thanks for those dedicated employees of the Department of Veterans Affairs who are now in work in Marion, IN, at our VA medical center there, at the Adam Benjamin Outpatient Center in Crown Point in my district, and all of the VA medical facilities across our country in the benefits offices, which in so many ways are helping our Nation to fulfill its obligation to our veterans.

When we speak tonight about the need to improve the budget, when we speak tonight about the need to better fund programs, it would be a mistake for the impression to be left that we are not appreciative of the good work that is now being done by those VA employees. I understand the problems that have been so difficult for them over these last few years. We hope that in the budget this year we can provide the needed personnel that will be in each of our VA facilities to see that our Nation truly does meet its obligation.

EXISTING PTSD TREATMENT FACILITIES

The 16 inpatient treatment facilities which exist offer varying degrees of treatment. Only two of the units have been funded through the central DVA office. The rest, such as the recently reopened unit at the Marion VAMC in the Fifth Congressional District of Indiana which I represent, were created from existing resources and exist on a very tenuous basis given the funding crisis in the VA health care system.

In Indiana alone, they are estimated to be around 10,000 veterans suffering from PTSD. Only 18 received treatment from the Fort Wayne VAMC in 1988, and just 19 at the Indianapolis VAMC. While the inpatient PTSD unit at the Marion VAMC and the four Vet Centers in the State pick up some of the slack, these numbers are still very low, and I imagine that they could be applied nationwide.

Another issue is outreach. Vet Centers were designed to reach out to Vietnam veterans with readjustment problems and give them the help that they need to get back on their feet. While they do a good job in my opinion, there is still a lot to be done if only 10 percent of those with PTSD are getting treatment from the VA. Many veterans don't realize that they have PTSD or are not aware of the help that is available.

Many more veterans are afraid of the stigma attached to PTSD—crazed veterans and all—and have been reluctant to come forward because of the likely repercussions to come from their employer or their friends.

Even more reluctant to come forward are active duty personnel. A recent study of Pentagon officers who served in Vietnam showed that 20 percent of these officers display symptoms of PTSD. Many more are expected to experience delayed PTSD, or symptoms of PTSD that begin appearing after leaving the military service. We need to make sure that there is a better awareness within the military regarding treating active duty personnel with PTSD.

At the hearing and at the forum, we also heard from families of PTSD suffers as to the problems and lack fo attention that they receive from the DVA. Part of the healing process, according to clinical PTSD specialists, involves helping the family as a whole. The RTI study included interviews with spouses of Vietnam veterans who revealed that PTSD has had a negative impact not only on the veterans' own lives, but also on the lives of their spouses and children.

The basic problems of coming back to children you don't know and families that have gone ahead without you, perhaps compounded by joblessness and alienation, have led to many problems for veterans with PTSD and their families. If a veteran does get admitted on an inpatient basis, he returns from treatment a different person—alienated again. The cycle can go on and on. It would be much more effective for the VA to include family participation in the healing process, rather than admitting and readmitting the affected veteran time after time.

While there should be no doubt in anyone's mind that PTSD is a service-related disability, a relatively small amount of veterans with PTSD are receiving benefits for their disability. According to the Indiana Regional Office of the VA, however, only 269 of the estimated 10,000 Hoosier veterans with PTSD are receiving disability compensation.

According to testimony that we heard at the hearing, diagnostic examinations for PTSD only involve the veteran, and are often completed in 20 to 30 minutes. It is the opinion of clinical psychologists that it takes at least 2 to 3 hours with a veteran and his or her family to make an accurate diagnosis. My colleague FRANK MCCLOSKEY pointed out the problems that his caseworkers are having in securing treatment and benefits for veterans with PTSD, saying that one veteran was given a disability rating for the same reason that another one was denied.

Perhaps this difficulty in securing favorable disability determinations relates to another problem that disturbs me about the VA's attitude towards PTSD. If anyone should believe that PTSD is a bonafide, legitimate mental disorder caused or triggered by combat or combat-related experience, it should be the VA. But that is not the impression I have received from testimony at our hearing or from talking to mental health professionals. Too many VA psychiatrists, I am told, take a so-called Freudian approach to mental health concerns, focusing on the extent to which problems encountered in adulthood are often the result of a childhood experience. This mode of psychological thought has not been in the mainstream for quite a while, and I find it hard to believe that it would continue on at the VA. One Vietnam veteran with PTSD was told by the VA that his problems stemmed from "flunking the second grade," and not from the horrors of his war experience in Vietnam. Perhaps more research into the causes and treatment of PTSD within the VA would address this problem and help to update the psychological mode of thinking within the organization.

I first became aware of the PTSD issue through the treatment facility at the Marion VAMC, and the program's director, Dr. Donald Schmidt. The program has been popular with its patients, and has been a quality program.

But the capacity of the program has never been more than 12 beds, and thus only the most severe cases have been treated.

Nationally, waiting lists exist for many DVA inpatient PTSD units, with delays as great as 18 to 20 months before admission. This is inadequate for many veterans who have serious PTSD problems now. Since PTSD can be a chronic illness in many cases, time spent waiting will not make a veteran better—over half of the men and a third of the women that ever had PTSD still have it. PTSD is not a problem that will just go away.

PTSD LEGISLATION

Legislation which I introduced last year, in H.R. 3037, would address this problem and other components of the PTSD issue. I'd like to thank the Vietnam Veterans of America and the Wabash Valley Vietnam Veterans in Indiana for their good work in developing the legislation. I'd also like to thank the 82 members who have cosponsored H.R. 3037, and the veterans groups who have endorsed the legislation: AMVETS, VFW, Disabled American Veterans, and the American Legion, in concept.

Let me briefly summarize the components of this legislation. The bill would add at least 30 additional inpatient PTSD units to VA medical centers over the next 5 years, which would make a total of roughly one VA inpatient PTSD unit per state. This is a recommendation which has been made the past 6 years.

I was pleased to see that the DVA has added 23 PCT's, or PTSD Clinical Teams, to existing VA hospitals through the United States. These teams will help to alleviate the shortfall in PTSD care, but should not be considered long-term solutions to this problem given the VA funding crunch. Centrally funded inpatient units are the way which we should go.

This legislation would also require the DVA to add at least 40 vet centers for readjustment counseling. We heard from many veterans in Indiana who were pleased with the services that vet centers had to offer, and I have visited several myself. I appreciate the good work that the staff of the vet centers do with their limited resources.

I learned from Dr. Arthur Blank, director of the Vet Center Program, that cities as big as Toledo, OH, and Nashville, TN, are without vet centers. These outreach and counseling centers are popular and effective in treating Vietnam veterans with PTSD. Vet center staff members often travel many miles to help veterans with their adjustment problems. I'm sure that some of the costs of expanding the Vet Center Program would be offset by savings in travel time and expenses.

The Vet Center Program celebrated its 10th anniversary this year. I'm sure that my colleagues with vet centers in their districts are pleased to have these services available to the Vietnam veterans in their districts. If my colleagues that do not have a vet center in their district had a chance to visit one, I'm sure that they would agree that adding more vet centers would be an excellent way to reach out to those hundreds of thousands of veterans that are having readjustment problems but cannot get help.

H.R. 3037 would authorize stable funding for VA contract counseling programs for PTSD, which serve veterans in areas not served by VA vacilities. We heard at the hearing that only 5 individual PTSD cases were contracted out of the Indianapolis VAMC catchment area last year. This is a tool that could be very beneficial in reducing the burden on overcrowded hospitals that are besieged by veterans suffering from PTSD who could otherwise be assisted by private clinics.

In addition to expanding treatment, the bill would encourage the DVA to recruit qualified professionals to administer PTSD care by encouraging the inclusion of psychiatrists, psychologists and others who specialize in the treatment of PTSD in the Health Professionals Scholarship Program. One step that we must take if we are to expand the treatment of PTSD is recruiting qualified professionals to staff these programs.

H.R. 3037 would give permanent, statutory authority to the Advisory Committee on Readjustment of Veterans. Similar to the POW and Women Veterans Advisory Committee, the group would continue to advise and report on the activities relating to PTSD. If we want the DVA to focus on the issue of PTSD, then we are going to have to make sure that veterans' groups and PTSD treatment professionals have their voices heard by the Secretary.

The bill would also create a research program for the treatment of PTSD. While a lot of attention has focused on exploring the causes and extent of PTSD, little coordinated study has been done on the treatment of PTSD. This program, conducted within the VA, would study the best treatment methods for PTSD to insure that quality care can be given on a consistent basis throughout the country. We have heard that treatment for PTSD varies widely from place to place. Research on PTSD can help the VA to serve those veterans with the disease in a much more effective manner.

Finally, H.R. 3037 would establish a pilot program for PTSD care in halfway houses. This program would be similar to the halfway house program for drug and alcohol abuse treatment, and would take an additional burden off of the already overcrowded VA medical system. This halfway house program comes at the suggestion of a local veterans group in Indiana along with a VA administrator.

Mr. CONTE. Mr. Speaker, one of the most important responsibilities of Congress is, in the words of Abraham Lincoln, "to care for him who shall have borne the battle and for his widow and orphan." That is a responsibility that we must not take lightly, for serving as a legislator in a representative democracy is a privilege that veterans have defended with their very lives.

We must use the power entrusted to us to ensure that the U.S. Government acknowledges and satisfies its moral obligations to this country's veterans—the men and women who have risked life and limb to preserve our liberty.

It is sometimes said that our national memory of the sacrifices of our veterans dims during peacetime. But now, more than ever, the contributions of our veterans should be celebrated and commemorated. The principles and ideals that our veterans have struggled so tenaciously to preserve have bubbled to the top of humanity's consciousness. From China to the Baltic Republics, democracy is the universal beacon of hope and freedom is the watchword.

The battles waged by our veterans have been validated, and the value of their blood, sweat, and tears has been affirmed in the register of world opinion. Now is the time for us, as a nation, to renew our gratitude to our veterans for their selfless devotion to this country.

And, in fact, there has been a greater focus on our national obligations to our veterans in the past several years. Back in the late sixties and early seventies, very little attention was being paid to the mounting needs of veterans who had so ably served their country.

I became alarmed when I heard from young men returning to western Massachusetts from Vietnam that they were being ignored and neglected by a disinterested bureaucracy. So when the National League of Cities and Towns and the U.S. Conference of Mayors needed someone to chair a Special Veterans Opportunity Committee to examine veterans issues in 1973, I took the job on behalf of American veterans everywhere. After taking weeks of testimony—in Newark, in Cleveland, in Seattle—we designed a comprehensive plan to solve those problems. And a great many of our recommendations have been incorporated into programs that are currently serving the veterans community.

Without the active support and involvement of the veterans service organizations and others, we would not be where we are today. The progress we have made in attending to the needs of our veterans has been nothing short of spectacular.

In the past few years, the veterans community has enjoyed a number of legislative and policy victories.

We have elevated the VA to Cabinet-level status; created the Court of Veterans Appeals; expanded and strengthened the GI education bill; reformed the VA Home Loan Program to provide important protections to veteran home buyers; and created special programs for veterans who are homeless, jobless and in need of special services.

Last year, this Congress became engaged in a protracted battle over supplemental funding for VA medical care. After months of negotiations and political infighting, we were ultimately successful in appropriating $340 million in new budget authority for VA medical care in fiscal year 1989.

The House Appropriations Committee then carried the veterans' torch into fiscal year 1990 by recommending an appropriation of $11.56 billion, $820 million more than requested by the administration. Now, the President's budget for fiscal year 1991 proposes a $900 million increase over last year's final program level to operate our VA hospitals. We are making progress. Still, we cannot relax our guard until every eligible veteran receives the medical attention that he or she needs and deserves. That must be our priority.

The veterans of today are the soldiers of yesterday who invaded Normandy, risking their lives to liberate Europe from the clutches of Hitler. In 1990, those veterans need access to life-sustaining medications, and it is up to us to provide them. The veterans of today are

the patriots who, 40 years ago, landed on Inchon to face the armaments of Communist aggression. Today, those selfsame veterans cannot afford to wait 6 months to get an appointment with their medical doctors, and we better speed up the line.

And it seems like only yesterday that the American veteran marched out from Da Nang across the swamps of Vietnam to face snipers' bullets and enemy mines. Today, those veterans urgently need replacements for their worn artificial limbs. This country cannot ignore its moral imperative to attend to those veterans' medical needs. Those veterans fought to preserve our freedom; now we must fight to ensure their security.

The progress we have made in caring for our veterans, important as it has been, fails to adequately reward them for their heroism. That can only be achieved through universal respect and reverence for American veterans as the architects of our modern era of peace with freedom. Peace, of course, was never the ultimate object of their battles; peace is achieved more easily by surrender and submission than by war. But freedom—freedom to live life as we choose, freedom to express ourselves without reprisal from the Government, freedom to pray to the God in which we believe—is a right worth dying for.

I am proud to join my colleagues today in paying tribute to our veterans and in pledging my continued support for the programs that keep our veterans healthy and secure.

Mr. LENT. Mr. Speaker, I would like to join those of my colleagues who have chosen today to speak out in support of our veterans and for the vitally important programs of the Department of Veterans Affairs.

I am particularly concerned at this time by the level of the medical care offered to Nassau County vets who must journey to the VA Medical Center in Northport, NY. As many of my colleagues know, the Northport VA hospital serves the greatest concentration of veterans in the United States. Despite the fact that it is not easily accessible to a great many Long Island veterans, the Northport VA hospital treated over 200,000 men and women in 1989.

The Northport VA hospital's ability to provide quality care has been severely impaired in recent years as budget cuts have taken their toll. In the last year alone, a surgical ward and a long-term care ward have been closed, staff has been cut back, and the construction of a long overdue and much needed ambulatory care unit has been postponed indefinitely. I have heard from and met with countless veterans who are dismayed and angered by the deteriorating situation in Northport. Mr. Speaker, I must say that I share their disappointment because I know we can and should do better for our vets.

Last month, a group of concerned veterans in Nassau County came to me to propose converting a vacant hospital in Freeport, NY, a centrally located and easily accessible village, into an ambulatory care clinic. According to this modest proposal, the facility would offer only the most basic services such as an eye, ear, nose, and throat clinic, a radiology clinic, a pharmacy, and outpatient psychiatric care. Most importantly, the new Freeport facility would liberate thousands of vets in my district from the uncertainties involved in the long trip to Northport and enable scores more elderly and infirm vets to seek the treatments they require.

It was 125 years ago that Abraham Lincoln uttered the phrase that has been adopted as the mission of the VA, "to care for him who shall have borne the battle and for his widow and his orphan." Our veterans entered active military service with the assurance that their health care needs would be met in a dignified manner by a grateful nation. In keeping with that commitment, I urge you to join me in support of full funding for the Northport VA hospital and the establishment of an ambulatory care clinic in Freeport.

Mr. DINGELL. Mr. Speaker, eloquently stating a paradox of human behavior, Franklin Roosevelt once said that "those who have enjoyed such privileges as we enjoy forget in time that men have died to win them." It is my fear, that even in this time of momentous change, as emerging democracies develop around the world, we are in danger of forgetting the tremendous contributions to liberty made by our Nation's veterans.

As we enter the decade of the 1990's, we do so with the knowledge that veterans' health care resources have lost ground, and many services to our veterans have deteriorated. While America's veterans population ages and becomes more in need of medical care, we grow less capable of meeting their most elementary needs.

I am continually reminded by my constituents of serious flaws and inequities existing in medical care and other services provided to our veterans. These problems are not limited to the 16th Congressional District, but are, instead, national in scope. The House Committee on Veterans' Affairs reports that approximately three-quarters of those veterans who apply for compensation benefits from the Veterans' Administration [VA] can expect to wait at least 3 months for their claim to be processed. Additionally, staffing levels for employees in the VA's regional offices have declined 25 percent since 1982.

The administration's $30.5 billion fiscal year 1991 budget request for veterans' programs is inadequate to properly address the needs of all veterans. More funds are necessary to increase staffing of benefits personnel to improve the quality, timeliness, and access of care; restore funding for outpatient and nursing home care; restore research funding to an adequate level; and preserve home loan programs.

The amount of funds authorized and appropriated for our veterans must go beyond merely halting the trend in declining services. It must restore a high quality of medical care and ensure access to the system. Our actions must prove that we honor our Nation's veterans in both substance and in spirit.

Mr. ANNUNZIO. Mr. Speaker, the Nation's veterans have suffered severely during the past 10 years, particularly in the area of health care benefits. The Reagan administration, in its questionable wisdom, subjected veterans to a series of budgetary restrictions that have created a situation in which the mission of the Veterans Affairs Department [VA] has been jeopardized. It is important now more than ever to demonstrate congressional support for veterans and programs within the VA.

For that reason, I strongly support the budget proposal for fiscal year 1991 presented by the House Committee on Veterans' Affairs. As I said recently in a floor statement on the supplemental appropriation bill for this year, the proposed budget would not cure all the problems veterans have today in trying to get care in many VA hospitals and most outpatient clinics. However, the budget proposal may begin to turn things around.

The President's budget appears to be a sincere attempt to provide adequate funding for veterans health care. Still, due to a number of factors, it nonetheless falls somewhat short. The President's budget proposes a $30.9 billion spending plan for veterans programs for fiscal year 1991. The $12.2 billion request for VA health care, approximately $1 billion or almost 8 percent over the 1990 level, is still about $1 billion less than many veterans' groups believe is necessary for next year.

The House Veterans' Affairs Committee has recommended that next year's budget for veterans' programs be increased to $32.5 billion, a 7-percent hike in projected spending for the current year. For health services, the committee recommends a budget of $12.5 billion, an increase of approximately $246 million over the administration's proposal.

An important measure in the budget includes funds of $38.6 million to increase special pay for physicians and dentists, although details are not spelled out. I support the action of the Veterans' Affairs Committee to consider legislation to modify the authority to compensate physicians and dentists. The Department of Veterans Affairs has not implemented a substantial increase in the pay of physicians and dentists since 1980. The changes to the special pay structure and pay rates instituted in 1980 remain in place despite major changes that have occurred in the health care industry since that time.

In addition, the VA has difficulty in filling senior administrative positions. Long and middle-term tenure is not rewarded. Most turnovers occur within 4 years of a physician's joining the VA, so that among physicians under age 35 with 2 to 4 years of VA experience, the turnover rate was 22 percent in 1987.

Mr. Speaker, as I indicated earlier, VA medical care delivery deserves to be recognized and rewarded for its management of Federal dollars over the past decade. I agree with the American Legion that VA medical care delivery has been a model of fiscal restraint and has been a major contributor to VA's overall budgetary performance during that period.

I fervently join the American Legion in saying that the system now operated by the VA to deliver medical treatment deserves to be recognized for what it is—a natural resource. The system maintains contractual and other professional relationships with community-based facilities, 103 of the Nation's medical schools and the Defense Department's health care network. Through its affiliation with medical schools nationwide, VA is the largest single trainer of health care manpower. It is also the place where 50,000 medical students

and residents receive a portion of their training each year.

Mr. Speaker, the budget deficit needs to be reduced, but it shouldn't be done on the backs of veterans.

Mr. DWYER of New Jersey. Mr. Speaker, I would like to thank my colleagues, Mr. JONTZ, Ms. LONG, and Mr. BURTON, for taking time today to provide a forum for the discussion of a small, but very significant portion of the Federal budget—the Department of Veterans Affairs.

According to recent VA figures, there are approximately 27.1 million veterans and 46 million dependents and survivors who are potential VA beneficiaries. The benefits for which these individuals might be eligible are varied due to the particular needs of the veteran, however, there has been a common thread among all VA services during the past decade; the reduction of benefits and diminished services available for veterans and their dependents.

The assault on veterans benefits has been most pronounced in the area of health care. Veterans once eligible for hospital and nursing home care have found themselves categorized with eligibility based on income levels for those with non-service-connected ailments. Beneficiary travel reimbursement has been severely curtailed and access to outpatient medical treatment has been restricted both by imposed categories for veterans and by the increased numbers of those seeking care.

The full impact of the health care crisis necessitated a supplemental appropriation of over $1 billion last year and a $390 million supplemental for the current fiscal year. The Veterans' Affairs Committee has recommended a 7-percent increase in funding for fiscal year 1991, for a total package of $32.5 billion for the next fiscal year.

The VA runs the largest health care system in the United States. It is to our advantage to maintain quality services at these facilities; and it is our responsibility to provide eligible veterans with an environment in which they can obtain competent care.

The demands for Federal dollars are great, but we must act fairly with those who have already given so much to our country.

Mr. RANGEL. Mr. Speaker, I am pleased to join with my colleagues in demonstrating support for our Nation's veterans and for the programs directed at veterans by the Department of Veterans Affairs.

Over the course of several decades, men and women of every race and nationality have responded to the call of this Government in time of national and international crisis to defend democracy and further the cause of peace throughout the world. Often those men and women have made tremendous sacrifies in service to their country. Indeed, many have given their lives to ensure freedom for us in the United States and for others in foreign countries as well.

As a former combat veteran I am ultimately aware of the commitment and sacrifice made by the members of the military and the obligation on the part of this country to provide for them. I am pleased by the progress made by the Department of Veterans Affairs in meeting needs of veterans and encouraged by the Departments' plans for the future.

It gives me great pride to acknowledge, along with my colleagues, the work of the DVA and the enduring patriotic spirit that is typical of the American veteran.

GENERAL LEAVE

Mr. JONTZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on the special order just given.

The SPEAKER pro tempore (Mr. POSHARD). Is there objection to the request of the gentleman from Indiana?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. COLLINS (at the request of Mr. GEPHARDT), for April 18 and 19, on account of personal injury.

Mr. FORD of Tennessee (at the request of Mr. GEPHARDT), for today, on account of personal business.

Mr. STUMP (at the request of Mr. MICHEL), for today and the balance of the week, on account of family medical emergency.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative programs and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RIDGE) to revise and extend their remarks and include extraneous material:)

Mr. SLAUGHTER of Virginia, for 60 minutes, on May 2.

Mr. BLILEY, for 60 minutes, on May 2.

Mr. GINGRICH, for 60 minutes each day, on April 18 and 19.

Mr. DELAY, for 60 minutes each day, on April 24 and 25.

Mr. DREIER of California, for 5 minutes, today.

Mr. PASHAYAN, for 60 minutes, on April 23.

Mr. KYL, for 60 minutes each day, on May 2, 9, 16 and 23.

(The following Members (at the request of Mr. WASHINGTON) to revise and extend their remarks and include extraneous material:)

Mr. WISE, for 5 minutes, today.

Mr. FAZIO, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. KLECZKA, for 5 minutes, today.

Mrs. LOWEY of New York, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. ROYBAL, for 5 minutes, today.

Mr. WISE, for 5 minutes, on April 19.

Mr. OWENS, of New York, for 60 minutes, today.

Mr. WASHINGTON, for 60 minutes, today.

Mr. WISE, for 60 minutes each day, on April 24, 25, and 26.

Mr. TALLON, for 30 minutes, on April 24.

Mr. AKAKA, for 60 minutes, on April 24.

Mr. OWENS of New York, for 60 minutes each day, on April 19, 23, 24, 26, 27, and 30.

Mr. WASHINGTON, for 60 minutes each day, on April 19, 24, 25, and 26.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. RIDGE) and to include extraneous matter:)

Mr. GINGRICH.
Mr. LENT.
Mr. SAXTON.
Mr. SCHULZE.
Mr. MACHTLEY in five instances.
Mr. DEWINE.
Mr. SOLOMON in three instances.
Mr. KYL.
Mr. LAGOMARSINO in four instances.
Mr. BROWN of Colorado.
Mr. LEWIS of California in two instances.
Mr. SCHUETTE.
Mr. LEWIS of Florida.
Mr. MCDADE.
Mr. HANCOCK.
Mr. GEKAS in two instances.
Mr. SHUSTER.
Mr. COBLE.
Mr. PORTER in two instances.
Mr. GALLO.
Mr. PETRI.
Mr. LOWERY of California in two instances.
Mrs. MEYERS of Kansas in two instances.
Mr. MCEWEN.
Mr. MICHEL.
Mr. BROOMFIELD.
Mr. BUECHNER.
Mr. HUNTER.

(The following Members (at the request of Mr. WASHINGTON) and to include extraneous matter:)

Mr. ATKINS.
Mr. MATSUI in two instances.
Mr. MCNULTY.
Mr. DWYER of New Jersey.
Mr. BILBRAY.
Mr. BARNARD.
Mrs. LOWEY of New York.
Mr. MAVROULES.
Mr. BRYANT in two instances.
Mr. MAZZOLI.
Mr. TRAXLER.
Mr. YATRON in three instances.
Mr. RANGEL.
Mr. WOLPE in two instances.
Mr. KENNEDY.
Mr. ANTHONY.
Mr. FORD of Michigan.
Mr. MURTHA.

Mr. MOODY.
Mr. RICHARDSON in two instances.
Mr. DIXON.
Mr. FROST in two instances.
Mr. FAUNTROY.
Mr. NELSON of Florida.
Mr. HAMILTON in three instances.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. WISE.
Mr. TALLON.
Mr. ROE.
Mr. LANTOS in two instances.
Mr. EDWARDS of California in two instances.
Mr. MRAZEK in four instances.
Mr. PENNY in two instances.
Mr. STARK in three instances.
Mrs. BOXER.
Mr. LEHMAN of Florida.
Mr. FAZIO.
Mr. UDALL.
Mr. SOLARZ.
Mr. GRAY.
Mr. WEISS.
Mr. LEVINE of California.
Mr. GIBBONS.
Mr. LIPINSKI.
Mr. LEHMAN of California.
Mr. FOGLIETTA.
Mr. STUDDS.
Mr. ACKERMAN.
Mr. TRAFICANT in four instances.
Mr. SAWYER.

SENATE JOINT RESOLUTIONS AND CONCURRENT RESOLUTIONS REFERRED

Joint resolutions and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week;" to the Committee on Post Office and Civil Service.

S.J. Res. 275. Joint resolution designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet;" to the Committee on Post Office and Civil Service.

S. Con. Res. 117. Concurrent resolution expressing the appreciation of Congress for the contributions of the Friends of the National Arboretum in providing for the preservation and public display of 22 of the original columns of the East Front Portico of the United States Capitol Building; to the Committee on Public Works and Transportation.

S. Con. Res. 118. Concurrent resolution to authorize the printing of a brochure describing the history, design, and functions of the United States Capitol as the seat of the legislative branch of the Government; to the Committee on House Administration.

ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1048. An act to provide for the acquisition of data about crimes that manifest prejudice based on certain group characteristics;

H.R. 2334. An act to designate the Post Office located at 30 East Ninth Street in Austin, Texas, as the "Homer Thornberry Judicial Building;" and

H.R. 3968. An act to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1096. An act to provide for the use and distribution of funds awarded the Seminole Indians in dockets 73, 151, and 73-A of the Indian Claims Commission; and

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing.

BILLS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following date present to the President, for his approval, bills of the House of the following title:

On April 11, 1990:

H.R. 3968. An act to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations; and

H.R. 1048. An act to provide for the acquisition and publication of data about crimes that manifest prejudice based on certain group characteristics.

ADJOURNMENT

Mr. JONTZ. Mr. Speaker, pursuant to House Resolution 377, I move that the House do now adjourn in memory of the late SPARK M. MATSUNAGA.

The motion was agreed to; accordingly (at 7 o'clock and 35 minutes p.m.), pursuant to House Resolution 377, the House adjourned until tomorrow, Thursday, April 19, 1990, at 11 o'clock a.m. in memory of the late Honorable SPARK M. MATSUNAGA.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2932. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to consolidate and expand the statutory authority for the National Agricultural Library in the Department of Agriculture; to the Committee on Agriculture.

2933. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the act of July 2, 1962, to give the Secretary of Agriculture additional intrastate authority to prevent the spead of any dangerous communicable disease of livestock or poultry during extraordinary emergency conditions; to the Committee on Agriculture.

2934. A letter from the Comptroller General, the General Accounting Office, transmitting a review of the President's third impoundment message for fiscal year 1990, pursuant to 2 U.S.C. 685 (H. Doc. No. 101-172); to the Committee on Appropriations and ordered to be printed.

2935. A letter from the Deputy Director, Office of Management and Budget, transmitting a report that the appropriations to the Department of Veterans Affairs for "Compensation and Pensions" for fiscal year 1990 have been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

2936. A letter from the General Counsel, Department of Defense, transmitting a copy of amendments to the Manual for Courts-Martial, United States, 1984, pursuant to 10 U.S.C. 836(b); to the Committee on Armed Services.

2937. A letter from the Secretary of Defense, transmitting the annual report from the Reserve Forces Policy Board for fiscal year 1989 on the progress made in improving the readiness of the National Guard and Reserve components, pursuant to 10 U.S.C. 113(c), (e); to the Committee on Armed Services.

2938. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notification concerning the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to Turkey for defense articles estimated to cost $50 million or more (Transmittal No. 90-30), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

2939. A letter from the Principal Deputy Comptroller, Department of Defense, transmitting a copy of the contract award report for the period May 1, 1990, to June 30, 1990, pursuant to 10 U.S.C. 2431(b); to the Committee on Armed Services.

2940. A letter from the Under Secretary of Defense (Acquisition), transmitting a copy of the Selected Acquisition Reports [SAR's] for the quarter ending December 31, 1989, pursuant to 10 U.S.C. 2432; to the Committee on Armed Services.

2941. A letter from the Secretary of Defense, transmitting a copy of the "White Paper on the Department of Defense and the Congress"; to the Committee on Armed Services.

2942. A letter from the Under Secretary of Defense, transmitting a report on funds obligated in the chemical warfare—chemical/biological defense programs during fiscal year 1989; to the Committee on Armed Services.

2943. A letter from the Secretary, Department of Housing and Urban Development, transmitting the 1990 Consolidated Annual Report on the community development programs administered by the Department, pursuant to 42 U.S.C. 5313(a); to the Committee on Banking, Finance and Urban Affairs.

2944. A letter from the Secretary, Department of Housing and Urban Development, transmitting a report entitled, "Alternative Methods of Funding Public Housing Mod-

ernization", pursuant to Public Law 101-235, section 124 (103 Stat. 2022); to the Committee on Banking, Finance and Urban Affairs.

2945. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting its 1990 report on actions taken, and progress made to implement expedited funds availability schedules, pursuant to Public Law 100-86, section 609(d)(1)(A) (101 Stat. 648); to the Committee on Banking, Finance and Urban Affairs.

2946. A letter from the Acting General Counsel, Department of the Treasury, transmitting a draft of proposed legislation to amend title 31, United States Code, to provide for the effective and efficient production, marketing, sale, and financing of numismatic items of the U.S. Mint, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

2947. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-187, "Housing Production Trust Fund Board Amendment Act of 1990", and report, pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

2948. A letter from the Secretary of Education, transmitting a copy of Final Regulations for the Pell Grant Program—Expected Family Contributions for Students with Special Conditions, pursuant to 20 U.S.C. 1232(d)(i); to the Committee on Education and Labor.

2949. A letter from the Secretary, Department of Health and Human Services, transmitting the annual report on the National Institute for Occupational Safety and Health for fiscal year 1988, pursuant to 29 U.S.C. 671(f); to the Committee on Education and Labor.

2950. A letter from the Secretary of Health and Human Services, transmitting the Department's annual report on the status and accomplishments of the runaway and homeless youth centers for fiscal year 1988, pursuant to 42 U.S.C. 5715(a); to the Committee on Education and Labor.

2951. A letter from the Secretary of the Interior, transmitting reports from the U.S. Fish and Wildlife Service and the National Park Service on the activities of the Youth Conservation Corps Program operations in fiscal year 1989, pursuant to 16 U.S.C. 1705; to the Committee on Education and Labor.

2952. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to extend and amend programs under the State Department Care Development Grants Act, pursuant to 31 U.S.C. 1110; to the Committee on Education and Labor.

2953. A letter from the Deputy Under Secretary for Travel and Tourism, Department of Commerce, transmitting a marketing plan to stimulate and encourage travel to the United States for fiscal year 1991, pursuant to 22 U.S.C. 2123(a)(15); to the Committee on Energy and Commerce.

2954. A letter from the Secretary of Health and Human Services, transmitting a special report on the use of consortia for research and development of vaccines and drugs for the prevention and treatment of acquired immune deficiency syndrome [AIDS], pursuant to Public Law 100-607, section 203(b); to the Committee on Energy and Commerce.

2955. A letter from the Secretary, Interstate Commerce Commission, transmitting notice that the Commission has extended the time period for issuing a decision in Finance Docket No. 31387 (Sub-No. 1), "Canadian National Railway Company—Lease from Grand Trunk Western Railway Company", July 24, 1990, pursuant to 49 U.S.C. 10327(k); to the Committee on Energy and Commerce.

2956. A letter from the Acting Secretary of State, transmitting on behalf of the President, a report on the situation in El Salvador, which documents the progress achieved by the Government of El Salvador from October 1, 1989, to March 31, 1990, pursuant to Public Law 101-167, section 554(b) (103 Stat. 1237); to the Committee on Foreign Affairs.

2957. A letter from the Administrator, Agency for International Development, transmitting the 1989 Annual Report on the International Fund for Ireland, pursuant to Public Law 99-415, section 6 (100 Stat. 949); to the Committee on Foreign Affairs.

2958. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting its quarterly report concerning human rights activities in Ethiopia, covering the period October 15, 1989, through January 14, 1990, pursuant to Public Law 100-456, section 1310(c) (102 Stat. 2065); to the Committee on Foreign Affairs.

2959. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a copy of the Price and Availability Report (Part III) for the quarter ending December 31, 1989, pursuant to 22 U.S.C. 2768; to the Committee on Foreign Affairs.

2960. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to Canada for defense articles and services (Transmittal No. 90-32), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2961. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to Turkey for defense articles and services estimated to cost $100 million (Transmittal No. 90-30), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2962. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting notification of a proposed manufacturing license agreement for the production of significant military requirement in Australia (Transmittal No. MC-10-90), pursuant to 22 U.S.C. 2776(d); to the Committee on Foreign Affairs.

363. Also, memorial of the Senate of the State of Idaho, relative to the Federal trust

fund; jointly, to the Committees on Government Operations and Public Works and Transportation.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 41: Mr. BONIOR, and Mr. BUSTAMANTE.

H.R. 70: Mr. DOUGLAS.

H.R. 82: Mr. SOLARZ.

H.R. 92: Mr. LIPINSKI.

H.R. 98: Mrs. COLLINS, Mr. SKELTON, Mr. MATSUI, Mr. ROBERTS, Mrs. MEYERS of Kansas, Mr. WHITTAKER, Mr. SAXTON, Mr. KENNEDY, Ms. SNOWE, Mr. CARPER, Mr. SANGMEISTER, Mr. SHUMWAY, Mr. FISH, Mr. MCMILLEN of Maryland, Mr. RHODES, Mr. DONNELLY, Mrs. SMITH of Nebraska, Mr. GORDON, Mr. WALKER, Mr. GUNDERSON, Mr. CRANE, Mr. MCDADE, Mr. BEREUTER, Mr. CONTE, Mr. INHOFE, Mr. GONZALEZ, Mr. COURTER, and Mr. HOPKINS.

H.R. 159: Mr. FROST.

H.R. 201: Mr. MILLER of Ohio, Mr. MARKEY, and Mr. SMITH of Vermont.

H.R. 214: Mr. VOLKMER, Mr. SMITH of Vermont, Mr. BRENNAN, and Mr. MARKEY.

H.R. 286: Mr. BLILEY and Ms. LONG.

H.R. 290: Mr. JONTZ and Mr. SCHEUER.

H.R. 303: Mr. MURTHA.

H.R. 373: Mr. FEIGHAN.

H.R. 446: Mr. AUCOIN, Mr. DEWINE, Mr. DENNY SMITH, and Mr. SKAGGS.

H.R. 505: Mr. SERRANO.

H.R. 520: Mr. HYDE.

H.R. 521: Mr. HYDE.

H.R. 522: Mr. HYDE.

H.R. 523: Mr. HYDE.

H.R. 550: Mr. DEWINE.

H.R. 551: Mr. FEIGHAN.

H.R. 586: Mr. ENGEL and Mr. POSHARD.

H.R. 638: Mr. FOGLIETTA.

H.R. 655: Mr. WASHINGTON and Mr. SIKORSKI.

H.R. 658: Mr. THOMAS of Wyoming.

H.R. 720: Mr. FEIGHAN.

H.R. 931: Mr. SOLARZ, Mr. BATES, and Mrs. BOXER.

H.R. 933: Mr. MARKEY, Mr. CONDIT, and Mr. STALLINGS.

H.R. 995: Mr. WILLIAMS.

H.R. 1068: Mr. FROST, Mr. SUNDQUIST, Mr. SARPALIUS, Mr. STALLINGS, and Mr. WHEAT.

H.R. 1200: Mr. LANTOS, Mr. HOAGLAND, Mr. WILSON, Ms. ROS-LEHTINEN, Mr. DE LUGO, and Mr. DUNCAN.

H.R. 1268: Mr. GEJDENSON, Mr. RINALDO, Mrs. UNSOELD, Mr. RICHARDSON, and Mr. SKELTON.

H.R. 1280: Mr. MILLER of California.

H.R. 1287: Mr. CRAIG and Mr. COMBEST.

H.R. 1400: Mr. KASICH, Mr. THOMAS of Georgia, Mr. IRELAND, Mr. LIPINSKI, Mr. SAVAGE, Mr. SCHUETTE, Mr. MOAKLEY, Mr. FORD of Tennessee, Mr. ECKART, Mr. DE LA GARZA, Mr. CRANE, Mr. MOODY, Mr. CAMPBELL of Colorado, Mr. JENKINS, Mr. TAUKE, Mr. NEAL of Massachusetts, Mr. CONTE, Mr. KENNEDY, Mr. COLEMAN of Texas, Mrs. COLLINS, and Mr. LEWIS of Georgia.

H.R. 1574: Mr. FAUNTROY, Mr. RICHARDSON, Mr. CONYERS, Mr. PETRI, Mr. GORDON, Mr. TRAFICANT, Mr. PAYNE of New Jersey, and Ms. SLAUGHTER of New York.

H.R. 1593: Mr. PORTER and Mr. STUMP.

H.R. 1676: Mr. MINETA.

H.R. 1699: Mr. JONTZ, Mr. KASICH, Mr. ROWLAND of Connecticut, Mrs. JOHNSON of Connecticut, Mrs. BOGGS, Mr. ACKERMAN, Mr. MANTON, Mr. FLAKE, Mr. TAUZIN, Mr. STEARNS, Mr. MYERS of Indiana, Mr. MACHTLEY, Mr. HOPKINS, Mr. MCGRATH, Mr. CARR, Mr. DANNEMEYER, Mr. MCDERMOTT, and Mr. NEAL of Massachusetts.

H.R. 1784: Mr. MCMILLEN of Maryland, Mr. THOMAS A. LUKEN, and Mr. FAUNTROY.

H.R. 1807: Mr. BUSTAMANTE and Mrs. UNSOELD.

H.R. 1918: Mr. WELDON, Mr. FLIPPO, Mr. LENT, Mr. SCHEUER, Mr. BORSKI, Mr. ROBERTS, Mr. FASCELL, Mr. WAXMAN, Mr. SHUMWAY, Mr. JAMES, Mr. MCEWEN, Mr. GORDON, Mr. MINETA, Mr. ROYBAL, Mr. RICHARDSON, Mr. DYMALLY, Mrs. UNSOELD, Mr. POSHARD, Mr. DEFAZIO, Mr. RINALDO, Mr. COSTELLO, Mr. QUILLEN, Mr. BRUCE, Mr. GALLEGLY, Mr. NATCHER, Mr. AKAKA, Mr. PALLONE, Mr. WISE, Mr. SPENCE, Mr. DERRICK, Mr. SIKORSKI, Mr. BLAZ, Mr. MCNULTY, Mr. ROSE, Mr. HAWKINS, Mr. BONIOR, and Mr. MOORHEAD.

H.R. 2025: Mr. ROE, Mr. GEJDENSON, and Mr. VENTO.

H.R. 2086: Mr. JAMES.

H.R. 2152: Mr. BROWN of California, Mr. SCHEUER, Mrs. LLOYD, Mr. NELSON of Florida, Mr. MCCURDY, Mr. VALENTINE, Mrs. MORELLA, Mr. SKAGGS, Mr. BROWDER, and Mr. TORRICELLI.

H.R. 2168: Mr. THOMAS A. LUKEN, Mr. MINETA, Mr. COYNE, Mr. ROE, Mr. SARPALIUS, Mr. MURPHY, Mr. DICKS, Mr. MCMILLEN of Maryland, and Mr. FORD of Michigan.

H.R. 2204: Mr. DURBIN and Mrs. BOGGS.

H.R. 2418: Mr. HALL of Ohio and Mr. DELAY.

H.R. 2460: Mr. BLAZ and Mr. YATRON.

H.R. 2647: Mr. HUTTO.

H.R. 2781: Mr. BLAZ and Ms. SCHNEIDER.

H.R. 2798: Mr. CONDIT, Mr. SOLOMON, Mr. DE LUGO, Ms. SCHNEIDER, and Mr. CONYERS.

H.R. 2840: Mr. FOGLIETTA, Mr. VALENTINE, and Mr. RAVENEL.

H.R. 2926: Mr. WYLIE, Mr. DONNELLY, Ms. SCHNEIDER, Mr. TALLON, Mr. SHAW, Mr. HUTTO, Mr. PETRI, and Mr. YATRON.

H.R. 2967: Mr. TRAXLER.

H.R. 2984: Mrs. LLOYD, Mr. WOLPE, Mr. NELSON of Florida, Mr. MCCURDY, Mr. VALENTINE, Mrs. MORELLA, Mr. BROWDER, and Mr. TORRICELLI.

H.R. 3004: Mr. BURTON of Indiana, Mr. DINGELL, Mr. FORD of Michigan, Mr. MANTON, and Mr. MAVROULES.

H.R. 3030: Mr. KANJORSKI and Mr. TAUZIN.

H.R. 3037: Mr. RIDGE and Mr. LENT.

H.R. 3050: Mr. MCDERMOTT.

H.R. 3123: Mr. MATSUI, Mrs. PATTERSON, Mr. YOUNG of Alaska, and Mr. MANTON.

H.R. 3210: Mr. OWENS of New York and Mr. WEBER.

H.R. 3267: Mr. CAMPBELL of California and Mr. CROCKETT.

H.R. 3283: Mrs. KENNELLY and Mr. HAYES of Illinois.

H.R. 3405: Mr. DE LUGO, Mr. BATES, and Mr. BUSTAMANTE.

H.R. 3423: Mr. TORRES.

H.R. 3430: Mr. BROWN of California.

H.R. 3447: Mr. JOHNSTON of Florida.

H.R. 3475: Mr. ENGEL and Mr. OWENS of New York.

H.R. 3498: Mr. LEWIS of Georgia, Mr. SHAW, and Mr. BENNETT.

H.R. 3511: Mr. SMITH of New Jersey.

H.R. 3546: Mr. HOCHBRUECKNER.

H.R. 3582: Mr. CRAIG and Mr. MILLER of Washington.

H.R. 3631: Mr. JAMES.

H.R. 3643: Mr. CRAIG, Mr. CHAPMAN, Mr. MICHEL, Mr. SAXTON, Mr. LANCASTER, Mr. TAUZIN, Mr. HOLLOWAY, and Mr. YOUNG of Alaska.

H.R. 3652: Mr. WOLPE, Mr. HERGER, Mr. INHOFE, Mrs. SAIKI, Mrs. MARTIN of Illinois, Mrs. JOHNSON of Connecticut, Mr. DERRICK, Mr. BRUCE, and Ms. SLAUGHTER of New York.

H.R. 3684: Mr. DYSON, Mr. YATES, Mr. RAVENEL, Mr. PALLONE, and Mr. SKAGGS.

H.R. 3686: Mr. HILER and Mr. RHODES.

H.R. 3716: Mr. ESPY and Mr. POSHARD.

H.R. 3732: Mr. BURTON of Indiana, Mr. GEKAS, Mr. MCCRERY, Mr. SHAYS, Mr. DENNY SMITH, Mr. GALLEGLY, Mr. ESPY, Mr. LAUGHLIN, Mr. FAWELL, Mr. MACHTLEY, Mr. VOLKMER, Mrs. LOWEY of New York, Mr. MOAKLEY, Mr. DOUGLAS, Ms. LONG, Mr. VISCLOSKY, Mr. WILSON, Mr. ERDREICH, Mr. STEARNS, Mr. HYDE, Mr. MILLER of Ohio, Mr. ROBERT F. SMITH, Mr. SMITH of New Hampshire, Mr. GLICKMAN, Mr. CRAIG, Mrs. BOXER, Mr. ORTIZ, and Mr. SARPALIUS.

H.R. 3735: Mr. MAVROULES, Mr. ENGEL, Mr. ESPY, Mr. GUARINI, Mr. HATCHER, Mrs. MEYERS of Kansas, and Mr. MURPHY.

H.R. 3751: Mr. MINETA, Ms. ROS-LEHTINEN, Mr. FRANK, Mr. MACHTLEY, Mr. FAUNTROY, Mr. KILDEE, Mr. SCHEUER, Mr. SWIFT, and Mr. WEISS.

H.R. 3755: Mr. JOHNSON of South Dakota.

H.R. 3773: Mr. JOHNSON of South Dakota.

H.R. 3789: Mr. MAVROULES, Mr. OWENS of New York, Mr. SAWYER, and Mr. HALL of Ohio.

H.R. 3831: Mr. MAVROULES, Mr. RICHARDSON, Mr. HOCHBRUECKNER, Mr. SMITH of New Jersey, Ms. SNOWE, Mrs. BOXER, and Mr. PICKETT.

H.R. 3851: Mr. TORRICELLI, Mr. MARKEY, Mr. WALSH, Mr. FEIGHAN, Mr. CONYERS, Mr. DELLUMS, and Mr. SAVAGE.

H.R. 3857: Mr. ESPY.

H.R. 3858: Mr. CHAPMAN and Mr. PACKARD.

H.R. 3859: Mr. GAYDOS, Mr. WALSH, Mr. GALLO, Mr. MILLER of California, Mr. HAYES of Illinois, and Mr. SLATTERY.

H.R. 3869: Mr. PETRI.

H.R. 3874: Mr. GONZALEZ, Mr. ATKINS, Mr. DELLUMS, Mr. EVANS, Mr. FOGLIETTA, Mr. DURBIN, Mrs. COLLINS, Mr. LEWIS of Georgia, Mr. DEFAZIO, Mr. OWENS of New York, Mr. OLIN, and Mr. FRANK.

H.R. 3876: Mr. POSHARD and Mrs. KENNELLY.

H.R. 3880: Mr. DAVIS, Mr. GEREN, Mr. KENNEDY, Mr. MACHTLEY, and Mr. MATSUI.

H.R. 3907: Mr. BLILEY.

H.R. 3914: Mr. ORTIZ, Mr. SAXTON, Mr. RICHARDSON, Mr. GONZALEZ, Mr. ROBINSON, Mr. SLAUGHTER of Virginia, Mr. LEATH of Texas, Mrs. LOWEY of New York, Mr. CLINGER, Mrs. PATTERSON, Mr. SERRANO, Mr. MAVROULES, Mr. RINALDO, Mr. WISE, Mr. HANSEN, Mr. COYNE, Mr. COX, Mr. MILLER of California, Mr. KASTENMEIER, Mr. EDWARDS of California, Mr. TRAXLER, Mr. CHANDLER, and Mr. ERDREICH.

H.R. 3918: Mr. VUCANOVICH.

H.R. 3922: Mr. HOLLOWAY, Mr. ROBINSON, and Mr. MARTINEZ.

H.R. 3923: Mr. HOLLOWAY and Mr. CRAIG.

H.R. 3936: Mr. SWIFT, Mr. SCHUMER, Ms. OAKAR, Mr. POSHARD, Mr. ROE, Mr. BONIOR, Mr. SAWYER, Mr. MCCLOSKEY, Mr. ATKINS, Mrs. BOXER, Mr. MANTON, Mr. LEHMAN of California, Mrs. KENNELLY, Mr. SABO, Mr. LEWIS of Georgia, Mr. MINETA, Mr. WALGREN, Ms. PELOSI, Mr. VENTO, Mr. PALLONE, Mr. YATES, Mr. COLEMAN of Texas, Mrs. LOWEY of New York, Mr. MARKEY, Mr. COSTELLO, Mr. CARPER, Mr. LANTOS, Mr. SOLARZ, Mr. MURTHA, Mr. MAVROULES, Mr. HOCHBRUECKNER, Mr. COYNE, Mr. CONYERS, Mr. SCHEUER, Mr. ANNUNZIO, and Mr. TRAFICANT.

H.R. 3961: Mr. MACHTLEY.

H.R. 3973: Mr. SMITH of New Hampshire, Ms. SCHNEIDER, Mr. BATES, Mr. MACHTLEY, and Mr. DOUGLAS.

H.R. 3977: Mr. ECKART, Mr. JAMES, Mr. SCHEUER, Mr. FAUNTROY, Mr. MILLER of California, Mr. WHEAT, Mr. OBERSTAR, Ms.

SCHNEIDER, Mr. NEAL of Massachusetts, Mr. DEFAZIO, Mr. SIKORSKI, Mr. BONIOR, Mr. PALLONE, Mr. PARKER, Mr. BEILENSON, Mr. TOWNS, Mr. KASTENMEIER, Mr. MANTON, Mr. WALSH, Mr. ATKINS, and Mr. BILBRAY.

H.R. 3980: Mr. DELAY.

H. Res. 354: Mr. TORRICELLI and Mr. WAXMAN.

H. Res. 358: Mr. TRAFICANT.

H. Res. 359: Mr. BUECHNER, Mr. ARMEY, Mr. FIELDS, and Mr. CRAIG.

H. Res. 365: Mr. BOSCO, Mr. GINGRICH, Mr. MAVROULES, Mr. SIKORSKI, Mr. SMITH of New Hampshire, Mr. WEBER, and Mr. WEISS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

151. By the SPEAKER: Petition of the City of Loma Linda, Loma Linda, CA, relative to a telephone network system which could provide video transmission and programming for cable TV; to the Committee on Energy and Commerce.

152. Also, petition of the City of Richland, WA, relative to competition for existing cable TV; to the Committee on Energy and Commerce.

153. Also, petition of the Governor of the State of Hawaii, relative to Medicaid coverage for pregnant women and children up to age 6; to the Committee on Energy and Commerce.

154. Also, petition of Lucian T. Robinson, Jr., Raleigh, NC, relative to a proposed new national anthem; to the Committee on Post Office and Civil Service.

155. Also, petition of the Canal Authority of the State of Florida, Tallahassee, FL, relative to the Cross Florida, Barge Canal Project; to the Committee on Public Works and Transportation.

156. Also, petition of the council of the city of New York, City Hall, New York, N.Y., relative to services and programs for veterans; to the Committee on Veterans' Affairs.

157. Also, petition of the Berea City Council, Berea, OH, relative to Medicare budget cuts in the fiscal year 1991 Federal budget; to the Committee on Ways and Means.

158. Also, petition for the council of the city New York, N.Y., relative to the Dodd-Hawkins-Hatch Child Care Agreement; jointly, to the Committees on Education and Labor and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3848

By Mr. FOGLIETTA:

—Page 43, after line 17, insert the following new subparagraph (and redesignate the subsequent subparagraph accordingly):

(B) as a condition for the issuance and continued validity of the license—

(i) the business may not impose, charge, or collect any fee for cashing or redeeming any travelers' check, check, money order or similar instrument in excess of the amount which is equal to the greater of—

(I) an amount equal to 1.5 percent of the face amount of such check or money order (not to exceed $8); or

(II) 50 cents; and

(ii) the business shall post in a conspicuous place a schedule, in English and Spanish, of all fees and charges for cashing or redeeming any travelers' check, check, money order, or similar instrument (including the maximum charges established pursuant to clause (i)); and

—Page 43, line 17, strike "and".

EXTENSIONS OF REMARKS

ARE WE A HUMANE NATION?

HON. LEE H. HAMILTON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HAMILTON. Mr. Speaker, I would like to insert a recent article by Arthur I. Blaustein into the CONGRESSIONAL RECORD. Mr. Blaustein was chairman of the National Advisory Council on Economic Opportunity under President Carter. He now teaches at the University of California, Berkeley. Mr. Blaustein's provides an insightful critique of society's unfulfilled goals of equality, justice, and economic opportunity. I recommend the following article as important reading to all my colleagues.

[From the San Jose Mercury News, Dec. 24, 1989]

ARE WE A HUMANE NATION?

(By Arthur I. Blaustein)

Twenty-five years ago, this nation undertook a course of action designed to combat "the paradox of poverty amidst plenty." In doing so, President Lyndon Johnson decided upon a broadside effort to seriously attack the root causes of poverty: inadequate health care, impaired education, lack of decent jobs, deteriorating housing and decaying neighborhoods. When Johnson requested—and Congress passed—the Economic Opportunity Act, it also signified a moral commitment on the part of our political leadership to pursue the unfulfilled goals of equality, justice, and opportunity.

It truly was a historic moment—one worth recalling with pride—for it was a time when Americans demonstrated their commitment, openness and generosity. A new federal agency was created to spearhead and coordinate this endeavor: the Office of Economic Opportunity (OEO), which had the responsibility for initiating several programs, including Head Start, Volunteers in Service to America (VISTA), Legal Services, Job Corps, Upward Bound, Foster Grandparents, Community Economic Development, and Community Action; all of which were direct and specific, aimed at pressing national problems.

It was a time of enthusiasm and hope. People not only thought about what was right and talked about what was wrong, but they also accepted personal responsibility for actually doing something about righting those wrongs. The nation's spirit was enlivened by the tens of thousands of young (and not-so-young) Americans who volunteered for the Peace Corps, VISTA, Legal Services and the Teacher Corps, or who supplemented their education by providing worthwhile social services to the poor through the more than 900 Community Action Agencies (CAAs) established across the country.

I do not have to tell you that times have changed. Nowadays, people complain a lot, but they do not take personal responsibility for anything other than their own ambition, career or security. On campus and off, rather than activism, idealism and vitality, the mood has shifted to apathy, fatalism, passivity and privatism: "Look out for No. 1,"—those who can't are shiftless, a drag on the economy.

Times also have changed for our disadvantaged youth. In the '60s, there was hope: Upward Bound, the Neighborhood Youth Corps and the Job Corps held out a helping hand. Youngsters who had never before had a chance believed that the dream of achieving selfhood could become a reality. By the early '80s, though, that hope had been dashed, and it was replaced with despair, as youngsters turned to drugs, crime and violence.

It is important to clarify this reality, for along the way, in deliberate efforts to destroy the credibility of these programs, conservative politicians began manipulating symbols in order to stigmatize them. During the Nixon era, they cleverly began to refer to them as "minority" and "welfare" programs, rather than as "opportunity" ones, thereby switching the message from a positive to a negative one. This kind of deceit and distortion was not an accident; it was designed to exploit fear and racial divisiveness.

By the time we reached the '80s, we had entered an era that officially—at the highest levels of government—condoned and even encouraged negative attitudes, code words and symbols directed against the poor in particular, and toward basic human and social service programs in general. Those conservative politicians who did so are adept at moralizing endlessly over the issues: the "problems" of the unemployed and underemployed, the homeless and hungry, of alcoholism, drug abuse, mental illness, infant mortality, child and spouse abuse and disrupted families. But they have neither the heart nor the will for the rigorous thoughts and work of finding cures or even just relieving some of the suffering and symptoms.

CREATING DISTORTIONS

Let me give a concrete example of what I mean. During the course of the 1980 presidential campaign, then-candidate Reagan would entertain crowds with the line, "Do you know how much it costs to keep a kid in the Job Corps? (pause) And how much it costs to send a youngster to Harvard? (long pause) Well, I'll tell you: $8,200 for the Job Corps and only $8,000 for Harvard." This usually elicited gales of smug laughter. But it was a false comparison, a perversion of reality. It just shows how distortions and false myths are created. The average taxpayer doesn't want complex economic answers, but they do deserve an honest answer. There are substantial costs if we eliminate the Job Corps. For example, it costs $26,000 a year to keep a youngster in prison. It costs $32,000 to keep a youngster in an alcohol and drug abuse program or a halfway house. It costs $55,000 to keep a youngster in a mental institution. And it costs only $16,000 to keep a youngster in the Job Corps, where they're learning self respect and job training.

The issues are: What are the values of the society, and where do we want to spend our money? The alternative to our Job Corps is not Harvard, it's despair. And there are substantial future costs to taxpayers. Drastic cuts in basic social and human service programs will exact social and human costs, and they will also appear as direct financial costs at the future times in different ledgers.

There is a price to be paid for Reagan's reduction of human and social services. The price is that these cutbacks did not reduce crime; they increased it. They did not promote better family life; they destabilized it. They did not reduce alcoholism; they increased it. They did not increase respect for the law; they weakened it.

The four particular elements of the Reagan administration's policies that have served to undermine our social equilibrium are: (1) the massive across-the-board cuts in social and human service programs; (2) the transfer of federal authority and program responsibility to states with diminished resources; (3) the abolition of delivery systems provided for in the Economic Opportunity Act; and (4) the abdication of moral leadership.

COMMITMENT TO EQUALITY

I want to quote from a tribute to Jane Addams made in 1960 by the distinguished writer and historian Archibald MacLeish; because it touches my sense of the meaning of the war on poverty. Jane Addams, he said, "was not working for her immigrants and her poor. She was committing herself with them to the common life—that life our generation watches more and more as spectators, as though it were not common, as though it were a life for someone else. She was as explicit about that as a woman could be. She was not, she said, a reformer: she wanted to establish a place (Hull House) 'in and around which a fuller life might grow for others and for herself.' And having made that much clear she then reversed her words to make her declaration clearer still. 'The good we secure for ourselves is precarious and uncertain until it is secured for all of us and incorporated into our common life.'

"No, Hull House changed Chicago and changed the United States, not because it was a successful institution but because it was an eloquent action by a woman capable of action regardless of the dark ahead. We talk as though the great question before our society was whether the things that need to be done in America to keep this last best hope of earth alive should be done by the federal government or by the states or perhaps the cities or by industries or by some other kind of organization. But that, of course, is not the question. The question before our society is simply whether or not these things will be done. And the answer is that they will be done if we ourselves see to it as Jane Addams and her friends saw it—if we accept, as she accepted, responsibility for our lives. That, when all is said and done is why our time remembers her—that she accepted for herself responsibility for the 'common life.' "

SERVING THE POOR

I cite this passage because it best describes for me the spirit and the intentionality of the Economic Opportunity Act, its programs and the people who worked at OEO.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

In 1965, the concept of Hull House was institutionalized through the Economic Opportunity Act with the establishment of over 900 Community Action Agencies (CAA), an indispensable step forward in the delivery of social services to our nation's poor. These multiservice agencies have provided basic life-support services to millions of Americans. Yet, the Bush administration is still trying to undo all the positive accomplishments that have been achieved in the past 25 years by the agencies. What is it replacing them with? Vague rhetoric about "a thousand points of light" and unspecific notions as to who else might do the job. Thus, once again, the stark reality is: the question before our society is simply whether or not those things will be done.

In reviewing the policies of the past 25 years, we have seen various strategies and theories come and go—a welfare-reform strategy, a private-sector job strategy, a minority-entrepreneurship strategy, a special-revenue strategy. Yet, I believe that if we had never passed the original legislation, the Economic Opportunity Act of 1964, which created an independent federal agency supporting CAAs, we would have to invent it today. It created the only coherent delivery mechanisms—imperfect as they may be—that relate policies and programs to people. That is the genuine achievement of the Economic Opportunity Act.

Lost in the cliches, slogans, and double-talk of the conservative anti-government criticism are the solid accomplishments. The value of these programs, services, and innovations has been obscured; the extraordinary contributions have been slighted. I believe that it is particularly important during a period of passivity, privatism and rhetoric to recall a time when responsibility for the "common life," as Jane Addams put it, was the law of the land. When our government actually provided the kind of moral leadership that is consistent with the values of a just, humane and truly democratic society.

Isn't it ironic? When the Reagan administration abolished OEO in 1981 and transferred authority to the states, it was the first time a federal agency had been shut down since World War II. They shut it down under the pretense of having a better way of fighting poverty. We now know what that meant: stealing from HUD and extorting from Wedtech.

954 POINTS OF LIGHT

At this point, when we should be reaping a substantial peace dividend, I believe that a rediscovery of the spirit and a re-enactment of the content of the Economic Opportunity Act would be the most healthy response possible to cope with our present social and community problems. If President Bush is serious about establishing "a thousand points of light," he need not look very far or very long. There are 954 points of light out there now: They are called community action agencies. They have been burning the midnight oil for too long and are in need of some fuel.

With the demise of the Cold War, only a tragic failure of nerve can prevent the administration from acting upon the remarkable opportunity that history is now offering: that of reordering our national priorities. Not only the 34 million poor in America, not only the 45 million near-poor (who are one accident, layoff, illness or divorce away from poverty); but also each and every one of us who cares about the future of our nation must ask the question, "If not now, when?"

Politics today, in a period of limited economic growth, seems to have reached a level of abstractness that removes it from the commonplace circumstances of ordinary Americans. When a sane and civilized family runs into tough financial times, two things happen. The one thing that they do do is to assure that those members of the family who are least able to fend for themselves are given the protection and minimum amenities necessary for survival. The one thing that they do not do is to allow those who have more than enough and are enjoying luxuries to continue to hoard. There are certain natural principles of behavior, of caring and decency, that have prior claim over untested game plans of economic theorists or politicians on the make.

Our founding fathers were well aware of what was needed: They knew that a vital and health federal government is indispensable to the well-being of a self-governing people. They believed in the ability of government to secure and protect the liberties of all our people—the weak as well as the strong. That is, after all, what democracy is all about.

Finally, it must be said in response to the downgrading of national commitment to economic opportunity; in response to our government's avoidance of our growing social problems and its abdication of moral leadership: that only those people have a future, and only those can be called humane and historic, who have an intuitive sense of what is important and significant in both their national and public institutions, and who value them. It is this conviction, and the continuing belief in the common-sense vision of the American promise, that allows us to recall the significance of the goals and principles embodied in the Economic Opportunity Act. And to remind ourselves that the struggle for genuine equality, justice and economic opportunity is still the most important endeavor of our time.

A TRIBUTE TO KATHY BARRETTE

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Kathy Barrette, of Pawtucket, RI attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Kathy and her classmates were able to achieve excellence. Kathy and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the National Competition against teams from across the Nation.

It is with great pleasure that I salute Kathy Barrette and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Kathy and her classmates good luck in the national competition.

THE CONSUMER AFFAIRS COMMISSION OF ALAMEDA COUNTY DESERVES A PAT ON THE BACK

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. STARK. Mr. Speaker, I rise today to congratulate the Consumer Affairs Commission of Alameda, CA, in California's Ninth Congressional District for an outstanding year in 1989 and, for their participation in National Consumers Week—the week of April 22–28, 1990.

The Alameda County Consumer Affairs Commission is a group of individuals appointed by the Alameda County Board of Supervisors. The purpose of the commission is to advise and to educate the community on consumer oriented issues. The commission also assists consumers through mediation and serves as another place for consumers to turn to instead of taking their complaints to the courts.

I would like to congratulate the commission on the banner year in 1989. The following is a list of the commission's accomplishments:

The commission's service to the county increased at a rate of 30 percent—or from 4,207 to 6,200—from 1988 to 1989, and the commission handled over 1,275 complaints and physically mediated, resolved and closed nearly 300 of them. The remainder were handled via information dissemination and response to inquiry.

In 1989, the commission recovered more than $55,174 in cash, goods, and services—a tremendous savings to the county. They sought revenue from outside the county and received a grant from Pacific Bell. They also recruited volunteers from the community to assist the commissioners in the day-to-day operations of the commission.

As part of their Outreach Program, the commission participated in seniors fairs in both Oakland, CA and Hayward, CA. The commission met with numerous senior citizens groups, civic and community groups, as well as schools, to help educate these groups concerning problems relating to consumer issues. The commission also communicates with the Alameda city and county library systems by setting up displays with information for consumers through pamphlets and by facilitating direct contact with commissioners on consumer protection issues. They also held an open house for county employees.

As the commission's focus of participation in our local community during National Con-

sumers Week, they are sponsoring an information sharing event whereby consumers can take advantage of the educational information provided.

Mr. Speaker, the Consumer Affairs Commission is a wonderful resource for both me and the community—I refer many of my constituents to the commission where they receive excellent assistance and guidance from the commission. I would like to commend the Consumer Affairs Commission of Alameda County for their dedication to the ongoing need for consumer education and information regarding consumer rights, and I congratulate the commission on their participation in National Consumers Week.

A TRIBUTE TO LESLEE REIS: AN EXTRAORDINARY WOMAN AND RESTAURATEUR

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. PORTER. Mr. Speaker, recently the people of our area, and indeed, throughout the Nation, lost one of the culinary world's most outstanding leaders: Leslee Reis. Mrs. Reis died suddenly and unexpectedly in New Orleans during a weekend trip, and she is mourned by all those who were fortunate enough to know and work with her, as well as by countless thousands of customers who frequented her world-class restaurant, Cafe Provencal.

I became fast friends with Leslee and her husband, Andy, when we were members of the Evanston Young Republicans. She was a wonderful and energetic person, someone who always brightened the lives of those around her. She will be deeply missed, and her contributions to her profession are substantial.

Of all the recent accounts of Leslee's life which were written after her untimely passing, I found an April 27 Chicago Tribune article that captures the most important aspects and I have selected excerpts to be reprinted below. Together with the memories and love of all those who were touched by Leslee, I hope that this record may help provide a fitting tribute to a very special lady.

Mrs. Reis, a pacesetter of Chicago's culinary world, was founder and executive chef of the award-winning Cafe Provencal, which she opened in 1977, after doing her own form of market research: standing on a street corner in Evanston, asking passersby if they wanted the kind of restaurant she wanted to open. In 1982 she opened Leslee's and in 1987, Bodega Bay Cafe, both in Evanston. Both closed in 1988.

Until her marriage in 1965 to her high school sweetheart, Mrs. Reis had never cooked an entire meal, much less an epicurean feast. She was working toward her doctorate in biochemistry at Harvard when she got sidetracked, taking a course at Le Cordon Bleu and volunteering to do dishes for Julia Child, who was about to debut as "The French Chef" on television. Her first entry into the food business was catering.

"I'm terribly distressed," said Julia Child in Boston. "She did a lot for women in the business. She was a fine chef and ran a fine restaurant. The last time we were in Chicago we had a wonderful meal at her restaurant. She was a wonderful, jolly, fine, good person."

Mrs. Reis was one of the star chefs at New York City's Tribute to James Beard, City-Meals-on-Wheels in 1987 and the Wolfgang Puck Charitable Foundation's American Food and Wine Festival in 1988. She was chosen as the only Midwestern guest chef on Julia Child's television series, "Dinner at Julia's" in 1983, and was a founding member of the American Institute of Wine and Food and of Les Dames d'Escoffier Chicago.

One reason for her success as a restaurateur was that she kept a pure style at Cafe Provencal, said Gordon Sinclair, owner of Gordon's restaurant. "Leslee was very firm in her conviction that Cafe Provencal was authentic French provincial cooking. She stuck to her style. She was not affected by the nouvelle movement but maintained a hearty and robust cuisine," he said.

"Because of her bravado, I don't think any knew just how much she cared about people and the business," said cookbook author and Tribune columnist Abby Mandel. "She was extremely sensitive to people. She really cared and I think that was the secret of her success."

LOMA LINDA MEDICAL CENTER'S GIFT OF LIFE TARGETING TUMORS WITH AN ATOM SMASHER

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEWIS of California. Mr. Speaker, I am pleased to share with my colleagues an article that appeared in last week's Washington Post concerning a highly advanced technology utilizing particle accelerators in the treatment of cancerous tumors. Loma Linda University Medical Center has been a pioneer in this technology for 20 years and a description of their work is included in this article. I call it to my colleague's attention because I want all of you to be aware of the availability of this cancer curing treatment center that will begin treating patients this summer.

TARGETING TUMORS WITH AN ATOM SMASHER—MAINSTAY OF PHYSICS FINDS A PLACE IN THE MEDICAL ARSENAL AGAINST GROWTHS INACCESSIBLE BY SURGERY

(By Gregg Levoy)

High on a hillside overlooking San Francisco Bay, a woman apprehensively enters a building that houses a particle accelerator, an atom smasher that is the mainstay of physics and now is being used to treat cancer and other life-threatening diseases.

The 28-year-old woman suffers from an arteriovenous malformation, a hereditary condition that results in an abnormal growth of blood vessels in the brain. Several years earlier, the malformation caused a hemorrhage that resulted in a temporary coma and paralyzed the woman's right eye. Because the malformation is too deep and inaccessible for surgery, her physician, Jacob Fabrikant, a professor of radiology at the University of California at Berkeley, fears her next hemorrhage could be fatal. His experiments in particle beam therapy at the Lawrence Berkeley Laboratory may represent her last hope.

In one of three medical "caves" at the accelerator complex, a phalanx of shirt-sleeved doctors and physicists help the woman onto the Isocentric Strereotactic Apparatus for Humans, a revolving couch that permits the accelerator's helium-ion beam to take aim at her skull from different angles. Her sister watches the hour-long procedure on a closed-circuit monitor in an adjacent room.

Strapped into the couch, the woman's head is immobilized in what looks like a custom-made hockey mask. Computerized images help technicians train the accelerator on the malformation in her brain to within a fraction of a millimeter.

Each of four doses of the therapy takes about a minute, is painless and silent and essentially clots the malformation. Because blood is unable to flow through its capillaries, it will atrophy, probably within a year and dissolve harmlessly.

Originally designed for particle physics, atom smashers have been compared to a demolition derby in which two speeding cars crash; physicists do the same thing with atoms, sending them crashing together at high speeds and then counting the particles that scatter as a result of the collision to try and determine the building blocks of matter.

Increasingly, atom smashers are regarded as promising tools to treat cancer and other diseases, because they allow doctors to lower the dose of radiation while increasing the accuracy of radiation therapy.

That is particularly true for cancers that are localized in one area of the body. "Anything that is treatable with X-rays could probably be better treated with particle beams," said Raymond Kjellberg, a neurosurgeon at Harvard Medical School, the home of the only other clinical accelerator in the United States. "My guess is that [atom smashers] will replace most X-ray use in 10 to 20 years," said Kjellberg.

Conventional radiation treatment uses X-rays, which scatter as soon as they hit the body, wasting energy and affecting healthy and cancerous tissue alike. This is especially dangerous if the tumor is in a vital spot, such as near the heart or spine. For this reason, a less than ideal dose is used to avoid damaging normal tissue.

Proton beams used in particle therapy have the same biological effect on the body as X-rays, disrupting a cell's metabolism and breaking up the DNA, making it incapable of reproducing. But unlike X-rays, they can be controlled to penetrate no farther than the tumor and to unleash their cell-killing energy directly on the target.

A particle beam's velocity can be varied by passing it through a telescoping water absorber, similar to the collapsible plastic cups used in camping. The longer the absorber, the more water the beam must pass through, and the slower it travels.

The velocity of a beam determines how far into the body it travels before reaching the end of its range. Ideally, a particle beam dumps the bulk of its energy right on top of the tumor, resulting in less damage to healthy tissue.

Particle beams are generally trained on a site from several different points, further minimizing the dose on any given path. Beams can also be shaped to the precise configuration of a tumor.

As a result, doctors can deliver up to 35 percent more radiation than with conventional X-ray therapy, while sparing sensitive surrounding tissue.

Given the complex technology involved and the difficulty in precisely controlling the beam energies, proton therapy remained a limited option until the early 1980s.

But with the advent of several advances including more sophisticated targeting procedures, an increased understanding of tumor biology and three-dimensional computer imaging techniques such as CAT scans and magnetic reasonance imaging, which can map tumors with great precision, particle beam therapy began to emerge as a promising tool.

Today, there are nine facilities around the world that use the technology: in addition to the accelerators at Berkeley and Harvard, there is one in Sweden, three in the Soviet Union, two in Japan and one in Switzerland.

Doctors in these facilities have treated a total of about 6,000 patients for cancer of the head, neck, lung, abdomen, eyes, lung, prostate, spinal cord, pelvis and cervix, as well as non-cancerous ailments such as the arterial malformation.

Fabrikant and others at Berkeley have treated about 900 patients with the device, most of whom were suffering from ocular melanoma, a cancer that used to require removal of the eye. Using helium beams, treatment not only can spare the eye but can obliterate the cancer in 95 percent of cases, compared with 60 percent of surgical cases.

One sign of the promise of accelerators is a facility under construction at Loma Linda University Medical Center outside Los Angeles. There a $40 million "proton therapy" accelerator is expected to begin operation this summer, the only machine in the world designed expressly for medical use.

As the first hospital-based facility, it reflects a change in design from earlier medical accelerators. They were modified from physics laboratories by diverting beams, usually via magnets, into a room made to look as much like a hospital setting as possible. "What we really did," said Kjellberg, "was just push 10 years of physics experiments out of the way."

Loma Linda's design puts a computer-controlled couch in the center of a three-story revolving gantry, a ferris-wheel-like apparatus with a dozen five-ton electromagnets suspended on its frame. This arrangement—it is the beam that moves, not the patient—enables greater precision for treatment involving multiple angle radiation.

There will be three treatment rooms, each with a gantry, and one with a fixed beam for single-entry treatment for diseases such as eye cancer, in which the use of a gantry is excessive. The entire facility is built underground for natural radiation shielding.

Loma Linda will have the capacity of treating up to 100 patients a day, in half-hour sessions, according to project director James Slater, chairman of the department of radiological therapy. This, he says, will undoubtedly relieve some of the pressure on more research-oriented accelerators at Berkeley and Harvard, which currently have patient waiting lists of nearly a year.

ENCOURAGE THE RECYCLING OF PAPER PRODUCTS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LAGOMARSINO. Mr. Speaker, the Environmental Protection Agency estimates that paper products will constitute approximately 40 percent of the municipal solid waste stream by the year 2000. In order to curb this trend, now is the time to establish and provide incentives which encourage the recycling of paper products.

Today I am introducing legislation to provide that incentive to companies which mass mail paper products through the U.S. Postal Services' second- and third-class mail.

Last year the U.S. Postal Service delivered approximately 62.8 billion pieces of third-class mail and approximately 10.5 billion pieces of second-class mail to households in the United States. The combined weight of second- and third-class mail in 1989, totaled approximately 11.6 billion pounds, the equivalent of approximately 46.5 pounds per American citizen.

Considering each ton of recycled paper produced saves approximately 17 trees, 11.6 billion pounds of recycled paper would save approximately 99 million trees.

In order to encourage recycling, to save millions of trees, and to reduce our solid waste stream, I am introducing legislation which states the following:

"It is the sense of the House of Representatives that the U.S. Postal Service should study and report to Congress on the feasibility of establishing lower rates for any second- and third-class mail matter which uses recycled paper and materials."

By creating a lower mail rate for mailings using recycled materials, we can make it beneficial for mailers to use recycled goods. I urge my colleagues to support and cosponsor this much-needed legislative measure.

MAHONING COUNTY TASK FORCE ON AIDS

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the Mahoning County Area Task Force on AIDS, which is located in my 17th Congressional District of Ohio. The Mahoning County Task Force on AIDS will be participating in AIDS Awareness Week in Ohio from May 5, 1990 thru May 11, 1990.

AIDS Awareness Week is to recognize the tens of thousands of people who have died from AIDS including the 22 people who have died in Mahoning County from this tragic virus. The week also brings attention to the millions of people who are living with the virus and encourages further education in hopes the impact of AIDS can be limited.

The Mahoning County Task Force on AIDS, as well as the AIDS unit of the Youngstown Health Department, have worked unyieldingly in their campaign against AIDS. They have gone beyond the call of duty to educate our community on the AIDS virus.

Mr. Speaker, I would like to commend the Mahoning County Task Force on AIDS for their hard work and dedication not only to Mahoning County and Ohio but also to the United States. AIDS is a threat to everyone, and groups such as this help educate communities such as ours thus enabling everyone to deal better with this tragic disease. I am honored to represent these outstanding people.

OPPOSE ARMS SALE TO TURKEY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. YATRON. Mr. Speaker, today I join with my good friend and colleague, Congressman WILLIAM S. BROOMFIELD in introducing a joint resolution disapproving of the Pentagon's proposal to sell five COBRA helicopters to the Government of Turkey.

Mr. Speaker, I recognize that it is extremely difficult to successfully oppose an arms sale of this nature. But I think it is important to send a strong and unambiguous signal to Ankara that as long as Turkish forces occupy over one-third of the sovereign nation of Cyprus, United States policymakers will continue to speak out against strengthening military relations with Turkey.

Congress has supported the United Nation's efforts to find a peaceful settlement to the dispute on Cyprus. Ambassador-designate Nelson Ledsky who serves as the Department of State's Special Representative on the Cyprus matter has worked very hard to encourage all parties to this dispute to negotiate in good faith. Unfortunately, the Turkish Cypriot leadership and its supporters in Turkey have consistently obstructed the peace process.

Mr. Speaker, the United States should not reward a government which militarily supports a breakaway regime in another country with more U.S. military aid and I would urge my colleagues to support this resolution.

TRIBUTE TO BRYAN BOJANOWSKI

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SANGMEISTER. Mr. Speaker, I rise today to pay tribute to Bryan Bojanowski, the winner of the Earth Day Essay Contest held for eighth grade students in the Fourth Congressional District. Brian is a student at Infant Jesus of Prague School in Flossmoor, IL. In his essay, Bryan shows a keen awareness that every individual citizen can make an investment in the future of our Earth by making a conscious effort to conserve our natural resources in everyday life.

I submit for inclusion to the RECORD a copy of Bryan's essay, "Doing My Part for the Environment—I Can Make A Difference".

In preparation recently for writing an essay about conservation, I decided to take a hard look at what my own family was doing to help save the environment.

Let's take paper, for instance. Mom was asking for paper, rather than plastic bags at the grocery store. We were already using both sides of scrap paper and we shared magazines and newspapers with my grandparents. I searched the pantry while I was

putting away all those groceries that came in those brown paper bags and discovered we had paper plates and cups rather than foam. So far, so good!

Continuing my search, I discovered that my sister, who is single handedly keeping hair spray companies in business, was at least using non-aerosol products. I patted her on her spray stiffened head and went on.

We closed off unused rooms in the winter and had, in fact, lowered the temperature for the entire house. I knew it was cold when Mom broke out the bunny slippers!

I determined that all our furniture was made of pine or oak rather than tropical woods and we were waiting to do full loads of dishes and laundry. We took showers, rather than baths to conserve water and we never washed the car with a hose.

Speaking of the car, our twelve year old antique was probably no longer fuel efficient, but on the positive side, it did pass the emissions test with flying colors. We also car pooled when possible and tried to avoid unnecessary trips.

Other things I know we did included using a metal chimney to start the barbecue rather than charcoal lighter. We used light timers when we were away from home on vacation and made an effort to remember to turn off the TV and the lights when we left a room. As chief battery burner in the house, I invested in a battery charger and rechargeable batteries.

One thing we were not doing was to save bottles and cans for recycling. I plan to nag family members from now on about that!

As an editor of our school newspaper, I plan to write an editorial encouraging the students to pick up trash and participate in our ongoing can recycling project. I would also like to direct the editorial at the adults who do the purchasing for our cafeteria and attempt to persuade them to purchase paper packaging instead of styrofoam.

All in all, I was surprised at how many of the things my family already practices were also helpful to our environment. None of the things I mentioned here are difficult for a family to do and hopefully, if everyone did them, the environment would be improved. A little sacrifice on everyone's part could bring lasting benefits to all mankind.

I know my colleagues will want to join me in saluting Bryan Bojanowski for his prizewinning essay.

KANSAS STUDENT WINS SCHOLARSHIP

HON. JAN MEYERS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. MEYERS of Kansas. Mr. Speaker, it is with great pride that I announce that one of the recipients of the Shell Century III Leaders scholarship resides in my congressional district. Her name is Heather Bartel of Kansas City, KA. Heather, a student at Sumner Academy in Kansas City, received the award based on her outstanding leadership abilities.

Heather is aptly qualified for the leadership role as treasurer of Student Congress, vice president of the Key Club, and a member of the German Club, cross-country team, and orchestra. After completing the application process, which involved a current events quiz, and the preparation of a commentary citing a solution to a current problem in American society. Heather proceeded to the interview phase of the 10 finalists from Kansas.

As a State winner, Heather had the opportunity to compete in the national finals of the contest which were held in Williamsburg, VA. The questions asked involved offering solutions to critical issues which the United States will face in the next century.

Mr. Speaker, I wish to commend Heather on her scholastic achievement and leadership potential. It is reassuring to know that America's youth is already planning for the future. Heather is an outstanding example for the youth of Kansas and the entire Nation.

SUPPORT THE FUTURE OF HIGH PERFORMANCE COMPUTING

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LOWERY of California. Mr. Speaker, I rise today in support of H.R. 3131, the National High Performance Computing Technology Act and to share with my colleagues testimony submitted by Dr. Sidney Karin, director of the San Diego Supercomputer Center [SDSC], during hearings on the bill's companion measure in the other body. Located in my district, SDSC has been successfully providing high performance computing to the Nation's research community since 1985 when it was established by the National Science Foundation. I commend Dr. Karin's leadership and diligence in ensuring the success of the center; and his commitment to the field of high performance computing.

The testimony follows:

STATEMENT OF DR. SIDNEY KARIN

Mr. Chairman and Distinguished Senators: My name is Sid Karin, I was asked to testify, but I couldn't get to the hearing because I broke my leg a week ago when I was trying to go very fast down a mountain. We skiers are taught early and reminded often to reassess our surroundings and respond to all the varying factors, not only to the snow conditions, but also to the terrain, the folks in front of you, and those "hot dogs" behind you. When we go really fast, we need to make very rapid adjustments or you lose control. The lesson I learned skiing is a lesson we're all learning in the field of high-performance computing. It was my fascination with going fast that drew me to high-performance computing in the first place, I suppose, but while I can break a leg, I'd rather my country didn't. So I thank you for the opportunity to add my two cents to the record of the testimony.

My title is director of the San Diego Supercomputer Center, one of the supercomputer centers established by the National Science Foundation in 1985. I have another title also, which is vice president of a San Diego research and development company called General Atomics, which runs the San Diego Supercomputer Center under the NSF Cooperative Agreement. I'm also an adjunct professor in the Computer Science and Engineering Department at the University of California, San Diego. Prior to donning these three hats, I had yet another title: manager of the User Service Center at General Atomics, that is, the User Service Center of the National Magnetic Fusion Energy Computer Center, one of the Department of Energy supercomputer centers, located at Livermore.

Our NSF supercomputer center, the one I direct today, was so quick to get off the ground five years ago precisely because it arose as a kind of spinoff of or evolution from the DOE supercomputer effort. It was the first NSF center to have experience with linking users nationwide on a network, again because of its close relationship to the DOE effort. It's the product of a certain evolutionary path. I want to encourage your positive reading of S.1976 by drawing that evolutionary path, which is the path of high-performance computing, into the future. I have been where high-performance computing has been, and I think that gives me some insight into where it has to go.

The bill before you has four parts. The elements are establishment of a national network, development of improved software, support for high-performance computer systems, and basic research and education. This bill represents a balanced approach to continuing United States leadership in high-performance computing, and I am heartily in favor of funding all of these elements.

I should emphasize that I don't think we should be first in high-performance computing just because it would be nice to be first in as many areas as we possibly can. High-performance computing, as an enabling technology, is directly related to United States competitiveness in the world economy, and I want to explain how each part of this bill can be used to bolster and reinforce our competitive position.

The direct benefits of a national network are very obvious, as obvious to us today as the Interstate Highway System was to everyone in Eisenhower's time, when I was just a kid who loved fast cars.

Let me tell you how obvious it has become that we need a national network. When we started the San Diego center, we had before us the experience of the Magnetic Fusion Energy center, MFE, which was the first to link supercomputing researchers across the country by telephone and satellite on a true network. At all other nonclassified supercomputer centers, the remote users, and there weren't many, had to dial in and pay for a long-distance call.

When the San Diego center began, we knew we would need a network like MFE's, and we put it together that way, with links reaching from Maryland to Hawaii, with the result that we had more users working at our center between 1986 and early 1988, when the NSFnet backbone and regional networks began to take shape. We joined the NSFnet effort and began to phase out MFEnet clone. Today NSFnet and its associated regional networks, like the California Education and Research Federation network that we run from San Diego, are providing service to increasing numbers of researchers around the country. I should add that high-performance computing is Darwinist: we've made the most of our inheritance, and we've adapted swiftly for survival.

So I think a larger national network linking all researchers at high speeds is an adaptation the United States requires for competitive survival, and this bill addresses it. The funding required is not the largest part of the bill, but this initiative may well provide the most leverage.

If it has a defect, it is in its identification of the network as a "national research and education computer network" linking "gov-

ernment, industry, and the higher education community." Let's not make the mistake of isolating the research components of our economy from the engineering, design, and manufacturing sectors that benefit from the research. Let's link government, industry, higher education, and production—whether we call it manufacturing, trade, or commerce.

I'm suggesting that the various sectors of our economy can all evolve together. If they don't, we'll be in the same position as travelers were when the railroads began, having to hop out of trains at the border because the tracks in the next country were of a different gauge. Let's not keep the most productive sectors of our economy on a different gauge from research and education.

That leads me to another point about balance: high-performance computing is so important that it requires the cooperation of all agencies: not only DOE, but also NSF, NIH, NASA, the departments of Commerce and Agriculture, and others. I hope you will find a way to put in this bill or in another bill a mandate to all agencies to cooperate and to consider what the United States requires for competitive survival as they do so.

Since I'm suppporting evolution here, let me point to the ultimate development. A computational superhighway should link everyone in the same way that telephones and fax machines do today. That idea is contained in the bill in the thought, here on page 8, that the government network should be phased out or turned over to the commercial networks when they can meet the needs. At that point, all of the elements of our society that can collaborate will be able to collaborate, and Japan Incorporated will be looking at U.S. Incorporated. As a number of editorialists have suggested in recent weeks, we may also need to face Germany, Incorporated, in the world market very soon. And in 1992, Europe, Incorporated.

That goal won't be met by networking alone. We need the other parts of this bill. The balance of the program is essential. Networks will let us talk to each other and compute together, but what will we compute, and how fast can we do it? And how can we assure that all of these elements work together to provide a robust computational infrastructure?

Let me bring in Darwin again to look at this. My center is a product of evolution. Its ancestor was a youthful DOE center that is still a vigorous citizen. Our center owes a lot to this parent, and to aunts and uncles on the DOE side as well. We obtained software, documentation, and much good advice from MFE. Our mass storage system, which we have now commercialized under license from the DOE labs, was a software product from Los Alamos, with hardware from IBM. In addition, we have a similar technology transfer agreement with Lawrence Livermore for its UNIX-based file management system. As we have developed and interacted with our brother and sister NSF centers, we have been able to repay our parents and aunts and uncles. We have worked with the DOE labs on operating system issues. We are working with Los Alamos and Caltech on prototyping a gigabit per second network of the kind envisioned in this bill.

And we've also grown up and had kids of our own, and so have our brothers and sisters. We have fostered and participated in much important research, including research that speaks to one of the grandest challenges we face: maintaining American competitiveness. For example, in our center, we helped Gencorp to develop a new method for rapid injection molding of fiberglass and plastic auto body parts. The NSF center in Pittsburgh helped Alcoa to develop lighter aluminum cans, and the NSF center in Illinois helped Kodak develop new chemical processes for film developing. Moreover, we've had a vigorous program of research and technology transfer conducted jointly with members of the computer industry. At San Diego, this has included Cray, Digital Equipment, Supertek, Apple, and Alliant. This program has enable these vendors to enhance their product offerings and improve their competitiveness in the world market.

We have taken very seriously our responsibility to educate researchers, students, and young people in the use of supercomputers and the opportunities of computational science. There's the Superkids program at MFE, the SuperQuest program at Cornell, the Kid Lab program at San Diego, and programs in Research Experiences for Undergraduates at all the NSF centers, in addition to fellowships and appointments for visiting scientists. All of these centers give workshops and hold meetings to spread technique, whether it's new math or new supercomputer graphics or new biochemistry. And we also clone ourselves. Key staff members of some of the new state-supported supercomputing centers have been drawn from the many experts trained by the DOE/DOD and NSF centers.

In order words, the NSF centers and the existing DOE centers have taken a leadership role in the efforts this bill seeks to support. Those efforts are the efforts that the present centers of supercomputing have been engaged in, multiplied thirty- or forty-fold. A layer of expertise, a computational mini-infrastructure, has already evolved. The efforts envisioned in this bill will have the most leverage if the funding is channeled through this layer. I hope the language referring to new centers will be looked at very closely when the time comes to implement this bill. A center is supposed to be central and is supposed to centralize, so it can act rapidly and take advantage of economies of scale. We should not repeat the experience we already have; rather, we should build on it and very quickly evolve upward from it.

Darwinian Nature is profligate with mass extinctions and reformations of the plant and animal kingdoms, but, as Darwin himself pointed out, when humanity domesticates and breeds animals, it can choose to do better than Nature will do, and faster as well.

WE MUST HAVE A MIX OF ENERGY RESOURCES AND NUCLEAR POWER MUST BE PART OF THAT MIX

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. BYRON. Mr. Speaker, as we commemorate Earth Day, this Nation is understandably drawn to consider the protection of our natural resources and national treasures. As a member of the Subcommittee on National Parks and Public Lands, I am reminded of these obligations every day.

At this moment, Congress is seriously considering legislation to limit oil exploration in significant amounts of the Arctic Plain in Alaska, bills that would prohibit oil exploration and drilling over the vast majority of the American coastline, and vital legislation to clean up the air that will have a profound impact on our energy policy.

All of this is vital and necessary, but sooner or later we must begin to ask where we will get the energy resources to sustain our economy. If we won't drill for oil, if we discourage the use of coal, if we don't want our wild and scenic rivers destroyed by hydroelectric facilities, if we are unwilling to sustain the size and strength of our military to protect our import supply lines, what do we intend to do?

Certainly, I have supported the encouragement of alternate fuels: solar, wind, methanol, et cetera. I also believe that recycling and conservation have important roles to play. But these options are not going to sustain our economy in even the intermediate term, let alone allow us to increase our standard of living.

Sooner or later, we will be forced to confront these questions again. Mr. Speaker, I have enclosed a recent editorial from the Washington Post that contains part of the answer. That answer is nuclear.

SEABROOK STARTS UP

Despite 14 years of protest demonstrations and litigation, the Seabrook reactor in New Hampshire went into operation this week. It will generate power for New England without contributing to acid rain or to global warming. Will that end the opposition to it? Unlikely.

That opposition has two parts. Much of the legal combat has involved the plan to clear people out of the surrounding area in the event of a major accident. Seabrook is near beaches that draw heavy crowds in summer, and the claim is that people couldn't get out quickly. But there's another kind of opposition that has nothing to do with this specific site. It begins with the visceral conviction that the technology itself is illegitimate and dangerous.

Certainly it is dangerous. To illustrate the point, a truck accidentally damaged the cooling system of a reactor in Georgia this week. There were no serious consequences, but under slightly different circumstances, there could have been. Nuclear power is an unforgiving technology. There are now many dangerous and unforgiving technologies in daily use in this country saving money, time and lives. There is no way to generate large quantities of electricity without danger, and the question is which method returns the greatest benefits with the smallest risks.

New England and the whole East Coast are now at the edge of serious power shortages. Conservation of energy is essential, but even with a strenuous effort at conservation, there are going to have to be new power plants. What sort should they be? Most of the country's power is currently produced by burning coal, which greatly damages the environment. Natural gas is cleaner but more expensive and, like any fossil fuel, produces carbon dioxide, the major element in global warning. Solar energy is coming along but will always be limited by the sun's habit of periodically disappearing. The opponents of Seabrook include most of the ranking politicians in

Massachusetts, whose position is conspicuously vitiated by the extreme vagueness of their own thoughts about where and how to produce adequate energy for a modern society in a cold climate.

If this country seriously wants to reduce the amounts of carbon dioxide being pumped into the atmosphere, it is going to have to use more nuclear energy.

REAGAN'S SPEECH BRINGS THIS PATRIOT OUT OF THE "CLOSET"

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HYDE. Mr. Speaker, one isn't used to newspaper columnists writing good things about former President Reagan, and when I ran across Ken Dychtwald's article in the Chicago Sun-Times of February 18, I was pleasantly surprised. The writer recognizes what many of us have said for some time that Ronald Reagan has made us all very proud to be Americans.

I commend this article to my colleagues for their review:

[From the Chicago Sun-Times, Feb. 18, 1990]

REAGAN'S SPEECH BRINGS THIS PATRIOT OUT OF THE "CLOSET"

(By Ken Dychtwald)

Last week I had a most unusual experience. The Sara Lee Corp. had invited a small group of powerful business leaders and their spouses to a mini-conference, a kind of "think tank" focused on the future.

The faculty for this four-day gathering included, besides myself, John Naisbitt, author of Megatrends 2000; Lester Thurow, dean of the business school at the Massachusetts Institute of Technology; James Fletcher, director of NASA; Zbigniew Brzezinski, counselor for the Center for Strategic and International Studies, and former President Ronald Reagan.

President Reagan addressed our group of 50 or so people on Feb. 6, his 79th birthday. After lunch was served, his birthday cake (made by Sara Lee, of course) arrived and we all joined in singing a rousing rendition of "Happy Birthday." Then, for several hours, Reagan addressed our group with his opinions on a wide range of domestic and international issues:

Gorbachev: "I had very good 'chemistry' with Mr. Gorbachev. I'm keeping my fingers crossed for his continued success."

Leadership: "My favorite world leader is Margaret Thatcher."

His most unhappy incident as president: "The killing of the Marines in the bomb explosion in Lebanon."

A challenge to appear with the other three living past-presidents on a TV special about politics: "An interesting idea, but remember only the acting president has all the facts. I wouldn't want to do anything that would undermine President Bush."

During the question-and-answer period that followed, I raised my hand to catch his attention. When he selected me and my jitters passed, I asked: "As a long-lived American—and as a prominent leader of Americans—what, in your opinion, makes us and our country special?"

After taking a moment to reflect, and then fastening his eyes on me, he said: "Well, I have been thinking about that very question myself lately. I have never said this in public before, but here is what I think makes America great.

"In this day and age, you could go to live in Spain, but you'd never become a Spaniard. If you moved to Japan and spent the rest of your life there, you'd never be accepted as a Japanese. Similarly, if you chose to live in France, you wouldn't be accepted as a Frenchman. But anyone can move to America and become an American. Ours is the greatest social experiment in the histroy of civilization. We have a nation where people of all races, religions and ethnic backgrounds have joined together to form the great melting pot of democracy.

"The other thing that I particularly appreciate about America is that nearly all the nations of the world, each of their constitutions tell their people what they can do. In ours, the people tell the government what it can do."

And then, in a dramatic moment, Reagan began to recite the opening sentences of the U.S. Constitution: "We, the people * * *."

When he finished his answer, a hush fell over our group as we all felt touched by Reagan's observations and the deep feelings that motivate him. As a baby boomer who has for many years felt that patriotism was a bit corny and unfashionable, I must say that Reagan's comments and belief in our nation's basic values and ideals were a welcome relief from the cynicism and negativity that are so prevalent these days.

And as I heard Reagan passionately voice the importance of personal and political freedom, I felt proud to be an American, more proud than I had allowed myself to feel for some time.

It got me wondering—maybe there are other "closet patriots" out there. How do you feel about these issues? Please write to me in care of the Chicago Sun-Times, Features Department, 401 N. Wabash, Chicago 60611.

TIME TO RENEW REVENUE SHARING

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MURTHA. Mr. Speaker, in the current budget debate we have been overlooking one very important, needed step: to restart the Revenue Sharing Program.

Revenue sharing began in 1972 and over 14 years provided $83 billion to local governments. Put simply: It was a program that worked—worked to keep valuable programs underway and worked to provide for community needs.

In October 1986, I offered an amendment on behalf of the Appropriations Committee as a last-ditch effort to extend revenue sharing. The House leadership decided President Reagan would veto the entire, crucial spending bill if our amendment was included so we reluctantly agreed to a Rules Committee decision striking our amendment. Since then, Chairman WHITTEN, and I have introduced legislation to reauthorize the program.

It is needed at this time for three main reasons.

First, with cutbacks during the Reagan-Bush administrations in domestic programs, more of the burden for community services has fallen to local governments. This was the very philosophy that sparked the initial round of revenue sharing. The need is just as real today.

Second, everyone recognizes that we have a major infrastructure rebuilding problem facing us in the 1990's. Until funds became available for the Federal Government to lead the way in that effort, local government will again be carrying the burden. Revenue sharing will provide them with the financial edge to continue and improve vital water, sewage, road, and community building upkeep until we can take more major steps.

Third, while the Reagan-Bush administrations have made much of their goals of reducing Federal taxes, whether you agree with their approach or not, this policy, coupled with the decline in spending, has placed for many Americans a larger tax burden at the local level. And local governments often work with more regressive taxes that penalize the working families and older Americans on fixed incomes more than tax rates tied to income level.

We can fit revenue sharing into our overall budget picture. It marks an idea whose time has returned. Revenue sharing II should be a congressional sequel this summer, as it would provide a major economic boost.

D.L. WIEMAN

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FAZIO. Mr. Speaker, I rise in honor of longtime California State transportation leader, D.L. (Larry) Wieman. After 42 years of service to the transportation industry and his community, Larry will retire on April 30, 1990.

In light of his present status and past achievements, Larry is richly deserving of the high esteem he holds in the minds of his colleagues, as well as those in Federal, regional, and local agencies.

As an engineer, planner, and executive, Larry brought innovation, commitment, and leadership to a variety of assignments. With a long history of promoting statewide improvements to transportation, projects he helped with include: the design of Interstate Route 10 through Redlands, CA; the promotion of legislation which created the present department of transportation; and, the oversight of the completion of Interstate Highway 5.

From the beginning of his career, Larry ardently pursued innovative ways to improve the transportation systems in California. After receiving his degree in engineering design from UCLA in 1950, he was appointed district engineer for the department of public works, where he planned road construction throughout the San Bernardino district.

Later, after numerous district assignments, Larry became the head of the statewide highway research program in Sacramento. Once in Sacramento, Larry became involved with the State legislature, helping to create the new department of transportation, and eventually became the acting chief of the division of transportation planning. In 1976, he was ap-

pointed director of Caltrans District 10 in Stockton, which covered nine counties in the Central Valley.

During his tenure at the department of transportation, Larry was noted for his development of a management method known as quality circles, and for his organization of a statewide planning system, "Planning in the 1990's," which yielded the advance transportation system development effort.

Larry is generous with his time and energies outside of his career. He has been extremely active in raising money for the United Way and was responsible for coordinating fundraising contests as the division and section leader of the United Way of San Joaquin County.

As a fellow in the American Society of Civil Engineers, and a member of the Transportation Research Board's Committee on Water Transportation and Statewide Planning, Larry works outside of his position to further the interests of California transportation.

Larry resides in Sacramento with his wife, Virginia. They have one daughter and two grandchildren.

Mr. Speaker, I applaud the efforts of Larry Weiman, knowing well that this career-long pursuit to improve the transportation systems in California will leave a trail of innovation and leadership. I wish him luck with his future endeavors, and congratulate him on his past achievements.

MRS. MARY BRIDGES WILL CELEBRATE HER 100TH BIRTHDAY ON APRIL 22

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MRAZEK. Mr. Speaker, I rise today to inform my colleagues of a milestone in the life of one of my constituents. On April 22, Mrs. Mary Bridges of Centerport, Long Island, will celebrate her 100th birthday.

Perhaps it will seem callow of me, Mr. Speaker, to admit that the thought of a lifetime spanning a century's time is almost incomprehensible. But think of it: Mary Bridges was born during the administration of President Benjamin Harrison. Her life and times have known the Spanish-American War, the rollout of the Model T, Woodrow Wilson's League of Nations, Prohibition, the Great Depression, and Pearl Harbor. She has seen America evolve from an agrarian country to builders of home computers and supercolliders. Her century on Earth has seen both steamships on the Mississippi and starships beyond Neptune.

How wonderful it must be for her to reflect on all of this, to see both where we've come from and where we're going. I'm certain that her perspective and her wisdom could benefit those of us here as we seek to chart a course of our Nation's future without repeating the mistakes of the past.

Mr. Speaker, I'm sure my colleagues join with me today in wishing a most happy 100th birthday for Mrs. Mary Bridges as she begins her second century on this planet.

A THANK YOU TO DR. HERBERT V. FINE FOR 43 YEARS OF SERVICE

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. POSHARD. Mr. Speaker, Dr. Herbert V. Fine is a true American success story. Recently, in my district, the people he has served so faithfully for the last 43 years gave their thanks for all he has done. And I want to tell you about Dr. Fine, in hopes that his example will be a shining light for all those who read about him.

Dr. Fine was born July 2, 1917, to Philip and Bessie Fine in Chicago, IL. His life was typical until the age of 12, when his mother died. The year was 1929, and the stock market crash completed the devastation in his family. Herbert, his brother Melvin, and sister Ethel, were placed in an orphanage because his father could not care for the children. For the next 3 years, until his father remarried, Herbert kept the children together. He was forced to become a man at a very early age.

Dr. Fine attended high school in Chicago, distinguishing himself as a fine musician, and near the end of his studies he decided to become a doctor.

Through great personal determination he was accepted by the Chicago Medical School, a tremendous challenge financially and academically. Dr. Fine was a student and a worker by day, a janitor by night to make ends meet. But the fire of determination kept his will stoked high, and his sister Ethel worked as a bookkeeper to help keep him in school.

During his junior year, Dr. Fine became very ill and was hospitalized. During that time he met a pretty young nurse named Esther Schultz. They eventually were married, and with the help of his wife and sister, Herbert V. Fine became a doctor in 1943.

Dr. Fine served in the Army, was discharged in the fall of 1946, and began his continued training as a physician.

At age 29, he made a decision that symbolizes his career. Looking to help people who needed him, he sought out a small community desperate for a physician. In April of 1947, with help from the Carterville Lions Club, Dr. Fine visited Carterville, IL. With fewer than 1,000 residents and without a doctor for quite some time, Carterville was a poor community of farmers and coal miners who had received little if any medical attention.

In May 1947, Dr. Fine, his wife Esther and their 2-year-old son Rusty, made the journey to Carterville to set up his practice. Dr. Fine's dream had begun, and the town would sleep a little safer.

In 1948 his wife gave birth to twins, Beth and Bruce. Two months later his sister Ethel, who was so instrumental in his success, was killed in a fire at their childhood home in Chicago. Dr. Fine named his practice in her memory, and his prescription pads read "The Ethel Memorial Dispensary" in her tribute. Each day he practices medicine he honors her love and devotion, and the medical books that helped start his practice are often inscribed "To Herbie, With Love, 'ET'."

In the early 1950's Dr. Fine moved his office to 110 North Division Street in Carterville, where it remained until 1988. Converted from an old grocery store, this facility was state of the art, including an x-ray machine. The office was open every day of the week, from 9 a.m. until the last patient was seen. More than 100 people a day would seek attention, even though appointments were unheard of, and every patient was treated, regardless of whether they could pay. If they were sick they received Dr. Fine's care.

Around the holidays people would often bring turkeys, hams, and desserts which were given from the heart. And often Dr. Fine would take those treasures to other families who would otherwise go without.

A fourth child, Alexander, was born in 1956. Dr. Fine had been in Carterville less than 10 years, working 20 hours a day, including house calls, a practice he still keeps. Dr. Fine himself stopped deliverying babies in 1985, but up until that time he brought 2,500 new lives into this world, each delivered with a loving touch and with great respect for the meaning of life.

Dr. Fine was on the staff of Holden and Doctor's Hospital in Carbondale, Marion Memorial Hospital, and Herrin Hospital. He gradually limited his practice to Herrin, and as a member of the Williamson County Medical Society, he was recently honored as "Lifetime Secretary," giving up the post 2 years ago. He has been active in numerous professional societies and community organizations.

On August 29, 1988, Dr. Fine closed the 110 North Division Street office. I am proud to say that location is now where one of my district offices is located, and Dr. Fine helped set a standard for public service that we are obligated and honored to perpetuate.

I should mention these details were provided by his family which has generously shared its love and devotion to help make Dr. Fine's contributions possible.

From an orphan in Chicago to the lifefline for a rural community in southern Illinois. It is an amazing story. It epitomizes the success a person can have and the contribution to the community they can make if they are determined to see it through. It underscores the real strength of our society. And it highlights the brilliance of a man who gave so much that we look to him as an example of a man who made a difference.

Where would we be without the babies he delivered, the children he inoculated against disease, the adults who were given prolonged opportunities to live under his care, and the families who were comforted by his compassion in their greatest time of need?

Dr. Fine, we owe you a great deal, and knowing the kind of man you are, any sort of payment would not only be refused but considered unnecessary. So let us instead simply say, "thank you."

WORKERS MEMORIAL DAY

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SCHEUER. Mr. Speaker, on April 27 and April 28, American workers killed, injured, or diseased while on the job will be remembered during Workers Memorial Day observances taking place across the Nation.

The American labor movement has fittingly chosen this weekend for its observances because it also marks the 20th anniversary of enactment of the Occupational Safety and Health Act, commonly known as OSHA.

This is a time at which all of us should reflect on—and act on—the need to strengthen and improve our Nation's landmark job safety law, as well as other workplace safety and health laws. Coming as it does on the heels of Earth Day, Workers Memorial Day also serves to remind us of the importance of rededicating ourselves to doing all that we can to promote clean and healthy workplace environments.

The Indoor Air Quality Act of 1990, of which I am proud to be an original cosponsor, would go a long way toward doing just that. This proposed legislation, currently being marked up in committee, is intended to help reduce the threat to human health posed by indoor air contaminants. Reducing these contaminants would be accomplished, in part, via the establishment of a coordinated research program and a process for directing and focusing the authorities of Federal agencies toward this goal.

Among other provisions, the Indoor Air Quality Act of 1990: Provides for development of technical and management-practice bulletins to assess technologies for control and measurement of indoor air contaminants; directs the Environmental Protection Agency [EPA] to develop a list of indoor air contaminants and prepare health advisory documents for them—describing the characteristics of the contaminant and the health threats posed at various concentrations—directs the EPA to develop a national response plan identifying actions to be taken to reduce contaminants in indoor air. In accordance with the bill, an interagency council on indoor air quality would be established to coordinate indoor air activities of federal agencies. An office of indoor air quality would also be created within the EPA.

In drafting this proposed legislation, we recognized the importance of involving State and local governmental jurisdictions as well. Indeed, development and demonstration of State and local responses to indoor air contaminaton problems is an integral purpose of our bill. It would authorize funding for Federal grants to support the development and implementation of State strategies for the management and assessment of indoor air quality.

On Friday, April 27, I shall be joining a number of dignitaries from New York City's labor, political and religious communities in paying tribute to the American worker on the occasion of the second annual Workers Memorial Day. I hope that many of my colleagues will, likewise, be participating in similar activities taking place in their areas.

Just as Earth Day and the publicity surrounding it has helped stir our ecological consciousness and strengthen our resolve to protect our environment, I hope that Workers Memorial Day will serve as a clarion call, beckoning us to implement further safeguards to protect the health and safety of America's working men and women.

FEDERAL TAXPAYERS' RIGHT-TO-KNOW ACT

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. WOLPE. Mr. Speaker, "you get what your pay for" has long been a saying for American consumers, but for years the American taxpayers have been left in the dark about where their tax dollars go. That is why today I am introducing the Federal Taxpayers' Right-to-Know Act.

Many of us are hearing from a great number of our constituents who are expressing their views on the various proposal to reduce the Federal deficit. Too often, however, the debate on fiscal policy has been clouded by persistent misconceptions. How many times have we heard, both from within Congress and without, that we could balance the budget if we would only eliminate food stamps or foreign aid or defense spending?

The Federal Taxpayers' Right-to-Know Act would inform the taxpayer about Government spending by requiring that all Federal personal income tax booklets contain two pie charts: One depicting sources of Government revenue and the other showing a breakdown of how the revenue is spent.

Mr. Speaker, I believe the simple step contained in this bill will contribute a more informed public debate on Federal budget policy and, hopefully, to the development of the national consensus necessary to tackle the deficit crisis.

I urge my colleagues to support this initiative and to cosponsor the Federal Taxpayers' Right-to-Know Act.

SOVIET "UNION" IS NO UNION, BUT A PRISON

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SOLOMON. Mr. Speaker, Captive Nations Week was first passed by bipartisan acclaim over 30 years ago. Since that time, however, many Members of this House have spoken and voted as if there was no such thing.

To those Members, it was the United States, not the Soviet Union, that should be held responsible for the suffering that still characterizes this bloody century.

Much of that blood is on the hands of those who never took the Soviet threat seriously and who now regard its retreat as proof it never existed.

But the threat was always very real to those who lived under it for 45 years, and in reality still live under it today.

That reality was outlined eloquently in a March 21 column by Richard Grenier in the Washington Times. I submit it for the RECORD.

[From the Washington Times, Mar. 21, 1990]

"NAUGHTY EMPIRE" LOSING ITS CAPTIVES

(By Richard Grenier)

Does anybody care if the Russians tried to assassinate the pope? It happened so long ago. Back there with the assassination of Abraham Lincoln, wasn't it? Is anybody still interested? So thought The New York Times, apparently, which buried the new KGB defector story strongly supporting the Soviet-instigation thesis inside the paper on page 6, below the fold, and kept out of the heading and lead the boring part about the pope.

And even is the Soviets did instigate an assassination attempt on the pope, would it matter really, compared to the unspeakable evil of exploding cigars that the CIA's fireworks department was thinking of sending Fidel Castro (a man now described as monstrous even in Moscow), and who, spared the cigars, has done for Cuba what Nicolae Ceausescu did for Romania?

The crux of the matter is: Would an assassination of the pope be really evil? Would Rep. David Bonior, Michigan Democrat and still a fervid Sandinista even after the Nicaraguan electoral landslide, consider assassinating a reactionary pope of a comparable level of wickedness to brutally crushing under our iron heel Nicaragua's freedom loving agaraian reformers? Perhaps "naughty" would be a better word for a papal assassination, conveying disapproval but moderation.

Because once you say "evil" you open the door to all kinds of absurdities, like former President Reagan calling the Soviet Union an "Evil Empire," which every sophisticated person knows was bigoted, hateful and might even have made Moscow angry. He obviously should have called the Soviet Union a "Naughty Empire."

And I hope you bad little Muscovities have learned a lesson from Afghanistan, Poland, Hungary, Czechoslovakia, Romania, Bulgaria, Georgia, Armenia, Azerbaijan, Byelorussia, the Ukraine, Kirghizstan, Uzebekistan, Tadzhikistan, Moldavia, Estonia, Latvia, Lithuania, Nicaragua and Ulan Bator. Yes, I do. And the next time I hear you say "Workers of the world, unite!" I'm going to wash your mouth out with soap.

One of the most embarrassing aspects of the expression "Evil Empire," of course, is its inextricable linking with the concept of "Captive Nations," an expression which—and you would need a diabolically long memory to remember this, like six months—used to excite an equally fervent degree of scorn from the cognoscenti, the enlightened.

Were Lithuania, Hungary, Poland and Czechoslovakia really *captive*? How ridiculous! Besides the Russians might get irate if we said things like that. And what good did it do?

It tells you something about the ecstacies of otherworldly dreaming and decline in fortitude that have beset the Democratic congressional delegation in recent decades (but far less so Democratic voters) to recall that once upon a time liberal Democrats voted for Congress' "Captive Nations Week Resolution" just like conservative Republicans.

You have only to read the ringing proclamations of President John F. Kennedy on the honor that history had conferred on America in calling upon her to defend world freedom "in its hour of greatest peril!" And his proclamations of support for "national independence and freedom" for the Captive Nations.

But for decades now, as the tide shifted, as younger brother Edward Kennedy shifted, in fact, the expression "Captive Nations" has appeared in major publications mainly in ironic quotes, often ridiculed as "Cold War rhetoric." When suddenly, mirabile dictu, even such pro-Soviet stalwarts as the Institute for Policy Studies' Richard Barnett have started singing the praises of the "wonderful flowering of democracy in Eastern Europe" (a bit baffling since Mr. Barnett has thought the Soviet system more democratic than ours all along). And it appears that the Captive Nations (ironic quote marks hastily deleted) were captive after all.

Where are all those ironic quote marks today? Where are those exquisite ironists? Why, doubtless celebrating the wonderful flowering of democracy in Eastern Europe, the uncapturing of the nations that in their view were never captured to begin with.

It is quite false to say, meanwhile, (as now is parroted daily) that "no one" predicted the collapse of the Soviet colonial empire. In 1967, if you please, professor Lev Dobriansky, then at Georgetown, published "The Vulnerable Russians," which not only predicted the collapse of the Soviet Empire but pinpointed the fatal flaw which would bring it down: the nationalism of its subject peoples.

The very words "Union of Soviet Socialist Republics" were a fallacy, Mr. Dobriansky insisted. There is no Soviet Union, he wrote, "only Russia and her prison house of nations." It would not collapse in a few years, he warned, but was doomed nonetheless.

We owe a further debt of gratitude to Mr. Dobriansky. He is the author and proponent of the celebrated Captive Nations Week Resolution, first passed by the U.S. Congress to thunderous bipartisan acclaim in July 1959, and the truth of which—after years of scorn—is now writ large on the face of the globe.

What does it feel like to be proved right, and in spades, three decades later, after all the years of disparagement? I'm elated," says Mr. Dobriansky, father of Deputy Assistant Secretary for Human Rights Paula Dobriansky. "But it's far from over. Remember, most of those countries still aren't free.

"When most Americans hear about 'ethnic' disturbances in the Soviet Union they think it's like the U.S., with Irish-American neighborhoods, Italian-American neighborhoods. In the Soviet Union, these are completely independent nations annexed by Russia by force. What I want now is to establish a Liberation Countdown."

AIDS TAKES LEADING JOURNALIST LARRY LEE—AN OLD FRIEND WHO WILL BE MISSED

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FROST. Mr. Speaker, I rise to note the passing of an old friend, Larry Lee, one of northern California's leading journalists. Larry died of AIDS recently and was the subject of a lengthy obituary in the April 8th edition of the San Francisco Examiner, which I am placing in the RECORD today.

Larry grew up in Fort Worth, TX, where he was editor of my high school paper 1 year before I held the same position. He went on to a long and distinguished career in radio and television journalism in the Bay area. It's been 30 years since I last saw Larry; but, I followed his career over the years. He was an extraordinary reporter.

I want to remember Larry by telling you a little story about him from our days in high school. In 1958, Larry ran for president of the Texas InterScholastic League Press Association. He was a decided underdog, so in joining him as his campaign manager, we hit on a novel idea. We bought matching pairs of the brightest red pants we could find and wore them throughout the State convention. This was 1958 and red pants were a novelty.

We campaigned until the very last ballot was cast. Incredibly Larry and his chief opponent wound up in a 43–43 tie for president. They were declared co-presidents for the year, and when the other fellow resigned a few months later, Larry Lee—red pants and all—became State president, an office he held with distinction for most of a year.

Larry Lee amazed people all his life. He was a great talent and will be greatly missed.

[From the San Francisco (CA) Examiner Mar. 8, 1990]

LARRY LEE: "HE WAS LEGIT, THE REAL THING"

(By Burr Snider)

When Larry Lee died of AIDS at Children's Hospital at age of 48 this week, a hot and brilliant light went out of the San Francisco sky. We won't soon see the likes of this many-faceted journalistic superstar.

As a producer, writer, newscaster, idea man, straw boss, indefatigable investigative reporter and all-round intellectual media gadfly, Lee simply had no equal.

His mere presence on a project, newcast or investigation was enough to push the quality of the work to the highest levels of excellence.

Lee first came to San Francisco in 1971 and made an immediate mark in radio, first with the Berkeley public station KPFA, and later as part of the most fearless and iconoclastic radio news show there ever was, "The 5:45 KSAN News."

He'd come from Texas, where he began his career as a copy boy with the Fort Worth Star-Telegram, quickly advancing to assistant state political editor before moving to Alabama to report on the civil rights movement.

Later he covered the space program for the Associated Press, before launching a tenacious two-year campaign to found a public radio station, KPFT, in Houston.

It was at the wild and irreverent KSAN that Lee found his true metier—and a target worthy of his scathing hatred for political chicanery: the Nixon White House. The KSAN news team, led by Lee, took on the Watergate crooks night after night, no holds barred, and pinned them to the mat every time.

When you wanted the real dark nasty conspiratorial stuff, Larry Lee always know where to shine the light.

"He was not the kind of guy you run across often in electronic journalism," says Larry Bensky, national affairs correspondent for Pacifica Radio. "Larry was enormously bright, omnivorously interested in current affairs and thoroughly versed in history and literature, politics and science. And he knew what was really going on like nobody else. One phone call to Larry was worth about a dozen to other people."

Berkeley writer Kate Coleman remembers Lee as a mentor who always demanded your best work.

"There was no fudging on the truth or on excellence with Larry," Coleman says. "He was always telling me my job wasn't to be Miss Nice Guy, and that's a voice I want in my ear the rest of my life. But how I really remember him is a playmate. He was just so much fun, a great game player. He'd come over and we'd have a slumber party, playing dominoes and watching things like 'Bambi,' sitting there crying like a couple of old maids. He could be as highbrow as you wanted, but he could really get down, too."

"He was sort of a William F. Buckley of the left," says radio newsman Scoop Nisker. "He had a brilliance for political insight and a knack for putting bad politicians down without sounding malicious."

"He was the first openly gay person to work in the mainstream media in San Francisco, and he made it so much easier for those who followed," says reporter Randy Shilts.

"We could fight furiously and remain the closest of friends," recalls TV reporter Belva Davis who worked with Lee at both KQED and at KRON-TV, where he headed the prize-winning investigative team at the time of his death.

"I'd go to him for guidance when I was writing my book and people would ask me how a white gay guy could help me write about my black childhood. It was because he was so perceptive, and because he could relate. A very special person."

"For better or worse, he formed my professional character, which I'm told is somewhat surly," laughs Danice Bordett, one of Lee's coconspirators at KSAN, now living in New York. "Larry was equally suspicious of people on either side of an issue. But he was gallant and brave and graceful all the way, and at the end he was still pissed off at the people who were wrecking his country."

"He had a direct and honest and charming manner and he was simply a wonderful journalist," says newsman Dave McQueen, who knew Lee from Texas in the '60s. "At KSAN his theory was that people wanted to be talked to, not read to, so we'd just go in with news clippings and some wire copy and talk the news. Sometimes I'd look over and Larry would close his eyes and just talk and talk and talk, everything flowing out just beautifully."

The author and poet Barry Gifford collaborated with Lee on oral biographies of Jack Kerouac and William Saroyan and became a close friend.

"We had totally different lifestyles, but my family absolutely loved Larry," says Gifford. "He just recently called my daughter and spent three hours trying to talk her out of doing a communications major in college. He said she'd just have to unlearn all that stuff when she went to work. He was just a gas. He taught me how to be a great detective: Keep your mouth shut and don't believe anything anyone says until it checks out. He was legit, the real thing. I still owe him money, for Christ's sake. I want Larry back so I can pay him what I owe him."

A lot of people do.

A TRIBUTE TO HARRY T. HARPER

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BARNARD. Mr. Speaker, I rise today to pay tribute to Harry T. Harper, Jr., M.D., who was recently awarded the American Heart Association's 1990 Heart of Gold Award.

Fully realizing the total inadequacy of words to convey the homage I wish to give Dr. Harper, allow me to review some of the highlights in the life of this outstanding man.

Dr. Harper was born almost eight decades ago in Copperhill, TN, a small town located on the north Georgia border.

He obtained his M.D. degree from Emory University School of Medicine in 1933.

Following an internship at Emory University Hospital, he joined Dr. Virgil P. Sydenstricker at the Medical College of Georgia for a fellowship in Medicine. The next 4 years were productive and exciting, establishing the tone for what the future was to be.

During this time, Dr. Harper collaborated with the cardiovascular physiologist, Dr. William F. Hamilton, and they and their colleagues made medical history with the first direct recording of blood pressure in man. This made possible the development of cardiac catheterization in the diagnosis of heart disease and laid the foundation for open heart surgery.

It was during this period that Dr. Harper did postgraduate work at Massachusetts General Hospital with the world-renowned cardiologist, Dr. Paul Dudley White, with whom he remained good friends for life.

In 1938, Dr. Harper chose to enter private practice in internal medicine with an emphasis in cardiology and, since 1946, has limited his practice exclusively to cardiology, becoming the first physician in Georgia to do so. In addition, Dr. Harper has been practicing medicine longer than any other Augusta physician.

Dr. Harper, however, continued his commitment to education. He became a faculty member at the Medical College of Georgia in 1937, was chairman of the department of medicine from 1942 to 1944 and was made clinical professor of medicine in cardiology in 1952. He served in this capacity until 1982 when he was named professor emeritus by the board of regents. On this occasion, the Medical College honored him with an entire day of activities designated as Dr. Harry T. Harper Day. He received many tributes in recognition of his numerous contributions and a lecture was presented by one of his most famous students, Dr. J. Willis Hurst.

Generations of medical students, interns, and residents attest to Dr. Harper's excellence as a professor. He possesses the rare and marvelous talent of being a master teacher.

Dr. Harper has been outstanding in local medical affairs, having served as president of the Richmond County Medical Society, president of the medical staff of both University Hospital and St. Joseph Hospital, member of the University Hospital Authority and the first physician to be elected chairman of the authority.

Recognition in the State and Nation is evidenced by his service as president of the Georgia Heart Association, as consultant to the Surgeon General and the U.S. Army, as consultant for the Veterans' Administration and as a member of numerous national medical organizations. He gained wide publicity when he was consulting cardiologist for President Eisenhower when the former President suffered a heart attack while visiting in Augusta in 1965.

Thousands of patients with heart disease have benefited from the skilled care delivered with understanding and compassion by Dr. Harper. He personifies the true meaning of the word "physician."

There is yet another important facet of Dr. Harper's life. He is a loving and devoted husband, father, and grandfather. In fact, he recently celebrated his 57th wedding anniversary.

I join the colleagues, friends, family, students, and patients of Dr. Harper in recognizing his distinguished career as a physician and as a wonderful human being.

FREMONT/NEWARK CHAPTER OF AMERICAN GI FORUM CELEBRATES SILVER ANNIVERSARY

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. EDWARDS of California. Mr. Speaker, I rise today to congratulate and pay special tribute to the Fremont/Newark chapter of the American GI Forum of the United States as they prepare to celebrtate their silver anniversary.

The American GI Forum of the United States was founded over 40 years ago in Corpus Christi, TX, as an organization composed primarily of Mexican-Americans who were veterans of the United States armed services. A primary concern of the organization in those early years, was fighting the discrimination many Mexican-American veterans faced when the returned from their World War II service. Then, as now, the American GI Forum was in the forefront of antidiscrimination efforts.

The founder of this organization was Dr. Hector Garcia, whose hard work and dedication paved the way for more chapters to be formed in Texas. Eventually, Dr. Garcia was joined by Vincente Ximenes, and under their leadership the American GI Forum of the United States became nationally recognized, and established chapters nationwide.

The Fremont/Newark chapter was founded in 1964, by Forumeer Louis Cortez, and today it is one of the most progressive and active chapters. Members of the Fremont/Newark chapter have occupied State offices for the GI Forum, and forum members have served in the government on both the city and county levels.

Of particular note is the GI Forum's vital work in the area of education. Recognizing that the preservation of our freedoms depends on education, the forum has been very active in promoting educational opportunity. Over the years, they have given many thousands of dollars in scholarships to deserving students.

The Medal of Honor is the highest military award for bravery that can be awarded to an individual of the U.S. armed services. Over the years, Congress has paid reverence to over 20 members of the American GI Forum by honoring their valor with the Medal of Honor. I am honored to pay special recognition to a group with such distinguished members.

Mr. Speaker, for their work in giving educational opportunity to young people, for helping to instill patriotism in our communities, and for their efforts in working toward an America free of racial and ethnic barriers to equal opportunity, I am proud to salute the Fremont/Newark chapter of the American GI Forum.

IN TRIBUTE TO MARVIN DUNN, JR., OUTSTANDING EDUCATOR

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BRYANT. Mr. Speaker, I am pleased to pay tribute to one of my constituents, Marvin Dunn, Jr. This year is a special one for Mr. Dunn. He is ending a career in education that spans more than three decades. He is fittingly ending this distinguished career as he began it—in the classroom.

Marvin Dunn is currently a sixth grade teacher at S.S. Conner Elementary School in my district, and he is a former administrator with the Dallas Independent School District [DISD]. Mr. Dunn is a distinguished, retired veteran, having served in the U.S. Marine Corps during the Korean War. He earned the Korean Medal, the United States Service Medal, the Legion of Merit, and the Purple Heart.

Like many veterans, Marvin Dunn returned from serving his country to continue his education. Mr. Dunn earned both bachelor of science and masters of education degrees from East Texas State University. Shortly after receiving his masters of education degree, he began his long teaching career with the DISD as a seventh grade classroom teacher.

Marvin Dunn's career in education has been a multifaceted one. In his first teaching post, Mr. Dunn became dedicated to developing curriculum alternatives for the youth attending public schools in Dallas, TX. His commitment to this goal led him away from the classroom to the job of curriculum writer for DISD's Paul L. Dunbar Community Learning Center and then to the position of assistant director of the learning center.

The young people attending public schools in the DISD have benefited greatly from Mr. Dunn's leadership abilities in the educational community. For half of his lengthy career in education, Mr. Dunn was instrumental in the development of broad-based programs for the social studies curriculum of the DISD. In the area of multicultural education, he developed and managed the multiracial social studies

program and served as the manager of the cultural crossroads program for the DISD. The curriculum he designed remains the cornerstone of the DISD's district-wide social studies curriculum.

After a successful career as an administrator, Mr. Dunn chose to return to the educational front lines as a classroom teacher. For the past 8 years, Mr. Dunn has helped prepare a generation of young students attending S.S. Conner Elementary School to meet the challenges and demands of the educational system and life.

Marvin Dunn retires after 34 years of excellence in education. I thank him for his dedication to education, I congratulate him on his retirement, and I ask my colleagues to join me in saluting Marvin Dunn, Jr., one of the many hardworking and dedicated professionals of DISD, for his commitment to education and to children.

TAMAR STIEBER WINS PULITZER PRIZE

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. RICHARDSON. Mr. Speaker, it gives me great pleasure to share with you the news that a New Mexico reporter has won a prestigious Pulitzer Prize.

Tamar Stieber of the Albuquerque Journal has been awarded the 1990 Pulitzer Prize for specialized reporting. Tamar is being recognized for her outstanding reporting detailing the problems associated with L-tryptophan. It was Tamar who broke the story connecting the dietary supplement L-tryptophan with a blood disorder. Tamar's stories led to the nationwide recall of the once popular dietary supplement.

It was Tamar's convincing stories which led me to introduce legislation banning L-tryptophan. Before the Congress had a chance to act on my bill, the Food and Drug Administration called for a voluntary recall of L-tryptophan.

Tamar's outstanding and persistent effort at pursuing this important story accurately reflects the excellent quality of journalism practiced by reporters, editors, and staff at the Albuquerque Journal. The Journal's exceptional editorials and superb local, national, and international coverage should serve as a model for many of our Nation's newspapers.

My congratulations are extended to Tamar and to her colleagues at the Albuquerque Journal. It was a job well done.

Attached for my colleagues review is an article which appeared in the Journal North, which is the Albuquerque paper's Santa Fe edition, detailing Tamar's Pulitzer Prize celebration.

NORTH STAFFER WINS HIGHEST HONOR

L-TRYPTOPHAN STORIES BROUGHT NATIONAL RECALL

(By Johanna King)

ALBUQUERQUE—Journal North reporter Tamar Stieber won the Pulitzer Prize Thursday for her series of articles linking a rare blood disease to the dietary supplement L-Tryptophan.

The stories, which ran in the main editions of the Albuquerque Journal, led to a national recall of the over-the-counter dietary supplement that had been used widely for more than a decade.

"This is a great thing for the Journal North Bureau, which is a close-knit group of really quality journalists," said Stieber's boss, Journal North editor Tim Coder.

Last November, Coder assigned Stieber to what he thought was another flu story.

"She took it and ran with it," he recalled.

"Tamar came back 24 hours later with information about three people who had taken the dietary supplement. Right then, we knew we had something that was potentially big."

Stieber wrote about three northern New Mexico women who had been taking L-Tryptophan and later were diagnosed with eosinophilia-myalgia syndrome (EMS). The rare blood disease causes incapacitating, often debilitating muscle pain. The women were taking L-Tryptophan for either insomnia or premenstrual syndrome.

Stieber interviewed several doctors and health officials who refused to link the disease with the dietary supplement, she said. Then she talked to Dr. Gerald Gleich of the Mayo Clinic.

"He's the one who was willing to say three women with the same symptoms taking L-Tryptophan was not a coincidence."

Coder, Stieber and Journal editors in Albuquerque decided not to run the first story until five days after it was written to avoid creating a public scare.

"We felt a responsibility to get the story right, to get it balanced," Coder said.

Stieber, 34, said she didn't realize she had written a Pulitzer Prize winner.

"It was an everyday, daily story," Stieber remembered. "I was trying to meet deadline. I was trying to get the facts right."

Since the first story ran on Nov. 7, at least 1,463 EMS cases, including 21 deaths, have been linked to L-Tryptophan, according to the Centers for Disease Control in Atlanta. Thirty-three cases have been reported in New Mexico.

A couple of weeks after the first story ran, the U.S. Food and Drug Administration called for a national voluntary recall of products in which L-Tryptophan is the major component.

"There was a lot of human suffering as a result of this disease," Coder said. "We hope in some way we alleviated some of it or prevented more suffering."

Stieber, who has been with Journal North about a year, said she was speechless when she first learned that she had won the coveted award.

"I'm totally dazed," she said.

The Pulitzer Prizes, recognizing outstanding work in journalism and the arts, are presented annually by Columbia University.

Bob Christopher, the administrator of the prizes, said the 16-member panel of judges "honed right in" on Stieber's stories because of the initiative shown in the reporting and their national impact.

"In some categories, there's a lot of debate. There wasn't on this one," he said.

Stieber says she owes a debt of gratitude to her Journal North colleagues for pitching in to cover her beats so she could concentrate or the L-Tryptophan story.

"Not only did they not resent it but they gave me support and were very excited about the story," she said. "They're a great bunch of people—and journalists."

Stieber has worked for the Journal for 10 months and has been a full-time reporter since 1987, where she began working for the Sonoma Index-Tribune in California.

TINKERING WITH SOCIAL SECURITY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HAMILTON. Mr. Speaker, I would like to insert a recent article by Representative ANDY JACOBS into the CONGRESSIONAL RECORD. Mr. JACOBS is a leading expert on Social Security, and I found his comments on this issue thoughtful and informative. I recommend the following article as important reading to all my colleagues.

[From the Indianapolis Star, Apr. 3, 1990]

TINKERING WITH SOCIAL SECURITY

(By Andy Jacobs, Jr.)

Truth is elusive and its interpretation the prerogative of each individual in a free society. It therefore should not be surprising that opinions differ about a current proposal to repeal one of the most prudent parts of the Social Security bailout law.

Because of the stiffest recession since 1929, the Social Security system in 1983 was on the verge of having insufficient funds to meet its obligations. Ronald Reagan, Tip O'Neill and Bob Dole struck a three-part compromise to make Social Security secure. Retirees with incomes above a certain level would pay income tax earmarked to one-half their Social Security benefits, and workers would pay gradually more in Social Security taxes both for obligations to current retirees and to make an additional investment to meet the surge in claims anticipated when the baby boomers would retire 30 years later.

The current proposal to repeal the investment part raises some serious questions.

Are Social Security surpluses being used to obscure the magnitude of annual additions to the national debt? Yes.

Can this subterfuge be stopped without discontinuing the process wisely begun in 1983 to build up a Social Security nest egg for baby boomers when they retire in the next century without enough people left in the work force to make the traditional "pay as you go" arrangement work? Also yes.

The scheme to have Social Security surpluses create the illusion of smaller federal government deficits is called the unified budget. It was the crafty invention of the Johnson administration to hide the cost of Vietnam by pretending that income to the federal trust funds is income to the regular government accounts, which are called the federal funds budget.

Subsequent administrations and congresses have used the same ledger legerdemain to mask the excesses of their deficit spending.

The way to end the practice of pretending Social Security surpluses are income to the regular federal government is not to repeal the surpluses, but simply to repeal the unified budget law and thus go back to the pre-Johnson days when federal trust funds were officially reported for what they are: self-financing entities distinctly separate from the operating budget of the U.S. government.

Contrary to popular myth, the Social Security surplus is not being used to reduce the national debt. It is part of the national debt. The surplus is not being spent to pay

current operating expenses of the federal government. Proceeds from interest-bearing bonds purchased with Social Security surpluses are being spent to pay current operating expenses of the federal government.

If you put $1,000 in the bank and I am foolish enough to borrow $1,000 from that bank to go on vacation, am I merely spending your money? Or am I the reason your money is earning interest for you?

How is it that U.S. government securities are "junk bonds" when it comes to Social Security trust funds investment, but the same securities, according to the best informed investment authorities, are the safest investment possible when it comes to everybody else?

From the very beginning of the system, Social Security trustees have been required by law to invest the surpluses in U.S. government securities for the obvious reason that the ship of state would be the last to go down. And with one unfortunate mid-1980's exception, which was quickly corrected by Congress, every president has kept faith with the law.

I may borrow $1,000 for a vacation, but the important question for you is whether your bank has made the loan to someone who will pay it back on time and with interest.

Social Security Commissioner Gwen King is on the right track when she says the important question for Social Security participants is whether the federal government is so bogged down with debt to everybody else that it won't be able to pay the bonds held by Social Security. Right now the loans from Social Security amount to about 5.6 percent of the common debt. But if the federal government doesn't start living within its means, it will have to scrape hard to pay the principal and interest it will owe to the trust fund for the baby boomers when they retire.

The key to keeping the future bearable in this regard is for the federal government to stop borrowing money from others, especially foreign others to whom Uncle Sam is now paying effectively higher interest rates than are being paid to his own citizens on the same kind of securities.

We should start paying off the entire debt by installments of 2.5 percent annually so that the pain from past profligacy can be spread evenly over the next 40 years. The money would be paid back to investors who could be expected to reinvest in the private sector and boost our capacity to produce.

Regarding the proposal to rescind the decision to save for the baby boomers' future, what has changed since 1983?

The Social Security tax is no more regressive now than it was then. The "weighted" benefits are no less progressive. The sham of a unified budget is no more deceiving now than in 1983. In fact, it is less deceiving. Despite the unified budget gimmick, the real federal government operating deficit this year is $270 billion, not the $165 billion proclaimed by the government.

But let's suppose we did rescind the part of the Social Security tax being used to build up the next egg. Does anyone really believe the federal government would borrow less? Or would it borrow a greater amount from the Japanese?

And what would happen in the 21st century when the dramatically reduced workforce could not contribute enough in payroll taxes to cover the baby boomers' benefits, and the U.S. Treasury did not have a legal obligation to pay off bonds held by the trust fund? Would the government operating budget, with its broader-based tax, rescue the bankrupt system without changing it from the dignity of earned rights into a hat-in-hand welfare system?

It has been proven that the political process can sell a lot of fantasy, but even the U.S. government cannot repeal reality. And the reality is that while enticements to stop building up the baby boomers' retirement fund are tempting, they invite a course that is hell-bent for disaster.

BISHOP KEOUGH HIGH SCHOOL HISTORY CLASS EARNS STATE TITLE

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Tracey Buglio, of Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: presentation, overall knowledge of the Constitution, and application of the principles of the Constitution.

For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Tracey and her classmates were able to achieve excellence. Tracey and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Tracey Buglio and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Tracey and her classmates good luck in the national competition.

THE WAR ON DRUGS WILL BE WON THROUGH DEMAND REDUCTION

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. STARK. Mr. Speaker, I believe it was the Bush administration Attorney General who said, "if you want to lose the war on drugs, leave it just to law enforcement."

He's right, for the truth of the matter is that regardless of the exceptional work and commitment of thousands of law enforcement men and women, we simply cannot prosecute our way out of this problem. We can do worthwhile short-term items like greatly expand the State and local law enforcement grant funding program, and I've commended the administration for improving the distribution of these funds this year. We not only increased the total funds, we shortened the length of time involved in getting the funds to the front lines.

Regardless, it's time we looked at the drug problem as not only a law enforcement problem, but a health problem as well. The men and women of law enforcement on the front lines realize this, and recent testimony before Congress brings it home.

The primary successes in our efforts have been achieved on the demand-side of the equation. The enhancement of drug education awareness programs, improvements in drug treatment services, and the expansion of drug prevention programs like law enforcement-supported Project D.A.R.E.

The international drug fighting community has collectively come to realize that the only way to win a war on drugs in the long-term is through better, expanded demand-side solutions. The Christian Science Monitor's coverage of the recent international summit held in London is encouraging. I offer it to my colleagues for consideration:

[From the Christian Science Monitor, Apr. 16, 1990]

DRUG SUMMIT FOCUSES ON CURBING DEMAND

(By Alexander McLeod)

"If words could win wars, the international drug crisis would be over already."

The remark came from an Australian at a three-day world ministerial drug summit in London at which 112 nations committed themselves to a renewed attack on the abuse of chemical substances—in particular, cocaine.

But the gathering—sponsored by Britain, the United Nations, and the World Health Organization—promised more than the delegate's sardonic comment suggested.

David Waddington, Britain's home secretary, chaired the proceedings and warned at the outset that the worldwide campaign against hard drugs had been losing ground. What was needed, he said, was new thinking and new approaches.

By this measure, the conference, which cost £1 million ($1.6 million) to stage, may turn out to have been a bargain.

There was impressive support for a swing from excessive reliance on curbing the supply of hard drugs toward curbing demand, by alerting people to what Prime Minister Margaret Thatcher called "the terrible consequences of drug abuse."

Her six-point strategy outlined to the conference, and later adopted, included:

A renewed drive to persuade young people that drugs are a peril.

Explicit advertising and publicity to deter potential addicts.

A strengthening of family ties, with the aim of creating barriers against loneliness and deprivation.

Earlier identification of the symptoms of drug abuse.

Improved treatment of those already dependent on drugs.

Total resistance to calls that drug taking should be made legal.

The British prime minister declared: "Reducing demand may be less dramatic and newsworthy than arresting traffickers, but without customers, the drug traffickers would soon be out of business."

United Nations Secretary-General Javier Pérez de Cuéllar noted that the Thatcher strategy was a logical follow-up to last February's drug summit at Cartagena, Colombia, attended by the United States and the three Andean cocaine-producing countries.

He said the need was to strike a better balance between halting international drug trafficking and hitting at the economic, social, and psychological factors that result in people deciding to obtain and take drugs.

The magnitude of the task of eradicating drug abuse worldwide was brought home to conference attendees over and over again.

According to UN estimates, the trade is now worth $500 billion a year—more than the global profits of the oil industry, another product whose marketing is controlled by a cartel.

Last year, 200 tons of cocaine were seized by police and customs officials around the world. But a US delegate said that that represented only a fraction of the global trade, which still appeared to be on the rise.

In pursuit of the strategy of persuading young people to avoid drugs, the Thatcher government has decided to target seven areas of Britain where, abuse is a major problem.

Local drug prevention teams will set to work in Birmingham, Brighton, Liverpool, and four London boroughs.

The teams will cooperate with central and local government agencies to produce what a Home Office minister called "a coherent policy to help young people to resist being drawn into the cycle of drug abuse."

If successful, the seven pilot schemes will become models for a more extensive antidrug network in many parts of Britain, the minister said.

Similar programs in the Netherlands have shown encouraging results.

Although the swing away from curbing supply toward reducing demand was probably the most significant development at the drugs summit, there was plenty of stress on the continuing need for watchfulness as new narcotics routes are developed by the traffickers.

About half of the drugs entering Europe, the conference learned, came via Spain, but there was a new trend: the opening up of a "Balkan corridor" for heroin from India and Pakistan.

Douglas Tweddle, Britain's chief customs investigation officer pinpointed Czechoslovakia, Bulgaria, Romania, and Yugoslavia as countries that needed to be carefully watched.

Another unwelcome trend, identified by Antonio Gava, the Italian interior minister, is that criminal teams from South America are setting up laboratories in Europe and using them to process coca paste into cocaine, which is later distributed widely in European countries.

Statistics show that seizures of cocaine in Europe are increasing. They rose from 2,400 kilograms in 1987 to 6,100 kilograms last year.

But, according to an Interpol report mentioned at the conference, the total movement of cocaine into Europe has also been increasing rapidly.

The implication of this, according to a French delegate, is that higher seizures merely reflect the growth in the European narcotics trade.

BUDGET LATE AGAIN

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. PORTER. Mr. Speaker, most Members probably don't realize that an important legislative deadline passed this weekend without being met. Of course no one should feel bad about not knowing. For some reason, the powers that be here in the House don't say much about certain deadlines.

What was the deadline? By Sunday, April 15, according to the Balanced Budget and Emergency Deficit Control Act of 1985, the House was supposed to have completed action on the concurrent resolution on the budget.

The appropriations process cannot properly begin until the budget is adopted, but once again we have missed the deadline and are on target for another year of budget blunders.

With 6 months to go before our target adjournment date we are laying the groundwork for another continuing resolution by ignoring budget deadlines. This is irresponsible and just plain dumb.

There is still time to get on track and complete action on all 13 appropriations bills before the target adjournment date in October, but we need a budget to do this and we need one now.

A TRIBUTE TO LLOYD MICHAEL

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today a gentleman who has made a significant and critical difference to the people of southern California, Lloyd Michael of Alta Loma. On April 28, 1990, he will be honored upon his retirement for his many years of service to the community as general manager of the Cucamonga County Water District.

Lloyd Michael was born in Pomona, CA, on August 20, 1923, and attended grammar schools in LaVerne and Ontario, graduating from Chaffey High School in 1941. Following high school, he attended California State Polytechnic in San Luis Obispo. He enlisted in the U.S. Army Air Corps in 1942 and spent over 2 years in Europe during the war years. Shortly following his enlistment, Lloyd married Marian Kramer. They are the proud parents of four children—Dennis, Marianne, Anita, and Virginia—and six grandchildren.

Lloyd Michael was a general contractor in partnership with his father-in-law, operating Kramer Quality Construction from 1946 to 1952. He was the owner/operator of the Euclid Avenue Lumber Co. from 1952 to 1960 and owner/operator of citrus groves from 1950 to 1972.

Michael became a member of the board of directors of the Cucamonga County Water District in 1968 and served as president of the board for 2 years. In August 1972, he was appointed general manager of the Cucamonga County Water District.

Michael is a member and past president of the Rancho Cucamonga Rotary Club and a Paul Harris Fellow. He is presently serving on the San Antonio Community Hospital Foundation board of directors. For 12 years, he served on the Alta Loma School District board of trustees, several years as president. He is a charter member and past president of the Ontario/Upland Optimist Club as well as a member of the Rancho Cucamonga Chamber of Commerce. In addition, he is a past president of Orange Belt Lumbermen's Association and is involved with several mutual water company boards as well as citrus packing house boards.

Mr. Speaker, I ask you and our colleagues to join me today in recognizing the many achievements and contributions made to our community by Lloyd Michael upon his retirement. His commitment and hard work over the years has clearly made a difference to us all.

HONORING OUR VOLUNTEERS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LAGOMARSINO. Mr. Speaker, since we will be observing National Volunteer Week next week, I want to take this opportunity to recognize a special group of volunteers, the Community Memorial Hospital Auxiliary of Ventura, CA.

These volunteers serve selflessly, providing our greatest natural resource—human resource, to a world of need.

Each year, volunteers give freely of their time, energy, and talent. The only payment they seek is the thank you or a smile that comes with a job well done.

In my part of California, there is a long tradition of men and women volunteers who perform work of the highest quality. They brighten the lives of others while helping to create a healthy, productive, and humane society.

On behalf of myself, the people of Ventura, and the U.S. House of Representatives, I take great pleasure in honoring the volunteers of the Community Memorial Hospital Auxiliary and know my colleagues will join me in saluting their dedicated, compassionate, and continuing efforts.

TRIBUTE TO INSURANCE WOMEN OF TRUMBULL COUNTY

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the insurance women of Trumbull County who will be participating in National Insurance Women's Week, which runs from May 20 through May 26, 1990.

Professional insurance women have made significant contributions to the insurance industry. They have been extremely effective in

promoting public awareness of important issues such as tort reform, automobile safety, and the problem of drinking and driving.

There are more than 20,000 women in the professional insurance industry. They have made outstanding contributions and have earned recognition for their significant accomplishments in the vital insurance industry.

Mr. Speaker, I would like to take this opportunity to praise the insurance women of Trumbull County for their exceptional work in the insurance industry. These hardworking women deserve recognition, and I am proud to support National Insurance Women's Week.

NURSES' WEEK IN THE 6TH DISTRICT OF PENNSYLVANIA

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. YATRON. Mr. Speaker, today I rise to encourage my colleagues to join me in recognizing the invaluable contributions of the nursing profession to the health and well-being of the district's citizens. Nursing is a demanding occupation, and nurses are efficient, knowledgeable health care professionals who have assumed numerous leadership roles in the management and delivery of vital patient care services. Therefore, the week of May 6 through May 12 has been chosen as a time to honor these dedicated nurses, and to give their contributions and hard work the special recognition and praise they so richly deserve.

The nursing profession is fully committed to the promotion of health, the prevention and eradication of disease, and the delivery of quality health care. the competence and skill of the district's nurses is evidenced by high quality of our daily lives.

Dramatic changes are occurring in the way that we meet and pay for our health care needs. Simultaneously, the emphasis on cost effectiveness, and the rapid growth of medical technology, have given new meaning and direction to nursing care. Nurses have met the challenges of the rapidly evolving health care system while continuing to provide safe, conscientious, dependable, and compassionate care for all. Their tenacious and selfless efforts to serve humanity deserves to be given special appreciation.

Mr. Speaker, it is indeed a pleasure for me to recognize these invaluable health care professionals before you and the other Members of the House of Representatives, as well as the rest of the Nation. I urge my colleagues to join me in saluting the nurses of the Sixth District of Pennsylvania, and all nurses across the country, for their dedication and efficiency. Moreover, I wish all nurses continued success and good fortune in the future.

TRIBUTE TO STUART C. KROESCH

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SANGMEISTER. Mr. Speaker, it is with great pride that I rise today to pay tribute to an outstanding citizen of my district and a longtime friend, Stuart C. Kroesch of Joliet.

Stuart C. Kroesch has a long and exemplary history of service to his fellow man, both in the public and private sector. In the 50 years since he was admitted to the Illinois Bar, Stuart Kroesch has used his ample legal skills for the betterment of his community.

He has served on the criminal justice committee of the Will County Legal Assistance Program and as a member of the Joliet Elementary School Board in the 1950's. He has also been active in the Easter Seal Rehabilitation Center, the Will County United Way, and the Illinois and Will County chapters of the Humane Society.

His civic and professional memberships include the Will County, IL and national bar associations, Toastmasters, and the City Club. Mr. Kroesch is also appreciated by those who work for him, as he has been honored as "Boss of the Year" by the National Secretaries Association and the American Business Women's Association.

Among all of his good works, Mr. Kroesch can point proudly to his 41 years of membership in and legal assistance to the Joliet chapter of the National Association for the Advancement of Colored People. He became involved with the NAACP when the cause of civil rights for African-Americans was much less popular than it is today. Since 1949, Mr. Kroesch has provided technical assistance to the Joilet NAACP on many occasions.

Mr. Kroesch's championing of the disadvantaged and disenfranchised is all the more inspiring when you consider he has overcome his own disadvantage, blindness.

In view of Mr. Kroesch's years of unselfish contributions to his community and the NAACP, he will be honored with a life membership in the organization at its Freedom Fund dinner April 28.

Mr. Speaker, the people of Joliet are fortunate to have a community-minded gentleman like Mr. Kroesch to remind them that not all of their fellow citizens have equal opportunities and advantages. I salute my friend Stuart C. Kroesch on receiving this honor and wish him well in the future.

KANSAS STUDENT WINS IN SCRIPTWRITING CONTEST

HON. JAN MEYERS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. MEYERS of Kansas. Mr. Speaker, each year the Veterans of Foreign Wars and its ladies auxiliary conduct the Voice of Democracy broadcast scriptwriting contest. I am pleased that one of the top 12 winners in this year's contest is Tyson Brumbaugh Cram of Overland Park, KS.

Participation in the event has grown to 137,000 students competing for $56,000 in scholarship money. This year's theme for the contest was "Why I am Proud of America."

Tyson, a high school senior at Shawnee Mission West, eloquently captures the essence of the American people. I wish to congratulate him in bringing to our attention that which truly makes America great. The text of Tyson's speech follows:

WHY I AM PROUD OF AMERICA

(by Tyson Cram)

The Little Blue Engine looked up at the hill. His light was weak, his whistle was shrill. He was tired and small, and the hill was tall, And his face blushed red as he softly said, "I think I can, I can, I can, I think I can." So he started up with a chug and a strain, And he puffed and pulled with might and main. And slowly he climbed, a foot at a time, And his engine coughed as he whispered soft, "I think I can, I think I can, I think I can!" With a squeak and a creak and a toot and a sigh, With an extra hope and an extra try, he would not stop—now he neared the stop—And strong and proud he cried out loud, "I think I can, I think I can, I think I can!" He was almost there, when—CRASH! SMASH! BASH! He slid down and mashed into engine hash on the rocks below . . . which goes to show if the track is tough and hill is rough, THINKING you can just ain't enough!

This simple little poem, by Shel Silverstein, demonstrates the main reason why I am proud of America. Though we occasionally make the wrong decisions, or at least, unwise ones, we are always certain in what we do. When we are finished debating about whether or not to do something, we act. There is no insecurity involved. Although we are not always right, at least we know that we are doing our best. We do not try; we do.

With all of the problems that plague the American people—hunger, the homeless, crime, poor education—it is amazing that we have been able to last as long as we have. But when one realizes that we have brought our country to this level of technology in a mere two hundred-odd years, we must be proud of America. We have accomplished more in a couple of centuries, with a new form of government, than has any other country in the world. And all of this because we did not try; we did.

We have truly accomplished. We have abolished the concept of slavery, and our example has echoed around the world. Now, Saudi Arabia is the only country in the world where slavery is still legal. We have reduced our crime rate. Although we are still bothered by crime and probably always will be, the problem is nowhere near as the crime rate in the late 1920's and early 1930's in metropolitan areas such as Chicago.

But what stands out for me is the fact that we do not try to help people; we do help people. It is impossible now to travel throughout the United States without seeing an advertisement or a bulletin for one cause or another, be it new organizations such as Greenpeace or Amnesty International, or even older organizations like the United Way and the Salvation Army.

When the San Francisco area was plagued by earthquakes, the American people banded together to help. Thousands of dollars worth of food and clothing, as well as

money, were sent to those whose homes had been destroyed by this catastrophe. And, even earlier than this, the Americans showed their support when Baby Jessica fell down a well in Texas, and no one knew whether she was alive or dead.

But we do not limit our support to the United States. We are not only concerned with our own country; we make the world a better place as well. We send tons of grain to other countries every year, countries that need our support, as well as food.

And isn't that most important? Isn't caring about others, others less fortunate than ourselves, what America is all about? America was founded by outcasts and refugees from larger uncaring nations; who better to understand and be empathetic to the agonies and injustice suffered by others?

Unlike the Little Blue Engine, we do not try to succeed; we do succeed. If we can't get over the hill, we will go around it or cut through it. We know that no matter what, we will get through. For we know that, all in all, "Thinking you can just ain't enough!"

IN HONOR OF MAX J. SCHMIDT

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LOWERY of California. Mr. Speaker, I rise today to call the attention of my colleagues and the American people to the accomplishments of a distinguished San Diegan.

Max J. Schmidt is a remarkable individual who has dedicated himself to the betterment of his community and fellow San Diegans. His efforts have been instrumental in the design and development of San Diego County, and his devotion to public service is truly commendable.

Max was born on February 21, 1926, in Burglenfeld, Germany. Shortly after his birth, the Schmidt family emigrated to the United States and settled in Wisconsin. Max later obtained a degree in landscape architecture at the University of Wisconsin.

Like many great Americans of our age, Max began his adult life in service to his country. He joined the old Army Air Corps in 1944 and completed a tour of duty in the South Pacific.

In 1951, Max moved to San Diego and would spend the next 39 years changing the environment of all of its citizens. After working briefly as a landscape architect, he hired on as a planner for the county. He soon moved on to become a supervising planner with the San Diego City Planning Department, which was responsible for transforming a modest, undeveloped community into a modern, Sun Belt city.

Through his work with the planning department, Max has helped shape San Diego into one of America's most beautiful and livable cities. Anyone who has visited Mission Bay, Mission Valley, or Centre City has seen his vision and felt his genius.

For the past few years, Max has overseen the engineering and planning functions of the Centre City Development Corp., where he has been one of the major designers of the revitalized downtown district, its convention center, Horton Plaza, and several residential parks.

Mr. Speaker, in many ways, we have Max to thank for making San Diego a thriving, inviting, urban center. His remarkable work will touch San Diegans today and every day for the rest of their lives. Please join me in honoring this farsighted, dedicated American.

IN RECOGNITION OF LT. STEPHEN R. CHAPIN, JR., U.S. NAVY

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. BYRON. Mr. Speaker, it gives me great pleasure today to pay tribute to my constituent, Lt. Stephen R. Chapin, Jr., U.S. Navy. In May, he will be leaving his position as congressional liaison officer for the Secretary of the Navy to the House of Representatives.

I nominated Lieutenant Chapin for appointment to the U.S. Naval Academy in 1981. He distinguished himself as a midshipman, graduating 20th in a class of 1,049. He also excelled as a battalion commander and as a member of the varsity cross country and track teams. A secretary of the Navy distinguished graduate, Lieutenant Chapin earned the Class of 1912 Award as the Naval Academy's top political science graduate. In addition to his bachelor's degree from Annapolis Lieutenant Chapin also earned a master of arts degree in political science from Georgetown University.

Following graduation, Lieutenant Chapin completed the Navy's surface warfare officer school and was assigned as ordnance officer, damage control assistant, and auxiliaries officer on U.S.S. *Doyle* (FFG39). Lieutenant Chapin's outstanding service on *Doyle* included several deployments as part of the Navy's expeditionary force to the Mediterranean Sea, Indian Ocean, and Persian Gulf.

Based upon his proven performance as a fully qualified surface warfare officer, Lieutenant Chapin was selected to represent the Navy on Capitol Hill. During his tour, many of my colleagues and I have come to rely on his excellent support. It is my understanding that upon completion of his current duties, Lieutenant Chapin will transfer to the Naval Reserve and return to his roots in Maryland. He will continue his public service in the best tradition of our Nation's citizen-soldier.

Lieutenant Chapin's dedication and commitment to the Navy and the Nation will be missed. It gives me great pleasure today to join with his family and friends in wishing Lieutenant Chapin success and happiness in all of his future endeavors.

MRS. MARGARET ORTINAU-SIMONS TO RETIRE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HYDE. Mr. Speaker, during her 19 years of devoted and nurturing service to handicapped children and young adults, Mrs. Margaret Ortinau-Simons has illustrated once again that hardworking, conscientious individuals can have a major impact in this world.

On Friday, April 20, friends, family and colleagues will gather at the Grand Swiss Hotel in Chicago to mark her retirement from Ada S. McKinley Community Services, Inc. and celebrate her years of service to some very exceptional people. Retirement sometimes has a bitter-sweet flavor. Sweet because of the recognition of hard work and responsibility, yet bitter with the realization that those years of challenge are completed.

Margaret began her career with McKinley in 1971 and rose through the organization to become director of the Division of Family Services and Schools. Her efforts have resulted in development or expansion of programs benefiting developmentally disabled, mentally retarded, and behaviorally disordered children of all ages, foster children, poverty level, and delinquent youths.

She has helped shape legislation at the State and Federal levels to cope with the needs of these children, and has served as a consultant to the U.S. Department of Education, the Illinois State Board of Education and on a number of State and locally-sponsored education task forces.

Margaret is the past president of both the Illinois Affiliation of Private Schools for Exceptional Children and the Chicago Council for Exceptional Children. She has served as a visiting faculty member at Chicago State University, Northeastern Illinois State University, and Northern Illinois University. She is active in the United Way of Metro Chicago.

Margaret lives in Elmhurst, IL, with her husband J. William Simons. With her first husband Clarence J. Ortinau, who is deceased, she is the mother of two sons and is the grandmother of eight.

Despite her retirement from McKinley, I don't expect Margaret to shirk from a new frontier. I suspect she is making plans for some new endeavors, and I wish her all the best.

TRIBUTE TO GREAT NECK NORTH HIGH SCHOOL AND THE SCHOOL COMMUNITY

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SCHEUER. Mr. Speaker, the quality of education provided by America's public elementary and secondary schools has been the subject of heightened nationwide concern, debate, and discussion in recent years. We live in an era when millions of our youth are graduating from school as functional illiterates, many unable even to achieve minimum competency in basic subjects. Worse yet, millions of our young people are leaving school without even graduating.

Against this ominous backdrop, there are, of course, individual schools that stand out as sterling exceptions—as educational institutions where much learning does take place, where young people are encouraged to excel academically and do. The John L. Miller Great Neck North High School in Great Neck, Long

Island, is widely regarded as among the Nation's finest secondary schools, by such esteemed organizations as the Carnegie Foundation and the Institution for Educational Leadership at George Washington University, as well as by the National Association of Secondary School Principals.

While statistics in and of themselves may not always be all that revealing or important, the fact that over 70 percent of Great Neck North High School's more than 1,000 students achieve a "B" average or better—and that 84 percent of its most recent graduating class have opted to obtain a higher education at 4-year colleges and universities, including many of our Nation's most prestigious institutions of higher education—is certainly indicative of something very positive. These statistics alone speak volumes about the school and about a community of families that instill the importance of education in the minds of their children.

Although the fact that 129 members of Great Neck North's Class of 1989 earned New York State Regents Scholarships, and that two were awarded highly coveted National Merit Scholarships, may be a testament as much to the students themselves and to their upbringing as to the school and its fine staff, there can be no doubt that the school has provided them with the tools, mechanisms, inspiration, and opportunities for academic achievement. Advanced placement examinations in 18 subjects were offered by the school last year, as well as creative alternative-education programs, remedial programs, and English-as-a-Second Language programs designed to meet the individual needs of particular segments of its student body.

But perhaps the most telling example of Great Neck North School's success is the fact that 97.2 percent of entering freshmen and women graduate, and do so in a school district where the educational standards are very high.

On April 29, Great Neck North High School will mark its 60th anniversary. I am pleased and proud to join with the students and staff of Great Neck North High School, as well as the Great Neck Union Free School District's board of education and central administration and the Great Neck Schools' community at large in honoring the school on this important day. More than that, I salute them for their commitment to—and diligence in fostering—school and home environments in which our young people are encouraged to learn and to become all they are capable of being.

SALLY REAMES, EXECUTIVE DIRECTOR, PORTAGE COMMUNITY OUTREACH CENTER

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. WOLPE. Mr. Speaker, I want to pay tribute to a constituent and very special friend of mine, Ms. Sally Reames, the executive director of the Portage Community Outreach Center [PCOC]. On April 18, Sally will be honored by her friends and colleagues as she leaves her position after 9 years of dedicated service.

Sally began her career with PCOC in 1981 and is leaving behind a remarkable legacy of community service and achievement. It all began with the recognition that transportation services were sorely needed by handicapped persons in the community. In 1981, PCOC was successful in securing funding for a van equipped with a wheelchair lift which provided over 360 one-way trips per month to Portage residents with no means of transportation. In 1982, PCOC expanded the focus of the agency to provide direct assistance—clothing, food, shelter, and financial aid—to individuals and families in crisis. This initiative developed into a self-help program. Under Sally's leadership in 1983, a successful capital fund drive was launched for construction of a new facility. In 1987, a latch key program evolved from the highly successful self-help workshops, and the agency's focus began to encompass activities for youth. These activities today include tutoring programs, volunteer opportunities, the "Hire a Teen Program," and recreations. In the same year, PCOC, under Sally's direction, brought together a committee of "cruisers," parents and business owners who actively work toward conflict resolution and development of positive alternatives to "cruising."

Mr. Speaker, over the years, Sally Reames' commitment to her community, and her amazing creativity and resourcefulness, have contributed greatly to improving the quality of life of countless numbers of Portage residents. The care and concern that have always been present in her approach to local problems have earned her the respect and admiration of all who have been privileged to work with her.

I know my colleagues will want to join with me in congratulating Sally Reames for successful leadership of the Portage Community Outreach Center these past several years, and in wishing her continued success and happiness in the years ahead.

AMERICANS WANT MORE, NOT LESS, ALTERNATIVES IN CHILD CARE

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SOLOMON. Mr. Speaker, even as the juggernaut of child care legislation rolls on, it might be appropriate to pause and reflect on what people are thinking in the heartland of America, outside the beltway and the distortion of Washington special-interest politics.

To that end, it is my pleasure to enter in today's RECORD a recent editorial from my hometown newspaper, the Post-Star of Glens Falls, NY.

Like other, similar expressions of common sense, the editorial reminds us that the American people want less, not more, involvement by the Federal Government in the area of child care. Give American parents more, not less choice. Give them tax credits and vouchers that allow them to choose the method tailored to their needs, and the care givers with whom they feel most comfortable. We should discard immediately our presumption to know better than parents what is good for their children.

I commend this editorial to the attention of every Member.

[From the Post-Star, Apr. 2, 1990]

BUSH SHOULD STAND FIRM ON CHILD CARE

With a growing number of mothers entering the work force, Republicans and Democrats alike generally agree on the need to expand the scope of federal child care programs. But this good intention is being jeopardized by the exorbitant bidding war taking place on Capitol Hill.

Last year, President Bush put forth a reasonable proposal to provide poor families with income tax credits or cash payments of up to $1,000 a year for each child under age 4. The strength of this proposal is its sheer simplicity. People who most need the federal assistance would receive it directly and thus be better able to choose the day care most suited to their children. No large government bureaucracy would be created to administer the Bush program, and its total cost would be approximately $5 billion during the next three years and $2.5 billion per year thereafter.

Not surprisingly, Democrats in Congress promptly raised the child care stakes to extravagant levels.

Last summer, the Senate approved the Act for Better Child Care Services, which would cost $10.3 billion during the next four years. Although the measure contains a modest tax credit provision, many of the credits would go to middle-class families who are less in need of financial assistance. The bill would also create a cumbersome federal bureaucracy to administer government-established child care standards.

Last week, the House approved a five-year, $27.5 billion child care package. Like its Senate counterpart, the elephantine Early Childhood Education and Development Act proceeds from the flawed premise that the government must play a larger role in determining how families spend their child care dollars. Under the House bill, the government would decide who is qualified to provide child care services.

In addition to an expanded income tax credit, the bill would increase block grants to states for child care services and expand Head Start for disadvantaged preschool children. And it would establish a new program of care in schools before and after class for an estimated 10 million "latchkey" children whose parents work outside the home.

A House-Senate conference committee will soon begin to reconcile the differences between the two versions. Meanwhile, the White House has promised to veto either one of these fiscally irresponsible measures.

Mr. Bush is correct to dig in his heels on this one, because the bills are a modern throwback to the discredited Great Society philosophy that the only way to solve a social problem is to throw billions of government dollars at it. If the conferees are serious about seeing a child care bill become law, they will slash the price tag and remove the paternalistic provisions of the House bill.

To have a chance of being enacted this year, the legislation must concentrate on helping the working poor. That can best be done through the Bush strategy of expanded income tax credits or cash payments,

combined with vouchers to maximize parental choice.

Instead of trying to outbid each other, lawmakers should be formulating an affordable, compassionate child care policy that minimizes the role of government regulation. That is what President Bush called for several months ago. He should stand his ground until he gets it.

REMEMBERING RYAN WHITE

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FROST. Mr. Speaker, on Sunday, April 8, 1990, the Nation once again was reminded of how vulnerable is our population to infectious diseases and how very important it is to fight the causes of those diseases.

Young Ryan White of Cicero, IN, whose name has become known throughout the world, who symbolized this Nation's fight against the AIDS virus, lost his lengthy struggle to live.

Now is the time for Ryan's family to grieve; and, we join them in their grief. We have lost a handsome young American who, through no cause of his own, became infected with the AIDS virus, and fought courageously during that time of infection.

His death reminds us all that it is vital that we generously fund the research to find a cure for this disease. His death reminds us how fragile the human body truly is and how important it is to help those who find themselves in the same situation as Ryan White.

FOREIGN TRADE ZONES IMPROVEMENTS ACT OF 1990

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BARNARD. Mr. Speaker, as an original cosponsor of H.R. 4392, the Foreign Trade Zones Improvements Act of 1990, along with my colleagues, Messrs. PEASE and LEVIN and Ms. KAPTUR, I want to urge my colleagues to join with us in support of this important yet noncontroversial step forward in leveling the playing field in one aspect of our international trade dealings. The legislation we have introduced will make much-needed changes in the foreign trade zones program, which was originally designed to promote U.S. exports but which in many cases now encourages the use of imported products.

As chairman of the Government Operations Subcommittee on Commerce, Consumer, and Monetary Affairs, I presided over hearings on the subject of foreign trade zones March 7, 1989 and prepared a report on the subject for the full committee entitled, "Foreign Trade Zones [FTZ] Program Needs Restructuring,"—House Report 101-363, Nov. 16, 1989. This legislation, together with the regulations recently proposed by the Foreign Trade Zones Board of the Department of Commerce, goes a long way to solve some of the problems we noted in our hearings and report.

The heart of the new legislation is the establishment of strict public interest criteria for the establishment of zones. The public interest in this area will now be defined for the first time, and will mean the national trade and employment interest of the United States. It is about time that any U.S. trade action, such as the granting of the benefits of a foreign trade zone, should reflect serious study of the impact of the particular activity on our trade deficit and our domestic economy. Too often in the past a zone has been granted where a showing is made of increasing employment in one area, even though there would be an equivalent reduction in employment in another area of our country by reason of the advantages gained by the foreign corporation from the zone.

This very situation occurred recently, when the Foreign Trade Zones Board granted a zone for a 2-year period to Yamaha for the manufacture of golf carts in Newnan, GA. What was never full understood was that the domestic competition for golf carts was two companies in Augusta, GA, and that granting a tariff advantage to Yamaha in Newnan, GA would only detract from employment in Augusta, GA. This makes no sense. Hopefully, this kind of error will not be repeated under the new legislation.

The Foreign Trade Zones Improvements Act of 1990 would accomplish other need reforms: it would speed up the process, which now takes months and years for a decision to be rendered; it would place the burden of proof on the FTZ applicant; and would require that new FTZ's be reviewed periodically. It would also add the requirement that the International Trade Commission render opinions as to the economic impact of proposed zones, thereby removing this process from the less competent and less independent Commerce Department.

This is a useful bill. I urge my colleagues to support it.

RONALD D. GRAY—GOLD AWARD WINNER

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. EDWARDS of California. Mr. Speaker, the 1990 Gold Award Ceremony of The Congressional Award was held on March 27 in the Cannon Caucus Room.

Fifty-two fine young Americans were honored at an impressive ceremony, with Senator MALCOLM WALLOP of Wyoming presenting the gold medals.

The Congressional Award was created by Congress in 1979 to recognize voluntary public service, personal development, and physical fitness achievements by young adults ages 14 through 23.

A person can be recommended for a Gold Award if he or she is at least 18 years old but has not reached his or her 24th birthday and has completed 800 activity hours within a minimum of 24 months. I was very proud that one of my young constituents, Ronald D. Gray of Fremont, CA, was the recipient of the Gold Award.

In the booklet printed for the Congressional Award ceremony Ronald Gray's impressive achievements were described as follows:

Ronald volunteered to teach scouting skills to youth and helped maintain Boy Scout Camps, including reroofing huts at Camp Royaneh. He also helped transport patients at the Veterans Administration Hospital to obtain medical care within the hospital, and offered companionship to the elderly. Ronald is a valued employee at Golden Gate Auto Auction in Fremont, where he has become a trained tow truck operator, organizes storage of vehicles on 48 acres of property and processes redemption paperwork, as well as carrying out auction procedures. He is actively involved in Indian dancing and competed in the National Order of the Arrow Conference in Colorado Springs, Colorado, representing the Bay Area council.

Ron's advisor, Jay Schmitz, says, "Ron not only works the long 8 to 10 hours days, but then entertains new and old members by participating in Indian ceremonies and dances to honor special events . . . I am proud to recommend him for the Gold Congressional Award."

At the ceremony I had the honor of escorting Ronald to the podium where Senator WALLOP congratulated Ronald and placed the gold medal around his neck.

Ronald received applause from the audience, several hundred in attendance, including his proud parents, Mr. and Mrs. Robert Gray.

Mr. Speaker, it was indeed a thrill and an honor for me to participate in this moving ceremony, and I'm sure that you join me in congratulating Ronald Gray for his significant achievements.

JOHN HENRY FAULK, GENUINE AMERICAN HERO AND FRIEND OF THE CONSTITUTION

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BRYANT. Mr. Speaker, an American hero died on Monday, April 9, 1990. "The U.S. Constitution lost a staunch friend," the Dallas Times Herald appropriately observed in an editorial, "when Texas author-humorist-actor John Henry Faulk died of cancer at 76. Thanks to John Henry Faulk and people of his rare mettle, liberty endures."

My friend John Henry Faulk was a courageous fellow. His heroics were not on a battlefield, but in courtrooms and conference centers and concert halls, where he brought to life the Constitution and the Bill of Rights he loved so dearly.

A rising young star in the rising young medium of television, John Henry Faulk knowingly chose principle over acquiesence to fear and intimidation. Although he knew neither he nor his associations were loathsome, dangerous, or un-American, he knew that attacks upon both by the blacklisters and hatemongers of the McCarthy era were still greater attacks on his beloved Constitution and Bill of Rights.

Knowing very well that he would lose his job, his opportunity for remunerative employ-

ment, and very possibly his freedom, John Henry Faulk fought back. Not so much for himself, I believe, as for every other American and "a system based on courage."

His travails are well documented in his appropriately titled autobiography, "Fear on Trial." Because John Henry Faulk had the courage not only to say no to, but to forcefully challenge, the blacklisters and hatemongers and their campaigns of intimidation and guilt by association, fear lost.

John Henry Faulk's courage—the courage that made this Nation possible and the example that encouraged courage in others at a time when there was precious little in our Nation—prevailed.

He won the largest libel judgment in history, but that didn't mean he aspired to be or became rich. He never realized a penny from his victory.

He stopped some of the blacklisting, but that didn't mean he regained his job or his promising future at CBS. He did not.

What he did achieve was what he most wanted to prove. That the Constitution, along with the liberties it promises, is the most outstanding and powerful democratic document in the history of the world—one which guarantees every citizen a chance to speak and associate freely and to right wrongs.

John Henry Faulk righted a serious and dangerous wrong, not for himself, but for the future of America.

In spite of being scorned and excoriated publicly and privately, in spite of being deprived of the fame and fortune that likely would have been his if he, like so many others, had acquiesced to fear, John Henry Faulk never waivered in his faith in America or its Constitution. And never, along the way, did he lose his humor, striving always, as he has noted, to puncture pomposity.

John Henry Faulk's courage inspires courage.

Molly Ivins, another dear friend of John Henry Faulk, paid tribute to humble giant of a man in a recent column that I would like to share with you.

[From the Dallas Times Herald, Apr. 11, 1990]

WHEN OTHERS BUCKLED, JOHN HENRY FAULK STOOD STRONG

(By Molly Ivins)

AUSTIN.—John Henry Faulk, God bless him, went and died at the age of 76, leaving the Great State shy of a freedom fighter the like of whom we've not seen since Sam Houston. They claim Faulk was the man who broke the blacklisting system during the McCarthy Era and your history books will say the same.

Ossie Davis, an actor who was a friend of Faulk and a fellow victim of the blacklist, got to recalling "the scoundrel time" not long ago, the days when you never knew who had accused you or what the charges were; you just couldn't ever get work again. Singers, dancers, actors, writers, a 7-year-old who was to play Helen Keller in "The Miracle Worker"—it made no difference.

"It reminds me of a famous photograph," said Davis, "that was printed around the world after the terrible earthquake that destroyed Tokyo in 1923. That was just after they had started to use steel in the construction of highrise buildings, and that picture showed a devastation, nothing but a sea of rubble left by this dreadful destructive force. Except for this one tall building, and the caption under the picture was 'Steel stood!' John Henry Faulk was like that building, all around him a sea of twisted wreckage and ruined lives, but John Henry stood. Steel stood!"

Johnny always said were it not for his vanity, he'd of been mortified to be called a hero, on account of he had so much fun facing up to the blacklisters. And whoever heard of a hero havin' more fun than the law allows?

Came from South Austin, Johnny did, out of an old Texas family, and was the son of one of those pure American non-conformists in the Tom Paine-Clarence Darrow tradition. His daddy was Judge Faulk, who was Eugene V. Debs' campaign manager back when the glorious old Socialist got more votes for president in Texas than the Republican candidate. On top of that, John Henry Faulk studied folklore at the University of Texas under J. Frank Dobie, one of the most independent spirits the Great State has ever produced: The two of them stayed close friends until Dobie's death in 1964.

In the late 1930s, Johnny Faulk got a Rosenwald Fellowship to travel around the South recording the folklore of rural blacks. His work is parked in the Library of Congress to this good day. Faulk specialized in the preachers of the Brazos River bottom: To the end of his life he could re-create the now lost art of "sing-preaching," a beautiful, rhythmic style of Bible storytelling once common in black America. John hated Hitler so bad, he got into the Army despite being one-eyed. He was on Christmas leave in New York City in 1945 when some executives from CBS heard him telling his Texas folk stories at a party and approached him about a job. That's how he got to be a semi-famous show-biz star. By the late 1940s, he had his own network radio program called "Johnny's Front Porch," featuring a ditzy assemblage of small-town Texans rather in the fashion of the later Broadway hit "Greater Tuna." Who are we to insist these people are too loopy to be believable? Have you checked the governor of Texas lately?

Plus being a radio star, Johnny Faulk was choppin' in the tall cotton in the early days of television as host of the morning news program on CBS, as a panelist on popular quiz programs; they said his down-home humor made him "the new Will Rogers." He got blacklisted for opposing the blacklisting system. He ran for union office in New York, the American Federation of Radio and Television Artists, on an anti-blacklisting platform. He had no sooner won than he was blacklisted himself. Instead of giving up, John Henry Faulk of South Austin, Texas, hired the best lawyer he could find and sued the scoundrels.

His case pitted two of the best-known trial lawyers of their day against one another in court. Louis Nizer defended Faulk, and Roy Cohn, former top assistant to Sen. Joe McCarthy, defended the blacklisters. It took six long years for the case to come to court, six years during which Faulk went broke, was reduced to sponging off his relatives and selling encyclopedias door-to-door.

The trial itself produced much high drama and a few moments of low comedy. (Faulk's book about the case, "Fear on Trial," was later made into a television movie starring George C. Scott as Nizer.) At one point Nizer forced John Henry, on the witness stand, to the saccharine, self-serving confession that the only prize he had ever won was a Methodist Sunday School Attendance Award—the implication being, "What the hell kind of communist can this guy be?" Faulk always recalled that Murray Kempton, who was sitting at the press table, almost urped on the spot.

The jury in Faulk's case reported back early to ask a peculiar question: Could they award the plaintiff more than he had asked for? The judge said he'd never heard of such a thing, studied his law books for a spell and then announced he could find no rule against it. So the jury gave John Henry Faulk $3.5 million, substantially more than he'd claimed, and it would be pleasant to report that justice triumphed and that the old freedom-fighter lived out his days in ease and plenty. Unfortunately, the blacklisters Johnny sued, a professional commie-hunting organization, AWARE Inc., which had been paid by the networks to "identify communists," was itself pretty-near broke by the time the case came to trial. (Justice delayed is justice denied.) Between the attorneys' fees and the expenses, John Henry Faulk barely saw a nickel of that settlement, but by then he had slowly begun to rebuild a career as an after-dinner speaker and as an authority on the First Amendment.

I s'pose John Henry could have lived on his laurels thereafter, boss hawg of the anti-blacklisters. Instead he too to preaching, in any forum from the Cattlemen's Association in the smallest Texas towns to the most prestigious universities in the country, on the history and true meaning of the First Amendment. And he was stronger than dirt on that subject. The many thousands of you who have heard him will never forget the guy who made you feel like Jamie Madison and Tom Jefferson were close personal friends of yours.

Never one just to preach on the beauties of the First, John Henry used it all his life long, used freedom of speech to denounce fascists and racists and a splendid assortment of knownothings and pinheads who sinned against the Bill of Rights. He was never against people he disagreed with: He was ever against those who cannot understand the beauty of disagreement.

Oh, damn, there's so much more I could write. About what he was like as a friend and a husband and a father and a lot of other human roles at which the great hero of the Bill of Rights was sometimes no more successful than most guys who fix Volkswagens for a living, even though he was a love of a guy. But whatthehell, Johnny Faulk, who was ever the first to laugh at his own frailties as a human being, did do something of great historical importance, put it down though he would himself. Like steel, John Henry stood. At a time no one else would. And honor him we should.

DEEPDALE GARDENS COMMUNITY COUNCIL

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SCHEUER. Mr. Speaker, I am sure most of my colleagues can attest to the fine services provided to their constituents by community councils and community centers located within their districts. Today, I rise to call your

attention to one such community council in my district.

For the past 30 years, the Deepdale Gardens Community Council has been providing a wide array of cultural, educational, recreational, and social activities for the adults, senior citizens, and youth in the northeastern section of Queens. Arts and crafts, first-aid instruction, basketball, handball and tennis, health lectures and screenings, and a supervised day camp are just a few of the many vital and enriching activities, programs, and services that have been provided to community members over the years.

Acting as a pseudo-"Y" or neighborhood house, the Seymour Perlmutter Community Center—operated under the auspices of the community council—also has opened its doors—at no cost—to neighborhood agencies and educational, health, and social organizations.

I commend the dedicated current and former board members and staffers of the Deepdale Gardens Community Council, Inc.—Seymour Perlmutter Community Center—on 30 years of distinguished service to the community.

Particularly deserving of gratitude is Chet Szarejko, its executive director. A teacher by profession, Mr. Szarejko has devoted much of his life to working with young people and has sought to instill in them the importance of getting involved in civic and community affairs, as he has. Under his stewardship, the Seymour Perlmutter Community Center has become a vital center of activity in the Borough of Queens.

TAKE TRANSPORTATION TRUST FUNDS OUT OF UNIFIED BUDGET

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. McEWEN. Mr. Speaker, for many years I have been actively seeking to enact legislation to take the transportation trust funds out of the unified budget and allow for a spend down of the cash balances which have accumulated in the trust fund accounts. This morning, I met with a number of individuals representing organizations that agree—we must take these funds offbudget in order to meet critical infrastructure needs and retain the competitive advantage that the United States has enjoyed for so long.

I would like this opportunity to share their letter of support with my colleagues.

AMERICAN TRANSPORTATION ADVISORY COUNCIL,
April 18, 1990.

Hon. BOB MCEWEN,
House of Representatives,
Washington, DC.

DEAR BOB: For over twenty years, dollars paid by highway users through the federal motor fuels taxes have sat idle in the Highway Trust Fund. Highways and bridges have deteriorated and become clogged because this country has not been using all of its available resources to meet highway improvement needs. Today, the balance in the Highway Account of the Highway Trust Fund has grown to over $10 billion—money which should be paid through the trust fund for highway work and apportioned to the states for highway improvement projects.

With needs for reconstruction, rehabilitation, capacity improvements, and safety upgrading approaching $40 billion annually as estimated by the Federal Highway Administration in reports released in 1988 and 1989, the nation must spend currently available resources to meet these needs. The first step in returning our national highway network to an adequate level of service is by releasing the balance in the Highway Trust Fund.

This can be accomplished best by taking the Highway Trust Fund and the related Federal-aid Highway Program off-budget. This action would have a two-fold benefit. First, it would restore the confidence of the highway user that his dollars are being properly invested. And second, with that confidence restored, the Federal-aid Highway Program could be expanded to better address the problems of deterioration and congestion.

An opportunity to take the Highway Trust Fund, Airport and Airways Trust Fund and Inland Waterways Trust Fund off-budget will come when the House of Representatives considers the Social Security Trust Funds issue later this year. It makes even better sense to remove these three special purpose trust funds from the budget if the Social Security Trust Funds are being removed. As with the social security program, the revenue from these three transportation trust funds should only be used for the transportation programs that they were created to support.

We the undersigned highway industry organizations urge you to vote to remove the Highway, Airport and Airways and Inland Waterways Trust Funds from the unified federal budget and to support annual appropriations which spend the balances in these funds on the purposes for which the taxes are collected.

Sincerely,

AMERICAN ROAD AND TRANSPORTATION BUILDERS ASSOCIATION; AMERICAN BUS ASSOCIATION; AMERICAN PUBLIC WORKS ASSOCIATION; ASPHALT INSTITUTE, INC.; AMERICAN CONCRETE PIPE ASSOCIATION; CONSTRUCTION INDUSTRY MANUFACTURERS ASSOCIATION, CH2M HILL; BETTER ROADS & TRANSPORTATION COUNCIL; INSTITUTE OF TRANSPORTATION ENGINEERS; HIGHWAY USERS FEDERATION; CONTECH CONSTRUCTION PRODUCTS, INC.; NATIONAL CORRUGATED STEEL PIPE ASSOCIATION; NATIONAL STONE ASSOCIATION; NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS; PORTLAND CEMENT ASSOCIATION; NATIONAL SLAG ASSOCIATION; NATIONAL WATERWAYS CONFERENCE, INC.; NATIONAL ASPHALT PAVEMENT ASSOCIATION; NATIONAL LIMOUSINE ASSOCIATION; UNITED BUS OWNERS ASSOCIATION; J.M. HUNNICUTT & ASSOCIATES; SALT INSTITUTE; ASSOCIATED BUILDERS & CONTRACTORS; NATIONAL AGGREGATES ASSOCIATION; NATIONAL READY MIXED CONCRETE ASSOCIATION; AMERICAN SOCIETY OF CIVIL ENGINEERS; AND ASSOCIATED GENERAL CONTRACTORS.

STATEMENT OF GROUP OF ARAB AND JEWISH-AMERICAN LEADERS ON MIDDLE EAST PEACE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HAMILTON. Mr. Speaker, I would like to draw the attention of my colleagues to a statement issued last month by a group of Arab-American and Jewish-American business, academic, and professional leaders on the Middle East conflict. The views expressed in this statement represent a consensus position of the group which has been meeting for the past 7 years to discuss issues related to Middle East peace.

The statement identifies four issues that present obstacles to further progress toward a settlement of the Palestinian problem. It comments on each of these obstacles and on why the issue should not be permitted to block the process toward elections in the West Bank and Gaza.

The statement and a covering letter follow:

MARCH 12, 1990.

The enclosed statement represents the consensus of a group of Arab American and Jewish American business, academic, and professional leaders who, together with former Secretary of State Cyrus Vance, have met over the past seven years to discuss a basis on which the parties to the Mid-East conflict may find their way to the peace table.

The undersigned have served as Co-Chairmen to facilitate the dialogue between the members who have signed this statement. We hope that you will find it useful and constructive.

LESTER CROWN,
ALBERT TAHMOUSH,
NAJEEB HALABY,
HOWARD SQUADRON.

FACING REALITIES ABOUT A MIDDLE EAST NEGOTIATION

We are a group of Americans of Arab background and Jewish background who along with former Secretary of State Cyrus Vance, have been working together for seven years. We have focused on two areas—economic development for the Palestinian Arab population of the West Bank and Gaza, and how to get the parties to the Middle East conflict to the peace table. We have involved ourselves in these efforts, as Americans, because we believe the United States has a vital and continuing role to play in the Middle East peace process. We expect our government to be even more deeply involved in that process in the next few years.

We have made very modest contributions in both areas, partially because the problems are so difficult, and partially because we have quite deliberately set limited goals. Thus, we have never tried to agree on, or to recommend, the terms of any possible settlement. We have recognized that only the parties, at a peace table, can work out such terms.

In the areas of our concentration we have informed ourselves through meetings with very high officials in the Israeli, Jordanian, Egyptian and American governments. We

have also met with Americans affiliated with the PLO.

The actions of, and resulting from, the intifada in the West Bank and Gaza have prevented, for the time being, all efforts in the area of economic development. On the other hand, they have highlighted the necessity for finding a way to get to the peace table. Although we have avoided public statements, we now believe that some truths about getting to the table deserve public expression. Our group reflects a broad spectrum of views and backgrounds, and we trust that its observations and conclusions will be given serious consideration.

Each of the parties to the Middle East dispute has stated publicly from time to time that it is prepared to commence peace negotiations "without any preconditions". We believe that the parties would long since have been at the table if that particular rhetorical phrase had been sincere and had been acted upon. In fact, each of the parties has raised unrealistic preconditions to a peace negotiation. We urge that these preconditions, which we regard as obstacles, be discarded.

The first obstacle is the demand that the Palestinians be represented by persons independent of the PLO.

We understand that internal political considerations in the United States and Israel may dictate a Palestinian delegation that does not include prominent PLO officials. We believe that, at the present time, the Bush administration and most of the Arab world, accept that necessity; and are prepared accordingly to work with Israel in the selection of the initial Palestinian delegation. However, in the real world, no Arab country (not even Egypt)—nor any Palestinian delegation—will participate in a peace negotiation, if the members of that delegation have not previously been approved by the PLO. It is time to acknowledge that no Palestinian delegation will make any proposal that has not received PLO sanction, and that no Palestinian delegation will agree to any solution that does not have PLO endorsement. That reality should be honestly faced.

Next, there is the demand that the discussion be limited to particular issues. Naturally, if the first meeting is to discuss procedures for an election, the agenda for the meeting should conform to that purpose. But it is inevitable that there will be some conversation about the next step after the election—if only in terms of process, timetable, and the agenda for the meeting after the election. Any attempt to circumscribe the initial discussion more closely is unrealistic.

The third obstacle is the consistent reiteration by one party or the other of ultimate goals. Depending on the party, the demand is articulated that the goal be "sovereignty", "autonomy", "confederation"—or whatever. In the real world, Israel's security concerns as well as the political needs of the Palestinians for maximum self-governance will ultimately have to be addressed, after delegations are selected, elections are held, and the parties are finally discussing substantive issues. The problems do not lend themselves to traditional solutions. New modes of relationship and new arrangements for living together will have to be developed. There will have to be lengthy and complicated negotiations directly between the parties involved, with the assistance of the United States, and possibly Egypt, if the parties want such assistance.

Finally, there is the question whether an Israeli-Palestinian agreement, if it can be achieved, is sufficient. What constitutes a comprehensive peace? Israel expects, not unreasonably, peace commitments from the entire Arab world. The Arab states take the position that the Palestinian problem must first be solved "in all its aspects"—and comprehensive peace will follow. This chicken-egg obstacle must be addressed. In some manner, the other players—particularly Syria and Jordan—must be brought into the process as quickly as possible.

Our own experience—with strong ties to both sides—teaches us that it is possible to resolve deep differences if parties with opposing viewpoints are willing to sit together and talk. We have been impressed by how our differences have narrowed over the years, because we chose to talk to each other.

We urge that the prior demands and preconditions, the proposed formulas and frameworks, the unrealistic expectations and dreams—the obstacles to progress—be put aside. We urge that sincere and serious attention be paid to taking the first step on what will be a very long and difficult road—by agreeing on the composition of a Palestinian delegation, elections, and an agenda consistent with reality.

TRIBUTE TO CAROL COSTA

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to pay tribute to Ms. Carol Costa who has recently coached her U.S. history class to victory in the Rhode Island 1990 Bicentennial of the Constitution and Bill of Rights competition.

Ms. Costa teaches at Bishop Keough High School in Pawtucket, RI. She coached her class in this competition, which tests students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. Through the excellent guidance and preparation by Ms. Costa, the class was able to achieve excellence. A further tribute to Ms. Costa comes from her students. Said one student, Ms. Costa "believed in us when at times we didn't believe in ourselves." Ms. Costa and her class will now travel to Washington, DC in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Ms. Costa and the members of her U.S. history class from Bishop Keough High School. Her outstanding effort demonstrates a love for her work which transcends the classroom, while pushing her students to their utmost ability. I would like to wish Ms. Costa and her students best of luck in the national competition.

IN HONOR OF ADA SCHICK WING

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LAGOMARSINO. Mr. Speaker, I'd like to take this opportunity to salute Ada Schick Wing of Santa Barbara. She has spent most of her 93 years in public service, and her devotion to the support and treatment of the mentally ill has led to a special honor for her.

The Phoenix of Santa Barbara, Inc., an alternative to the State hospital, has named their Phase II Program Ada's Place in honor of her devotion and foresight in providing primary care for those suffering from mental illness. Ada's Place will provide a care facility for clients who are prepared to live in a more independent situation, yet still needing support and supervision. It will serve as a vital link in our community care system, helping to meet the need for housing of the mentally ill. The people who will benefit from Ada's Place are at a crucial stage of their rehabilitation, making the transition between full-time care and independent living. Without this program and others like it, people at this stage of treatment can end up incarcerated or living in the streets.

Ada Schick Wing's record of community involvement sets a shining example. She helped to establish the Phoenix Program, still serves on the board of directors, and helped start the Santa Barbara Mental Health Association. She has served on the Santa Barbara County Commission on Aging, served on the Santa Barbara Senior Citizen Advisory Commission until 1986, and has worked as a volunteer over the years for recording for the blind, the committee for Braille Institute among others.

Many times in the past, Ada would ask the directors of the Phoenix Program, "When are we going to get Phase II started?" On April 20, her drive and initiative will be recognized with a party in Ada Schick Wing's honor, celebrating the opening of Ada's Place.

Mr. Speaker, I would like to close this tribute with Ada Schick Wing's motto, words we can all live by. She says, "Put your heart and soul into the things you can change and don't worry about the things you cannot." I invite our colleagues to honor my good friend Ada Schick Wing, who has truly put her heart into changing things for the better. On behalf of myself, the community, the people of Santa Barbara, and the U.S. House of Representatives, let me extend to Ada Schick Wing our heartfelt thanks and congratulations.

TRIBUTE TO THE WARREN OPHTHALMOLOGY ASSOCIATES

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to Dr. Richard D. Shapiro, Dr. Nigel K. Newman, and Dr. Frank A. D'Apolito of the Warren Ophthalmology Associates of my 17th Congressional District of Ohio. The Warren Opthalmology Associates recently expanded their present facility in Warren, OH.

The Warren Ophthalmology Associates recently installed state-of-the-art diagnostic and treatment equipment and renovated the building thus providing better service for their patients. Besides better medical care, the upgrade of the facility will create new temporary and permanent employment for people in the Warren area.

I commend Warren Ophthalmology Associates for their commitment to the Warren area. The decision to expand their present facility instead of moving to another area demonstrates the doctors' dedication to the enrichment of our community.

Mr. Speaker, I would like to thank Dr. Richard Shapiro, Dr. Nigel Newman, and Dr. Frank D'Apolito for the contributions they have made to our community. Their hard work and caring is greatly appreciated by myself and our fellow citizens. I am honored to represent these outstanding men.

TRIBUTE TO MOSURE & SYRAKIS CO.

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the Mosure & Syrakis Co., an engineering firm which is located in Youngstown, OH. Mosure & Syrakis Co. received two distinguished awards for excellence in engineering for their work on the Youngstown water treatment plant which serves the Mohoning County and parts of Trumbull County, OH.

Mosure & Syrakis Co. received the Honor Award from the American Consulting Engineers Council as a part of the council's annual engineering excellence awards competition. They also received the Ohio Outstanding Civil Engineering Achievement Award from the Ohio Council of Local Sections of the American Society of Civil Engineers. The firm is being honored for its innovations on the upgrade and expansion of the Youngstown water treatment plant.

Mosure & Syrakis Co.'s innovations in sludge handling resulted in additional EPA funding for the project and the ability to contain the project within a 5-acre area. The upgrade and improvements of the water treatment plant will enable the plant to serve the Mahoning Valley through the year 2010. The process for sludge handling employed by Mosure & Syrakis Co. resulted in a 10-percent increase in funding in addition to the existing 75-percent grant from the EPA. A total of $36 million was saved by the Mahoning Valley due to the Mosure & Syrakis Co.'s outstanding job on the Youngstown water treatment plant.

Mr. Speaker, I would like to take this opportunity to salute and thank the Mosure & Syrakis Co. for their exceptional service to my 17th Congressional District of Ohio. They did a magnificent job on the upgrade and renovation of the Youngstown water treatment plant. I would also like to congratulate Mosure & Syrakis Co. on the awards it received as recognition for the outstanding work they did on the upgrade and expansion of the water treatment plant. I am honored to have the Mosure & Syrakis Co. in my district.

TRIBUTE TO THE JUNIOR CLASS PATROL OF SENIOR TROOP NO. 688

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. YATRON. Mr. Speaker, today I rise to pay tribute to six bright, talented, and determined young women from the Sixth District of Pennsylvania. These young women are members of Junior Class No. 688, and they are all actively involved in making the life of their community better.

On April 29, 1990, a special ceremony will be held in honor of these young women at St. John's Lutheran Church in Boyertown, PA, to recognize their successful completion of all requirements for the Girl Scout's Gold Award. Their hard work and constant efforts to serve their neighbors and fellow Scouts makes them deserving recipients of the Gold Award, which is the highest honor any Girl Scout can receive.

Most of these young women have been active in Scouting for many years, and have proven their abilities and climbed the Girl Scout ranks. Their achievements simply reflect their concern for humanity, which has been cultivated by the troop leaders who have helped these outstanding Girl Scouts earn the Gold Award.

Mr. Speaker, it is indeed a pleasure for me to recognize Jennifer Little, Larin McLaughlin, Gwen Mason, Abby Parish, Heidi Schwarz, and Charlene Stoudt before you and other Members of the House of Representatives, as well as the rest of the Nation. There is no doubt that the Gold Award will be the first of many awards for these young women. Let us take this moment to commend them for their accomplishments and to wish them the best of luck and success in all of their future endeavors.

McCLELLAN PUBLIC AFFAIRS OFFICE RECEIVES TOP AWARD

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FAZIO. Mr. Speaker, it is with great pleasure that I take this opportunity to recognize the outstanding achievements of the public affairs office at McClellan Air Force Base in Sacramento, CA. Recently selected as the best public affairs office for 1989 in the entire Air Force Logistics Command, the McClellan public affairs office has excelled in all facets of public outreach. Maj. Gen. Trevor Hammond, commander of the Sacramento Air Logistics Center, and Lt. Col. Duane Roberts, director of the public affairs office, can be rightfully proud of this high honor.

With a well-planned and well-coordinated public relations program, McClellan Air Force Base has maintained an open and productive relationship with Sacramento and other northern California communities. Following is an article from the base newspaper, the Spacemaker, which gives a more detailed account of the award-winning activities of the public affairs office. I commend the article to my colleagues and congratulate General Hammond, Colonel Roberts, and the entire staff of the public affairs office for their outstanding achievements.

[From the Spacemaker, Mar. 16, 1990]

SM-ALC "BEST PA IN AFLC FOR 1989"

(By Michelle Myers)

"This selection came as no real surprise to me, but it's nice that command recognition is given."

With that comment, Maj. Gen. Trevor A. Hammond, ALC commander, presented Sacramento ALC Public Affairs the AFLC Best Public Affairs Office Award for 1989.

General Hammond continued, "I've said for a long time that our Public Affairs program is very good, and this shows that others share my opinion."

The award was formally presented to General Hammond by Gen. Charles C. McDonald, AFLC commander, at the recent AFLC Commanders' Conference at AFLC headquarters, Wright-Patterson AFB, Ohio. The local presentation was made to Lt. Col. Duane C. Roberts, PA director, and his staff in an award ceremony here March 9.

The award consists of a mounted bowl, engraved with the name of each year's winner, as a traveling trophy and a permanent wall plaque. The trophy will be placed in the display case in the front entry of center headquarters, Bldg. 200.

While the award was based on overall excellence, specific programs within the PA office were evaluated and compared to similar programs at the other Air Logistics Centers.

Community Relations was rated as best in the command, as was the Environmental Public Affairs program. Media Relations and Internal Information received second place awards.

The center's community relations program was praised for its extensive efforts in establishing a "Grass Roots" program with adjacent small communities, as well as maintaining and strengthening contacts with the larger cities and towns in the

region. Public Affairs is actively involved in 14 Chambers of Commerce and participates in two major community-action groups. These groups consist of local, state and federal representatives and local citizens working to improve their communities.

In addition to community involvement, Public Affairs operates a Speakers' Bureau, using volunteers from the center and base to speak to civic, fraternal and service organizations in communities throughout Northern California.

Speeches cover a wide variety of mission topics, career possibilities and other subjects of community interest about the Air Force and Sacramento ALC.

While base tours have always been a big part of the community relations agenda, a concerted emphasis is now being placed on education. For example, in cooperation with the Rio Linda School District, McClellan is involved in an aerospace education program which will help teach more than 600 sixth graders aerospace fundamentals.

Colonel Roberts, PA director, noted that by no means has Public Affairs alone been responsible for community relations' successes. "It takes both enthusiasm and a spirit of cooperation by many folks to achieve results. The many individuals and organizations of the center and base who've volunteered their time and effort are the real reason for success."

However, he said that the overwhelming energy Smokey Bassett and Jamie Cameron-Harley of PA's community relations program put into their jobs gave a natural edge over the other ALCs. "They go far beyond the normal demands of their jobs to help us aid the community in any way they can," he said.

Finding ways to show appreciation to volunteers and those who lend support for the center's community relations efforts is a big part of maintaining positive relationships, according to Mr. Bassett, chief of community relations.

"People must want to stay involved in order for it to work," he said.

PA's environmental program was also awarded first place for its work in establishing a cooperative relationship with the news media and local communities.

Informational methods included environmental fact sheets, environmental update newsletters and special environmental tours to keep the public informed on the center's programs.

For example, when on-base sampling of wells began last year, Mark DeFrances, PA's Environmental representative, visited off-base residents who lived near drilling sites. He explained the drilling and allayed any concerns about drinking water quality.

Media Relations also contributed greatly to the award. Over the past year, news media interest in McClellan continued to grow extensively, as was reflected by the more than 600 media queries. These ranged from ALC future workload, to budgetary impacts, to base closures. Each query was expected to be answered within hours, or at least by the next day.

"It's truly a team effort," said Linda Trogdon, chief of media relations. "Not only within Public Affairs, but also with the many people and offices that aid us in providing the proper answer, and in the shortest time possible."

The requests for information and news aren't all local. For example, Maintenance's Neutron-Radiography facility drew news coverage from Germany, Japan and Australia, as well as nationwide.

Of course, all the news isn't good news. Dealing with bad news is a constant challenge for Ms. Trogdon, and sensitive issues are dealt with daily.

"The most important thing to consider when dealing with media queries is to be accurate and to respond quickly," said Ms. Trogdon. "One thing that improves credibility is being prepared in advance. Although you can't know everything that is going on here, being aware of the most important things and possible consequences is crucial."

While the McClellan newspaper, Spacemaker, is the primary tool of the Internal Information program, it isn't the only one. Also included is Commander/Director's * * *, Hometown News Releases, the Unit Public Affairs Representative program, and other special and one-time projects to inform the center's military and civilian work force.

RACE AGAINST DRUG ABUSE WILL HOLD ANNUAL AWARD LUNCHEON

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MRAZEK. Mr. Speaker, I think it is clear to all of us that any actions taken by this body to wage the war on drugs cannot be successful in and of themselves. It will take commitment by our citizens on many levels—in schools, in the workplace, in our homes—if we are to win this long battle.

For this reason, I take great pleasure in informing my colleagues of an organization on Long Island which is taking the challenge of finding new and innovative ways to bring attention to the role we can all play in fighting drug abuse in our society. The organization, Race Against Drug Abuse, Inc., has sought to unite government, volunteers, and the business community on Long Island in this vital cause.

Race Against Drug Abuse will hold its annual awards luncheon on April 20 to honor members of the Long Island community who have distinguished themselves and their organizations in the war against drug abuse. The Drug Fighter of the Year Award will be presented to Robert Johnson, publisher and chief executive officer of Newsday.

Mr. Johnson's worthy selection for this honor results from the aggressive and intelligent programs his company has initiated in the field of drug education, both for this own employees and for the citizens of Long Island and the New York metropolitan area. First, Newsday has developed a videotape and curriculum on drug education for distribution to every school in Nassau and Suffolk Counties, Long Island, and in the five boroughs of New York. This program can be a major tool for educating our children about the dangers of drugs at an age where a strong impression can be made.

Mr. Johnson's publications, Newsday of Long Island and New York Newsday, also have printed and distributed millions of inserts on drug education in recent months for the edification of the reading public. And his company has launched a compassionate and enlightened program of drug education and assistance for his own employees who has fallen prey to the tragedy of drug abuse.

Along with Mr. Johnson, several other Long Island residents will be honored at the April 20 luncheon. They include William Haskins of Suffolk Daytop for Program of the Year; Elizabeth Madigan of the Smithtown Schools as Student of the Year; Sandi Frisch of Suffolk Safe Homes as Volunteer of the Year; Barry Romanski of Cablevision for the Media Award; Edwina Carr of Cambridge Healthcare Consultants for Outstanding Contribution to the Field; and a Special Recognition Award to Mark Baliak of European American Bank.

The festivities also will include a Montauk-to-the-Marriott Marathon to bring attention to the fight against drug abuse. Special recognition is deserved for a constituent of mine, Victor Rugg of Fort Salonga, the president of Race Against Drug Abuse, Inc., and an individual who has devoted considerable time and effort to a very worthy cause.

Mr. Speaker, I'm sure that all of my colleagues join with me today in saluting Race Against Drug Abuse, Inc., its honorees and the many concerned individuals, companies, and government agencies which have contributed to the battle against drug abuse on Long Island. Their efforts prove that the war on drugs goes far beyond this body's capacity to exact change, and that all of us in this country can become involved in combatting a problem that affects all facets of our society.

THE 100TH ANNIVERSARY FOR THE SALINE BAPTIST ASSOCIATION

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. POSHARD. Mr. Speaker, although the quality of education and the level of morality is said to be low in today's society, there is a place in my district where morality is expressed through every means possible.

I am speaking of the 33 churches that make up the Saline Baptist Association. Their livelihood is a practical example that the religious values in my district are as strong today as 100 years ago. And this October 10, the Saline Baptist Association will celebrate its 100th anniversary.

In 1890, 10 churches in Saline and Gallatin Counties organized into the Saline Baptist Association. There were some rocky times and some great challenges to be met, but the memberships' faith helped the Saline Baptist Association grow until in 1938 it reached its current membership of 33 churches, drawing from Saline, Gallatin and Johnson Counties.

The association has grown and expanded its services to where it now helps other churches within the area. These exemplary people also help their neighbors by selflessly offering emergency food supplies to those in need.

The Saline Baptist Association has survived wars, the Depression, the turbulence of the 60's and early 70's, and today's ever changing society. I strongly believe we should commend and congratulate these fine people for

their efforts in preserving human life and humanity.

KALAMAZOO YMCA BLACK ACHIEVER'S PROGRAM

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. WOLPE. Mr. Speaker, I rise to pay tribute to the Kalamazoo YMCA Black Achiever's Program.

The Kalamazoo YMCA Black Achiever's Program was developed by members of the Harlem YMCA in 1971 to motivate young black people toward setting both educational and career goals. Since its inception, the idea has spread to other areas throughout the Nation. The Kalamazoo Family YMCA adopted such a program in January of this year. The Black Achiever's Program promotes leadership and encourages development of each individual youth's social and moral character with the assistance of black role models as mentors from a variety of career fields.

The Kalamazoo YMCA has had a long history of supporting activities for the youth of the community. The Black Achiever's Program is an inspiration to teens and provides a promise for a brighter future. I am honored to represent members and volunteers of the YMCA Black Achiever's Program who recognizes that our youth are our future, and who are giving so much of themselves.

REAR ADM. LEWIS BARTON COMBS: ENGINEER AND GREAT AMERICAN

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SOLOMON. Mr. Speaker, when the district I represent was redrawn in 1982 to include the Dutchess County town of Red Hook, Lewis Barton Combs became my constituent.

You will understand how proud I am once I tell you a few things about his life.

The towns and villages of America are filled with unsung heroes who left their marks on history, enriched their professions, and raised families, all without fanfare and public acclaim. Lewis Combs is one such hero, a man whose accomplishments in the academic world came only after a distinguished military record.

After 31 years of service in the U.S. Navy's Civil Engineering Corps [CEC], Rear Admiral Combs retired to begin a second career as lecturer and dean of the civil engineering department at Rensselaer Polytechnic Institute in Troy, NY. He retired from RPI in 1961.

Rear Admiral Combs is best known for his key role in the formation of the famous Naval Construction Battalions, immortalized in the 1944 John Wayne movie, "The Fighting Seabees."

But let me start at the beginning.

In 1917, there were 250 applicants for a commission in the Navy's CEC. Only 20 were chosen, among whom Lewis Combs, 1 year out of RPI, was sixth in his class. Although he did not serve overseas in World War I, his interwar activities prepared him well for an important role in the Second World War.

Between the two wars, assignments in the Pacific and Far East included the design and construction of naval shore establishments and underwater construction. It made him well-qualified to help expand the CEC and organize the Seebees.

Mr. Speaker, as most Americans know, the Seabees operate on the motto of "We fight, we build." When many civilian construction workers were captured by the Japanese on Wake Island, it was a spur to form battalions of men who were capable of defending what they built. That's why the Seabees are symbolized by a figure wielding a machine gun in one hand and construction tools in the other.

When he became a rear admiral in 1942, he attained the highest rank given to an officer in the CEC. He is no stranger to honors, having been given the Distinguished Service Medal by President Truman.

In a recent newspaper interview, he declared that what we need is teachers with imagination to inspire young people with the possibilities of the future. That hardly sounds like a man who earlier this month celebrated his 95th birthday, but that spirit of youthful optimism helps explain the career accomplishments of Rear Admiral Combs.

Mr. Speaker, I ask you and Members of this House to join me in wishing him a happy birthday, with many returns. Let us rise and salute Rear Adm. Lewis Barton Combs (Retired), a great engineer, a great patriot, and a great American.

WHY I AM PROUD OF AMERICA

HON. HANK BROWN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BROWN of Colorado. Mr. Speaker, I would like to submit the following speech by Kimberly Killifer of Ovid, CO, for the RECORD:

WHY I AM PROUD OF AMERICA

"Domo Arigato Gozimashta America." On August 6, 1989, I heard these words whispered through tears from my host mother. I sat with my entire Japanese host family in the safety of their living room. All eyes were focused on the television as Japan remembered 44 years ago when an American atomic bomb shattered thousands of lives in a single moment. A loud siren echoed from the television as hundreds of thousands of people silently lay upon the ground. Close-ups captured by camera crews revealed the silent tears. Children too young to understand the symbolism of their parent's actions cried in fear. I sat in amazement as men, women, and children of all ages reenacted the terror that changed Japan and the world forever.

Glancing around the room, I realized the intensity in Hiroshima had invaded my Japanese home. I suddenly felt afraid, alone and confused. My only previous contact with the bombing of Hiroshima was what I'd read in a text book—a brief explanation replacing human fears and tragedies with numbers and dates. I began to understand the true destruction in Hiroshima: Families—just like the one I love so very much, the basic element of Japanese society—were shattered.

Through the haunting sound of the siren, four simple words touched my heart: "Domo Agrigoto Gozimashta America." Translated, this means "Thank you very much America." I was stunned. In the midst of sorrow over the death of family and friends, my host mother thanked America! She *thanked* America.

Not understanding this reaction, I questioned her remark and will treasure her response for the rest of my life. One moment it appeared I should be ashamed to be an American, and the next I experienced an overwhelming pride in my country. Through tears and heartache, my host mother gently explained. She told me she thanks America for its help in reshaping Japan. In a voice trembling with emotion, she told me that the bomb took many lives, yet America saved Japan from itself. Dropping the bomb was not an end, it was a new beginning. My country did not ignore the suffering. The bomb ended the war, and Americans were free to return home. Yet they stayed and helped rebuild the shattered cities, sharing their knowledge in science and industry. They provided a source of raw materials. They traded with Japan and supported her economically. My beautiful host mother smiled and said, "For Japan, America has been as your American singer says, 'The wind beneath her wings'."

The atomic bomb, developed in wartime to protect America and to end a tragic war, demonstrated unbelievable power. However, strength can be measured by various standards, and the undeniable strength of America can best be judged through her behavior toward those who have no way to help themselves. I am proud of America, and am nearly overwhelmed to finally understand my country has the courage and wisdom to kneel down, extend a hand of hope, and share her strength—by lifting a shattered nation to her feet. I can only echo the whispered words of my Japanese host mother, "Domo Agrigoto Gozimashta America!"

CLEAN POWER'S STRANGE ENEMIES

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LENT. Mr. Speaker, this week marks the 20th anniversary of Earth Day, which is a milestone in America's environmental movement. As we partake of the celebrations going on all over the country, let us reflect for a moment about a strong ally of the environmental movement, yet one which frequently goes unheralded.

I'm speaking of the nuclear energy industry. As the following editorial from the New York Times points out, it is vital that America keep the nuclear power option open, because it reduces such deleterious environmental effects as acid rain and global warming. Nuclear electricity is America's largest, proven source of energy that has virtually no impact on the atmosphere. Electricity from nuclear energy currently reduces by 20 percent emissions of carbon dioxide, and by millions of tons per year four other major categories of atmos-

pheric pollutants cited by the Environmental Protection Agency: namely, particulates, carbon monoxide, volatile organic compounds, and methane.

The following editorial from the New York Times appeared on March 12, 1990.

[From the New York Times, March 12, 1990]

CLEAN POWER'S STRANGE ENEMIES

Gov. Michael Dukakis of Massachusetts owes a large debt to the owners of the Seabrook nuclear plant in New Hampshire: $2 billion. That's the cost of his refusal to help his New Hampshire neighbors devise an emergency evacuation plan.

The plant was ready to run in October 1986, and interest and maintenance costs have been growing at a rate of $50 million a month ever since. New Hampshire finally devised its own plan, and last week Federal regulators voted to grant an operating license.

The plant will probably be running soon, but burdened with the vast costs of this pointless delay. Mr. Dukakis's office, unrepentant, says the investors knew the risks. But it's his risk estimates that were awry. He exaggerated the dangers of nuclear power, while spurning those of climatic warming.

American nuclear power plants, Seabrook included, have many faults. They are too large, too expensive and too complex. Mr. Dukakis bears only part of the blame for the fact that Seabrook is 12 times over cost and 11 years behind schedule. But technology isn't wholly to blame, either. As the French have proved, plants using the basic American model can be built quickly and designed to run safely. France now uses nuclear power to produce 70 percent of its electricity.

But France does not have state governors like Mr. Dukakis and New York's Mario Cuomo. Following the Three Mile Island disaster, states were required to help devise emergency escape plans. Dukakis and Mr. Cuomo used this duty as a veto.

Mr. Dukakis offered the Chernobyl disaster as a reason for not cooperating on Seabrook, even though Soviet reactor had an entirely different design. Mr. Cuomo, citing public worries over an escape plan, effectively killed the completed reactor a Shoreham, wasting a $5.5 billion asset. These policies—along with copious errors by reactor builders and utilities—have brought America's nuclear industry to stagnation. So daunting are the political prospects that newer, more efficient plants are unlikely to get off the drawing boards.

Meanwhile, technological leadership has passed to Japan. Construction of a new plant takes five years there, compared with 11 in the U.S. And as Japan searches busily for an advanced generation of reactors, the infrastructure required to build nuclear plants dwindles in America.

Maybe the nuclear option will turn out to be a dead end. If so, Mr. Dukakis and Mr. Cuomo will have helped speed its demise. But oil prices could rise sharply. and solar energy could take decades more to develop. The greenhouse warming of the atmosphere could then create a premium for nuclear power plants, which don't produce greenhouse gases. There would be a worldwide demand for such plants, but the U.S. may be then have frozen itself out of the market.

The smarter strategy would be to keep the nuclear option open. Environmentalists are inconsistent when they press for action to avert greenhouse warming while remaining admantly opposed to nuclear power. They recently condemned John Sununu, the White House chief to staff, for opposing swift measures against warming; yet as Governor of New Hampshire, Mr. Sununu strongly supported the Seabrook reactor.

It's leaders like Governors Dukakis and Cuomo who obstruct the one kind of baseload power plant that produces no greenhouse gases. In the crowded annals of human folly, the sagas of Seabrook and Shoreham will surely rate a space.

YOUNG AMERICANS ACT

HON. JOSEPH P. KENNEDY II

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. KENNEDY. Mr. Speaker, support for the Young Americans Act (H.R. 1492) is growing. We have 67 cosponsors/supporters who feel that this legislation is greatly needed to ensure that our children have a stake in the American dream. I would like to submit for the RECORD an updated list of Members of Congress who have joined the late Senator Claude Pepper in supporting the Young Americans Act. I urge the Committee on Education and Labor to take immediate action on this legislation.

The current cosponsors/supporters include: Mr. KENNEDY, Mr. DOWNEY, Mr. CLAY, Mr. HAYES of Illinois, Mr. OWENS, of New York, Mr. ROBINSON, Mr. BOUCHER, Mr. FISH, Mr. GILMAN, Mrs. BENTLEY, Mr. JONTZ, Mr. ATKINS, Mr. BEVILL, Mr. FAUNTROY, Mr. AKAKA, Mr. DE LUGO, Mr. TRAXLER, Mr. DELLUMS, Mr. GORDON, Mr. MCDERMOTT, Mr. RANGEL, Mr. BATES, Mr. TOWNS, Mr. KOLTER, Mr. CROCKETT, Mr. DYMALLY, Mr. SKAGGS, Mr. BONIOR, Mr. LEHMAN of Florida, Mr. MOAKLEY, Ms. KAPTUR, Ms. PELOSI, and Mr. ENGEL. Also: Mr. EVANS, Ms. OAKAR, Mr. BORSKI, Mr. SMITH of Florida, Mr. FLORIO, Mr. FAZIO, Mr. JONES of North Carolina, Mr. FOGLIETTA, Mr. HERTEL, Mr. FLAKE, Mr. STAGGERS, Mr. SIKORSKI, Mr. TRAFICANT, Mr. LEVIN of Michigan, Mr. ACKERMAN, Mr. RICHARDSON, Mr. FEIGHAN, Mr. LAFALCE, Mr. FROST, Mr. DAVIS, Mr. FORD, Mr. FALEOMAVAEGA, Mr. FUSTER, Mr. BILBRAY, Mr. BRUCE, Mr. KLECZKA, Mr. DEFAZIO, Mrs. UNSOELD, Mr. SAWYER, Mr. WHEAT, Ms. COLLINS, Mr. DWYER, and Mr. POSHARD.

A VIGOROUS ECONOMY IN A VIGOROUS LAND

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SOLARZ. Mr. Speaker, earlier this month, India's new Finance Secretary, Dr. Bimal Jalan, came to Washington as head of the Indian delegation to the Indo-U.S. Economic and Commercial Sub-Commission. The subcommission, as many of my colleagues know, is one of the subordinate bodies of the Indo-U.S. Joint Commission, co-chaired by Secretary of State James Baker and Minister of External Affairs Kumar Gujral.

The Indo-United States Joint Commission was created to provide a forum where bilateral problems between the United States and India can be discussed in an atmosphere of good will and mutual understanding. In addition to covering economic and commercial issues, the Commission has also performed useful work in the areas of education, culture, and scientific exchange.

Prior to assuming his new position in January of this year, Dr. Jalan served in Washington as India's Executive Director at the International Monetary Fund. His return here several weeks ago was his first trip back since taking over his new duties.

Mr. Speaker, Dr. Jalan's remarks at the opening session of the Washington meetings not only provided a concise summary of recent developments in the Indian economy but also offered wise observations on some of the global issues that are in the process of reshaping our world. Knowing of my colleagues' interest in these matters, I now ask leave to insert Dr. Jalan's remarks into the RECORD.

REMARKS AT THE OPENING SESSION BY DR. BIMAL JALAN, FINANCE SECRETARY AND LEADER OF THE INDIAN DELEGATION TO THE INDO-U.S. ECONOMIC AND COMMERCIAL SUB-COMMISSION, APRIL 2-3, 1990

Mr. McCormack and friends, I am grateful to you Mr. McCormack for your remarks. We attach a great deal of importance to the bilateral talks between our two countries. The present meeting of the Sub-Commission is taking place at an opportune moment. We have entered the last decade of the century, and how we deal with the global challenges confronting us will have profound influence in the next century. We meet also at a time of momentous changes in the world political and economic systems. These changes affect the Great Powers, including the United States. They also affect us in India, and indeed other developing countries, as global trading and investment partners are being redesigned. And we meet soon after the new Administrations have taken over in our two countries. In the United States, you have a new Administration, and as with all new Administrations, there is a new theme and new hope.

Within a relatively short period the Administration of President Bush has set a new tone which gives hope—however faint—that after the tensions of last few decades, we may be entering an era of peace, and harmony. In my country, a new Government has taken over more recently under the leadership of Prime Minister Vishwanath Pratap Singh. It is a matter of significance and pride not only to us as Indians, but also I believe of some relevance to the rest of mankind, that the change in Government was brought about through free and fair election—an election in which two hundred and ninety six million people, i.e., close to three hundred million people, participated. This was the largest election ever held in human history. As, a Western journal remarked at that time, it was as if the entire U.S. and Europe went to polls on a single day, and voted to usher in a new Government.

2. I believe that this shared faith in the democratic process is what binds the people of our two countries in an everlasting friendship—more than trade, commerce or investment. These are important in themselves, but much more important is our abiding faith that Americans and Indians

cherish the same values, and worship the same great institutions of democracy.

3. I hope very much, along with you Mr. McCormack, that what we accomplish here today and tomorrow will carry forward the good work done by our predecessors and further strengthen the network of relationships between our people and our Governments.

4. With your permission, let me now deal with some issues about the Indian economy and Indian policies that may be of some interest to you. I do not want to deal with these comprehensively, but only selectively. The details can be dealt with in the Working Group which will be meeting a little later.

5. On the Indian economic situation—let me just highlight a few salient points. India is on a new growth path. The rate of growth in 1988-89 was 10 percent, thanks to agricultural recovery. For the last decade, we had a growth rate of slightly more than 5 percent per annum. This is higher than our own historical rate of 3.5 percent. It is also higher than the rate of growth of other developing countries.

Another striking fact is that higher growth has been achieved with relatively low rates of inflation. Our inflation rate has been in the single digit through most of the decade, and the latest deseasonalized annual rate of inflation is about 7 percent per annum. India has also been a prudent borrower abroad. Although our external debt has increased, it is within our servicing capacity. We have never defaulted on a single loan, postponed a single payment or put any restriction on repatriation of dividends or profits. Lately, those who follow our affairs closely would have heard us complaining about our high external debt. The interesting point is that it is we in India who are making these noises, not the bankers or our creditors. The reason why we are saying this is to ensure that our Departments and enterprises keep within prudent borrowing limits and do not overborrow as a soft option. Our credit rating remains high—one of the best in the developing world because of this caution, and we propose to keep it that way.

6. Another very important development in the Indian economy is the upsurge in exports. We have created an environment where exports are profitable, where our industry is becoming more outward looking, and where competition is becoming more pervasive. This fiscal year 1989-90, our exports in dollar terms have grown by over one-fifth or by more than 20 percent.

7. You would also be glad to know that the last five years have seen a major upswing in our capital markets, the volume of new issues has increased several times over, and share values have multiplied. There was a lull for about eight weeks before the new budget on the 19th of March. Since then, however, the markets have soared, and there is a new confidence in the future of the economy. Our industrial growth has been of the order of 8 percent per annum in the last six years—one of the highest in the world. There was a slight dip in the current year, but now the indications are there will be a pick-up in the next quarter. Incidentally, the new budget has done a major restructuring of the corporate tax system—which has some similarity with your own tax reform. The rate of tax has been reduced, combined with abolition of capital allowances and tax shelters of various kinds. This will simplify the system and also yield substantially higher revenue.

8. As you know, agriculture is very important to our economic future. The bulk of our people are still dependent on agricultural employment. India is now, by and large, self-sufficient in food, except for marginal imports in years of drought. We propose to give high priority to investments in this sector so that productivity increases take place and we can re-build sufficient stocks of foodgrains to meet any contingency.

9. I should not only talk about achievements. Let me also mention two problem areas: the fiscal imbalances and the pressure on balance of payments. We have a fiscal deficit which is larger than we can sustain, and an important priority of the new Government is to reduce it. The situation is not unlike yours. Expenditure programs, once in place, are extremely difficult to cut. There is also an inertia on the tax side, as there is reluctance to increase taxes which is not very popular at any time, particularly when elections are close or when they are just over. Nevertheless, I am glad to inform you that faced with a difficult situation, the new Government has decided to act boldly and strongly. The recent measures, taken in the last two weeks, are expected to raise resources, which is more than 1 percent of GDP. The fiscal deficit will decline by about 1 percent of GDP even after allowing for some increases in expenditure.

10. On the balance of payments, the problem has arisen because of upsurge in imports in the last couple of years, particularly automobile and electronic components where large investments have taken place, and petroleum products where we have had no new major discoveries of oil. We are also repaying the IMF loan. However, with the faster growth in exports and other measures, we are confident of tackling this problem.

11. This is a brief account of our economic situation. Let me now deal with two or three areas of policy that are perhaps of special interest to you. Firstly, the whole issue concerning so-called liberation. There is considerable interest in American media and ovservers on the question whether India is going to go foward and continue the process of "liberalization," or is there going to be a reversal.

12. The position of our Government is clear on this issue. We are going to go forward, but at a pace which is consistent with our needs and with our priorities. We are going to reduce red tape, reduce direct physical controls, and rely more on fiscal and financial instruments. At the same time, it is fair to say that we continue to believe that in a poor country like ours, where there is tremendous scarcity of capital and infrastructure, the State through a process of consultation with all sections of the people and free debate in Parliament, has to decide on investment priorities. Should we invest in luxury housing and new models of automobiles *or* in housing for the homeless, rural water supply and irrigation? This decision cannot be left to free markets because there are no free markets for supply of sanitation, health, water, irrigation, or housing for the poor and the landless. This is not only an Indian reality. In rich countries like yours or in Europe, these tasks are major concerns of Governments. This job has to be done by the elected representatives of the people, and the only question that we, and perhaps you, have to tackle is how to get it done in the most cost effective way.

13. So far as private sector is concerned, it is being given its due role to increase output and create jobs within the framework of national priorities. Nearly 83 percent of our income originates in the private sector. This is much higher than most countries of Europe or North America. Lately, our industry has shown tremendous capability in undertaking large projects raising finance and in setting up enterprises abroad. This new strength of our industry is fully reflected in the growth and spread of capital markets.

14. The question of foreign investment policy normally raises some passion on both sides. We believe that our point of view on this is not fully understood, and perhaps you feel that our policies are not fully responsive to the vast changes that are taking place in the world economic environment. Having been involved in this debate for some time, more recently as the Chairman of our Foreign Investment Board, I feel that the area of differences is not as wide as it seems at first sight. After all, we have 200 new foreign collaborations with American companies every year. All your major companies, with a couple of notable exceptions, are represented in our country and doing extremely well. We must be doing something right!

15. However, I should acknowledge that there are some problems. These have become rather exaggerated because of public controversy surrounding a few individual cases. Such cases are no more than 3 or 4, but they have attracted a good deal of attention. I have no doubt that these will get sorted out, one way or the other, in due course. So far as the policy of the new Government is concerned, it is the intention to simplify the procedures, make it less *ad hoc* and more transparent. The Ministry of Industry is working on this, and we hope that very soon we will evolve a procedure whereby in designated priority areas, permission for foreign equity participation up to 40 percent will be approved more or less automatically provided the foreign exchange balance is reasonable. We also permit majority equity investment in export and high technology industries. Our main worry is that we should not get into a situation where there is lots of foreign investment, but where servicing of such investment becomes a problem because of high imports of equipment and raw materials but very little exports. The best guarantee of a stable and lasting regime for foreign investment is a sound balance of payments situation. We would like American and other foreign companies to contribute to this objective.

16. A couple of days ago, we have announced a new export-import policy. This policy will be operative for the next three years. Major steps have been taken to reduce form-filling and red tape. The policy provides special support to exporters, including a new scheme for imports of machinery and capital goods at very low tariffs for export production. We believe that exports and imports are the two sides of the same coin. Imports must largely be financed through exports and not through borrowings. The greater success we have in exporting, the easier it would be to liberalize imports.

17. Let me now say a word about some of the global issues which are of particular interest to us. Along with the rest of the world, we are excited about the events taking place in Eastern Europe. We fully endorse the global and multilateral efforts to help these countries with trade, investment and finance. History will not forgive us if the world fails to come to the aid of these countries at this crucial juncture.

18. We are concerned about some slowing down of growth in the industrial countries, the continuing imbalances in the payments situation of major industrial countries, consequent pressure on interest rates and the volatility in exchange rates. There is also no easing of protectionist pressures. What is even a greater cause for concern is the retreat from multilateralism. In our view, the only way to solve the global problems in an acceptable way is to strengthen, rather than weaken, multilateral approaches and multilateral institutions, in which all countries can participate equally. We very much hope that the United States, as the largest industrial nation and as the spirit behind many multilateral initiatives in the post-war years, will play a leading role in reinvigorating multilateralism and in providing the necessary vision for ushering in a more equal world.

19. Thank you for listening to me so patiently. May I end by recalling one statistic which may be of some interest. According to data compiled by economic historians, and quoted in Paul Kennedy's celebrated book, in 1830 India accounted for 17.6 percent of the world manufacturing output as against United Kingdom's share of 9.5 percent, and only 2.4 percent of United States. This was in 1830, which was not so long ago—no more than 4 or 5 generations earlier. This was the time when the British empire in India was expanding, and by 1860, the process of colonizing India had been completed. By 1900, India's share in manufacturing output had declined to 1.7 percent as against 18.5 percent for Britain and 23.6 percent for U.S.A. The industrial revolution completely passed us by, and until independence in 1947, India had practically no industry and no growth. This historical experience had a profound impact on the evolution of our trade and industrial policies in the last forty years. When you reflect on these policies, please remember that for over two centuries, the world trading and industrial system was not very kind to us. Things are, of course, different today. We have built up a diversified industrial structure, we are expanding our participation in world trade, and we are now ready to play our role in strengthening global economic cooperation.

Thank you.

RECYCLED PAPER

HON. LINDSAY THOMAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. THOMAS of Georgia. Mr. Speaker, with the 20th anniversary of Earth Day quickly approaching, many of us have read or seen stories about the "green revolution"—reports of a growing environmental awareness and activism among American consumers. Industry is answering this trend, in part, by developing products to meet consumers' pro-environmental demands. I am pleased to recognize one such contribution to the "greening" of our Nation's homes.

Fort Howard Corp., a leading paper company based in Green Bay, WI, that also has a facility in Effingham County, GA, which is in my congressional district, is introducing a new line of paper towels and bathroom tissue made from 100 percent recycled paper. As stated in a recent story in the Wall Street Journal, which appears at the conclusion of my remarks, Fort Howard hopes its "Green Forest" products will appeal to consumers who want to "use their pocketbook to not only buy a product they need, but also make a statement about the environment."

Fort Howard is investing in the notion that the rise in environmentalism is more than just a fad. They are betting that many Americans will follow the lead of consumers in Britain and elsewhere abroad, by using recycled paper products as part of everyday lives. We all should hope they are right.

This country is facing a solid waste crisis as Americans dispose of more than 160 million tons of waste every year. Our landfills are nearing capacity. While paper represents about 40 percent of solid waste, it offers the best opportunity for recycling. Today, 85 percent of everything that is recycled is paper. Clearly, an important part of the answer is recycling, and there are well over 1,000 municipal recycling programs already underway. It's a fact that for every ton of paper recycled, we save 17 trees and conserve 3.5 cubic yards of diminishing less energy and water resources. But collecting and separating paper for recycling before it enters the waste stream is only half the battle; we do not accomplish anything until we "close the loop" by creating markets for the paper through the purchase of recycled paper products.

Fort Howard has been an industry leader in paper recycling for more than 50 years. Each year its operations in Effingham County, GA, and also in Wisconsin and Oklahoma recycle more than a million tons of wastepaper. If the paper Fort Howard recycles were to end up in landfills, it would be enough to fill a 100-acre landfill to the depth of 15 feet each year. Fort Howard also works with State governments and private companies to set up their own recycling systems, and has won praise for local initiatives to collect old telephone books and for creating model recycling programs like the one with the State of Wisconsin.

The company also has supplied quality 100 percent recycled products for offices, government and commercial buildings, and other non-residential uses for many years. It was the first to develop Envision, a line of commercial tissue products specifically to meet EPA's content guidelines for paper products purchased with Federal funds.

More than ever before, the attention of this Nation and this Congress are turning to the challenges of protecting the Earth's fragile environment. Efforts such as those by Fort Howard will help remind Americans that, in a real sense, environmentalism begins both at home and at work.

[From the Wall Street Journal, Mar. 2, 1990]

FORT HOWARD CORP. INTRODUCES 100 PERCENT RECYCLED TOILET TISSUE, PAPER TOWELS

[By Vindu P. Goel]

American consumers accept recycled aluminum soda cans, recycled glass bottles, recycled grocery bags. They even accept recycled greeting cards. But are they ready for 100% recycled toilet tissue?

Fort Howard Corp. thinks so. Convinced that Americans are becoming concerned about vanishing forests and overflowing landfills, the closely held Green Bay, Wis., paper-products maker last month began a limited launch of the first major line of bathroom tissue and paper towels made entirely of recycled paper fibers—and marketed that way.

Such competitors as James River Corp., and Kimberly Clark Corp., both of whom use some recycled paper in their towels and bathroom tissue, doubt that the time has come for a marketing revolution. "The advantage has just not been in marketing products as recycled," says Jean Allen, a spokeswoman for Kimberly Clark. "Consumers, want softness, quality, and absorbency," none of which they associate with recycling, Ms. Allen says.

Fort Howard is undaunted. The company claims that its Green Forest recycled tissue is virtually indistinguishable in texture from low-cost brands currently on the market, such as Scott Paper Co.'s ScotTissue. Green Forest retails at a premium price—about $1.35 for a four-roll package. But Jeffrey P. Eves, a Fort Howard vice president, in charge of the promotional assault, contends that by purchasing a 100% recycled product, "consumers can use their pocketbook to not only buy a product they need, but also make a statement about the environment."

Scott and James River have long incorporated some recycled fibers into their products. And Fort Howard, which has based its entire business on recycled rather than virgin paper pulp, successfully introduced a 100% recycled bathroom tissue in the United Kingdom last year. Within five months, the new tissue, called Nouvelle, captured 3.2% of the market. Fort Howard's European plants are running at full capacity to meet demand.

But until now, no major paper manufacturer has dared court American consumers by boasting of the recycled content of its products. Tissue packages and advertisements for Scott's Cottonelle and James River's Northern line are silent on content, stressing instead softness and purity—not the fact that some of the paper might have had an earlier life as a computer printout. Packages for Green Forest, while not specifying exact content, are adorned with trees and a big "Made With 100% Recycled Fiber" on the front.

According to estimates for 1988, by Smith Barney, Harris Upham & Co., Fort Howard commands a mere 2% of the $2.3 billion U.S. bathroom tissue market and about 4.5% of the $1.5 billion paper towel market. The company is not expecting to seize the rest with Green Forest.

Fort Howard concedes that it won't be easy to overcome consumers' aversion to used paper, particularly for personal hygiene. But Fort Howard's market research suggest that there are enough environmentally concerned consumers out there to support a couple of extra percentage points of market share in each category, valued at about $78 million in sales.

"It's a nice opportunity," says Mr. Eves. "It is not our objective to win converts to the cause." However, if the cause grows bigger, as Fort Howard hopes, then the company won't have to play catch-up to consumer attitudes.

"Nobody is suggesting that, overnight, this thing will become a Hula-Hoop," says Mr. Eves. "On the other hand, there is a possibility that, over time, it will outlast the Hula-Hoop."

To induce wary tissue-buyers to try Green Forest, Fort Howard plans to offer 15-cent coupons, run in-store promotions, and spon-

sor special recycling events. Of course, it's possible that consumers may not love trees enough to make such a personnal sacrifice. Fort Howard launched a similar recycled tissue the last time the environment was a big issue, in the 1970s only to see it fail miserably. This time the company takes heart in the popularity of a private label 100% recycled bathroom tissue sold by Loblaw Cos., Canada's larges grocery chain. Loblaw's tissue, introduced last summer as part of a special "green" line, is the most popular toilet paper the chain sells.

The Midwestern grocers who are receiving the first shipments of Green Forest towels and toilet paper are treating them like any other new products. "I am not convinced they're going to sell," say Bernard Schipper, a senior merchandising manager for Meller Inc.'s 54 store chain in Michigan and Ohio. "But we want to at least offer them to the consumers and let them decide."

DEFENSE SPENDING MUST BE CUT, TAXES MUST BE INCREASED, IF BUSH IS TO TURN HIS RHETORIC ON EDUCATION INTO REALITY

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FORD of Michigan. Mr. Speaker, as we are preparing our budget resolution and funding strategy for fiscal 1990, I would like to call to the attention of my colleagues an article, written by Robert H. Atwell, the president of the American Council on Education, which appeared in the April 4 issue of the Chronicle of Higher Education. This article, entitled "Defense Spending Must Be Cut, Taxes Must Be Increased, if Bush Is to Turn His Rhetoric on Education Into Reality," presents an insightful look at the problems our education system is facing today and the Federal assistance necessary to solve them.

I would hope that my colleagues would take Mr. Atwell's message to heart. President Bush promised the American people that he would be "the Education President." I would hope that we could send him a budget to sign this year, with significant increases in funding for all levels of education—a budget that would allow the President to achieve his goal.

[From the Chronicle of Higher Education, Apr. 4, 1990]

DEFENSE SPENDING MUST BE CUT, TAXES MUST BE INCREASED, IF BUSH IS TO TURN HIS RHETORIC ON EDUCATION INTO REALITY

(By Robert H. Atwell)

In recent weeks a typical Washington battle has broken out—the kind of conflict only a policy analyst could love. The subject in contention is national education spending and, specifically, where we stand compared with other nations.

To the outside observer, this fight may seem little more than a skirmish, a duel of statistics. But in the current political context of education summits and national goals, it masks serious disagreements over how we will improve our education system, what it will cost, and who will pay.

On one side are President Bush, his political supporters, and the Department of Education, who argue that the United States already spends more money on education than any other nation. The key to improvement, they say, is to spend it more wisely. That belief is reflected in the President's budget proposals, which would keep federal spending on education virtually level.

On the other side are the authors of a report from the Economic Policy Institute, backed by some education leaders and several key members of Congress, who claim that the United States does not stack up well compared with its international competitors and that significant increases in government support are needed.

At the heart of the debate is how one measures spending. The Administration relies on the traditional indicator, which is spending per student. By that standard, the United States is second only to Switzerland in terms of expenditures through the 12th grade.

The report of the Economic Policy Institute contends, however, that when education spending is measured as a percentage of gross national product, the United States does not come out at—or near—the top, but low on the list of industrial nations. To match just the average spending level for elementary and secondary education, the report argues, we would need to spend an additional $20 billion.

Interestingly, both sides agree that by either measure expenditures on higher education in the United States exceed those of almost every other nation—leading some policy makers to conclude that America's colleges and universities are "well off," and that any new funds should be targeted solely on the pre-kindergarten through 12th-grade levels.

However, on this score, both the G.N.P. and the per-student indicators are misleading. Essentially, they fail to reflect fundamental differences between the United States and other nations.

Most significantly, our rate of college participation—nearly 60 per cent among students of traditional college age—is the highest in the world. Of other industrialized nations, only Canada, with 55 per cent, comes close. New Zealand is the only other country with a participation rate above 40 per cent: both West Germany and Japan come in below 30 per cent.

Even after correcting for international differences in the structure of educational systems, we devote more of our G.N.P. to higher education, but we must, since we are educating a greater share of our population.

Spending per student on higher education in the United States—about $8,000 in 1985, the base year used in the economic institute's study—includes federally funded research conducted on college campuses. But a few other nations follow the U.S. research-university model, so such expenditures are not counted in their education totals. Subtracting federal research funds brings the U.S. per-student spending figure down to $7,000, below that of Denmark and Australia.

Comparing U.S. spending with other nations' also misleading because government here plays a much smaller role in financing higher education than in other industrial countries. Revenue flowing to American colleges and universities from federal, state, and local sources in 1985 amounted to $45 billion—less than half the total. The rest came from tuition, fees, and endowment income, gifts, and auxiliary enterprises such as hospitals. By comparison, in Japan, the one other nation that depends on non-governmental investments in higher education, such sources account for only about one-third of total spending. When one counts government spending alone, the United States ends up in the middle of the industrial pack, well below Japan, Great Britain, Australia, and Denmark.

As these figures show, it's dangerous to base national policy on narrow statistical measures. How much we spend should be a reflection of what we need to do, not abstract comparisons.

If such indicators tell us little about where our education system really is, where it must go, or the way to get there, other factors—demographic, economic, social, and structural—better reveal the nature of our challenge.

Our uniquely decentralized public-education system is plagued by huge disparities in investment between affluent and poor school districts. How can we provide children from poverty-stricken families in urban and rural areas with the resources they need to succeed?

By 2000, one-third of our school-age children will be members of minority groups, many of them disadvantaged and many facing severe language barriers because they are the children of immigrants. Against this background of growing diversity and rapid change, how can we raise student performance and prepare graduates to participate in an increasingly competitive international economy?

The economy of the future will place a high premium on education beyond the secondary level, yet during the last 20 years there has been a significant decline in the percentage of minority high-school graduates going on to college. As these students account for a greater share of the labor force, how can we insure that our supply of educated workers is adequate to fill the jobs that need doing?

Alone among nations, the United States has made a national commitment to guarantee access to higher education for all qualified students, regardless of their financial status. How can we fulfill that commitment in an era of tight budgets and anti-tax politics?

No doubt about it: Meeting these challenges will require us to spend more money and spend it wisely. Structural reforms are important, but they will not be enough. I'm not prepared to argue that simply spending more money than any other country necessarily will produce the results we want, but I do maintain that we can productively invest extra funds in a variety of programs that have proved their effectiveness.

The key players in this game is the federal government, which brings us to another recent example of statistical legerdemain. Challenged to explain why the Administration's budget request for fiscal 1991 does not reflect its rhetorical emphasis on educational improvement, representatives of the White House and the Education Department respond that greatly increased federal funding not only is not needed, but also wouldn't make much difference anyway because federal funds account for only 6 per cent of total education spending.

That's a bit of dissembling that should not go unchallenged. In the aggregate the figure may be true, but it provides a totally inaccurate picture of the federal role and its impact. For the past 25 years, the federal government has had the primary responsibility for guaranteeing educational opportunity to those who, for economic and social reasons, might otherwise be denied it. Thus federal spending has been targeted on a

select few areas where it can do the most good for the disadvantaged.

Take student aid, for example. Pell Grants, guaranteed loans, work-study funds, and other forms of assistance to needy students this year will total almost $20 billion. That's fully 75 percent of all financial aid available to students in post-secondary education. The federal government plays a similarly important role in other programs for the disadvantaged, including Head Start, compensatory education for elementary-school children, and education of the handicapped.

Major increases in appropriations for each of these areas in the next fiscal year would begin to make up for some of the ground lost in the 1980's. And because these programs directly and effectively serve the growing numbers of students at risk academically, such support also would make a huge difference in their educational performance.

To continue with the example of federal student aid: Even with far tighter eligibility standards for Pell Grants, the rapid growth in the number of low-income students has far outpaced growth in appropriations for this program over the past decade. As a result, since 1980 the value of the maximum grant has eroded by 16 percent.

Although the federal government now accounts for 75 percent of student aid, 10 years ago its share was 83 percent. The government's failure to keep up with growing need has been a driving force behind tuition increases, with institutions recycling a significant share of their increased revenues into financial aid.

Also, as a recent study by the American College Testing Program demonstrates, a direct relationship exists between the shift in emphasis in federal financial aid from grants to loans and declining participation in higher education by low-income students. Raising the maximum Pell Grant to $3,100—the authorized level for fiscal 1991—would cost slightly over $2 billion. But it would attract into higher education many qualified low-income students who currently forgo this opportunity, and it also would produce savings on the other side of the ledger by reducing the number of defaulted loans.

How do we pay for the kinds of investments required to transform education rhetoric into educational reality? I have argued in the past, and argue now, that it is possible only by cutting defense spending and raising taxes.

On the first count, we need a peace dividend not at some uncertain time in the future, but right now. The realities of the international situation permit, and the needs of the nation and world require, more than token cuts in the Pentagon's budget. Missiles aimed at East Germany should be traded for services aimed at our neediest students.

But even with a large peace dividend, we cannot reduce both our social and fiscal deficits. Responding to the many unmet needs of American society requires us to look for ways to raise additional revenues and to do so equitably, with the greatest burden falling on those who have benefited most from the tax reductions of the past 10 years.

We can set all the national education goals we want; but if we fail to devote the resources required to achieve them, we will be like King Canute, ordering back the tide that inevitably will wash over us. Our willingness to act—and not which side has cornered the truth on relative levels of education spending—will determine whether ours is a more competitive economy and a more democratic society in the 21st century.

THE ADMINISTRATION IN WONDERLAND—DOUGLAS BLOOMFIELD DISCUSSES AMERICAN POLICY TOWARD IRAQ

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LANTOS. Mr. Speaker, in recent weeks we have seen an incredible performance by the leaders of Iraq—that country first, executed a journalist for a British newspaper, which it accused of spying because he visited one of its poison gas factories to get details about a devastating fire, second, tested a medium range, multistage ballistic missile, third, got caught smuggling triggering devices for nuclear weapons out of the United States, fourth, has built missile launchers within range of Tel Aviv, and fifth, threatened, in the words of its irresponsible President Saddam Hussein, to destroy "half of Israel" with chemical weapons. Lest one think this last threat is an idle one, keep in mind that Iraq used chemical weapons against the Iranian army during the Iran-Iraq war in violation of international law, and used chemical weapons against its own citizens—innocent civilian Kurdish children, women, and men.

Mr. Speaker, despite the appalling and outrageous conduct of the Government of Iraq, our State Department has a "soft spot" for that vicious dictatorship. The United States is Iraq's largest trading partner and they are seeking substantial credits for the purchase of our products. Nevertheless, our State Department refuses to put any pressure on Iraq to clean up its act.

At the same time, the State Department has repeatedly criticized and threatened Israel—our democratic ally in that same region. Israel is the only functioning democracy in the area, it holds free elections, has a free press that openly criticizes the Government, and an independent judiciary which assures the enforcement of the rule of law. Israel has actively sought to establish peaceful relations with its neighbors. And how has the administration responded to our democratic ally Israel? By seeking to limit and restrict United States assistance to Israel, and making deliberate and ill-timed comments against Israel which helped bring down that country's Government. Yet the same administration which harshly criticizes the Government of Israel, coddles the Butcher of Baghdad.

Mr. Speaker, Douglas M. Bloomfield has written an excellent article on this contradiction in American policy in the Middle East. It appeared recently in The Washington Jewish Week. I ask that it be placed in the RECORD, and I urge my colleagues to give it careful attention.

AIDING AND ABETTING

(By Douglas M. Bloomfield)

It's hard to tell sometimes how George Bush picks his friends or makes decisions.

Take the example of two countries which recently asked for U.S. Government loan guarantees so they can borrow at the lowest available rates. One wants $1.25 billion to purchase American grain and other goods. The second wants less than a third that much, $400 million, to build housing for refugees.

In both instances, the President and the Congress are on different sides. For one country, the Congress shows great enthusiasm and supports the aid, but the President wants to impose restrictions on the money as well as other policies of the recipient. In his anger, he even helps bring down the country's government.

For the second, the Congress objects to any loan guarantees because the country is a notorious outlaw nation that uses nerve gas without restraint, is deploying ballistic weapons, trying to build a nuclear bomb to use against an American ally, threatens to unleash chemical and biological weapons, has the worst human rights record of any nation and is generally nasty. For that country, however, the President overrides Congressional objections and does nothing about the need for restrictions or changes in policy.

Oh Alice. It gets curiouser and curiouser.

The first country is Israel. The second is Iraq.

The Bush Administration, like its predecessor, has repeatedly demonstrated a "soft spot" for Iraq, according to people in a position to know.

"It was like pulling teeth to get any criticism of those bastards," according to a senior Pentagon official in the Reagan Administration who fought against the transfer of high western technology to Iraq.

Stephen Bryen, former deputy undersecretary of defense, said the Saudis strongly encouraged closer U.S.-Iraqi relations, telling American officials that Saddam Hussein had changed and underneath it all was really a good guy. "The Iraqi desk people at State and Defense bought that hook, line and sinker."

In recent weeks and days, Iraq has tested a medium range, multi-stage ballistic missile, executed a journalist accused of spying, gotten caught smuggling triggering devices for nuclear weapons, built fixed missile launchers within range of Tel Aviv, threatened to destroy "half of Israel" with chemical weapons and generally thumbed its nose at the civilized world.

In the face of all that, George Bush has reacted with preppy restraint. He has sent forward his spokespersons to say "we do feel very strongly about [smuggling nuclear triggers] as a non-proliferation issue," "we deplore the execution" of the British-based reporter and the threat to exterminate Israel is "irresponsible, inflammatory and outrageous."

Sounds tough, but the pity is that's as tough as the Bush Administration is likely to get with Iraq. There is nothing behind the rhetoric.

This week, Rep. Howard Berman (D-CA), a long-time critic of U.S. policy toward Iraq, plans to introduce legislation imposing meaningful sanctions on Iraq. The Bush Administration opposes it, and the congressman and his colleagues are being arduously lobbied by businessmen who not only dislike these sanctions but want to lift the last remaining restraint on high technology transfers to Iraq.

This White House/business alliance succeeded in killing tough sanctions in the Reagan Administration. At that time, the

president said congressional sanctions for chemical weapon use were not in order, but that he should be given the discretion to take whatever steps he considered necessary. Neither Ronald Reagan nor George Bush ever found any reason to exercise that discretion.

The reason, according to Sen. William Cohen (R-ME), "we love the color of money and the smell of oil." The American response to Iraqi actions, said the vice chair of the Senate Intelligence Committee, should be "sound and fury, but all we're hearing is the sounds of silence." The *Wall Street Journal* agrees: "It appears that Iraq will pay no economic price or serious diplomatic penalty for its actions."

What sets Iraq apart from other countries with weapons of mass destruction is its "chillingly unselfconscious willingness to use them," Berman points out, even against its own citizens.

Iraqi claims that it needs these weapons for self defense are betrayed by its own aggression in the Iran-Iraq war as well as its first use of ground-to-ground missiles and chemical weapons in that conflict.

American technology has played a key role in Iraq's missile program. The U.S. Commerce Department promoted high-tech imports to Baghdad despite Pentagon warnings that it could be used for Iraqi missiles, according to Stephen Bryen, who led the often-losing battle within the Administration.

The Reagan-Bush administration was loathe to criticize Iraqi use of chemical weapons, Bryen points out. In fact, it could be argued the administration to a degree condoned the practice. Evidence can be seen in efforts to give the Iraqi army military canisters of atropine, an antidote for certain chemical weapons. The advocates of the sale argued the canisters were defensive in nature, but the truth is they would have given Iraqi troops protection to move up close with their chemical weapons and be able to survive if some of the gasses blow back in their own faces. If that happens, the soldier simply takes the canister and whacks it against his thigh and is injected with the life-saving atropine. Bryen was able to block the sale.

Iraq has deployed near its border with Jordan six permanent launchers of ground-to-ground Al-Husayn ballistic missiles with a 400-mile range and capable of hitting much of Israel. It is currently developing the 1,200-mile Tammuz 1 missile.

Saddam Hussein wants missiles because he knows how badly his air force did in the war with Iran. His pilots were neither brave nor skilled enough to come in low and close enough to be effective. Missiles don't have that problem. What's more, with the warheads Iraq is building, accuracy is irrelevant. Chemical and biological weapons are used against people, not military installations. Their purpose is terror, murder and mass destruction. It makes no difference if it is a few hundred meters or even a few miles off course—unless you're underneath.

Much of the Iraqi buildup is being financed by gifts and loans from friends like Saudi Arabia and Kuwait, but a chunk is coming from American consumers. Last year the United States imported $2 billion worth of Iraqi oil. American taxpayers spent millions more keeping Persian Gulf shipping channels open for Iraq and her allies during the tanker war and provided other valuable assistance to Iraq in its war with Iran.

It is time for the United States to stop aiding and abetting the Butcher of Baghdad. The time for timidity is past. Credit guarantees for Iraq should be cancelled immediately. There should be an embargo on further importation of Iraqi oil, a broad ban on technology transfer, adoption of the Berman sanctions bill, and a recall of the American ambassador, who suffers from a bad case of clientitis, until there is more evidence of improvement in Baghdad than the word of friendly Arab diplomats whose countries live in fear of Iraq. Iraqi supporters who expect American aid, technology and weapons must be told that decisions on those matters will be in inverse proportion to their support for Saddam Hussein.

If George Bush truly wants to be the leader of the free world, he must quit hiding behind the empty rhetoric of his spokespersons and demonstrate forceful leadership against one of the most repressive and dangerous regimes in modern history.

IN RECOGNITION OF PLAY-IT-SAFE INTERNATIONAL

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEHMAN of California. Mr. Speaker, I would like to take this opportunity to commend an outstanding educational organization in my district, Play-It-Safe International, by recognizing its efforts to educate children safety techniques and crime prevention throughout the world.

The Play-It-Safe Program involves the distribution of coloring books, parent and teacher aids, and video aids in accordance with the guidelines issued by the Department of Justice. The program helps children understand commonsense rules about personal safety and crime prevention.

Play-It-Safe was founded in 1977 as a cooperative project between law-enforcement agencies, concerned citizens, and others who came together to conceive a way to teach safety to youngsters up to the third grade. From its start in Fresno, CA, the program spread quickly. Play-It-Safe is currently available in 31 languages in 2,800 cities throughout the world cultivating a mutual exchange between nations of ideas on safety.

Only by providing our children with information which will help them become more aware of how and why accidents happen can we encourage them to avoid situations where the potential for injury is great. Mr. Speaker, I believe that the achievements of the Play-It-Safe Program are felt all across the Nation and the world. I congratulate Play-If-Safe International for its concern for the welfare of our children and its aggressive program of bringing readily understandable educational materials to our youths.

THE HOMELESS OUTREACH ACT OF 1990

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MATSUI. Mr. Speaker, today, I am introducing a bill to require SSA to conduct outreach to homeless individuals who may be eligible for SSI benefits and to assist these people in obtaining and retaining their benefits. An estimated 1.3 million people would benefit from this type of outreach. According to the National Institute of Mental Health, in some cities fewer than 10 percent of eligible homeless people receive SSI benefits.

This proposal will establish a comprehensive program not only to reach the homeless but to ensure that they continue to receive the benefits and have access to other services and programs to which they are entitled, such as food stamps or health care.

In 1987, Congress took a step toward trying to reach homeless individuals who may be eligible for SSI and other benefits through a provision enacted as part of the budget reconciliation package. This provision established a demonstration outreach project to the homeless to help overcome the barriers they face in applying for benefits. Our intent was to assist homeless people in applying and receiving SSI benefits, food stamps, and medical care.

This demonstration project never was implemented by SSA. The agency argued that Congress did not appropriate money for this purpose and that they already were doing outreach to the homeless population. In response, the National Law Center on Homelessness and Poverty, along with Representative PETE STARK and a number of other plaintiffs, filed a lawsuit against SSA and the Department of Health and Human Services for failing to implement the demonstration project.

In February, a Federal judge ruled in favor of SSA and HHS, determining that Congress was not clear it its direction and therefore SSA was justified in not implementing the outreach program. Currently, there is no requirement that SSA conduct outreach to the homeless.

The legislation I am introducing today, and which has already been introduced in the Senate by Senator DON RIEGLE, will fill the gap the Court found. It would put into law the requirement that SSA not only identify homeless individuals who may be eligible for SSI, but that the agency help guide these people through the sometimes long and confusing path to receiving these and other benefits. This bill would require SSA to conduct ongoing outreach to homeless individuals through visits to soup kitchens, shelters, and day centers and other places frequented by the homeless. The agency also must provide assistance to homeless individuals in completing and filing applications for benefits, and must provide assistance in making appointments for any necessary medical examinations.

SSA would have to provide assistance to homeless individuals to prevent the inappropriate suspension of benefits. Many homeless

individuals have their benefits cut off because the local SSA office was unable to contact them through the mail or by telephone. Under this bill, SSA would have to restore these benefits immediately, or in instances where an appeal is filed, provide the homeless with the necessary support in seeking an appeal.

Homeless individuals applying for SSI benefits would receive expedited consideration of their application. If SSA is unable to make an eligibility determination within 30 days, the homeless person would become eligible immediately for benefits on the 31st day of application and benefits would be paid back to the date of application.

This bill also would allow SSA to award grants to State, local governments, or nonprofit organizations to conduct the outreach efforts. In many communities, these types of partnerships have been highly successful.

In Sacramento, we were fortunate to have the American Association of Retired Persons fund an outreach project during May, June, and July 1989 to reach homeless and homebound people who were eligible for benefits. During the months of the project, SSI applications increased by 40 percent and benefit awards increased by 32 percent. Advocates in Sacramento believe the success rate is even higher.

The Legal Center for the Elderly and Disabled, which spearheaded the Sacramento effort, decided that 3 months was not long enough to conduct an outreach program, so they managed with very little money, to continue the outreach efforts until November. The Legal Center is now seeking funds from the Department of Health and Human Services to fund a continuing outreach program to eligible homebound and homeless individuals in Sacramento. They have seen a drop in applications since the outreach project concluded.

Although, there are millions of people who would gain from receiving these important benefits, few of them know of the program or that they are eligible. There are presently 4.4 million SSI recipients. Studies of this program estimate that the participation rate for individuals 65 years and older in the SSI Program is somewhere between 50 and 60 percent.

Organizers of the Sacramento outreach project estimate that at the outset as many as 10,000 people living in Sacramento were not receiving the monthly SSI payment to which they were entitled.

The National Law Center on Homelessness and Poverty estimates that as many as 3 million Americans are homeless. As many as 55 percent of the homeless may be eligible for a modest amount of Federal assistance under the SSI Program because they are elderly, physically handicapped, or mentally ill. According to the National Institute of Mental Health, only 10 percent to 30 percent of homeless individuals actually receive the benefits to which they are entitled.

While the Sacramento outreach project was tremendously successful these local projects cannot take the place of a nationwide effort to publicize the availability of these important benefits—benefits that can mean the difference between being housed and homeless.

BISHOP KEOUGH HIGH SCHOOL STUDENTS WILL ENTER NATIONAL COMPETITION

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the bicentennial of the Constitution and Bill of Rights competition.

Valerie Brown, of Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Valerie and her classmates were able to achieve excellence. Valerie and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Valerie Brown and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Valerie and her classmates good luck in the national competition.

DESIGNATING NOVEMBER 1990 AS DYSLEXIA AWARENESS MONTH

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LAGOMARSINO. Mr. Speaker, I would like to call my colleagues' attention to a bill I am introducing today which would proclaim November 1990 as Dyslexia Awareness Month.

Because of the difficulties dyslexic students encountered with reading and writing skills, we used to wrongly and unfairly label these individuals as "stupid" and "dunce". These labels actually better describe our old, ignorant attitudes. In fact, many of these learning-disabled are very smart and talented. Despite their learning-disability, they have found innovative ways to compensate and overcome their difficulties, becoming very successful, productive, and well-respected members of our society. Who, for example, would consider Cher, Tom Cruise, and Gov. Tom Keane as disabled? Like other dyslexic individuals, they are can-do people. Did you know, for example, that such luminaries as Albert Einstein, Leonardo da Vinci, Thomas Edison, Hans Christian Andersen, Winston Churchill, President Woodrow Wilson, and Gen. George S. Patton also were dyslexic?

With a better understanding of dyslexic today, we are able to design programs to help those with dyslexic and other learning-disabilities. New, different ways of teaching are helping bright, resourceful learning-disabled students excel in a wide variety of studies. I was recently introduced to a model school especially for dyslexic and other learning-disabled students right here in Washington, DC—the Lab School. Through Meredith Reynolds, a high school social studies teacher there, I realized that with the right kind of teaching and learning atmosphere, students who would have struggled in the average classroom because of different needs, instead are right up there with the best of their peers throughout the Nation competing for slots in America's top universities. In fact, a member of my staff who has visited Meredith's classroom and talked about Congress and American Government gave her students high marks. Their questions and comments were more intelligent and insightful than those of their peers in other high schools.

I would like to pay special tribute to my constitutent, Joan Esposito, who struggled for over 40 years with this handicap before being tested and discovering that she was dyslexic. Since that time she has worked tirelessly in trying to educate the public about this learning disability. She established project Heroes which has adults with dsylexia address children in public school classrooms about the problems associated with being dyslexic. Because of her work over the years Joan will be receiving the 1990 Woman of Distinction Award by the Santa Barbara-based soroptimist organization for her work on behalf of dyslexics.

It is indeed tragic to think many people with this disorder go through life without ever having this problem detected. We must continue to focus national attention on this problem since many of these individuals could learn to read and write if they were only aware that they were dyslexic. It has been estimated that 25 million adult Americans are functionally illiterate. How many of these individuals are suffering needlessly because of this handicap? Thanks to Barbara Bush we have all been made aware of the high rate of illiteracy in this country, but we must continue to do all we can to insure that all our citizens are fully literate. I believe that efforts such as this will help to achieve this goal.

I hope you will join with me in calling attention to this situation and hope you will support me in this effort and cosponsor this worthy resolution.

IN RECOGNITION OF LT. COMDR. SHAW COHE

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. BYRON. Mr. Speaker, I would like to take this opportunity to honor and recognize Shaw H. Cohe, lieutenant commander, Supply Corps, U.S. Navy.

It has come to my attention that Lieutenant Commander Cohe has been awarded the Meritorious Service Medal for his outstanding work as the Navy's liaison officer for acquisition and contracts with the U.S. Congress. His dedicated efforts in this field have been of tremendous assistance not only to me and my colleagues but to the entire Nation as well.

I am sure that Lieutenant Commander Cohe will continue his superlative work in his current position as Military Assistant to the Principal Deputy Undersecretary of Defense for Acquisition. A man of Lieutenant Commander Cohe's talent and expertise is rare indeed, and it gives me great pleasure today to recognize him before this body.

WORK OF RESIDENTS FOR A MORE BEAUTIFUL PORT WASHINGTON PRAISED

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MRAZEK. Mr. Speaker, I rise today to pay tribute to Residents for a More Beautiful Port Washington. As Earth Day 1990 approaches, the efforts of this fine organization of citizen activists deserves special mention.

Residents for a More Beautiful Port Washington was formed 22 years ago by a group of environmentally aware and concerned citizens. Since that time, it has been instrumental in protecting and improving the environment of Port Washington and its surrounding communities.

Some of the successful projects of Residents for a More Beautiful Port Washington have included the beautification of the local train station and post office, the prevention of dumping of garbage in Hempstead Harbor, establishment of an environmental book fund for the local library, the sponsorship of a regional park, and the production of countless informational forums and cultural events.

In addition to their tireless civic efforts, Residents for a More Beautiful Port Washington has established itself as an effective citizen lobby on the local, State, and Federal level. It has been effective in shaping governmental policy and educating our elected officials concerning a wide range of sensitive environmental issues.

Mr. Speaker, at a time when many decry the pervasive materialism and lack of community spirit in our Nation, I applaud the work of the many concerned activists of Residents for a More Beautiful Port Washington. It is my every hope that they will continue to work on behalf of their community for many years to come.

ZEIGLER-ROYALTON'S SMOKE-FREE CLASS OF 2000

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. POSHARD. Mr. Speaker, I want to call attention to some young people in my district making an important commitment to living healthy lives.

Mrs. Maudie Bell's second grade class at Zeigler-Royalton Grade School is taking the pledge to be a "Smoke-Free Class of 2000."

This is a unique program sponsored by the American Cancer Society, American Heart Association, and American Lung Association. It is a Tobacco Prevention Program targeting students who will graduate from high school in the year 2000.

Each year the students will be involved in programs to learn more about the dangers of tobacco, with the goal of a generation of young people who are smoke-free.

I want to make special mention of these students because at an early age they have made an important decision to live their lives in a healthy manner. They understand what smoking and other types of tobacco use can do to their bodies. And they are also willing to make a stand against the peer pressure that can be found even in the early grades, and which they are sure to encounter as they progress through the school system.

The toll smoking takes on our society each year is tremendous. It is a real health concern for all of us, but we can be encouraged by the actions of these second graders who are leading the way to a smoke-free generation. I look forward to the high school graduation ceremony where these youngsters, and perhaps many more who will join them after today, graduate as the "Smoke-Free Class of 2000."

They have my support and congratulations.

I am listing their names for the RECORD so they may receive appropriate recognition for their efforts.

Stevie Battaglia, Allison Chamness, Alison DeSomer, Sara Dollins, Janetta Fletcher, Beau Forbes, Jimmy Gaddis, Kristy Gayer, Matt Gayer, Ryan Goodisky, Joey Hargraves, Kacey Karnes, Deanna Kimble, Ricky Kirk, Jason Krelo, Emily Kretz, Daniel Mitchell, Melissa Mistroka, Christo Poggas, Julie Robinson, Donelle Rowland, Josh Short, Austin Simion, Erik Trusty, Linnea Vantrease, Nathan Walker.

CONGRATULATIONS TO MEL C. ROMERO

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. RICHARDSON. Mr. Speaker, one of New Mexico's most dedicated workers, Mr. Mel C. Romero, is retiring after 38 years in the credit union business, the last 16 being spent at Zia Credit Union in Los Alamos, NM.

Mr. Romero began his career in Pueblo, CO, in 1953 at Mount Carmel Credit Union. He left in 1963 to lead a joint CUNA-Peace Corps Program in Chile, South America.

After 2 years in Chile, he was hired by the University of New Mexico to train future contingents of volunteers going to Central and South America. He taught Spanish/Chilean history and accounting in Spanish.

From the University of New Mexico, he went to work for the Air Defense Credit Union at Fort Bliss, TX. After 2 years there, he was offered a position at Otero Federal Credit Union at Holloman Air Force Base near Alamogordo, NM. He was serving as assistant manager there when he was asked to interview for the position of manager at Zia Credit Union. He was one of 15 candidates and was chosen after his first interview.

While Mr. Romero was at Zia, the credit union maintained the lowest delinquency ratio for a credit union of its size in the United States, and never had to foreclose on a home or mobile home. Currently it holds one of the highest capital to asset ratios in New Mexico for credit unions and banks, with over $37 million in assets and 6,500 members. Mr. Romero should also be proud that Zia Credit Union was one of only three credit unions in the State to receive a CAMEL rating of one by the New Mexico Financial Institutions Division.

Mr. Romero has done an excellent job of building and strengthening this financial institution, which plays such an important role to the people of Los Alamos County. Although he will be sorely missed as the general manager of Zia, he can leave with the satisfaction that his tireless efforts have made Zia one of the finest and strongest financial institutions in the State of New Mexico. I commend Mr. Romero for his dedicated service and commitment to his community.

THE 25TH ANNIVERSARY OF NEW YORK CITY'S LANDMARKS PRESERVATION COMMISSION

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. WEISS. Mr. Speaker, I would like to share with my colleagues Mayor David Dinkins' eloquent remarks honoring the 25th anniversary of the New York City Landmarks Preservation Commission. The Landmark Preservation Commission has contributed significantly to the quality of life in New York City. It has helped New York preserve its past, its municipal identity, the fabric of many of its communities, and the architectural achievements of previous and present generations.

In 1965, during my first term as a member of the New York City Council, the city passed the Landmarks Preservation Law, which created the Landmarks Preservation Commission. Since its inception, the commission has designated 856 buildings as individual landmarks and 52 historic districts encompassing a total of more than 15,000 buildings. The commission has also expanded the preservation law to include scenic outdoor spaces, public interiors, and entire districts as landmarks.

I join Mayor Dinkins in congratulating the Landmarks Preservation Commission on its silver anniversary and in thanking the commission for all that it has done for New York City. I urge my colleagues to read Mayor Dinkins' remarks:

REMARKS BY MAYOR DAVID N. DINKINS, LANDMARKS PRESERVATION COMMISSION 25TH ANNIVERSARY

Good morning and welcome to City Hall. As one who lives and works in two historic 19th century buildings, I am particularly delighted to participate in this celebration of the 25th anniversary of the Landmarks Preservation Commission.

I salute my distinguished colleagues and predecessors in office, Mayor Robert Wagner and Mayor Abraham Beame, as well as former LPC Chairman Gene Norman, who is here representing former Mayor Koch, and my appointee to head WNYC, Tom Morgan, who is representing Mayor Lindsay.

My greetings to Barbaralee Diamonstein, Chairwoman of the Landmarks Preservation Foundation, which is sponsoring this celebration; City Council members Herbert Berman, Robert Dryfoos, June Eisland, Walter McCaffrey, Morton Povman and Priscilla Wooten; former Chairmen and Chairwomen of the Landmarks Preservation Commission, Beverely Moss Spatt, Kent Barwick, Gene Norman and David Todd; our recently designated Landmarks Commissioner, Laurie Beckelman, who will be presented for City Council consideration later this month; J. Jackson Walter, President of the National Trust for Historic Preservation; world-renowned architect I.M. Pei, distinguished architecture critic Paul Goldberger, theater impresario Joe Papp, writer and preservationist Margot Gayle, and all who have joined us on this silver anniversary of one of the most significant dates in our city's history.

On April 19, 1965, Mayor Robert F. Wagner signed Local Law No. 46 to bring the New York City Landmarks Preservation Commission into existence. While New York was not the first city to adopt landmarks legislation, we quickly found ourselves in the forefront of the preservation movement.

Since that time, the commission has designated 856 buildings as individual landmarks. But landmarks are more than individual sites. Often, it is the composition of a neighborhood that constitutes a landmark, and in that vein we have established 52 historic districts encompassing a total of more than fifteen thousand buildings. At the same time, we have expanded the law to allow the designation of scenic outdoor spaces and public interiors, as well as entire districts, as landmarks.

It hasn't all been smooth sailing. And the Commission's decisions have not always been perfect.

But on balance, the effect of the Landmarks Preservation Law on New York City has been more than positive: By preserving our past, it has also preserved our municipal identity, the fabric of many communities and the architectural achievements of former generations.

Initially, the Landmark Law was opposed by some real estate developers, who resented what they saw as an infringement on their property rights. But the law soon won widespread acceptance, for it reflected a truth—that architecture adds an important dimension to urban living.

On a practical level, even developers—frequently soon as the apostles of change—have come to appreciate the value of preservation. The Landmarks Law has enhanced the market status of such areas as Fort Greene, Brooklyn; Hunters Point, in Queens; Strivers Row, in Harlem; parts of Manhattan's Lower East Side; and so many others.

Landmarks designation often provided a cachet that made real estate more attractive and promoted owner investment. New York is a better city—and, I might add, a more competitive destination for tourism—because we have managed to save so many structures from oblivion.

Not only has Landmark designation rescued our past—but it has also helped to shape our future. Over the last 25 years, architects have come to know that their designs could become the landmarks of tomorrow. The challenge this implies is simply unprecedented in human history.

That great student of the world's cities, the late Lewis Mumford, once wrote, "The city is a fact in nature, like a cave a run of mackerel or an ant-heap. But it is also a conscious work of art, and . . . with language itself, it remains humanity's *greatest* work of art."

Just as a great book enters the consciousness of a civilization, so too does a great building enter the consciousness of a city. One can never destroy a great book; since the Landmarks Preservation Law, it is no longer easy to destroy a great building.

We have an exciting agenda in the years ahead. Our new Landmarks Commissioner looks forward to the 1990's as "the decade of neighborhoods," expanding our focus from large important public buildings and districts to include structures intrinsic to the character of neighborhoods.

To me, the word "neighborhood" has a human ring that is missing from the word "district." A district is architectural, but a neighborhood is both architectural and human. This new stress bodes well for the social fabric of our city, for it is our neighborhoods that give that fabric its unique strength.

And so I join you in thanking the Landmarks Preservation Commission for all it has done for the quality of our lives, and in wishing it a happy 25 birthday and many more years of service to the citizens of New York. Congratulations!

TRIBUTE TO EDWARD LAKE FIKE

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HUNTER. Mr. Speaker, about 3 weeks ago, a good friend of mine, Mr. Edward Lake Fike, left the San Diego Union after many years of dedication to that newspaper as its editorial page editor.

Those who worked with Ed consider him a man of principle and conviction. His long and distinguished career in journalism has had a significantly positive effect on our community in San Diego.

Ed will be sorely missed in his current position. I'm sure, though, that we will continue to hear from Ed, and I, for one, will listen to all he has to say. We wish him the best for his future and the future of his family. Best wishes, Ed!

THE REAL GORBACHEV

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MICHEL. Mr. Speaker, former President Richard M. Nixon was scheduled to address a meeting of the Boston World Affairs Council, April 12, 1990. For medical reasons he was forced to postpone that speech. I was fortunate to obtain a copy of the text he would have delivered in Boston, and I want to take this opportunity to share it with our colleagues.

With incisive analysis and a mastery of a broad range of issues, President Nixon takes a look at "the real Gorbachev," and offers some advice as to how the United States might deal with a world in which "the Soviets have lost the cold war, but * * * the West has not yet won * * *."

Last month, members of the House Republican Conference heard the former President speak on many of the same subjects he covers in this speech. We found his grasp of geopolitical realities and his ability to clarify ideas remain powerful. I think all our colleagues will benefit from reading his remarks.

At this point in the RECORD, I wish to insert "The Real Gorbachev," a speech prepared for delivery by former President Richard M. Nixon, before the World Affairs Council of Boston, April 12, 1990:

THE REAL GORBACHEV

(Address by former President Nixon before the Boston World Affairs Council)

In addressing this distinguished audience of foreign policy observers, I want to tell you up front what my approach will be.

Virtually all of the foreign policy experts these days are singing the same tune. Editorial writers, columnists, think tanks, and television commentators tell us:

The Cold War is over.

The West has won.

The Soviet Union no longer poses a significant threat to our interests.

A State Department expert observes that we are witnessing what he calls the end of history. We no longer need to devote our attention to the great issues that have divided us during the Cold War, but can now devote our efforts to issues which unite us like global warming.

I believe profound changes have taken place, but I see the world from a different perspective from those who reside in the Washington Beltway, the modern version of Plato's cave.

I believe the Soviets have lost the Cold War, but that the West has not yet won it.

I believe that we are witnessing the defeat of communism, but that this alone does not assure the victory of freedom.

I believe that while the Soviets threat has receded, we face challenges all over the world which will test us to the limit of our capabilities and our will.

Finally, I also profoundly believe that if we meet our leadership responsibilities, the twentieth century, which was the bloodiest in world history, will be succeeded in the year 2000 by a century of peace.

Nineteen-eighty-nine was the year of the century for the forces of freedom in the world. We saw the Berlin Wall come down

and communist leaders in Poland, Hungary, Romania, Bulgaria, Czechoslovakia, and East Germany driven from power by the people in those countries. The year was capped by the stunning defeat in a free election of another communist leader, Daniel Ortega in Nicaragua.

We now face a new challenge. Winning an election or a revolution is difficult. But far more difficult is running a government after you win. Now that the people of these countries have ridded themselves of the evils of communism, we must help them find a way to enjoy the blessings of freedom.

Democracy alone is not the answer. Democracy means government by elected leaders and elected leaders can provide bad economic policies as well as good ones.

Democratic socialism is not the answer. For seventy years we have opposed totalitarian communism because it is evil. Today we must oppose democratic socialism because it won't work. The trouble with the socialists is that they promise the golden egg and then kill the goose that lays it.

As Czechoslovakia's brilliant finance minister recently observed, partial economic reforms won't work. There is no halfway house between communism and freedom.

There is only one way to progress for these nations which have rejected communism. They should adopt the free market policies which have produced economic miracles in the United States, Western Europe, and Japan. Those like Poland who go through the agony to move that way deserve our full support.

The newly free nations of Eastern Europe and Nicaragua rejected communism because it didn't work. Our challenge is to assist them in ways that will make certain that freedom does not suffer the same fate. Rather than sending them political experts on how to run a campaign, we should send them economic and technological experts on how to run a free economy.

In his inaugural address on January 20, 1949, President Harry Truman announced what he called a "bold new program for making the benefits of our scientific and industrial progress available for the improvement and growth of undeveloped areas." Unfortunately, while this visionary Part Four program, as it was called, was never fully implemented in the 1950s, it provides a useful example in the 1990s of how we should approach the problems of the new democracies in Eastern Europe and Nicaragua and the less developed countries of the Third World. What we need today is an International Freedom Corps sponsored by the United States, Western Europe, and Japan which would have the responsibility to provide expert economic advice to those nations who chose freedom on how to develop and implement free market policies. For example, in the United States, retired chief executive officers of major corporations who are still in the prime of life could be of invaluable assistance in such a program.

The bottom line is that we should not blithely assume that if we can just "export democracy" these countries will find an answer to their desperate need for economic progress. Far more than our money to subsidize half-baked policies that are bound to fail, these countries need the benefit of our experience in dealing with the infinite complexities of free market economic systems.

Let us now take a close look at the most remarkable statesman of our time—Mikhail Gorbachev.

Gorbachev is a troika, a three dimensional personality. The fact that he does not have a single-minded vision, as was the case with his predecessors, should not be considered a liability. Unfortunately, history tells us that leaders with vision, more often than not, produce nightmares.

Despite what you may hear that he could be a closet democrat or even a closet Christian because he treats the Pope respectfully, Gorbachev is in fact a true believing communist. His goal is not to abandon communism, but to save it.

He is a patriotic Russian nationalist. His goal is not to dismantle the Soviet empire, but to preserve it, as demonstrated by the hard-line he is taking on Lithuanian independence.

But the most dominant facet of his complex personality is that he is a consummate pragmatic politician who likes power, knows how to use it, and will do what is necessary to keep it. It is this characteristic which has primarily influenced his decisions to adopt his revolutionary political, economic, and foreign policy reforms.

Rather than trying to psychoanalyze him, let us see what he has done.

His political reforms do not meet our standards. But compared with what the Russian people had before, they are breathtaking. Where there was no freedom of the press, there is now some. Where there was no freedom to criticize party leaders, there is now some. Where there were no free elections, there are now some. After having had their voices stilled for over seventy years, the great silent majority of the Russian people are finally being heard.

On the other hand, his economic reforms have been a dismal failure. For example, in the ten years of Deng Xiaoping's reforms in China between 1979 and 1989, the per capita income of the Chinese people doubled. In the five years Gorbachev has been in power, the per capita income of the Russian people has gone down.

His foreign policy reforms, however, have exceeded all expectations. He has withdrawn the Red Army from Afghanistan. He has announced reductions in his Warsaw Pact forces and in his defense budget. Most important, he has not used the Red Army to keep his East European clients in power, as did Khrushchev in Budapest in 1956 and Brezhnev in Prague in 1968.

We must keep this last point in context, however. The conventional Beltway wisdom is that it was Gorbachev who inspired and encouraged the anti-communist revolts in Eastern Europe. The truth is that it was Western values contrasted with the failure of communist policies, which brought millions into the streets of the great cities of Eastern Europe. Gorbachev deserves credit for not sending in the Red Army. But the revolutions in Eastern Europe were not pro-Gorbachev. There were pro-freedom and anti-communist.

The most significant question to address is why Gorbachev changed previous Soviet policies. Here we see the pragmatic politician taking over from the ideological communist and the Russian nationalist. Look at what he confronted when he came to power five years ago. Everywhere he looked, communism was suffering from terminal illness.

All of the Soviet Union's Third World conquests were losers, costing the Soviet Union $15 billion a year in subsidies.

Dissent and outright rebellion were boiling beneath the surface in the captive nations of Eastern Europe.

Most ominous, the Soviet economy was a basket case plagued by shortages, crime, and corruption.

Abroad he saw that his major potential adversary, the United States had recovered from the malaise of the late 1970s and the recession of the early 1980s, had a booming economy, a stronger military, and a new initiative, SDI which would cost him billions of dollars he did not have to be competitive.

In 1985, shortly after Gorbachev came to power, I asked China's General Secretary Hu Yaobang if he thought Gorbachev would adopt economic reforms as Deng Ziaoping had. He replied, "If he doesn't, the Soviet Union will disappear as a great power in the twenty-first century." He was right and Gorbachev knows it. He had no choice but to reform at home and to retrench aborad.

There is no question that Gorbachev has changed since the time he totally supported Brezhnev's policies. But it is a change of the head, not the heart. At a time he is using his head, we should not lose ours.

Let us see what he has not changed.

In implementing his political reforms, some communist officials have lost their positions. But Gorbachev has stengthened his. He is the most powerful Soviet leader since Stalin.

Despite cuts in his defense budget, he still spends twenty percent of his GNP on defense, compared with six percent in the United States. He has modernized all three legs of his nuclear triad, as well as his conventional land, sea, and air forces. The Soviet military is leaner, but stronger than when he came to power five years ago.

He has withdrawn the Red Army from Afghanistan, but spends $4 billion a year to keep the same communist government in power. Except for Nicaragua, all of the Soviet Union's Third World clients are still in power, subsidized to the tune of $15 billion a year in arms and economic aid from the Kremlin. The Cold War may be ended in Eastern Europe, but it is still being waged in the Third World.

Why did Gorbachev act as he did in Eastern Europe? He did what he did not to help us but to help himself. If he had used the Red Army to keep his unpopular clients in power in Eastern Europe, he would have aborted his brilliant diplomatic blitzkrieg to psychologically disarm Western Europe. he had to choose between Eastern Europe and Western Europe. He made the right choice. He chose Western Europe.

He faces a similar choice today. He must choose between Lithuania and the United States. If he uses force or threats of force to deny independence to Lithuania, there is no way that the Senate of the United States would approve any arms control, trade, or other agreement at the upcoming Bush-Gorbachev summit. Those who cynically say that having a Bush-Gorbachev summit must take priority over our concern for the independence of Lithuania are profoundly wrong morally. They are also wrong politically. The tough-minded, pragmatic politician who did nothing to keep his subservient client in power in strategically important East Germany will not risk his relationship with Western Europe and the United States to keep tiny Lithuania under Soviet control. The Ukraine, maybe; Lithuania, never.

To say that we must choose between independence for Lithuania and a Bush-Gorbachev summit misses the mark. It is possible to have both. Gorbachev will go to the brink, but he will stop short of action which would irreparable damage his new relationship with Western Europe and the United

States, who in the final analysis he knows are going to have to bankroll perestroika.

Gorbachev's decision not to use force in Eastern Europe has been a brilliant success from his point of view. He has removed the fear—the glue that holds the NATO alliance together. Even more important, his benign image as a man of peace has increased his chances to get the credits and technology he needs for his sick economy.

Should we help Gorbachev? The answer is yes if it serves our interests as well as his.

It does not serve his interests or ours unless his reforms go far enough to work. His current reforms do not meet that test. As Andrei Sakharov observed shortly before his death, "In the absence of radical reforms, credits and technological aid would only prop up an ailing economy and delay the advent of democracy."

Even if his economic reforms go far enough to work, it does not serve our interests to help Gorbachev if as a result we will be facing an economically stronger Soviet Union with the same aggressive foreign policy.

As we applaud Gorbachev's new thinking in Eastern Europe, we should take a hard look at some of his old thinking in the Third World. In nation after nation he is supporting anti-American regimes in Asia, Africa, and Latin America.

He provides $6 billion a year in arms and other aid to Castro, $2.5 to Vietnam, $4 billion to Afghanistan, $1 billion to North Korea, $1.5 billion to Syria, $1 billion to Angola, $1 billion to Libya.

We hear reports that he is trying to influence his Third World clients to adopt less aggressive policies. There is one sure way he can influence them. He can quit subsidizing them.

Now that the people of Eastern Europe have ended the Cold War in Eastern Europe, the time has come for Gorbachev to end the Cold War in the Third World.

But isn't this asking him to give up too much? Let us examine this question in historical perspective. In 1945, Winston Churchill sent a message to the new President of the United States, Harry Truman: "It is vital that we reach an understanding with Russia now before we mortally reduce our armed forces and withdraw to our zones of occupation." In effect, Churchill was saying, "Make a deal now when Stalin needs one because of our strength rather than waiting until later when he will not need one because of our weakness." His advice was rejected, and as a result a hundred million people in Eastern Europe were forced to endure 40 years of Soviet domination and repression.

We are at another great watershed of history. Gorbachev needs our help for his terminally sick economy. We should make a deal now which serves our interests rather than waiting until later when as a result of our help, he may no longer need one. We should link our decisions on items he wants like trade, credits, and technology to his actions on items we want like eliminating his support of our potential enemies in the Third World.

We should totally reject the fatuous advice of those who suggest that we should help finance perestroika. It is in our interest and in Gorbachev's as well for him to finance perestroika by cutting back on his Third World foreign aid programs and his huge defense budget.

Let us assume the best—that we will be entering a new era in which the Cold War is over, not just in Eastern Europe, but in the Third World as well. What are the challenges we will face?

First, there is the Soviet Union. Even without Eastern Europe, the Baltics, and its Third World outposts, the Soviet Union will not be an international pussycat. It will still have 30,000 nuclear warheads, the world's largest conventional army, and a modern, blue-water navy. And it will have a long history of pervasive Russian expansionism which began centuries before the Bolshevik Revolution. Those who fear a united Democratic Federal Republic of Germany because of Germany's history should take a hard look at the totalitarian Soviet Union in light of Russian history.

There is China—a nuclear power with one and one-tenth billion potentially capable people which in spite of not because of communism will be a military and economic superpower in the next century. Whether China will play a peaceful or destructive role in the world, whether it will repress or respect human rights, depends on whether the United States is able to again develop a constructive relationship with China. No other Pacific power can play that role. Does anyone seriously believe that the Japanese, let alone the Russians, would export democracy to China?

There is Japan, an economic superpower. It is fashionable and politically profitable to bash Japan these days. And as last week's issue of Newsweek indicated, it has now become fashionable in Japan to bash the United States. We must insist that we have fair trade as well as free trade with Japan. But we must recognize that as the two most advanced free world economies we are destined to be vigorous and at times even fierce competitors. But we must keep that competition in perspective. Those who contend that Japan has now replaced the Soviet Union as our major adversary in the world are grossly exaggerating the problem. The Dutch own more of America than do the Japanese. Even if all trade barriers between the United States and Japan were removed, our trade deficit with Japan of $45 billion a year would be reduced by only $5 to $7 billion. As we consider the causes of our economic problems, rather than always looking out the window toward Japan, we should look in the mirror. Above all, we must never lose sight of the fact that without a constructive, strategic relationship between the United States and Japan, peace will not survive in the Pacific.

There is Western Europe, which after 1992 will challenge the United States as the world's major economic superpower. Before blithely dismantling NATO, we must remember that we need it for two reasons: As insurance against a renewed Soviet threat, and as reassurance for those who rightly or wrongly fear the power of a united Germany. Let's look at Europe without NATO. For forty years, the goal of Soviet foreign policy has been to denuclearize Europe, get the United States out of Europe, neutralize Germany, and dismantle NATO. Such a Europe would leave the Soviet Union as the only nuclear superpower and as the dominent conventional power in Europe. How long could the German economic powerhouse tolerate that situation?

There is the Third World. By the end of the century, four billion people will be living in the less developed nations of Latin America, Africa, and Asia. They will have a per capita income of $800 a year, as compared with $18,000 a year in the United States, Western Europe, and Japan. That disparity is a recipe for revolution in a part of the world in which there have been over 100 wars since World War II in which more people have been killed than in World War I.

The people of these countries have enormous problems. In the past, the communists at least have talked about the problems. Too often, we only talk about the communists. Now with the communist threat receding, we should address those problems honestly and creatively.

I could go on, but as you can see, apart from the Soviet threat which has monopolized our attention for over forty years, we face awesome challenges. But they are also inspiring because they are the challenges of peace, not of war. Can America meet those challenges? It is ironic that at the very moment we are at the brink of victory in the Cold War, a wave of isolationism is sweeping across the country. From the left we hear that the United States is a declining power and that we are no longer able or even worthy to carry the burden of free world leadership. From the right, we hear that the United States has carried that burden long enough and that the time has come for those we helped after World War II, particularly the Japanese and the Germans, to assume that responsibility.

There is no question that the Germans and Japanese should do far more. But that does not mean that the United States should do nothing.

We are not as powerful as we were after World War II, relative to the rest of the world. But the United States is still the world's only true superpower. The Soviet Union is a military superpower. The Japanese and Germans are economic superpowers. Only the United States is a military, economic, and geo-political superpower.

As Herb Stein recently pointed out, the United States is a very rich country. We are not rich enough to do anything, but we are rich enough to do everything important.

In speaking of the power of the United States in his Iron Curtin speech, Churchill said, "This is a solemn moment for the American Democracy. For with primacy in power is joined an awe-inspiring accountability for the future." That statement is as true today as it was when he spoke those words forty-four years ago. Leadership that only the United States can provide in both Europe and Asia is indispensable if peace and freedom are to survive in the world.

We should provide that leadership not just for others but for ourselves. America cannot be at peace in a world of wars. When freedom is lost anyplace, it is lost in America. We cannot have a healthy American economy in a sick world economy. For example, while there was significant progress politically in many Latin American countries in the 1980s, economically, the eighties were a lost decade. Only Colombia showed growth—and that for very unhealthy reasons. As the poor of Latin America escape from poverty, we in North America will find our lives enriched.

Let me put the challenge we face in historical perspective. In 1947, two freshman congresssmen, Jack Kennedy and I, had offfices near each other on the fifth floor of the old House Office Building. I vividly recall our first major foreign policy vote, exactly forty-three years ago, In a dramatic joint sesssion of Congress, President Truman asked for military and economic aid for Greece and Turkey to meet the communist threat to those countries. It was a tough vote for both of us. It was tough for him because the liberal Democrats in his

Massachusetts district opposed any military foreign aid. It was tough for me because the Conservative Republicans in my California district opposed all foreign aid.

We both voted for it and helped to launch the great bipartisan initiative which deterred Soviet aggression in Western Europe of the past forty years.

We were young then. And with the enthusiasm of youth, we were highly motivated by the belief that we were serving a great cause—the defeat of communism.

You, the present and future leaders of America, have a greater cause—the victory of freedom. If you meet your challenge as we met ours, your legacy will be not just that you saved the world from communism, but that you helped make the world safe for freedom.

HONORING COMDR. PAT VIGGIANO

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. ENGEL. Mr. Speaker, this week, American Legion Post No. 1163 is honoring its commander, Pat Viggiano, who has served his country, his community, and his fellow veterans with distinction. I also wish to acknowledge the contributions made by this distinguished veteran.

Pat Viggiano has served as commander of the Frank A. Rea Post for the past 8 years and has been finance officer and membership chairman for the past 20 years. He has also chaired the Central Committee of War Veterans of Yonkers and still serves on its executive committee. Pat's activities during this time are well known to his friends in Yonkers, and the list of his accomplishments is a tribute to his dedication and good will.

Whether he is playing Santa Claus at a Christmas party for retarded children or organizing parades on Memorial Day and Veteran's Day, Pat Viggiano never forgets the importance of taking pride in his community and caring for his neighbors. The people of Yonkers, and especially his fellow veterans, have been enriched by his activities.

On behalf of my constituents, I thank Pat Viggiano for all his good works and wish him continued success and happiness.

COMMISSIONING THE U.S.S. "ALBANY"

HON. MICHAEL R. McNULTY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. McNULTY. Mr. Speaker, on Saturday, April 7, 1990, I had the honor of being the principal speaker at the commissioning of the U.S.S. *Albany* (SSN 753), a nuclear-powered attack submarine named for the capital city of the State of New York. With your permission, I would like to share my remarks with my colleagues.

ADDRESS BY CONGRESSMAN MICHAEL R. MCNULTY AT COMMISSIONING CEREMONIES FOR THE U.S.S. "ALBANY"

It is an honor for me to join with you today in celebrating the commissioning of the U.S.S. *Albany*—a great naval craft proudly bearing the name of the capital city of the State of New York.

Four previous U.S. Navy ships have borne the name *Albany*. The first was a sloop-of-war, commissioned 144 years ago. It served in the Mexican War.

The second was a steam sloop-of-war, commissioned the *Contocook* in 1868, but renamed the *Albany* the following year.

The third—a protected cruiser commissioned in 1900—saw service in World War I.

The fourth was a heavy cruiser, commissioned in 1946, and decommissioned in 1980 after having been converted to a guided missile cruiser. Five years later, her name was stricken from the Naval Vessel Register.

Today, we proudly commission the fifth *Albany*—a nuclear-powered attack submarine with great versatility that will enhance considerably the security of our country. The name *Albany* is back in the Naval Vessel Register.

Over the past three centuries, Albany, NY, has grown into one of our Nation's economic, commercial, cultural, and high tech centers.

In physical terms, New York's Capital District is embedded in the heart of the U.S.S. *Albany*. Its main propulsion unit was made by General Electric's Knolls Atomic Power Laboratory in Niskayuna.

In symbolic terms, the U.S.S. *Albany* stands for creativity, progress, and opportunity—characteristics which describe the capital city and the Capital District of the Empire State.

My friends, we are living through historic times. Think, for a moment, about the dramatic events of the past year. In March 1989, elections were held in the Soviet Union. Now elections in the Soviet Union are nothing new—they have been having them for decades. The only problem was that their elections had only one candidate for each office, and there was no competition.

Last year was different. No, the Soviets did not have the same kind of free and open democratic elections to which we are accustomed. They didn't even have multi-party elections. But they did allow for some choices within the party.

What was the result? Time after time, in region after region—even in the population centers of Moscow and Leningrad—when people were given the choice they picked the candidates of reform and democratization.

In Moscow, the outspoken Boris Yeltsin, was elected. When the party leadership tried to deny him a seat on the Supreme Soviet, Muscovites took to the streets in protest, and the leaders backed down.

Next were the elections in Poland. They were only for one House of Parliament—the lower House at that. But when the results were in, Solidarity won an overwhelming victory. I remember the talk around Washington at that time centered around the prediction that there could be a democratic government in Poland within a period of several years. There is a democratic government in Poland today.

You all know the rest of the story. The winds of democratic reform swept through Hungary, Czechoslovakia, Bulgaria, and Romania.

As all these changes were occurring, I will never forget the specter of Erich Honecker, then the leader of East Germany, standing up before the world and making the pronouncement: "This is where it stops, it will not happen here." Shortly after he made that pronouncement, Erich Honecker was no longer the leader of East Germany. As we speak, the process of German reunification has begun.

Just when we thought nothing more dramatic could happen, it did. The Soviet Communist Party voted to relinquish its monopoly on power. Shortly after that, the Soviet National Congress voted several sweeping reforms—including the direct election of the Soviet President in 1995.

Yes, it's been a great year for the emergence of freedom and democracy—not just in Eastern Europe, but also in Nicaragua, Panama, and in other places throughout the world.

What conclusions should we draw from this? Some say that we should unilaterally disarm; that the major world threats no longer exist. That is a simplistic point of view, in my opinion—and it totally ignores history.

I believe that there may eventually be the "peace dividend" that so many people are talking about now. But it won't be immediate. It will take time. The arms reductions which are undertaken by the United States of America should be the subject of negotiation—not unilateral action. I believe that Mikhail Gorbachev is one of the greatest politicians in the world. He has been able to establish a global reputation as a peacemaker, while simultaneously modernizing the nuclear capabilities of the Soviet Union.

When the summit between President Bush and President Gorbachev begins on May 30, we must insist that President Gorbachev begin to match his words with deeds.

While I believe that we are entering a new and better relationship with the Soviet Union—and that new relationship has the potential to help in promoting world peace—we must proceed with caution.

It should be remembered that military weakness never prevented war. When we let our defenses down—not too many years ago—we were in our greatest peril.

Today, as we commission this magnificent ship after an unprecedented military buildup, the fact of the matter is that the prospects for peace here at home and around the world are greater than they have ever been. That, my fellow citizens of America, is no coincidence.

I believe that our current military posture will prompt major concessions by the Soviets when President Bush meets with President Gorbachev next month. When our Republican President seeks those unprecedented concessions from the Soviet Union—which is still in process of strategic modernization even as we speak—this Democratic Congressman will be the first in line to support him.

Finally, I wish to pay tribute to a special individual and a special group of individuals. Congressman Sam Stratton, who represented portions of the Capital District of New York for 30 years could not be here today in person because of ill health. I visited with our friend, Sam, just a couple of weeks ago. We talked about the commissioning, and I assure you that he is with us today in spirit.

Sam is a distinguished veteran of our Armed Forces. On this special day I salute and pay tribute to him and to all who have served in our Armed Forces through the years. It is because of their tremendous bravery, dedication, and sacrifice that we

are seeing these dramatic changes which are taking place all around the globe.

Yes, freedom and democracy are emerging in every corner of the world and, yes, we may be moving toward one of the most peaceful periods we have known since we first inhabited this good earth. But let us remember that the freedom and democracy which millions of people are enjoying for the first time in their lives was purchased at a very high price.

To all those who ever served in the Armed Forces of the United States of America, and especially those, like my brother, Bill, who gave their very lives for their country let us always be grateful. They are our heros, and we salute them today.

ENDORSEMENT OF INDEPENDENT LITHUANIAN REPUBLIC

HON. C. CHRISTOPHER COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. COX. Mr. Speaker, earlier today, I received a copy of a resolution passed unanimously by the Moscow City Council, in the U.S.S.R., expressing their full endorsement and recognition of an independent Lithuanian Republic, and condemnation of their own President, General Secretary Gorbachev, for his repressive response and tactics. In addition, Mr. Speaker, it is also my understanding that comparable resolutions have also been passed by the city councils of Leningrad and Kiev.

It is my privilege to formally present this resolution for the RECORD, which was recently cabled to the Lithuanian President, Mr. Vytautus Landsbergis:

We, the people's deputies of the 21st session of the Moscow Soviet, support the striving of the Lithuanian people for independence and self-determination. We consider inadmissible the enforced keeping of your people and state in the framework of the Soviet Union. Understanding that a nation oppressing other nations cannot be free, we condemn interference of the President of the USSR and the Government of the USSR into the internal affairs of your republic. We hope for the common sense of our leadership and for the immediate establishment of a framework for the negotiation of all arguable points between Lithuania and the USSR. We wish you and the entire Lithuanian nation success in the rebirth of your country.

IN MEMORY OF REV. RALPH DAVID ABERNATHY

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GRAY. Mr. Speaker, I rise today in memory of Rev. Ralph David Abernathy. With his death yesterday, America lost one of its greatest fighters for civil rights.

I am saddened by his death, but I will always be inspired by his life. I will remember him as a friend, a brother in spirit and a colleague in the struggle for equal rights for all Americans.

Ralph came into this world the grandson of a slave. He left, one of the great leaders of this day. As a young man, he new, as he put it, that his life was with people. So he became a student of sociology and a son of God, and emerged to move the minds and hearts of a nation.

From the Montgomery bus boycott and the Southern Christian Leadership Conference to the march on Washington and the poor people's campaign, Ralph Abernathy showed that he was a man with the humility to serve, and the ability to lead.

If African-Americans today can rise higher and look out on a brighter horizon, we can do so because we stand on the shoulders of Ralph David Abernathy and others like him. We can do so because Ralph brought to the attention of the American people and this Congress, the plight of citizens who would not be ignored and the injustice of policies that could not be tolerated.

A true advocate of freedom, Ralph David Abernathy's many accomplishments in the civil rights movement will not be forgotten. Because of his efforts, he leaves his country a better place than he found it. God rest his soul.

COMMENDING INNER CITY ARTS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEVINE of California. Mr. Speaker, today I want to pay tribute to those in my State that do so much for so many with so few thanks. These people are an inspiration to everyone, a true example of American altruism and volunteerism, and I wish to give them the praise that they so richly deserve. They are the founders and employees at Inner-City Arts, a non-profit organization serving Los Angeles' disadvantaged and underprivileged youth.

The program is a positive and refreshing approach to solving the problems generated by our inner cities today. The facility provides classes and programs in all areas of the arts including painting, drama, music, dance, drawing, and writing to 500 children and teens on a year-round basis. By providing this creative outlet to these children, they unlock their imaginations, build their self-esteem, expand their horizons, and help them realize their full potential. The program also works to improve their English language skills and helps keep kids off the street and away from drugs. The professional artists involved with the center serve as teachers and role models. Encouraging them to bridge social and cultural gaps and grow into responsible adults capable of becoming the leaders of tomorrow.

Inner City Arts is a pioneer program that serves as a model for other centers in similarly depresses areas. It works in collaboration with a number of business organizations and governmental agencies to attract a broad base of community leaders to be involved in making a difference in the lives of these young people and their neighborhoods.

This outstanding and worthwhile program is attempting to expand in order to be able to serve all 4,500 of the school children in the area. It is my most ardent hope that it will not only serve these children, but that other communities will follow the shining example it has set for having such a tremendous positive impact on America's disadvantaged youth.

I ask my colleagues to join with me in recognizing this outstanding program for its much-needed service to our community.

"OLD GLORY"

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HALL of Texas. Mr. Speaker, a constituent of mine, Burnell Hall, principal of the Community Elementary School in Nevada, TX, wrote a poem that I wish to share with my colleagues today.

Old Glory! Proud and majestic symbol, home of the brave.
Old Glory! In absolute splendor, triumphantly, does she yet wave.
Old Glory! Defender of freedom o'er land, sea, and air.
Old Glory! Sons, daughters, or foes dishonor must never dare.
Old Glory! Raised in bloody strife; Lowered always in dignity.
Old Glory! Champion of true democracy; God, country, and liberty.
Old Glory! Awaken! Forefathers, fallen heroes, countrymen and women alike.
Old Glory! Proudly salute Old Glory; forever restore her might.

Mr. Speaker, as we adjourn today let us do so in honor and respect of those who use their talent to laud and highlight our flag, our country, our history—and our future.

AWARD WINNING ESSAY BY JOHN HARMON HOLLADAY III OF MANNING, SOUTH CAROLINA

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TALLON. Mr. Speaker, I am proud today to share with my colleagues the text of an award winning essay written by one of the most promising young minds from the Sixth District of South Carolina. John Harmon Holladay III won the South Carolina State competition for the Veterans of Foreign Wars annual scriptwriting contest.

For 43 years, the Voice of Democracy Scholarship Program has provided young people the opportunity to value their democratic heritage by sponsoring an essay contest and academic scholarships. Private initiatives such as this are the key to pointing our young students toward a life-long commitment to citizenship, leadership, and democracy.

I would like to congratulate John for his excellent and insightful essay. The text follows:

WHY I AM PROUD OF AMERICA

In truth, the word "America" sparks some pride in all true patriots, but what makes

my view unique? Why am I proud of America? It, of course, has something to do with the fact that this is where I live, but there is more. To me, pride can be a complex emotion, and when I think of my pride for my country, it takes on many faces.

Even pride has a logical side to it. When I think of ideas and objects that I am proud of, many glittering generalities come to mind. However, I believe that true pride can also be backed with facts. This is what I have labeled my "justified pride". For example, the students at Tianamen Square weren't losing their lives for the sake of communism. they were revolting to bring forth a democracy, and they used America as a role model. The facts stand by themselves. The fact is that our government has lasted for over 200 years, shifting and changing to conform with the most important element, the needs and interests of the individual. For me, the facts alone are enough to be proud of, but there is more.

You see, another facet of my pride for America is my "historical pride". I live in one of the greatest experiments of history, and one that succeeded. When I was first taught history back in the earlier grades, my view was no different from everyone else. I thought that history was boring. Without knowing it however, I was learning about my own history. America was founded so that I could express my views, think my way, lead my own life, and worship my God. In a way, my name is written into the greatest living historical document of all time, the United States Constitution. It states, "secure the blessing of liberty to ourselves and our posterity". I, as all Americans can state, am the posterity to the authors of that document, the founders of our country. Throughout history, wars and conflicts have been fought for my benefit. That is why I am proud of America's history. The people in it always not only protected themselves, but the future.

That is what the third part of my pride for America is about the future. I call this pride my "pride of the possibilities". How can I be proud of the future? Proud of what hasn't even happened yet? Well, the answer to that is that pride often sparks another emotion, confidence. I have the ability to look ahead and see where America is going from our actions today. My own view of the future America is one of peace, but doesn't everyone say that they hope for peace? I'm not just saying that I hope for it, I'm saying that I envision it. America has made strides in reduction of arms, abolishment of famine, worldwide agricultural productivity, the ending of bigotry, and the beginnings of global unity. To know that my country is willing to take that first step for a peaceful future makes me proud.

However, my strongest reasons for being proud of America come from the fourth and final aspect of my pride. It is the pure and powerful gut feeling. I call it "naked pride". Why am I proud of America? Well, pride is something that has been built out of all lessons and experiences of life. It isn't something that can be brought out, used, and then returned. It is always present and powerful. We all have our little building blocks that create our pride. My pride, my naked and powerful pride, has come from my own personal experiences. Hearing the national anthem before a ball game, seeing a jet with the American flag on its side pass overhead, and hearing a veteran speak of the ultimate sacrifice are my building blocks. They are the rhyme and reason, passion and fury, to my pride. And possibly the largest single reason for my pride is the fact that I live in a country that is so confident with itself that it doesn't force me to say that I'm proud of it. It gave me the choice, and for that I want to say to my country, "thank you".

HANSON, MA, CELEBRATES PRIDE THROUGH READING DAY

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. STUDDS. Mr. Speaker, I rise today to congratulate the students of the Maquan and Indian Head Schools in Hanson, MA, for their outstanding achievement in the World Book Partners in Excellence Program. Having committed their best efforts—and their free time—to reading for sponsorship, these young people have read 23,816 books, earning $20,000 for the purchase of encyclopedias, dictionaries and other educational materials for their schools. World Book's donation of $1 for every $2 raised has brought the total value of the students' accomplishment to $30,000.

Hanson, a community in southeastern Massachusetts which I am privileged to represent, has faced the challenge of decreasing resources for education with imagination, determination and singular effectiveness. As participants in the Partners in Excellence Program, the students of the Maquan and Indian Head Schools have set a nationwide record for books read and funds raised.

We join the citizens of Hanson in honoring their young people's achievement as the community celebrates Pride Through Reading Day on April 26, 1990. May good books remain the valued companions of the students of Hanson throughout a lifetime of learning.

A SALUTE TO CHARLIE BRADFORD

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FOGLIETTA. Mr. Speaker, I rise today to salute my constituent, Mr. Charlie Bradford. A 78-year-old grandfather, he has been working at the Philadelphia Naval Shipyard for 60 years—and he has no plans to retire.

This Friday, the workers and management of the Philadelphia Naval Shipyard are planning to honor Mr. Bradford for his years of service to the fleet.

Over the years, Bradford, whose friends call him "Chick" or "Brad," has encountered many brushes with death or injury. Climbing aircraft carrier antennas in freezing winds is just another day's work for Bradford. He tells one story of climbing 120 feet in the air above a ship, hitting ice and spinning around a yardarm and hanging there upside down like on a trapeze. But thrills and chills like that are just part of the job.

As he says, "It's a lot more exciting than sitting there puttering on a bicycle, going nowhere."

Charlie Bradford represents everything good about the Philadelphia Naval Shipyard. He is dedicated, hard working and loyal. Our Nation's youth look to people like Charlie Bradford for true inspiration.

I join with thousands of fans across Philadelphia and across the country in saying congratulations on a job well done, and good luck in your long and prosperous future at the navy yard.

EAGLE SCOUT HONORED

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LIPINSKI. Mr. Speaker, it gives me great pleasure to bring to the attention of my colleagues, a group of outstanding young individuals from the Fifth Congressional District of Illinois who have completed a major goal in their scouting careers. On Saturday, May 20, 1990 at St. Rita's Grammar School located in Chicago, IL, Sean P. Buckley, Patrick J. Krull, Michael T. Ryan and John A. Unger will be honored at an Eagle Scout Court of Honor.

It is important to note that less than 2 percent of all young men in America attain the rank of Eagle Scout. This high honor can only be earned by those scouts demonstrating extraordinary leadership abilities. These young individuals have clearly demonstrated such abilities through their dedicated community service and deserve special recognition.

In light of the commendable leadership and courageous activities performed by such fine young men, I ask you, my fellow colleagues, to join me in honoring Sean, Patrick, Michael and John for attaining the highest honor in Scouting—the Eagle Scout. With God's blessings, let us wish them the very best in all of their endeavors.

IT'S TIME TO CUT UNITED STATES ASSISTANCE TO TURKEY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BROOMFIELD. Mr. Speaker, today, Congressman YATRON and I introduced a formal resolution of disapproval denying the transfer of five Cobra helicopters to Turkey. There is no doubt about the fact that Turkey is a close ally of the United States and has a military relationship with this country. I also know that friends help friends and I am deeply disappointed that Turkey has failed to do more to settle the Cyprus problem.

Since 1974, 30,000 armed Turkish troops have occupied the northern half of Cyprus. There has been no real reduction in Turkish force levels since that time. While Turkish authorities claim that they want a resolution of this longstanding problem, Turkish force levels on Cyprus are unchanged. Is this how a friend helps the United States resolve a serious problem?

I am also concerned about Turkey's poor track record in illegally using United States supplied military equipment. Turkish military units on Cyprus are armed with United States equipment that was originally supplied to Turkey for NATO defensive purposes. Cyprus is not a member of the NATO alliance, and Turkey should not be using any of that equipment to further the division of that island. Once again, is Turkey really being helpful with the Cyprus dilemma?

With the warming in United States-Soviet relations and the welcome winds of change that are sweeping through Eastern Europe, there is a general decline in the level of tension between the former Warsaw Pact states and NATO member countries. The possibility of a Soviet military incursion into Turkey appears to have greatly diminished. Does Turkey really need more equipment at this time? Should America reward Ankara for dragging its feet on the Cyprus problem?

The American Congress, the United Nations, and the European Community want a solution to the problems that plague Cyprus. Turkey is a key player in finding that solution and should play a positive role in the overall peace process. Turkey should assume a new role by prevailing upon Mr. Denktash in northern Cyprus to return to the peace table and seriously negotiate a settlement on Cyprus. His recent performance at the U.N. talks in New York was unfortunate. Until I see a change in Turkey's attitude toward the Cyprus problem, I see no reason to transfer more United States military equipment to that country.

I urge my colleagues to support this resolution of disapproval.

TRIBUTE TO THE CITY OF OLIVETTE, MO, ON THE OCCASION OF ITS 60TH ANNIVERSARY

HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BUECHNER. Mr. Speaker, I rise today in tribute to a city whose story parallels that of American history. Olivette, MO, is one of the success stories that unfolded as America grew to the West; the spirit of a few determined settlers has given rise to an attractive, prosperous city. It gives me great pleasure to salute the people of Olivette on the occasion of the city's 60th anniversary.

About 150 years ago, the area that is now called Olivette was merely a handful of farms along Old Bonhomme Road, which connected ports on the Mississippi River with the Missouri. This area was simply called Central and was a common stopping point for westward travelers. As people began to realize the value of farmland so close to the city of St. Louis, the small village grew, bringing with it churches and a school. In the late 1850's, a group of St. Louis investors decided to build a plank road along the general route of Old Bonhomme, and they named it Olive Street Road.

As St. Louis County grew, the area became its own school district, which was named "The Village of Olivette." Olivette's location made it a farm service and transportation center for the farmers to the West, and by 1920, a thriving community was functioning in the area once known as Central. Finally in 1930, the State of Missouri incorporated the city of Olivette.

The postwar years saw Olivette grow into a sizable municipality, with its own police force, fire department, parks, business community, and all the earmarks of a thriving city. Still, it has never lost the essence of a small country town with a strong sense of history, and Olive Street Road—now called Olive Boulevard—remains the town's central artery. The friendliness of its citizenry, and its genuine sense of community belie the fact that it is a large suburb of a major metropolis.

Mr. Speaker, as the city of Olivette celebrates 60 years, I submit that it is a success story that is still being told. Even today, the city is getting larger, stronger, and better with every day. The story of the city that grew out of that little area called Central is testimony to the fact that the substance of a community is not its buildings, its businesses, its homes, or its government, but rather the aspirations of the people who live there. I ask that this assembly join me today in saluting the people of Olivette.

HONORING THE JAMAICA ESTATES ASSOCIATION

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. ACKERMAN. Mr. Speaker, I rise today to pay tribute to one of the most outstanding and dedicated community organizations in Queens, the Jamaica Estates Association. On Sunday, April 22, the association will celebrate its 60th anniversary with a dinner dance at Terrace on the Park in Flushing Meadow Park in Queens.

During its 60-year existence, the Jamaica Estates Association has continued to maintain the strong ideals, the sense of civic responsibility and community on which it was founded. In its efforts to enhance the security of its community the Jamaica Estates Association has waged an effective campaign against crime by hiring private security guards to patrol the neighborhood. It has been scrupulous in enforcing strict zoning regulations. The association has also been active in preserving the high quality of life in Jamaica Estates, particularly in the areas of road repair, sanitation, and maintainance of the large grassy areas in the neighborhood.

Over the past 60 years the Jamaica Estates Association has gone from strength to strength. In that time membership has grown to 900 family members and the governing board membership to 18. Among the many board members who have made outstanding contributions to their community, three in particular stand out. These are, the current president, Miriam Rosenblatt; the chairman of the board, Doctor Barry Weinberg; and the editor of the Jamaica Estates Association Bulletin, Michael Bookbinder. In their respective positions of authority, these individuals have all distinguished themselves in their efforts to improve life in Jamaica Estates.

In a time when many of our neighborhoods and communities appear to be threatened by numerous evils, common to life in the city, it gives me great pleasure to acknowledge a community association such as the Jamaica Estates Association that has succeeded in preserving Jamaica Estates as an oasis in a large urban area. I ask my colleagues to join me in congratulating the Jamaica Estates Association on its 60th anniversary and to extend my hope that it will continue to keep Jamaica Estates as strong and as vibrant in its next 60 years as it has in its last.

TRIBUTE TO MOLLY TURNER: A REMARKABLE SOUTH FLORIDIAN

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEHMAN of Florida. Mr. Speaker, my special friend, Molly Turner, has been a fixture on South Florida broadcasting for almost 40 years. I wanted to share with my colleagues a few highlights of this remarkable woman's career.

Molly Turner, a pioneer television broadcaster and feminist who broke down barriers for women journalists, is a living legend after 37 years on the air in Miami, FL.

Turner was the first woman television news anchor in south Florida and, it is believed, also in the State. She was also the first woman television reporter.

She became public affairs director at Channel 10—then WLBW—in 1961. Although she hosted interview shows and anchored the morning news, she still made time to serve on the boards of numerous community agencies, including the United Way, Salvation Army and United Cerebral Palsy. As chairperson of the Children's Service Bureau during the time of the Cuban airlift, Turner worked to place into south Florida homes the Cuban children arriving in this country alone.

Always in the forefront of women's issues, Molly Turner is credited with "integrating" Miami's political Tiger Bay Club, previously open only to male reporters. Women could not go beyond the lobby, while their male counterparts were allowed to enter the club to dine and hear the guest speakers. Turner launched a compaign to open up the meetings to women journalists in January 1970. At one point, it caused her literally to be barred from the club. But after several news reports by Turner, shot in front of the closed doors, the Tiger Bay Club was opened to all women reporters and, eventually, to women members.

Molly Turner served as founding president of the Gold Coast Chapter of American Women in Radio and Television. In 1975 she was named that organization's "Woman of the Year", and in 1986 received its "Florida Legend" award. In 1976 she was chosen a "Community Headliner" by the Greater Miami Chapter of Women in Communication. Turner was also selected as one of "Julia's Daugh-

ters"—named for pioneer Miami settler Julia Tuttle who persuaded Flagler to bring the railroad to Miami—and appears in the HERstory of Dade County, a recognition of women who have made a difference in the history of the area. In 1988, the YWCA also honored her as one of the "Women Who Make a Difference."

A leading advisor on consumer matters, Molly Turner has received many awards for her work, including three Emmy awards for investigative series—one on local water problems, another on health clubs and one a special feature on the Women's Rights Movement. The Florida Bar presented her an award for a series on the court system and she received another from the National Press Club for reports on the housing crisis. The Better Business Bureau of South Florida honored her with its "Excellence in Communications" award and she was the recipient of the prestigious "Trailblazer Award" from the Women's Committee of 100. In 1985, the Florida Council on Aging gave her the "Community Service Media Award" for her series on senior citizens. And in 1988, Florida Toastmasters presented her its "Community Leadership Award for Outstanding Accomplishments in the Field of Consumer Advocacy".

Molly Turner began her television career in 1951 on the Uncle Martin show, a live Saturday afternoon country and western music program on WTVJ, Miami. Hired as a singer by show host, Martin Wales, Turner painted on freckles and blacked out a tooth to play a hayseed comedienne called Cousin Effie. The show eventually moved to Channel 17 in Hallandale and became Sunset Ranch, a half-hour musical "soap opera" that ran 5 days a week at 5:30 pm. Turner became "Miss Molly", running the ranch house that was built in an open field at the TV transmitter site. Visiting country music stars such as Eddie Arnold and Red Foley appeared on the show. A co-producer as well as performer on Sunset Ranch, Turner's duties also included writing and delivering commercials and, sometimes, even selling them then editing the film.

Continuing with Sunset Ranch on WPST, Channel 10's call letters when National Airlines owned it, Turner also began doing freelance commercials, a 3-hour live morning news and talk show, and a weather show with Frosty Martin. At one time in the late fifties, before the days of videotape, she was doing an unheard-of 25 live appearances per week, on three different stations, from 7:30 am to 11:30 pm.

For the past 15 years, she has been the premiere consumer advocate in south Florida, with a national reputation. The Miami Herald calls her "one of the most recognizable and most respected women in local television".

Bill Ryan, former general manager of Channel 10 and now president of Post-Newsweek Stations, say that in 15 years of working with Turner, he never once saw her lose her famed lady-like demeanor. "Molly had style and grace, but you would do well not to misconstrue that because she was hard-nosed and driving in her job * * * she just did it with a touch of class," Ryan says.

Molly Turner has been a resident of Coral Gables, FL for 26 years. She and her husband, Philip Ruppenthal—now deceased—have two children * * * a daughter, Lyle Landon, an advertising executive for a group of teen magazines; and a son, John Christian, who is a screenwriter for movies and television.

THE GREATER SACRAMENTO MEDICAL PLAZA

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MATSUI. Mr. Speaker, I rise today to commend and congratulate Drs. Marvin Kamras, Steven Polansky and all those who have contributed their time and efforts on the grand opening of one of the most modern medical facilities in Sacramento, CA—the Greater Sacramento Medical Plaza. Drs. Kamras and Polansky have been active participants in community activities and have played a prominent role in representing other physicians on issues of current concern.

One of the largest surgicenters west of the Mississippi River, the medical plaza covers 14,000 square feet, has 6 operating rooms, 150–200 physicians on staff, and can maintain up to 600 cases a month. The medical plaza will handle a wide range of outpatient services, including orthopedic, gynecological and plastic surgery.

The opening of the medical plaza is indeed a special honor for both Drs. Kamras and Polansky and their family and friends. I have no doubt that the operation of the plaza will be both productive and successful. Sacramentans are fortunate to have this fine establishment as a source of quality medical services. The medical plaza will be a welcome addition to our city.

Mr. Speaker, I commend Drs. Kamras and Polansky for their dedication and commitment invested in opening the Greater Sacramento medical plaza. I know that with their commitment to excellence they will see that Sacramento is provided with the highest quality in health care service. I ask my colleagues to join me in congratulating Dr. Marvin Kamras and Dr. Steven Polansky in wishing them and the medical plaza many years of success.

INTRODUCTION OF THE MAGNETIC LEVITATION TRANSPORTATION AND COMPETITIVENESS ACT OF 1990

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MRAZEK. Mr. Speaker, today I am introducing legislation that will enable the United States to recapture its historic role as a pioneer in the field of transportation. Americans once dominated the world in the development of trains, automobiles, and airplanes as revolutionary modes of transportation.

In the late 1960's, the United States began research efforts on a highly promising new mode of transportation—magnetically levitated vehicles floating on guideways that could travel at speeds of up to 300 m.p.h. Today that mode of transportation is a reality, but, unfortunately, it was not the United States that developed the first such maglev vehicles for commercial use. We abandoned our efforts back in 1975, leaving it to Japan and West Germany to carry on where we left off. Having invested more than $1 billion in government funds each, Japan and Germany are now poised to dominate a potential $300 billion world market for magnetic levitation transportation technology.

It is absolutely imperative that we not abandon that market to our international competitors. Our Nation's future economic security demands that we catch up and surpass the existing technological capabilities of Japan and Germany. It is not too late. There now exists a window of opportunity to jump start an American-based maglev technology that can leapfrog our competition so that we will enter the 21st century with a distinct advantage in the world market for maglev transportation.

The Magnetic Levitation Transportation and Competitiveness Act of 1990 will provide the funding and mechanism necessary to allow American industry to compete in the building of an American maglev prototype that will surpass the capabilities of both the German and Japanese systems. By investing in this technology now, we can be assured that American companies will be in a strong position to compete in the world market for maglev as we head into the next century.

SUMMARY OF THE BILL

The legislation provides Federal funding for American companies and research institutions to quickly develop a prototype magnetic levitation transportation system that surpasses existing Japanese and German technologies. It would create a new agency with the Department of Transportation with regulatory authority over magnetic levitation systems. The agency would oversee a two-stage competition for the design and construction of the prototype system.

National Magnetic Levitation Transportation System Design Competition: The bill provides $350 million (over 3 years) to be awarded on a competitive basis to American companies and research institutions in a multiphase grant competition that culminates in the selection of a final maglev system design. No more than six participants submitting proposals for research and development of a design will initially receive grants. Grants in successive phases of the competition will be awarded on the basis of merit and potential for further development of the participant's design.

Grant Competition for Construction of a Magnetic Levitation Transportation System: The bill provides for the awarding of one grant of $600 million to be awarded on a competitive basis to a state or local government, a public-private consortia or any combination of government entities and/or private organizations for the construction of a magnetic levitation transportation system of not less than 40 miles in length that utilizes the design selected in the National Magnetic Levitation Transportation System Design Competition. The construction of this prototype American maglev system is expected to demonstrate the technological capabilities of the system and the commercial viability of maglev systems in the United States. The $600 million grant is expected to cover only a portion of the actual

costs involved in constructing the system. The remaining costs are to be borne by the entity awarded the grant.

Magnetic Levitation Transportation Administration: The bill establishes a new agency within DOT to regulate and oversee the development of this new mode of transportation. The Administrator would establish minimum health, safety, and environmental standards for the industry, and establish such rules and regulations as may be necessary to ensure reasonable levels of safety.

Study on Guideways for Magnetic Levitation Transportation Systems: The bill requires the Administrator to conduct a study to determine the feasibility of and need for adopting a standard for the construction of guideways for maglev systems to allow for future development of an interconnecting network of maglev systems. Six months after completion of the design competition, the Administrator is to transmit a report on the study's findings and make recommendations to Congress.

CBO REPORT RECOGNIZES THAT STATEHOOD IS NOT GOOD FOR PUERTO RICO

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FUSTER. Mr. Speaker, space does not permit me today to reprint in the RECORD a lengthy article on the almost prohibitive costs of statehood for Puerto Rico, but I certainly commend the piece to my colleagues. The article appeared in the April 7, 1990, edition of the New York Times, and was headlined, "Statehood Is Seen as Setback for Economy of Puerto Rico."

Written by Martin Tolchin of the Times' Washington Bureau, the article adequately summarizes a recent report issued by the Congressional Budget Office which was entitled, "Potential Economic Impacts of Changes in Puerto Rico's Status Under S. 712." That bill, S. 712, is the "Puerto Rico Status Referendum Act" and was marked up last August by the Senate Energy and Natural Resources Committee, which has primary jurisdiction in the other body. The House Subcommittee on Insular and International Affairs has held recent hearings—both here and in Puerto Rico—on a similar proposal.

Mr. Speaker, as you know, S. 712 would authorize a congressionally sanctioned plebiscite in Puerto Rico in the summer of 191 between the choices of statehood, independence, and an enhancement of the existing Commonwealth status. I favor the latter option, and while I have great respect for the institution of statehood I do not think it is in the best interests of Puerto Rico or the United States. Commonwealth status has worked well since the Congress created it in 1952, but would work even better with the enhancements outlined in S. 712.

As for statehood, it is just not feasible, from an economic and cultural-linguistic point of view. As the New York Times article points out at the beginning:

Puerto Rican statehood could undermine the island's economy and cost as many as 100,000 of its 900,000 jobs by the end of the decade, a new study by the Congressional Budget Office has found.

The Times article continues:

The study, which many people see as a setback for statehood supporters, estimated that the island would lose 73 percent of the investment it receives from United States companies because of the elimination of tax benefits intended to stimulate such investment.

Mr. Speaker, that is a very accurate, but only partial, assessment of the economic catastrophe that awaits Puerto Rico under statehood. And the New York Times, which is justifiably considered to be the best and most authoritative newspaper in the United States, is to be commended for reporting on the CBO study at such length.

The highlights of that study were covered by the Times story. But the study itself went even further. For example, the CBO study concludes that even without analyzing the probable economic dislocations from the contractions of services and activities of the Puerto Rican Government, by the year 2000 the statehood option for Puerto Rico will have cost the U.S. Treasury a net increase of almost $18 billion in Federal expenditures.

Moreover, the CBO also estimates that Puerto Rico's GNP would be reduced by 10 percent to 15 percent under statehood by the year 2000. Also, according to the CBO, Puerto Rico's critical industrial exports—which currently are 81 percent as great as the island's GNP—would be reduced 33 percent to 43 percent by the year 2000. Since almost all industrial production is for export, this suggests that Puerto Rico's industrial base would shrink accordingly.

On the other hand, under commonwealth status, according to the CBO, Puerto Rico "will enjoy a real annual increase between 2.5 and 4.5 percent in its economy."

Thus, Mr. Speaker, it is time for my colleagues to bite the bullet on this matter of political status for my island. Even a cursory glance at the CBO report permits essentially one conclusion: that enhanced commonwealth status is the best alternative for Puerto Rico. This conclusion, based on the CBO report, should certainly alter the whole plebiscite process that is now going on in both the House and Senate. How can we in the Congress, in good conscience, now include statehood or independence as realistic alternatives?

Mr. Speaker, given the clear message from the CBO, which in any case may have understated the costs of statehood, we in the Congress now have the clear obligation to take a hard look at the statehood option and perhaps to overhaul the status plebiscite process itself. At this time, Puerto Rico is just not ready for statehood.

TRIBUTE TO MICHAEL L. MURO

HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. LOWEY of New York. Mr. Speaker, today I would like to speak about an individual who was committed to his community, who was dedicated to the idea of public service, and who enriched the lives of others through his generous spirit. It is difficult to believe that Michael L. Muro was taken from us 2 years ago.

Mike Muro was a lifelong resident of Yonkers, NY. Throughout his life, he was deeply involved in community service projects and civic organizations, many of which involved children. He knew that investment in our youth is the key to strengthening our communities and building a brighter future. He was also active in our political process, a firm believer in our system of government. He had a distinguished record as Yonkers city assessor. Through his diligence and hard work, he earned the respect of those living in Yonkers and throughout Westchester County.

Now, 2 years after his untimely death, a foundation is being established in his name to fund scholarships for outstanding elementary, high school, and college students. I am sure that Mike would be pleased to know that he is being remembered through the Michael L. Muro Foundation and that the fruition of its work will be the education of children who might otherwise be denied opportunities. While he was with us, he reached out to young people. Now, this foundation will continue that valuable commitment.

SHARING THE RESPONSIBILITY FOR CLEAN AIR

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. UDALL. Mr. Speaker, my colleague and good friend from Utah, Mr. OWENS, delivered the following remarks as the keynote address to a Clean Air Conference at the University of Utah on March 24, 1990, in Salt Lake City. I am impressed with these remarks and would like to submit his speech to the RECORD so others can benefit from his insights.

SHARING THE RESPONSIBILITY FOR CLEAN AIR, KEYNOTE ADDRESS BY CONGRESSMAN WAYNE OWENS AT CLEAN AIR CONFERENCE, MARCH 24, 1990

He that troubleth his own house shall inherit the wind.—Proverbs 11:29

This familiar scripture may take on a new meaning in 1990, for we have surely troubled our own house—with ozone, carbon monoxide, PM-10, sulfur dioxide, nitrous oxide, air toxins, and the rest of the litany of air pollution problems. Unless we are careful, the wind we inherit—and our children inherit—is becoming increasingly dangerous and unhealthy.

I am pleased to see so many of you here this morning to participate in this conference, for there is something very basic, very elemental about this discussion. The clean air issue is not merely a political question. We can't hold our breath if Congress decides to stall on the question. Air is the breath of life. The Greeks understood this truth when they determined that fire, water, earth, and air were the four main elements. Thousands of years later, there is still no disputing this basic fact. Air is the most elemental human need of all. People

have survived for weeks without food, for days without water, but six minutes is about all we can normally survive without air. Politics must be transcended by this unalterable truth.

Air pollution is nothing new, from the acrid smoke in Neanderthal caves to the horrific incidents in London and Pennsylvania earlier this century. If you think we have it bad during inversion periods, consider this: in the first week of December in 1930, a thick cloud of industrial pollution settled in the Meuese Valley in Belgium for several days. Sixty people died. Thousands were hospitalized. In 1948 in Donora, Pennsylvania, a fog inversion killed twenty people and made 6,000 ill. In 1952 in London, during a five-day inversion which trapped dangerous pollutants, 4,000 deaths were attributed to the noxious air. And, of course an accidental release into the air of Union Carbide's methyl isocyanate killed over 2,500 people in Bhopal, India in 1984. This is not intended, however, to give us comfort; it should, instead, be taken as a warning.

Air pollution may not be new—but, as a serious health threat, it is fairly new to many of us. I spent my boyhood in Panguitch in south central Utah, where the air was an elixir, pure and limitless. It seems ridiculous that I should have to wax nostalgic today about what should be an inalienable right. The limitless horizons around Panguitch have been affected by our propensity to pollute and our birthright to clean air has been sold, forgive me, for a mess of wattage. We have treated air as though it were infinitely forgiving and infinitely resilient. It is neither. We have treated the atmosphere as some sort of common dumping ground for waste. We have made a habit out of poisoning America while we made it rich. And what has always been our closest ally has not, in places, become an enemy.

As incredible as it sounds, some communities around the Nation now have reason to fear their own air. As Mr. Dunlap will undoubtedly mention in his upcoming remarks, southern California has been the most heavily impacted region of all. People who enjoy exercise must do so in the early morning before carbon monoxide and ozone pollution make their lungs ache and bring tears to their eyes. The Center for Disease Control says that ozone pollution is as effective as some chemical weapons in destroying lung tissue. 1,600 lives in southern California may be lost each year to air pollution—that's as many people in that area as are killed by violent crime. And we all want to be tough on crime. Perhaps it is time to finally realize that the cost of air pollution goes for beyond the addition of a new scrubber. Human life and health is a factor that must become part of the equation, as Mr. James Cannon will discuss in his presentation on behalf of the American Lung Association later this afternoon.

Our problems in Utah are not as severe as those in California. If we take the proper steps today, they never will be. But we do have problems in Utah—even health problems—problems with air quality as the Health Panel later today will discuss. I sense that Utahans are now serious; we want to prevent further air quality deterioration and we want to restore the air quality we have lost. Poll after poll shows that Americans, Utahans included, are deeply concerned about air quality. An April 1989 Harris poll reported that nearly three in four Americans believe not enough is being done to keep clean the air people breathe. In a June 1989 Gallup poll, 63 percent said they worried about air pollution a great deal. An additional 25 percent said they were farily worried about air pollution.

We must ask ourselves how many Utahans have suffered ill health as a result of air pollution. We must wonder how many potential clean industries have resonsidered locating in our beautiful mountain valleys, when their executives found they could not see the mountains. How many companies which require a clean air environment for high-tech production have decided against Utah? How many of our children, how many of the elderly, the two most susceptible groups, have experienced respiratory problems because of our air? How many Utahans have even succumbed to cancer cause by carcinogens in our air? It is ironic that in a State of relatively few smokers, children of non-smokers living in a polluted environment may suffer a higher risk of respiratory disease than children of parents who smoke, living in cleaner areas of the country.

The unnatural pall that sometimes hangs over this valley and other nearby mountain valleys is unacceptable. Maintenance of the status quo is not enough. Conditions are not impossibly bad—but they must soon improve. Our air quality problems are most noticeable from the air, as I have seen in flights to southern Utah—a lens of brown-gray pollution suspends itself over our valleys, finally dissipating somewhere south of Spanish Fork, where views open up again for a hundred miles. But then, the pall from the Navajo Power Plant which proudly overlooks Glen Canyon Dam becomes visible on the horizon.

We clearly have a peculiar problem which must be addressed in these high valleys—a problem that touches on visibility, health, economic growth, and the beauty of our environment. Now we hear talk of more power plants to our west, across the border in Nevada, where the prevailing wind will bring more pollutants into our valley. Taken separately, the eight projected units of the Thousand Springs Power Plant are not particularly dirty. But taken all together, these eight units would generate enough pollution to be equivalent to one of the dirtiest power plants in America. We must now resolve to prevent that from happening.

There is something politically immoral about a project which bestows economic benefits on one region and dumps environmental refuse on another. Utah has had enough of such abuse.

This Thousand Springs ill wind will blow good to no Utahan—coming from out-of-State to produce power for California and the Pacific Northwest and carrying with it, for Utah, thousand of tons of sulfur and nitrous oxides.

We will have enough problems in the future coping with our own economic and quality of life considerations here without allowing ourselves to become the region's spetic tank. Such degradation of Utah's character and self-respect is unthinkable and intolerable, and further degradation of our valley's air quality for the convenience of our neighbors is unacceptable.

Utah is in the process of being probed and tested to determine its level of tolerance for the dubious honor of serving as garbage disposal for populous and politically powerful regions of this country. We successfully resisted becoming the Nation's nuclear waste repository. But, we must recall, that was not because of our State's resolve nor our political leadership's unified stand. Rather, it was transferred to Nevada because the national conscience would not permit its location outside one of our most beautiful national parks.

But, on a daily basis, Utah buries low level contaminated nuclear waste and toxic material to get them out of sight and out of mind for other regions of the country. And for that, of course, we take money and it brings jobs and economic growth of a kind.

Now our State must marshal its forces and find the means, and unity of purpose, to win what promises to be a monumental struggle against regional environmental abuse. And while our neighbors do not see themselves in that role, nevertheless they plan projects for their comfort and economic growth which will have that inevitable result for Utah.

And while we wish to resist causing regional interstate tensions, Utah's higher economic and quality of life aspirations now require that we organize the political liaisons necessary to successfully resist the Thousand Springs Power Plant. That is not just the symbol of our future problems, it is the manifestation and provocation and the place where Utah must draw a line in its desert dust.

I pledge my efforts to that end, and call Utah's congressional delegation, its Governor, and its legislature to join in that unified, non-partisan task.

Let us speak with one voice. Utah will no longer offer its unspoiled space, its landfills, its aquifers, and its air to the Nation, even for increasingly economically attractive rental fees.

So much for the bad news and the call to arms. The good news is that we can now begin to clean the nest we have so carelessly fouled. This is an extremely timely topic—in fact, this may be the best single weekend in twenty years, since the Clean Air Act initially passed, to discuss the issue. Clean air legislation is currently before both the House of Representatives where I serve and the Senate. The legislation is being debated on the floor in the Senate and in committee in the House, soon to reach the floor. We have the tools in this legislation to answer most of our pressing clean air problems if we can only hold a firm package together.

What are the current issues being discussed in Congress and in family rooms around the country? Acid rain, a problem we are just now beginning to see manifest in some of Utah's alpine lakes. Ozone pollution, what we normally call smog, the result of auto emissions for the most part. Salt Lake is a non-attainment area for ozone—not to be confused with the ozone we are losing in the upper stratosphere around the poles—and we are a non-attainment State, mostly because we love to drive and haven't fully embraced the idea of effective mass transit yet. We must follow through on the idea of an effective mass transit system, whatever form it ultimately takes, as well as tighter controls on the emissions our cars are permitted to make. No other course will solve our problems here.

PM-10, particulate matter smaller than 10 microns in diameter (five would fit on a human hair), is a particularly serious problem in Utah which has not received nearly enough attention in the national debate, since it is essentially a problem of the high-elevation, inversion-prone, sparsely-populated western States. But both Salt Lake County and Utah County are non-attainment areas for PM-10, which has been potentially implicated in both respiratory disease and cancer. I want to commend Representative Howard Nielson for his efforts in

tightening up the control standards for PM-10 in the House bill now before the committee.

The thorny issue of air toxics needs to be addressed as well. Individuals in one area of the country, Port Neches, Texas, if you can believe this, have a one-in-ten probability of developing cancer because of nearby toxic chemical emissions. Our Risk is nowhere near that high in Utah, but some people feel that even a one-in-ten-thousand risk is too great to bear. Alternative fuels are also currently being discussed—the President's ambitious and farsighted program of requiring the auto industry to produce a million alternatively fueled cars a year has, unfortunately, been seriously gutted by oil interests in the current House version of the Clean Air Act.

Like so many others, I was disappointed by the so-called "compromise" bill between the administration and the Senate which emerged from behind closed doors just a few weeks ago. There is a fine distinction between a compromise bill and a compromised bill and I fear the Senate is in the process of adopting the latter.

President Bush has done many admirable things so far in office, but I do not count this compromise bill among them. As he himself eloquently stated, not too long ago, "the wounded winds of the north, south, east, and west can be purified and cleansed—and the integrity of nature can be made whole again. Ours is a rare opportunity to reverse the errors of this generation, in the service of the next. We cannot and must not fail. We must prevail."

This is a powerful statement which must be backed up by strong legislation. It appears now that the job will fall to the House to strengthen the President's clean air proposal. This week, a fierce political battle is raging in the powerful House Energy and Commerce Committee which is debating changes to the President's bill. Will we have tougher auto emission standards? How will air toxics be regulated? Will our health be protected? Will PM-10 standards be tough enough? Will standards have the teeth necessary for enforcement? Will power consumers in the West end up paying for the cleanup of plants in the Midwest?

I am hoping the committee will act wisely and put together a clean air package which will protect our health and environment. We made a giant step toward that goal just two days ago when a comprehensive amendment passed nearly unanimously to the first title of the clean air bill. But we have a long way to go. If we do not get there, I will join my many colleagues on the House floor in insisting on a thougher clean air bill. I believe the people demand it and I believe it is the only responsible course of action.

I will be active in the debate on the House floor, as I have been active behind the scenes in the committee. Some of the areas I am most interested in include strengthening of PM-10 standards, incorporating provisions for woodsmoke, and regulating the intestate transport of air pollution—a provision just incorporated into the House bill which will be helpful in our effort to fight the proposed Thousand Springs plant in Nevada.

I am not pretending for a moment that this is an easy question to resolve. Nationwide, estimates of the annual cost of tough clean air compliance could be as high as fifty billion dollars annually. Interestingly enough, some estimates of the health and lost productivity costs associated with our present dirty air also approach that figure—and do not include the unquantifiable cost of human suffering and even death. But there are also credible studies which address the potential health cost inherent in economic disruption and unemployment. It is my convicton that clean air can be achieved without economic upheaval, but the debate still rages on where this compromise level will be.

And just as there is no simple quick fix to the clean air dilemma, there is no one clear villain in this scenario. It is human nature to find a scapegoat, place the blame, avoid personal responsibility, and solve a problem once and for all. From three trapped whales in Alaska last winter to famine in Ethiopia several years ago, we tend to look for the easy way to do the right thing. But famines still occur every year in Africa and whales are still killed for meat. We don't hear much about this, and that's probably the way we prefer it. In the same sense, we seem to look for one egregious polluter who we can blame for all our filthy-air woes. But as Walt Kelly, the cartoonist who drew Pogo, might have said, "we have met the polluter—and he is us." Collectively, we have created a problem. Collectively, we must undo the damage.

Who is the polluter? I am. You are. The answers are disturbing. Motorists who won't use mass transit. Woodstove owners. Construction workers. Industrial employees. Consumers of electricity and oil. In other words, all of us.

We cannot simply look for one source and shut it down, thinking we have solved the problem. We need to fight against this understandable tendency. There is no one identifiable evil, no Charles Mason of the polluting world. That villain does not exist. It would be so much simpler if it did. Today, at this Conference, I hope we will consider the actions we can each take to help clear the air. Utah's industrial leadership is proceeding in good faith, in my opinion, and I pledge, as one of Utah's political leaders, to help hold their feet to the fire.

The State of Utah, represented here today by Ken Alkema and Burnell Cordner from the Department of Environmental Health and the Bureau of Air Quality will discuss efforts Utah is making to quantify the sources of all the pollution we experience in Utah. One of these studies, for PM-10, small particulate matter, is nearly complete and the preliminary breakdown for Salt Lake County is enlightening: 44 percent of PM-10 comes from nitrates (mostly from automobile exhaust), 18 percent from woodburning stoves, 14 percent from sulfates (mostly from diesel fuel, oil refineries, and copper smelters), 14 percent from dust, salt, roadwork, 5 percent from diesel vehicles, and 2 percent directly from cars.

Clearly, we are all in this together. There is a striking and unavoidable commonality to this debate. We all breathe. Steelworker, environmental activist, lawyer, politician, student, businessperson. We all breathe ten to twenty thousand liters of air a day. Each breath contains 10 billion trillion molecules, literally exposed to miles of permeable membranes in our lungs. Given that biological fact, I have faith in the good will—and the good sense—of our people and I believe the basic truth of our absolute dependence on air will eventually touch us all. This is a fight too big to ignore. Let us be certain that the "wind" our children inherit will be pure, invigorating, and healthful.

EARTH DAY 1990

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. DWYER of New Jersey. Mr. Speaker, I rise to commemorate Earth Day 1970 and to call attention to April 22, Earth Day 1990.

It has been said that one can never understand the environment until one sees it as a living organism. Unarguably, Earth Day 1970 started this process of understanding by educating the American people to our responsibilities as stewards of the precious resources of the Earth, by offering a challenge to change, and, as my colleagues and I know well, by encouraging citizens to participate more actively in the political process.

In the subsequent 20 years, some of the problems that fueled Earth Day 1970 have been effectively addressed. On the Federal level, there have been some remarkable milestones: clean air, clean water, RCRA, and the Superfund. Yet, other problems have grown worse and new ones have come to light: global warming, ozone depletion, deforestation, and a host of solid-waste issues.

The solutions, however, have not been solely on the Federal level. Some aggressive responses have come from the States. For example, New Jersey has enacted some of the most innovative, timely, and farreaching environmental laws in the Union: Worker and Community Right-to-Know, the Oilspill Compensation Fund and the Environmental Cleanup and Responsibility Act, among others.

At the same time, I am constantly impressed by the efforts of individuals—some acting alone, often quietly, others acting jointly—to preserve their local environment; yet, each acting in concert with others, in different communities but possessing similar concerns, to create a better whole.

Had Earth Day 1970 never taken place, inevitably we would have had some event—either a Chernobyl, a Love Canal, a Fernald or an *Exxon Valdez*—that would have brought to light the potential consequences of our environmental neglect. But the time was right, and Earth Day 1970 altered the course of American politics by creating the modern environmental movement.

An anonymous European official recently commented that the purpose of politics is power, that the purpose of power is to govern, and that the purpose of governing is to show the way—even when it is unpopular. Perhaps it is time that we once again govern America, rather than muddle through the many issues demanding our attention.

Perhaps it is time to enact strong and effective clean air and oil pollution prevention legislation, to create programs that seek to prevent pollution rather than relying on programs that remediate it, and to fully enforce existing environmental laws.

Perhaps it is time to take a discomforting step now in order to avoid a possibly more disastrous and ultimately more costly mistake in the future—a mistake requiring harder choices with more limited flexibility in choosing among the possible solutions.

Perhaps it is time to govern America again. Perhaps April 22, Earth Day 1990 should be the starting point.

RECOGNIZING BILL SMULLIN

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BOSCO. Mr. Speaker, I would like to take a minute to recognize one of the most dedicated individuals I know, Mr. William B. Smullin.

I have known Bill for years, and I could not have been more pleased to see him recognized recently as the recipient of the National Association of Broadcasters' 1990 Distinguished Service Award—the broadcasting industry's highest honor.

No one is more deserving of this honor than Bill, and in fact, Bill is the first broadcaster from the western part of the United States to receive this award. Past recipients include other legends of the broadcasting industry, Walter Cronkite, Bob Hope, David Brinkley, and Herbert Hoover.

Over the course of his 57 years in broadcasting, Bill has been a true pioneer. In the West, Bill was always one step ahead of the pack. He was one of the earliest newspaper men to make the transition into radio, later became one of the first radio men to move into television, was one of the first television men to enter the cable industry, as well as becoming one of the first to establish a microwave link on the west coast.

Bill started his own company, California Oregon Broadcasting, Inc., in Eureka, CA in 1933 and developed it into one of the two oldest, continuously-operated, independent broadcast organizations in the United States. He remains active in the day-to-day operations of the company today.

Never one to be content to rest on his laurels, Bill is also a pioneer in the early development of cable television in Oregon and California. He built the largest multiple system operation in Oregon in the early 1950's as well as building cable systems in northern California. He was instrumental in the development of public broadcasting in southern Oregon and northern California.

In the early 1960's, Bill began Pacific Teletronics, a microwave company serving Oregon and California. The microwave company allowed residents of that region to receive all the television stations in San Francisco, Sacramento, Oakland, Portland, Salem, and Corvallis.

Bill has already received a great deal of recognition for his long, dedicated, and tremendously productive career. His awards are too numerous to mention here.

More important than recognition, however, have been Bill's continuous efforts on behalf of his local community. He has established student scholarship funds at Willamette University, the Oregon Institute of Technology, Humboldt State University, and Southern Oregon State College. He also is a major benefactor to community hospitals.

Receiving this prestigious award from the NAB is quite a feat. I know I am not alone in saying that no one deserves this recognition more than Bill. I wish Bill Smullins the best of luck in his projects to come, and am proud to be able to claim Bill as one of our own.

WILLIAMSBURG, PA, AT 200 YEARS

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SHUSTER. Mr. Speaker, I would like to, at this time, tell this body of one of the special communities that makes up Pennsylvania's Ninth congressional District. The borough of Williamsburg is celebrating the bicentennial of its founding in 1990 and I am honored to be the borough's Congressional Representative during this very important year.

Williamsburg, PA is a community of small diversified businesses surrounded by picturesque dairy farms in an area with a rich historical heritage. This spot along the Frankstown Branch of the Juniata River was first settled in 1789 by Jacob Ake and became the first incorporated borough in Blair County—the town was first named Aketown, but was later renamed in honor of Jacob's son, William. Ake and others were drawn to this remote section of the area by Big Spring, which purs forth millions of gallons of water daily from its location along one of the town's two major streets—High Street.

Big Spring helped Williamsburg play a major role in the evolution of industry in the region. The community was, at first, the center of commerce for operators and residents of the iron furnace communities that dotted the region. The spring and the river into which it flowed powered several mills—and made Williamsburg a key stop along the Pennsylvania Canal during its formation in 1826—the Frankstown Branch of the canal opened on November 15, 1832. Packet boats soon carried supplies, passengers—Charles Dickens in 1842—and iron products through the region. The canal created more jobs, including a foundry in town to service the lock system.

In 1873, the Williamsburg branch of the Pennsylvania Railroad was completed, and 2 years later the canal division was closed. As the iron furnaces disappeared, a new industry was born in the surrounding valleys—stone quarries. The Piney Creek watershed held a rich abundance of limestone and Gannister granite. The large stone railroad bridge across the Susquehanna near Harrisburg—still in use today—was built entirely from these minerals.

Williamsburg is indebted to one of its native sons for the greater part of its existence today. Steel tycoon Charles Schwab was born near town in 1862, and often returned to visit his neighbors and friends. It was Schwab, on one of these visits, who told town leaders about the rise of steel and decline of iron and minerals. The community was on the verge of decay when Schwab and others saw the potential Big Spring held for powering and supplying a paper mill. On October 14, 1905—after a million dollar investment and 3 years of work—Schwab joined the community in celebration of the opening of the mill. It was Schwab who bought land to make way for homes to house the influx of new workers, and it was Schwab who brought other business, including a silk mill, to his place of birth.

Schwab's last visit, ironically was on the occasion of a celebration honoring another hometown hero, aviator Wilmer Stultz, in 1928. Stultz earned a reputation as the boldest of the young air adventurers in the years after World War I, and accompanied Amelia Earhart and mechanic Lou Gordon on Earhart's flight to fame across the Atlantic. All three came to Williamsburg on July 18, 1928 for what has been described as the biggest celebration in the town's history. Earhart later laid a bronze tablet at the Altoona-Tyrone Airport designating the location as Stultz Field. Unfortunately, the hard-living aviator's enjoyment of fame ended July 3, 1929 in a crash on Long Island.

Williamsburg enjoyed prosperity for several decades, especially with the arrival of the United States Envelope [USE] plant in the midsixties and its subsequent expansion. The first setback in a disappointing decade occurred with the June 22, 1972 flooding of the downtown area as a result of Tropical Storm Agnes. While Federal flood recovery money helped renew the damaged areas, the true devastation came on February 17, 1975 when the Westvaco Paper Mill closed its doors forever—and compounded 6 months later when the Blair County Children's Home was destroyed by fire. The shock waves of the mill closing affected every person and place in the borough, and it was a sad, but determined, community that celebrated the Nation's bicentennial the following year.

The next 15 years, however, saw improvement. USE expanded its work force, the Fonda Group opened a major cup and paper products plant, and small business has grown steadily. Population today is about 1,800 and the 700-student school system draws from a population base of 5,000 living in adjacent Woodbury and Catharine townships. The area is well known for its excellent hunting and fishing, with Piney and Clover Creeks drawing anglers from all over the State.

Williamsburg, despite adversity, has retained a small town charm. Many cars bear bumper stickers that read "Williamsburg—We Are Family!", a phrase that best sums up the character of the community. The residents support a volunteer fire company, recently upgraded an athletic field and support—in body and cheer—football and basketball teams that consistently reach the playoffs—even though the school district is among the five smallest in the State! The trees planted along Canal and First Streets after the 1972 flood have matured and present a beautiful sight to the visitor especially in spring. The town is proud of its heritage and still produces local heroes such as Galen "Butch" Hall, a football standout at Penn State and later coaching at Florida.

For 200 years Williamsburg has remained faithful to the great American values of honesty and hard work, bypassed by the urban woes of juvenile delinquency, vandalism, and major crime.

GRIFFIN CELEBRATES SESQUICENTENNIAL

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GINGRICH. Mr. Speaker, I am proud to announce that 1990 marks the 150th birthday of Griffin—one of the great cities in the Sixth District of Georgia. On June 8, 1840—150 years ago—Gen. Lewis Lawrence Griffin, president of the Monroe Railroad Co., auctioned the first lots of land to establish a new town. The site was a promising one because it was to be the intersection of a north/south and east/west rail line, located on what was then the border between Henry and Pike Counties. In 1843, the State of Georgia granted a charter to the city of Griffin. She instituted her own city government in 1845.

Griffin is a small city, rich in southern tradition and history. The downtown district has a friendly, established atmosphere, made up of lovely buildings constructed predominantly in the late 19th and early 20th centuries. Among those places not to be missed are: The N.B. Drewery Drug Store—one of the oldest buildings downtown, this drug store was started by a Confederate doctor following the Civil War; Bailey's Building—constructed in 1892, is a noteworthy example of decorative brick and metalwork of the period; the Lewis-Mills House and the Prichard-Moore-Goodrich House—both beautiful homes were built around 1850 and are listed on the National Register of Historic Places; and the Sherman Opera House—constructed in 1870, it was the site of a dry goods store on one floor and the city theater on another.

Griffin, however, is not a town that time forgot. On the contrary, she is a very future-oriented community, with many healthy, competitive businesses, a thriving textile industry, good schools, and a concerned and active populace. Dundee Mills Inc., one of the largest employers in the Sixth District, is located in Griffin.

True to their enthusiastic, civic-minded nature, the citizens of Griffin have planned a creative variety of activities to celebrate their uncoming 150th birthday. Griffin's 150th Celebration Committee and the Great Griffin Mayfling Committee have joined forces to arrange kangaroo courts, made up of Celebration Belle Chapter members and Brothers of Brush Chapter members, which will promenade in period costumes at different locations in town. The high school will have a celebration dance. The city park will hold a Mayfling Golf Tournament, and a local bank and a running club will sponsor a 5K race in honor of the sesquicentennial.

On May 5, the city of Griffin will host a 150th birthday parade through downtown Griffin. That same day the 2-day Mayfling Arts and Crafts Fair will begin at city park. The Kiwanis will sponsor a tractor-truck pull at the fairgrounds, and the Griffin-Spalding Airport will hold a fly-in with antique airplanes and a dance that night. Later in May, the city plans to put on a play at Memorial Stadium about Griffin's history and to sponsor a commemorative tennis tournament at city park.

It is a great pleasure for me to represent the fine community of Griffin in the U.S. House of Representatives. I want to take this opportunity to commend the citizens of Griffin for their unending dedication to the growth and well-being of their town. I would also urge my colleagues and others to visit this wonderful place just south of Atlanta.

THE 25TH ANNIVERSARY OF THE FOSTER GRANDPARENTS PROGRAM

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MAZZOLI. Mr. Speaker, I rise today to recognize an important occasion, the 25th anniversary of the Foster Grandparent Program.

The Foster Grandparent Program has been operating at the national level since 1965 and its mission has been, and continues to be, to promote personal relationships between low-income persons aged 60 or over and children possessing special or unique needs. As of 1988, the program had approximately 19,000 foster grandparents serving 65,000 children across the Nation.

In Louisville and Jefferson County, the Foster Grandparent Program has been operating over the past 18 years. The Louisville and Jefferson County chapter currently has 95 senior citizen participants working with approximately 250 exceptional children.

In addition to working with children who have been abused, neglected, underprivileged or in the juvenile justice system, the Louisville and Jefferson County Foster Grandparent Program is now reaching out to children at risk of substance abuse. Senior citizens are dutifully equipped to help these youths face the hardships of substance abuse. I commend the Foster Grandparent Program for implementing this important initiative.

Mr. Speaker, it is certainly encouraging to see the spirit of voluntarism in action. For the past 25 years, the Foster Grandparent Program has employed a winning formula by matching the Nation's senior citizens with children having special needs. Let us hope the next 25 years are even more successful.

COMMEMORATING REV. NORBERT BIBEAULT, C.S.V.

HON. JAMES H. BILBRAY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BILBRAY. Mr. Speaker, it is with great pleasure that I rise today to pay tribute to the honoree for the Bishop Gorman High School's 1990 "Spring Fling," Rev. Norbert Bibeault C.S.V. This annual event, to be held on April 28, 1990, will honor the Reverend Bibeault for his unselfish contributions and dedication to the children and families of Bishop Gorman High School.

Born and raised in Hartford, CT, Father Bibeault joined the Viatorian Fathers, Clerics of St. Viator, in 1948. In 1952, he graduated from St. Ambrose College and went on to teach at Cathedral High School in Springfield, IL, for 1 year. From 1953 to 1958 he attended Catholic University in Washington, DC. It was during this time that he was ordained to the Priesthood and he received his master's degree in physics.

He began teaching physics and math at Spalding High School in Peoria, IL in 1957, and in 1959 he transferred to Alleman High School in Rock Island, IL. In 1962 he taught at McNamara High School in Kankakee, IL where he also served as the athletic director and dean of students. In 1967 he became principal at St. Viator's High School in Chicago, IL. And finally, in 1968, Father Bibeault came to Bishop Gorman High School in Las Vegas. For the next 21 years he taught physics and coached various sports committing himself to the students, the school, and the community. In 1989 he transferred to Bishop Brady High School in Concord, NH.

Among the many honors Father Bibeault has received throughout his years of education, he is probably the best known for holding the western indoor record for being the life of the party. Another dubious achievement Father Bibeault can claim is his first name basis with most gold courses in North America. I have heard it said many times during Father Bibeault's tenure at Bishop Gorman, "if you can throw it * * * catch it * * * hit it * * * or pitch it * * * Father Bibeault will be there." Truly, Father Bibeault has been one of the most well respected and admired faculty members ever to grace the halls of Bishop Gorman High School. His students all hold him in high acclaim and affection because they know he truly cares about each and every one of them.

Mr. Speaker, I urge my colleagues to join me today in commending Father Bibeault for his well-deserved recognition in outstanding contributions and loyalty to Bishop Gorman and to the Las Vegas community. Father Norbert Bibeault, C.S.V., serves as an inspiration to us all.

THE NATIONAL EXCELLENCE OF THE FUTURE FARMERS OF AMERICA, DENMARK, WI, CHAPTER

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MOODY. Mr. Speaker, today I would like to recognize an outstanding group of young people in Wisconsin: The Future Farmers of America, Denmark, WI, chapter. This chapter has an extraordinarily distinguished record of achievement in preparing young people to become good citizens and skilled farmers.

The Denmark chapter of Future Farmers of America is a national leader in community service, programming, and agricultural safety training. Out of 8,200 chapters nationwide, the Denmark group is the only chapter to receive FAA's prestigious gold rating in all three of these national chapter award programs.

What's more, they have accomplished this feat each of the last 5 years.

The family farm has been a backbone of the American tradition, and a key element of the Wisconsin economy. Carrying on that proud tradition is a priority for our Nation, and that is exactly what the Future Farmers of America seek to ensure.

I commend the Future Farmers of America for preparing the next generation of agricultural leaders, and I congratulate the young people of the Denmark chapter on their consistent record of winning awards for serving others and cultivating leadership skills. The chapter fosters and encourages values of public service, responsible community leadership, skilled agricultural practices, and farm safety.

Mr. Speaker, I am proud to cite these Future Farmers of America for the fine example they have set for the State of Wisconsin and for the Nation.

A TRIBUTE TO COL. CLINTON L. PAGANO

HON. JIM SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SAXTON. Mr. Speaker, I rise today to pay tribute to Col. Clinton Pagano who is being honored for his many dedicated years and extraordinary accomplishments on the New Jersey State Police Force.

Col. Clinton Pagano is a lifelong resident of New Jersey where he and his wife Audrey raised a family of three boys. Not only did he strive to protect the citizens of New Jersey, but he also defended our country in the final days of World War II in the U.S. Army and during the Korean conflict in the U.S. Marine Corps.

The year 1952 marks the beginning of Colonel Pagano's very distinguished career with the New Jersey State Police working on general assignment in the central New Jersey area. His exceptional advancement in law enforcement shows his dedication to public security and enforcement of law and order.

As an extremely ambitious person, within 2 years he became a detective and was quickly assigned as a field investigator with the auto theft unit. He had the opportunity to work on special assignments of the attorney general's office, and he also was a confidential investigation aide for the New Jersey Supreme Court.

Colonel Pagano continued to expand his horizons by becoming a captain for the narcotic's bureau, and a year later he was promoted to the position of assistant supervisor of the criminal investigation section. In the succeeding years, he also increased his knowledge of the management of law enforcement and criminal justice systems in classes he attended in New York, Maryland, and Northwestern Universities.

Three years later, Gov. Brendan T. Byrne nominated Captain Pagano as the ninth colonel and superintendent of the State police, and the New Jersey Senate unanimously approved him.

Some of his many remarkable accomplishments include his great efforts to recruit female troopers, to establish an urban crime fighting detail, and to become the State director of civil defense and disaster control.

Among many of the positions Colonel Pagano has held, he was elected to sit as general chairman of the Division of State and Provincial Police for the term of 1981–82. His career did not end there. He then was renominated by Gov. Thomas Kean as superintendent of the New Jersey State Police.

During his tenure, the New Jersey State Police has become the most widely diversified and efficient policing unit in the Nation, and it now has over 90 different programs.

I call on my colleagues to join with me, and the people of New Jersey, in extending our gratitude and appreciation to Colonel Pagano for the outstanding and enthusiastic devotion that he has made to law enforcement.

CONGRESSIONAL SALUTE TO AUSTIN J. MACARTHUR, RETIRING EDUCATOR

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. ROE. Mr. Speaker, it is with a great deal of pride and admiration that I rise today to salute an outstanding educator, administrator, coach, and athletic official who has truly distinguished himself during the past four decades.

I am speaking of Austin J. MacArthur of Clifton, NJ, who is retiring this year after 40 years as a guiding force in the Belleville, NJ, school system in my Eighth Congressional District. Mr. MacArthur will be honored for a lifetime of achievement with a testimonial dinner on Thursday, April 26, at the Friar Tuck in Cedar Grove, NJ.

Mr. Speaker, I know this event will be a source of great pride, not only to Austin MacArthur himself, but to his devoted family; his wife of 39 years, Joyce; his children, Patricia, Richard, Kenneth and Mark, and his grandchildren, Brian and Kristin Loughlin.

Mr. Speaker, Austin MacArthur has maintained such an active life, it is hard to know where to begin when recounting his numerous achievements. Following a tour of duty with the U.S. Navy during World War II where he served on the aircraft carrier U.S.S. *Croatan* CVE 25, he attended Montclair State College, earning his BA degree in business education and physical education in 1950. Two years later he earned his masters degree in personnel and guidance.

Austin J. MacArthur spent his 40-year education career making an enormous contribution to the Belleville school system. He spent 14 years at Belleville High School, 11 as a business education teacher and 3 as vice principal, before becoming principal at School Three, a position he has held for the past 26 years.

Along with his contributions as a teacher and administrator, Austin J. MacArthur was also widely known for his work as an athletic coach and as a sports official.

At Belleville High School he served as the head track coach, guiding his squad to championships at the county and State levels; as head cross country coach; as assistant basketball coach and as freshman basketball coach. Austin MacArthur has also been extremely active in baseball, having served as a coach on the Little League, Babe Ruth League, American Legion, and Metropolitan League, of which he served as commissioner.

Among his many activities, Mr. Speaker, Austin J. MacArthur was perhaps best known as one of the top basketball officials both in New Jersey and around the Nation. Collegiately, he officiated in 10 National Invitation Tournaments and handled one NIT championship game. He also officiated in 10 Holiday Festival Tournaments at Madison Square Garden in New York, also handling one championship game, and he officiated in four NCAA tournaments.

Mr. Speaker, Austin MacArthur also was the referee for a dozen New Jersey High School State Tournament championship games and for 10 Essex County Tournament championship. He also excelled as a football referee, officiating in six New Jersey High School State Tournament championship games.

Among Austin J. MacArthur's many awards and citations, he has received the New Jersey College Basketball Coaches Trophy for outstanding contributions to basketball, and the Corrigan Award of the International Association of Approved Basketball Officials [IAABO] Board No. 33 for his contributions to basketball. He also served as president of Board No. 33 IAABO, as international chairperson of the rules examination committee of the IAABO and as an Atlantic 10 Basketball Conference observer and evaluator of basketball officials.

Mr. Speaker, it is clear that Austin J. MacArthur has continued to strive for excellence regardless of his field of endeavor, whether it be as a teacher, administrator, coach or athletic official. In this regard, he has served as an important role model and influence on the youth of Belleville and of New Jersey, and has truly made his community and State, and our Nation a better place to live.

CONGRATULATIONS TO LT. COMDR. SHAW COHE

HON. EARL HUTTO

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HUTTO. Mr. Speaker, Lt. Comdr. Shaw Cohe will be leaving his position as the Navy's Congressional Liaison Officer for Acquisition and Contracts this week. Lieutenant Commander Cohe has been selected to serve as the Military Assistant to the Principal Deputy Under Secretary of Defense for Acquisition. He has provided extraordinary support for the Members of the House of Representatives and if his current performance is any indication he will be of invaluable assistance to the acquisition leadership of DOD.

Lieutenant Commander Cohe has provided outstanding support to my office and to the Readiness Subcommittee of the Armed Services Committee, which I chair. His dedication

and commitment to the Navy and the Congress of the United States were consistently demonstrated as was his technical expertise concerning a host of issues and inquiries. I would also like to thank Lieutenant Commander Cohe again on behalf of my constituents for his outstanding support of our procurement seminars in Pensacola and Panama City.

It gives me great pleasure to extend my heartfelt congratulations to Lieutenant Commander Cohe and to wish him fair winds and following seas in his new assignment.

FLORIDA ECIA AWARD WINNERS

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GIBBONS. Mr. Speaker, it is with great pleasure that I rise today to recognize an outstanding group of schools in my community which have been honored for their successes in education.

I am referring to 58 public and private elementary schools in Hillsborough County, FL, which recently were honored as "Top Gun" schools. The award acknowledges their special achievements with remedial reading and mathematics classes. Hillsborough County's ECIA chapter 1 basic program made the awards based on statewide standardized test scores.

As you know, ECIA stands for the Education Consolidation Improvement Act, the largest Federal-aid-to-education program in history. ECIA chapter 1 classes provide instructional help in reading and math over and above what usually is provided for all students. Congratulations are in order for the ECIA program, which coordinates remedial learning programs around the Nation. In recognition of this group's local achievements, the Hillsborough County School Board declared the week of March 19–23, 1990, ECIA Week.

Mr. Speaker, for the RECORD, I would like to insert the names of these outstanding schools, and their principals, with my heartfelt thanks and best wishes.

School and principal:
Broward Elementary, Beverly DeMott.
Bryan Elementary, O. Jack McMillan.
Cahoon Elementary, Beverly Parslow.
Christ the King, Sister Judith Suprys.
Clair Mel Elementary, Phyllis Wagers.
Cleveland Elementary, Phyllis R. Lee.
Crestwood Elementary, Patsy Sissle.
DeSoto Elementary, Rose Marie Chillura.
Dunbar Elementary, Geraldine Smith.
Edison Elementary, Sylvia H. Hornsby.
Egypt Lake Elementary, Larry Moore.
Forest Hills Elementary, Susan Turner.
Foster Elementary, Kenneth Cathcart.
Grady Elementary, Faye Pages.
Graham Elementary, James Pardo.
Incarnation School, Sister Eugene Schneider.
Jackson Elementary, James Rodgers.
Just Elementary, Lois Bowers.
Kenly Elementary, Deborah Coyle.
Knights Elementary, Sadye Martin.
Lanier Elementary, Carolyn Luis.
Lincoln Elementary, JoAnn H. Shaw.
Lockhart Elementary, Geraldine Ervin.
Lomax Elementary, Flossie Geathers.
Lopez Elementary, Harris Q. Carter.
Mabry Elementary, Joseph Trumbach.
Mary Help of Christians, Father John Nazzaro.
McDonald Elementary, Shirley Gonzalez-Day.
Mort Elementary, JoAnn McNeil.
Mt. Calvary School, Elisa Young.
Oak Park Elementary, Jack E. Davis.
Orange Grove Elementary, Velia C. Pedrero.
Pinecrest Elementary, Martha Hood.
Potter Elementary, Brenda D. Thompson.
Riverview Elementary, Sheila Jarsonbeck.
Robinson Elementary, Dennis Higgins.
Roland Park Elementary, Anthony J. Perrone.
Roosevelt Elementary, Helen Cathcart.
Sacred Heart Academy, Sister Joan Bocklet.
Seminole Elementary, Ruth Ann Reynolds.
Shaw Elementary, Earl Whitlock.
Shore Elementary, Olan Hill.
St Joseph School, Sister Mary Terzo.
St. Lawrence School, Maureen Hansma.
St. Patrick School, Robert Kenel.
Sulphur Springs Elementary, Stephanie Moffitt.
Tampa Bay Boulevard Elementary, Mary Lasris.
Thonotosassa Elementary, Sylvia McMillan.
Tinker Elementary, N. Jean Leone.
Town & Country Elementary, Barbara Santana.
Twin Lakes Elementary, Mary Libroth.
Villa Madonna School, Sister Theresa Kelly.
West Shore Elementary, Harriet Foundas.
West Tampa Elementary, Carl L. Barone.
Williams Elementary, Eloise Cabrera.
Wilson Elementary, R. Joyce Gatlin.
Wimauma Elementary, Beny Peretz.
Belle Witter Elementary, Phyllis Leidy.

IN MEMORY OF THE DIVINE AND SASSY SARAH VAUGHAN

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. DIXON. Mr. Speaker, I rise today to mourn the loss of a national treasure in the passing of jazz vocalist Sarah Vaughan. Known variously as "The Divine Sarah," "The Divine One," "Sassy" and "Sass," Sarah Vaughan has been described as "the most important singer to emerge from the bop era." A consummate jazz singer, Vaughan achieved enormous popularity among both jazz and pop audiences, blurring the lines between the two idioms with the immense talent and integrity she brought to both. The depth of her musical understanding and her sensitivity to the new wave of jazz music found expression in her singing and allowed the Divine Sarah to escape the disdain handed many singers—especially those who forsake jazz for pop music—by the jazz faithful. It is testament to her mastery of jazz concepts that, despite her meanderings, she always retained the deep respect and adoration of jazz musicians, her first and constant admirers.

Born in Newark, NJ, on March 27, 1924, Sarah Lois Vaughan studied piano from the age of 7 and was singing and playing organ at Zion Baptist Church by age 12. She earned entry into the jazz world by winning first prize for her rendition of "Body and Soul" in an amateur contest at Harlem's famed Apollo Theater. Stirred by her performance, singer Billy Eckstine, then with the Earl Hines Band, championed the young singer and implored Hines to hire her. Hines acquiesced and the 18-year-old Vaughan joined the group as a singer and second pianist. Her first professional performance was with the Hines group at the Apollo Theater in 1943. She had just turned 19.

Not long afterward, Eckstine left the Earl Hines Band, accompanied by Sarah, to lead his own group. Composed of such legandary jazz innovators as Dizzy Gillespie, Charlie Parker, Art Blakey, Budd Johnson and Miles Davis, the Eckstine band was a pioneering organization in which the imminent bebop revolution gestated. The band lasted only 3 years, but it would leave an indelible stamp on American music—and on Sarah Vaughan who received her training among some of the most brilliant musicians of the era.

The quality of Vaughan's own musicianship was such that her first recording experience was not as a vocalist, but as a pianist with trumpeter Gillespie and alto saxophonist Parker. Vaughan would point out that her vocal style was influenced more by horn players than by other singers. This was evident in her mastery of lyric phrasing and scat-singing and in her ability to alter a melody in subtle, unprecedented ways which bespoke a thorough harmonic understanding. Yet, the voice which conveyed this knowledge and skill was nothing short of amazing in and of itself. Sassy's was a voice of incredible range, richness and pitch. And, while they recognized her as exceptional from the very start, Vaughan's listeners were amazed and delighted to hear her smokey contralto register become steadily richer, her middle register retain its warm, lyrical tone, and her upper register remain true and pure as the years progressed. It has often been noted by aficionados of both jazz and European classical music that she possessed a voice of operatic calibre.

Notable among Vaughan's early recordings is "Lover Man," recorded with Dizzy and Bird in 1945. "It's Magic" (1947) was her first hit record and placed her squarely on the road to stardom. Other songs recorded by Vaughan include "You're Blase," "If You Could See Me Now," "I Cover the Waterfront," "Body and Soul," "Tenderly," "Everything I Have Is Yours," "I'll Remember April," "Easy Living," "I Remember Clifford," "Here's That Rainy Day," "Misty," "Perdido" and "Don't Blame Me."

During her 47-year professional career, Sarah performed and recorded with nearly every recognizable name in the world of jazz, and in a variety of musical settings and formats—from big bands and small jazz sets to philharmonics. While the small jazz set offered the most fertile setting for displaying her considerable talents, she was comfortable in any musical situation and able to keep even the largest audiences spellbound with her dynamic renditions of jazz standards and popular ballads. Vaughan received Esquire's new artist award for 1947, first place in the Down Beat

readers' poll for best female jazz vocalist from 1947–1952 and a Grammy for best vocal jazz performance, female, for "Gershwin, Live!" in 1982.

As early as 1957, it was said that Sarah Vaughan possessed "the finest voice ever applied to jazz." Few challenged the assertion then, and 33 years later it seems nearly axiomatic. For many of us who have traced her development and delighted in the vocal exploits of Sarah Vaughan over the years, the death of the Divine One marks and end of an elegant era. I ask you to join me today in celebrating the life and works of a towering figure in the world of American music. Sarah Vaughan will be sorely missed and warmly remembered by the millions whose lives she enriched through song.

BISON BASKETBALL—A TRADITION OF EXCELLENCE

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. CLEMENT. Mr. Speaker, I rise today to pay tribute to the college basketball team that won more games than any college team in America the past two seasons, and a team that proved during the decade of the 1980's to be one of the best in the history of the game. That team is the David Lipscomb University Bisons, from my hometown of Nashville, TN.

The Bisons record during the 1980's is incredible. They won 306 basketball games and lost only 63. Five times the Bisons participated in the National Association of Intercollegiate Athletics National Tournament and won the NAIA National Championship in 1985–86.

Let me begin by saluting the Bison coaching staff. Coach Don Meyer recently completed his 15th year as head coach of the Lipscomb men's basketball program. Last season the Bisons compiled a 41 to 5 record, becoming the first 4-year college program to ever win 40 or more games. Meyer was named NAIA coach of the year in 1989–90.

Under Meyer's guiding hand, the Bisons won 30 or more games five times during the past decade, capturing six conference titles, and five district titles. Nine Bison players were named All Americans, and most importantly, Coach Meyers emphasis on academics was reflected in four players being named NAIA Scholar Athletes.

The Sports Information Office at David Lipscomb, who helped provide information for this tribute, says, "Don Meyer's name will always be synonymous with the building of the David Lipscomb University basketball program. His impact has been one of gigantic proportion."

Much credit for success of the Bison program also goes to Assistant Coach Ralph Turner. In his fifth year as Meyer's assistant, Turner has been instrumental in developing the Bison basketball camp into the largest basketball camp in the country.

Meyer is also assisted by Student Assistant Coach Jason Shelton and student coaches Marty Cobb, Jon Fouss, John Martin, Ritchie Pickens, Paul Rogers, Robert Sain, and Chiffonda Washington.

And now the players.

Phillip Neil Hutcheson.

Phillip Hutcheson stands alone among NAIA basketball players. And even though the NAIA does not receive the national publicity larger colleges get, Phillip Hutcheson deserves to be mentioned in the same breath as any "big-name" college player who ever suited up for a game.

Hutcheson finished his career as college basketball's all-time leading scorer with 4,106 points. Setting an example for every player who ever follows him, Phillip managed to break just about every record which existed * * * while maintaining a perfect 4.0 grade point average. Phillip is only the third player in NAIA history to be named a four-time All American. The list of awards Phillip has gathered during his 4-year career at Lipscomb is awesome and simply too lengthy to mention.

The 1989–90 Bison season marked the close of three other brilliant careers at Lipscomb. Marcus Brodie, a 6 foot 3 inch guard from Florence, AL; Wade Tomlinson, a 6 foot 1 inch guard from Decatur, AL and Darren Henrie, a 6 foot 6 inch forward from Brentwood, TN. The four seniors ended their careers with a combined 139–16 record.

Darren Henrie was selected 1st team NAIA All Amercian, scored 3004 career points and became the NAIA career three point shooter. Henrie and Hutcheson combined for 7,110 points and 2,046 rebounds, more than any teammates to ever play college basketball.

Marcus Brodie broke NAIA National records for season and career steals.

Wade Tomlinson finished his illustrious career with over 1,700 points.

The Bison roster also included outstanding players Pete Froedden, Greg Thompson, Shannon Terry, Scott Waston, Brian Ayers, Tracey Scales, Rob Browne, Jerry Meyer, and Greg Eubanks.

Redshirt players were Mark Campbell, and Daniel Dennison, Gerald Lyle, and John Pierce.

Mr. Speaker, I ask my colleagues to join me in saluting one of the finest basketball and athletic organizations in the United States, the David Lipscomb University Bisons. This team's winning attitude, enthusiasm and focus on academics is certainly worthy of congressional recognition.

I'd like to conclude my tribute to the Bisons with the definition of a Bison basketball player. The definition, furnished by the school, could also have application as a definition for Members of Congress.

A Bison Basketball Player

A David Lipscomb University basketball player can come in any size, shape or color. There is no common denominator, except a love for the game and a desire to get the most out of his abilities. He is not only proud of his strengths, but understands his weaknesses. He is first of all concerned with the good of his team and knows that individual recognition will come through team excellence.

A David Lipscomb University basketball player has the enthusiasm of an evangelist; the discipline of a monk; the heart of a warrior; and never loses the honesty and character of a small boy.

He appreciates the support of thousands of fans, but he is much more aware of the example he is setting for some small boy watching him from the sideline. He is happy when he scores a basket, but never forgets that a teammate threw him the ball. While he never lets up at either end of the floor, the other team is not his real opponent; it is the full extent of his own potential that he is always playing against. He lets the referees, with the occasional assistance from his coach, do the officiating.

A David Lipscomb University basketball player is made and not born. He is constantly striving to reach his potential knowing that he will bypass other players who cannot withstand the strain of this quest for excellence. He realizes that the challenges and competition of today's game will better prepare him for tomorrow's world. He knows that the true measure of his performance is not recorded in wins and losses, but in how much of himself he has given to the game.

A David Lipscomb University basketball player never realizes when the odds are stacked against him. He can only be defeated by a clock that happens to run out of time. He is what a small boy wants to become and what an old man can remember with great pride that he once was.

NEW JERSEY SYMPHONY: CHOSEN AS RESIDENT ENSEMBLE FOR ADARE FESTIVAL

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GALLO. Mr. Speaker, I take great pride in announcing an historic musical event. The first annual Adare Festival in County Limerick, Ireland, will welcome conductor Hugh Wolff and the New Jersey Symphony Orchestra [NJSO] this summer, marking the first time an American symphony ensemble has been invited to become a resident ensemble in Europe.

From July 13 to 29, this artistic delegation from the State of New Jersey will perform a series of nine concerts on the grounds of Adare Manor, one of the great historic and architectural jewels of Ireland, and indeed, of all Europe.

Such an event invites the participation of exceptional artists. The NJSO will be joined by such outstanding soloists as James Galway, Julian Lloyd Webber, Barry Douglas, John O'Connor, Lucy Sheldon, Phil Coulter, Kim Kashkashian, and The Chieftains.

Visitors to Adare Manor will also see performances by the National Symphony Orchestra of Dublin, and the Radio-Television Erin Philharmonic Choir of Ireland, 150 of the finest voices to be found on the Emerald Isle.

This invitation comes as a tribute to the rich tradition of artistic expression in New Jersey. The NJSO was founded in 1928, but traces of its heritage over a century, to the creation of the Eintracht Orchestra and Singing Society of Newark in 1846. With this event, the inaugural of the Adare Festival, I am confident that the arts will continue to blossom, in both New Jersey and in Ireland.

Many people deserve praise for organizing this festival, including the hosts of this event, Mr. and Mrs. Thomas F. Kane of Summit, NJ, the honorary chairmen of this event, Gov. James Florio, and former Governors of New

Jersey: Brenden T. Byrne, William T. Cahill, Richard J. Hughes, Thomas H. Kean, Robert B. Meyner, and a committee of distinguished Americans.

Mr. Speaker, I am confident that this event will soon develop a history of its own. Thousands of Europeans and Americans gathering together to celebrate our common artistic heritage will not go unnoticed.

TAX POLICY CONCERNS DEALING WITH APPROPRIATE USE OF FUNDS

HON. BERYL ANTHONY, JR.

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. ANTHONY. Mr. Speaker, today, I introduce legislation the purpose of which is to address tax policy concerns dealing with the appropriate use of funds which are released when municipal bonds are advance refunded. The specific bond issue that gave rise to my concerns is the much-publicized Camden County Municipal Utilities Authority's 1990A Series and 1990B Series Capital Appreciation Sewer Revenue Bonds. The structure of that issue calls into question whether an unwarranted arbitrage opportunity is created when funds released by the advance refunding are invested, at approximately the same time as the refunding, in contracts which substantially guarantee a yield which is materially higher than the yield on the refunding bonds.

Before discussing the particular provisions of the legislation, let me digress for a moment. When I first began to assume a leadership role in the municipal bond area, I promised to seek relief in areas where I saw convincing proof that the tax law was inhibiting the ability of State and local governments to finance legitimate public projects. On the other hand, I said I would neither tolerate nor defend questionable industry practices. If problems arose, I promised to step forward with measured responses to stop them.

I think last year's legislative record speaks for itself. The 2-year exception to the arbitrage rebate provisions was supported by the Treasury Department and the Congress to provide State and local governments relief from the complex and overly burdensome arbitrage rebate regulations. At the same time, the "hedge bond" provision was a measured response to a type of municipal bond issue which at best promoted early issuance and which in too many cases could possibly have resulted in no public project being financed at all.

My goal in examining the financing structure in question was not to produce legislation to eliminate advance refundings or to require that State and local governments must be "broke to borrow." Advance refundings are important tools used by State and local governments to achieve legitimate interest rate savings, to restructure debt service, and to supersede existing bond covenants. But, advance refundings by their very nature require close scrutiny because they burden the market with multiple bond issues for the same project costs.

The structure that gives rise to my legislation uses capital appreciation bonds [CAB's] to advance refund an existing issue of tax-exempt bonds. The use of the CAB's creates a window whereby funds pledged for the payment of debt service on the refunded bonds are both released from the lien of the refunded bonds and rendered temporarily unnecessary to the payment of debt service on the refunding bonds. At approximately the same time as the refunding bonds are issued, the issuer enters into a forward purchase contract. Under the terms of the contract, as the released funds arise, they must be used to purchase investment property the yield on which is substantially guaranteed when the contract is made. The yield on that investment property materially exceeds the yield on the refunding bonds. By reason of the refunding, the released funds are made available for a use other than the payment of debt service on the refunded bonds or are not expected to be used to pay debt service on the refunded bonds until a later time.

It is neither the advance refunding nor the use of CAB's that raises tax policy concerns. It is the combination of those two factors coupled with the investment of the released funds in substantially guaranteed higher yielding investments as a part of the same overall transaction that resulted in my desire to examine the structure.

The financing structure which precipitated this legislation is very complex and, is not one entered into by most state and local governments or financing authorities. A complaint that I have heard in the past is that legislative responses are drafted without a full understanding of the particular transaction or practice which is in question. I am very pleased with the process which led to the development of this legislation. Before drawing conclusions, we met with bond counsel to gain a complete understanding of the transaction and their reasoning for structuring the transaction the way they did. Then all interested parties, including representatives from the Treasury Department, met to craft a legislative response. While I leave it to them to determine the propriety of prior transactions, I believe this legislation clarifies the tax policy direction for future transactions.

The general way the legislation addresses the tax policy concerns raised by the financing structure described above is to provide that such a financing will be viewed as a device under section 149(d)(4) of the Internal Revenue Code of 1986 if certain criteria are met. To meet the definition of a device for these purposes, the following three criteria must be present: (1) there must be an advance refunding, (2) the advance refunding must result in released funds, and (3) within 90 days before or after the date of issue of the refunding bonds the issuer enters into a contract for the purchase of investment property with the released funds which substantially guarantees a yield on the investment property that is materially higher than the yield on the refunding bonds. My bill is not intended to affect the tax treatment of released funds invested in an escrow for the refunded bonds. Nor is it intended to affect the tax treatment of a reserve or replacement fund for the refunding bonds to the extent it is transferred to serve as a reserve or replacement fund for the refunding bonds.

As with any legislation, there are always questions about definitions for certain terms or what is meant by the use of certain phrases. I will do my best to address as many of these questions as possible in advance. No doubt, there will be further comments and questions from practitioners, which I welcome. For purposes of this legislation, "refunded bonds" are bonds of a prior issue the principal of, or interest on, which is paid from the proceeds of a later bond issue. An example of a "contract" within the scope of the bill is what is commonly known as a guaranteed investment contract, or GIC. Determination that an investment contract provides a guaranteed yield is not precluded by any provisions of the Contract containing commercially normal exceptions to the guaranteed yield.

I believe this legislation is an even handed response to the problems which were presented by this particular type of transaction. I have tried to be receptive to complaints that I have heard that Congress frequently crafts overly broad responses to solve narrowly focused problems. The only problem with measured responses is that there are always individuals who will try to find new ways to circumvent the legislative fix. If this occurs in this particular instance—it will be at your own risk—because this legislation can be broadened at any time in the future. By attempting to find new ways around this legislation you not only put your particular transaction at risk, but also endanger the goodwill which is continuing to grow between practitioners and the Members and staffs of the tax writing committees.

THE 50TH ANNIVERSARY OF TROOP 320

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. COBLE. Mr. Speaker, for the past 50 years, Rehobeth United Methodist Church has sponsored a Boy Scout troop and Cub Scout pack. On Sunday, April 22, 1990, there will be a special ceremony to recognize this golden anniversary.

For the past 50 years, Rehobeth United Methodist Church, which is located in our congressional district, has sponsored Boy Scout Troop 320 and Cub Scout Pack 320. Hundreds of boys and young men have become Scouts thanks to the sponsorship of the church and the dedicated volunteers who have assisted with the program. As a former Boy Scout, I have great affection for those who participate in Scouting and great admiration for those who work with Scouts.

April 22 has been designated as "Scout Sunday" to honor the 50th anniversary of Troop 320. Among the highlights will be a demonstration of Scouting skills. One of the original founders of the troop, Mr. King Gregg, will be participating in the ceremony. Also scheduled to be there is Mr. Earl McGee, who was the scoutmaster from 1945 to 1951, and the current Scoutmaster Mr. Dale Showalter. There will be an Eagle Scout ceremony on the

same day for the lastest member of Troop 320 to receive Scouting's highest honor, Jeff Wise. In fact, in the 50-year history of Troop 320, there have been two dozen Eagle Scouts, quite an accomplishment for a troop of its size.

Special thanks must go to Rehobeth United Methodist Church for its long sponsorship of Troop 320 and Cub Scout Pack 320. Congratulations to Rev. Bruce Hobson, the minister of the church, and Mr. Ray Barbee, the chairman of the board of trustees, for their leadership. Also, a special note of thanks to Mr. Mark Floyd Reynolds II, for coordinating this 50th anniversary celebration.

Hundreds have benefited by belonging to Troop 320 and Pack 320 during these past five decades. This long and illustrious history would not have been possible without the assistance of the many scoutmasters and parents who gave of their time and talents to make Troop 320 and Pack 320 among the best in the country. On behalf of the people of the Sixth District of North Carolina, congratulations on your 50th anniversary. Bet wishes for many more years of successful Scouting.

FERRIS STATE UNIVERSITY ABIGAIL S. TIMME LIBRARY DEDICATION

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SCHUETTE. Mr. Speaker, I rise today to recognize Ferris State University and their commitment to quality education. On March 31, 1990, a dedication ceremony was held at the school for the renovation and naming of the Abigail S. Timme Library.

Abigail Timme, born Abigail Smith in 1890, was a most impressive woman. She graduated from Ferris Institute in 1912 in the secretarial studies curriculum and received a special recommendation from the founding father of the university, President Woodbridge N. Ferris. After graduation from Ferris Institute, Abigail worked for Burkey & Gay Furniture Co. in Grand Rapids, MI, and then went on to join the secretarial staff of Joseph Ware and Bernard Baruch in Washington, DC. In 1921 she accepted a position with Continental Casualty Co. in Chicago, one the Nation's largest insurance firms. There she met and married her husband, Ernst Timme, with she worked closely in helping design and implement many of the firm's development projects.

Although many miles separated Abigail from Ferris Institute, she continued to make contributions to Ferris Institute for its needy and worthy students. In 1977, this distinguished alumni received the honary degree of doctorate of humane letters from Ferris State College. Her generous contributions continued until her death in October 1987.

The renovation project at Ferris State University was made possible through the final gift of the Timme Trust Fund, which was adminsitrated by former President Robert Ewigleben and board trustee Dr. Clifford Larson. Ferris state University now has the ability to expand their automation system and focus on the special needs of their students to afford them a quality, long-term education.

Mr. Speaker, and my colleagues in the House, if Abigail were alive today I am positive she would be most honored by the efforts being exhibited by President Helen Popovich, the board of control, and the faculty at Ferris State University. Please join me in applauding their hard work and dedication. I wish them continued success in their endeavors.

AMERICA WEST HEADS EAST

HON. JON L. KYL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. KYL. Mr. Speaker, the Department of Transportation is currently considering a request by Arizona's home-grown airline, America West Airlines, to extend its service to Tokyo, Japan. The new service will provide Arizona and the Southwestern United States with improved access to the Pacific Basin. It will also provide major economic opportunities to the State of Arizona.

In awarding the rights, the Department must be sure that a carrier has both the capacity to provide the service and the will to actually establish the service if the authority is granted. America West is ready and willing to provide that service.

Moreover, if the rights are granted to America West, I am confident that the Department will find a very receptive business community in Arizona ready and willing to stand by the airline. In fact, in the past week and a half, the State's business leaders have flooded my office with calls and letters in support of America West's proposal.

Mr. Speaker, these rights represent a valuable asset. I urge the Department's careful consideration of America West's application.

CONGRESSMAN TOBY ROTH NOMINATED FOR HONOR FOR NAVY INVESTIGATION

HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. PETRI. Mr. Speaker, our colleagues will recall that during 1988 and 1989, Congressman TOBY ROTH conducted an investigation of a disturbing pattern of deaths among Navy personnel who were undergoing high-risk training. Congressman ROTH'S year-long investigation resulted in major safety improvements in an attempt to reduce a death rate which had reached one fatality every 8 weeks over the preceding 3-year period. Navy training is now safer as a result of TOBY ROTH'S work.

The investigation began after the death in early March 1988, of Lee Mirecki, a 19-year-old Navy trainee from Congressman ROTH'S hometown of Appleton, WI. Lee died of heart failure after having been held under water by his Navy instructors, in an exercise that is now banned under the new safety rules.

What is not generally known is that Congressman ROTH pursued his inquiry in the face of repeated attempts by high-level Navy brass to whitewash the problem, halt the inquiry, and sidetrack the reforms.

Nevertheless, Congressman ROTH would not be dissuaded, and his efforts resulted in a major GAO study of training safety, the replacement of the Navy training chief, an end to life-threatening situations, and a startling public admission by the Pentagon that the Navy had tried to mislead the Congress about these deaths.

Now, TOBY ROTH'S work on this case has earned him a nomination for the first annual Profile in Courage Award, to be given in President Kennedy's memory by the Kennedy Library Foundation. A citizen of Appleton, having followed the course of TOBY ROTH'S work on the Navy deaths, has submitted the nomination, and wrote the letter which follows to the Appleton Post-Crescent. The Milwaukee Sentinel followed up with an article about the nomination, which I am also inserting.

For those of us in the Wisconsin delegation who supported TOBY ROTH in his efforts, and for those of us in the House who recognize that his is a contribution to improving our military and strengthening Congress' commitment to obtaining the truth for the American people, I salute TOBY ROTH for his work work.

[From the Appleton (WI) Post-Crescent, Apr. 14, 1990]

ROTH CITED FOR ROLE IN MIRECKI INVESTIGATION

Editor, The Post-Crescent:

The Feb. 25 edition of Parade magazine featured an article on the late President John F. Kennedy and his two, now grown, children. Caroline and John F. Kennedy Jr. plan to commemorate their father on May 29, the president's birthday, by announcing the first recipient(s) of the John F. Kennedy Profile in Courage Award.

This award will be given to an American elected public official who has displayed exceptional political courage at great personal risk. The award will be $25,000, to be shared if there is more than one winner. A 12-member committee will make the final decision.

I nominated Toby Roth, our member of Congress for the Eighth District of Wisconsin. Mr. Roth clearly demonstrated excellence as our public official when he pressured, persisted and pursued a full investigation regarding the death of the naval recruit, Lee Mirecki. After talking with representatives from the Toby Roth office, I learned of the great personal and professional risks Mr. Roth was faced with. My letter and supporting information have been submitted to the nomination committee.

Additional support from your readers would greatly improve our chances of Toby Roth receiving the award. He deserves the recognition and knowing his constituents support his efforts. I ask your readers to please send a note or letter acknowledging Toby Roth as the likely candidate to receive this year's Profile in Courage Award to:

Profile in Courage Award Committee, John F. Kennedy Library Foundation, P.O. Box 436, Boston, Mass. 02103.

MAGGIE O'NEIL,
Appleton.

[From the Milwaukee Sentinel, Apr. 18, 1990]

ROTH RECEIVES NOMINATION FOR PROFILE IN COURAGE AWARD

WASHINGTON, DC.—More than 5,000 public officials—including Rep. Toby Roth (R-Wis.)—have been nominated for the first Profile in Courage award to be presented May 29, on the birthday of the late President John F. Kennedy, the director of the competition said Tuesday.

A number of Appleton residents have nominated Roth for his role in investigating the death of Lee Mirecki of Appleton, who died March 2, 1988, during rescue drill training at the Pensacola Naval Air Station.

The winner of the $25,000 award will be selected by a 12-member committee working with the John F. Kennedy Library Foundation in Boston, said Erica Stern, director of the competition.

Roth said if he won, he would donate the $25,000 to a charity in Mirecki's name.

"We received 5,000 pieces of mail in a two-week period," Stern said.

"It was gratifying to receive so many submissions from the people of this country at a time when it is widely believed that they are cynical about public service."

Many of the nominees, were local officials who are unknown outside their communities, she said. Some of the submissions ran to 100 pages.

Roth's nomination was made public in letters to the editor from residents of Appleton. The foundation has not released the names of nominees, but Stern said they have come from every state.

After Mirecki died, Roth disputed the Navy's account of the incident and sought investigations by the General Accounting Office and the Defense Department.

The House Armed Services Committee also pressed the case, and Congress adopted a Roth amendment to the 1989 defense spending bill that forced the Navy to admit the original account was misleading and to change training procedures.

DIAMOND JUBILEE OF THE NATIONAL ORANGE SHOW

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. BROWN of California. Mr. Speaker, this year marks the 75th anniversary of the National Orange Show, held in my congressional district in San Bernardino. For its Diamond Jubilee, the Orange Show has chosen "It's Our 75th Time Around" as its theme. As in past years, the Orange Show will include something for everyone: Fun zones, livestock shows, stadium events, and top-name entertainment.

The National Orange Show has played an interesting role in the Inland Empire. In 1911, in San Bernardino County, a profitable 5-acre orange grove could be purchased for about $300 down and $25 a month. The citrus industry was booming. To promote locally grown citrus products, a group of businessmen staged the first Orange Show on March 6–11, 1911, beneath a tent at the corner of Fourth and E Streets. The show included fruitstands, game booths, juggling clowns, agricultural assemblies, and music by the Bell Concert Orchestra. The first Orange Show was a success, planting the seeds for a wonderful annual tradition. Year after year the show grew bigger, attracting more visitors and more citrus exhibitors from across the country.

In 1992, the National Orange Show was established as a nonprofit organization. The following year it moved to its current location at the corner of Mill and E Streets, and the show's board of directors started making plans for permanent facilities. Except for a 5-year hiatus during World War II, the National Orange Show continued to grow, and is now the biggest annual event in the Inland Empire. I ask my colleagues to join me in saluting the National Orange Show on its Diamond Jubilee, which will be held for 11 days this month, from April 19 to 29.

MALCOLM G. WRIGHT

HON. MEL HANCOCK

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. HANCOCK. Mr. Speaker, this past week, our Nation lost a fine individual and I lost a personal friend of many years, Malcolm G. Wright of Springfield, MO.

Malcolm was a stalwart defender of the principles under which this Nation was founded. As such, he was always ready to enter the arena when individual initiative, integrity, and hard work were needed to move forward a civic or even a political project.

His friends and acquaintances mourn his loss. To his family, we extend our deepest sympathy.

WASTEFUL SPENDING

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. LEWIS of Florida. Mr. Speaker, I rise today to address the issue of H.R. 4404, the supplemental appropriations bill which the House considered on April 3, 1990.

As my colleagues are aware, I take my responsibilities with regard to the Federal budget deficit and wasteful spending very seriously. I believe the Federal Government should not be allowed to continue with these runaway spending programs. The Federal deficit must be brought under control and the budget process reformed.

For these reasons, I could not in good conscience support this supplemental appropriations bill.

In addition, many of the expenditures in this emergency bill were not emergencies at all. While I support many of the initiatives funded in this bill, I firmly believe they should be funded honestly during the normal appropriations process.

Mr. Speaker, I strongly favor many of the programs in H.R. 4404, however, I could not vote for a bill which I felt was too short term and was not fiscally responsible.

REGARDING THE 5TH ANNIVERSARY OF INDEPENDENCE DOGS, INC.

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. SCHULZE. Mr. Speaker, Independence Dogs, Inc. of Chadds Ford, PA, will be celebrating its fifth anniversary on April 29. This is particularly significant because this organization truly embodies the charitable concept of public service.

Volunteers at Independence Dogs train canines to assist mobility-impaired individuals in all areas of living. These dogs allow our handicapped citizens the opportunity to negate any physical deficiency holding them back from leading an otherwise normal life.

I congratulate Independence Dogs on 5 successful years, and wish the continued success of its important work. Indeed, Chadds Ford certainly has a special point of light shining its good work throughout the region.

HONORING LT. COMDR. SHAW H. COHE, U.S. NAVY

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MAVROULES. Mr. Speaker, I rise today to recognize and honor the outstanding efforts of Lt. Comdr. Shaw H. Cohe, U.S. Navy, as the Congressional Liaison Officer for Acquisition and Contracts with Congress.

Shaw was chosen for this demanding and important assignment based on his outstanding record as a naval officer and acquisition professional. He is a graduate of the U.S. Naval Academy, the Naval War College, and the Navy's Acquisition Contracting Officer Development Program. He holds a master of business administration degree from George Washington University. In addition to his afloat service deployed overseas as a fully qualified Surface Warfare Supply Corps Officer on the U.S.S. *Wichita* (AOR–1) and the U.S.S. *Hull* (DD 945), Lieutenant Commander Cohe served in acquisition and contracting officer assignment at the Naval Air Systems Command, the Office of Naval Research/Naval Research Laboratory in Washington, DC and overseas at the Naval Supply Depot, Guam.

Lieutenant Commander Cohe has drawn on this extensive experience to be of great assistance in supporting the Committee on Armed Service Acquisition Policy Panel and more recently the Investigations Subcommittee with regard to numerous hearings, issues, and congressional factfinding missions. He has also been of great service to me and many in this body by assisting and advising our staffs and constituents in the most effective and proper means of conducting business with the Navy. Of particular note is Lieutenant Commander Cohe's program of congressionally sponsored procurement seminars which have been conducted on behalf of approxi-

mately 100 members of this body and have benefited tens of thousands of constituents.

It has come to my attention that Lieutenant Commander Cohe will soon assume duties as the Military Assistant to the Principal Deputy Under Secretary of Defense for Acquisition. I have no doubt Lieutenant Commander Cohe will continue his superlative work in his new assignment. A man of Lieutenant Commander Cohe's talent and dedication is rare indeed and it gives me great pleasure today to recognize him before my colleagues.

TRIBUTE TO MARK DAVID BECK

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GEKAS. Mr. Speaker, I ask my colleagues to join me in recognizing a young man from the 17th Congressional District of Pennsylvania who has fulfilled the requirements of Eagle Rank of the Boy Scouts of America.

Mark David Beck, of Sunbury, will be presented with this honor on April 22. He is deserving of it. Mark holds a 4.0 academic average, plays on the basketball team, and is active in school and church activities.

A Boy Scout since 1986, he has been an assistant patrol leader, patrol leader, scribe, assistant patrol leader, and is currently a senior patrol leader. He was recently inducted into the Order of the Arrow.

His Eagle service project consisted of refurbishing and repainting the playground equipment of the Kenneth L. Bingaman Memorial at the United Lutheran Church of Sunbury. This project will benefit children and area residents for years to come.

Mr. Speaker, as Members of Congress, we have seen what Scouting means in the lives of young men. We know it is more than learning how to build a campfire or tie a knot. Scouting means a love of the outdoors and appreciation of our environment; it teaches the spirit of serving others and self-respect. It teaches lessons that last a lifetime.

I am very proud that Mark Beck has worked so hard to attain this goal. His efforts are a fine reflection on America's youth.

LAWRENCE (MA) EAGLE-TRIBUNE CELEBRATES 100TH ANNIVERSARY

HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. ATKINS. Mr. Speaker, it is with honor that I rise today to pay honor to the Lawrence Eagle-Tribune newspaper on the celebration of their 100th anniverary.

The Lawrence Evening Tribune, forerunner of the present daily newspaper, debuted on April 12, 1890 and merged with the Lawrence Daily Eagle 69 years later. For the past 92 years, this local daily newspaper has been owned and operated by the Rogers family in the finest tradition of the fourth estate.

The Eagle-Tribune's commitment to excellence in the coverage of local. State, and national issues has made a significant contribution to the fulfilment of the democratic ideal of an educated and informed public. The city of Lawrence and the Merrimack Valley are the richer for the Trib's presence. And in 1988 the paper received well-deserved national recognition and distinction when it was awarded the Pulitzer Prize for General News Reporting.

I salute all of the employees and owners of the Trib whose century of dedicated service has so clearly contributed to the betterment of the Merrimack Valley. It is my great pleasure to congratulate the Lawrence Eagle-Tribune on its 100th anniversary and to wish it continued success in the next century.

TRIBUTE TO ST. STEPHEN'S CHURCH, JOHNSTOWN, PA

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MURTHA. Mr. Speaker, I would like to recognize the congregation of St. Stephen's Church of Johnstown, PA, which will be celebrating its 100th anniversary on October 2, 1991.

Many Eastern Europeans were among the immigrants to the Johnstown area in the late nineteenth and early twentieth centuries, searching for new jobs and the unlimited opportunities that the United States had to offer. These new immigrants worked in the steelmills and coal mines, which formed the backbone of the rapid industrial development taking place in western Pennsylvania. They also brought their faith with them from their old homes, a faith which led to the founding of St. Stephen's Parish.

Johnstown has suffered through three disastrous floods in its history. Its houses of worship have been very important in beginning the healing process for the citizens of Johnstown after these tragic events. St. Stephen's, which itself was seriously damaged in the floods of 1936 and 1977, has been a rallying point for the community in these times of crisis, and has been one of the leaders in the rebuilding process which has shown the spirit of the city.

I would like to congratulate the parishioners of St. Stephen's on this upcoming anniversary. St. Stephen's has been an important part of the Johnstown community for the past century, and I wish all those involved with St. Stephen's well during the next 100 years of service to the people of Johnstown.

EXPANSION OF DAUPHIN COUNTY LIBRARY SYSTEM

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. GEKAS. Mr. Speaker, I ask my colleagues to join with me in recognizing an exciting effort underway in my congressional district in Pennsylvania. The Dauphin County Library System is expanding two of its branches, enabling the libraries to serve more central Pennsylvania residents even better.

The importance of providing additional library space and more books is far reaching. America is quickly becoming a nation of television watchers rather than a nation of thoughtful, well-read citizens. But even more disturbing than this, we are forced to face the reality that too many people in this country cannot read directions on a map or instructions on a medicine bottle.

The good news is that as the campaign for literacy becomes more visible, people are not afraid or ashamed to admit that they cannot read. The result will be an increased willingness to seek help and assistance. The good news is also that recent studies show teenagers are reading more newspapers, magazines, and books.

However, we must work to ingrain in our children a love of reading, of knowledge, and of learning. From their earliest years we must expose them to the books containing that knowledge.

I am proud that the Dauphin County Library System will now help accomplish this vital goal.

CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWS

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mrs. BOXER. Mr. Speaker, I would like to again commend my colleagues Congressman KOSTMAYER and Congressman JOHN MILLER for organizing this very important annual commemoration, and for their continued vigilance on behalf of those seeking to emigrate from the Soviet Union.

Additionally, I would also like to take this opportunity to thank the Bay Area Council for Soviet Jews for their tireless work on behalf of Soviet Jewry, and in particular, for their deep commitment to the reunification of families arbitrarily separated by the Soviet Government.

Despite President Gorbachev's policies of perestroika and glasnost, freedom continues to remain elusive for many Soviet Jews. Soviet Jewish emigration to Israel has been set back this year by protest from the Arab community which contributed to the breakdown of negotiations between the two countries for direct air flights, and led to a brief hiatus in flights from Budapest to Israel—the only exit route now open.

For those who wish to emigrate to the United States, the picture is no rosier. Once again, the number of Soviet Jews wishing to enter the United States far outnumbers the number of visas available. And, since this year's visas have been especially earmarked for the hundreds of Soviet Jews still stranded in Italy, the long waiting lines for exit visas in Moscow have only become worse.

At a time of growing anti-Semitism and increased threats of programs by the Soviet ultranationalist organization Pamyat, it is increasingly important that we rededicate our-

selves to the cause of freeing Soviet Jews. As part of that effort, I would like to bring the case of Joseph and Alla Roginsky to the House's attention.

Joseph Roginsky, his wife Alla, and daughter Janna, are residents of Leningrad. They first applied to emigrate in May of 1989 but were refused only 3 months later by the Soviet Government for reasons of regime consideration.

This arbitrary decison by the Soviet government now separates Joseph and Alla Roginsky from the rest of their family, all of whom now reside in the United States.

The Roginsky family has not given up hope. In January, they again applied for an exit visa. Now is the time for us to act to help reunite this family. Please join me in appealing to the Soviet Government for a prompt and positive response to the Roginsky's application.

Additionally, let us not forget the hundreds of other Soviet Jews now stranded in the Soviet Union with no way out. Jews all across the world have just finished observing Passover, a holiday celebrating freedom and liberation from bondage in Egypt. We can not rest until all those who remain trapped in the Soviet Union are given permission to leave of their own free will.

A HOLE-IN-ONE

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. McDADE. Mr. Speaker, on Saturday, April 7, while golfing fans across America were gripped with anticipation over Jack Nicklaus' chances to become the oldest player ever to win the Masters, Michael J. Russen, the son of my good friend and district office administrator Michael S. Russen, had a golden golfing moment of his own; a true thrill of a lifetime.

It took place at the Skyline Golf Course in northeastern Pennsylvania; known locally as one difficult course. A cool wind was blowing from left to right at about 12 miles per hour as he approached the tee of the tough, 185-yard par 3, sixth hole.

Mike looked long and thoughtfully at the pin flag flapping in the wind nearly 200 yards away and reaching into his bag, carefully selected a six iron. He stepped up to tee, and in textbook form, gave the ball a mighty whack. It sailed through the crisp air in a matter of seconds, like a missile heading toward its target, drawing ever closer to the faraway green. As it begin to drift toward earth, he could see it was going to land right on the green itself. And as he watched with pierced eyes, the little ball landed with a slight thump, rolled with determination toward the pin flag, and bounced against the pole before falling into the cup. The true hole-in-one! Congratulations Mike!

For Mike, and all of the weekend warriors who take to the links in pursuit of their dreams and aspirations and "a few moments in the pros," I would like to extend hearty best wishes, personal regards, and Godspeed.

THE MONTROSE HISTORICAL AND TELEPHONE PIONEER MUSEUM

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. TRAXLER. Mr. Speaker, I rise today to pay tribute to the opening of the Montrose Historical and Telephone Pioneer Museum which is scheduled to open on May 6, 1990. As the grand opening nears, the Montrose Area Historical Association is putting the finishing touches on this unique museum, which will be one of only five museums in the United States dedicating a significant portion of its display to the history of the telephone.

The Montrose Historical and Telephone Pioneer Museum will display artifacts and historical information about the development of the telephone. I am so very pleased that this museum will be opening in my congressional district, and I would like to publicly congratulate all of those people who have worked so hard on this important project.

EXTENSION OF THE INTEREST EQUALIZATION PROGRAM

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. FAUNTROY. Mr. Speaker, on Tuesday, April 3, 1990, I introduced a bill (H.R. 4447) that would make what is known as the Interest Equalization Program mandatory and extend it for one more year.

During the past decade, the direct lending authority of the Export-Import Bank of the United States—Eximbank—has been reduced by 90.7 percent. It was $5.4 billion in 1981, while today the administration has proposed only $500 million for 1991.

Unfortunately, during the past several years, the funding level has been inadequate and the demand for official export credits has exceeded supply. Consequently, Eximbank has been severely restricted from effectively carrying out its mandate to combat subsidized export financing offered by our foreign trade competitors.

In response, last year, we passed legislation authorizing Eximbank to implement a pilot program known as the Interest Equalization Program [IEP]. The program was an effort to leverage limited resources for the direct lending program by as much as 10 times.

Eximbank would apply resources from the IEP to "buy down" the interest rate on a commercial bank loan backed with an Eximbank guarantee of repayment from the commercial rate to the official OECD export credit rate. In this way, the IEP would be the equivalent of the direct loan program in terms of the interest rate, but will use a lesser amount of budgetary resources.

It was hoped that in addition to leveraging resources to assist our exporters to compete, such a program would encourage commercial banks to stay in the export finance business by offering reasonable assurance of repayment and sufficient return on their export loans. U.S. commercial banks have been retreating from export financing, and there have been no significant signs of their return.

We, in Congress, trusted the administration and provided them with discretionary authority to set up this alternative means of addressing the increasing demand for direct loans. Unfortunately, the administration did not choose to utilize the opportunity to establish a pilot program for 1990 and 1991. The refusal to initiate a pilot IEP is in direct conflict with congressional intent. The Office of Management and Budget [OMB] in my view, is being penny-wise and pound-foolish to kill the IEP before giving it a chance to work.

We made clear in the legislation that this was to be a pilot program which would sunset in 2 years in the absence of further legislation. Because the difference between the official OECD export credit rate is close to the commercial rates, the time is opportune to try out the IEP to address the needs of our exporters in competing with officially subsidized export credits overseas.

Perhaps OMB or others in the administration have better ideas for meeting the competitive financing needs of U.S. exporters. If so, my door is always open. Until I see Mr. Darman's shadow in my doorway, however, not only am I introducing this bill to make the program mandatory, but as chairman of the subcommittee with oversight jurisdiction of Eximbank, I have all the intentions of making sure the bill passes this year.

I request my colleagues to support this bill.

H.R. ——

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENTS TO INTEREST SUBSIDY PROGRAM.

(a) REQUIREMENT TO EXPEND ALL AMOUNTS APPROPRIATED FOR PROGRAM.—Section 2(f)(1)) is of the Export-Import Bank Act of 1945 (12 U.S.C. 635(f)(1)) is amended by striking "may enter" and all that follows through "appropriate" and inserting "shall use all amounts appropriated to carry out this subsection to make commitments to commercial lending institutions and other lenders".

(b) EXTENSION OF PROGRAM THROUGH THE END OF FISCAL YEAR 1992.—Section 2(f)(4) of such Act (12 U.S.C. 635(f)(4)) is amended by strking "1991" and inserting "1992".

(c) LIMITATION ON AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1992.—Section 2(f)(3) of such Act (12 U.S.C. 635(f)(3)) is amended—

(1) in subparagraph (A), by striking "and";

(2) in subparagraph (B), by striking the period and inserting "; and"; and

(3) in adding at the end the following:

"(C) $35,000,000, for fiscal year 1992.".

COL. FREDERICK L. SCHUSTER WILL RETIRE FROM AIR FORCE

HON. MICHAEL DeWINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. DEWINE. Mr. Speaker, on May 1 of this year my constituent, Col. Frederick L. Schuster, will retire from the Air Force. Over the last 30 years, the U.S. Air Force has benefited from the faithful and dedicated service of Colonel Schuster. Colonel Schuster received his commission in 1959 and served on active duty until 1969 when he accepted a commission in the Air Force Reserves. While on active duty, he served as a material officer at several locations prior to going to pilot training and earning his wings in 1965. From then until his separation from the active force in 1969, he served as a T-37 instructor pilot and functional check pilot. In 1969, Colonel Schuster began a 13-year stint as a C-141 aircraft commander and senior flight commander. He assumed command of an associate reserve military airlift squadron at Norton Air Force Base, CA, in 1982, and served in that capacity until 1985, where he accepted a position as individual mobilization augmentee assistant to the director of material management at Hill Air Force Base, UT. He assumed his present position as individual mobilization augmentee assistant to the commander, Logistics Operations Center, Air Force Logistics Command, WPAFB, OH, in 1988. Throughout his career, Colonel Schuster has distinguished himself as a stalwart professional who served his country with pride and honor.

THANKS TO ORVILLE MORAN

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. PENNY. Mr. Speaker, earlier this year it was my privilege to have Orville Moran of Austin, MN, work in my Washington office. During that time, Orville assisted me and my staff with various legislative projects and committee hearings.

An instructor of English at Austin Community College, Austin, MN, for over 20 years, Orville has demonstrated a commitment to education and his community that is rare. Orville Moran is a model citizen. During his stay in Washington, Orville spent much of his time researching new teaching techniques for use in his classroom. Austin Community College is lucky to have a person of Orville Moran's ability and commitment, Mr. Speaker.

My very best wishes and sincere thanks go out to Orville Moran and his wife Jeane.

A TRIBUTE TO DENISE BARON

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Denise Baron, of Pawtucket, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Denise and her classmates were able to achieve excellence. Denise and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Denise Baron and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Denise and her classmates good luck in the national competition.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, April 19, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 20

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to continue consideration of proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:30 a.m.
Armed Services
Readiness, Sustainability and Support Subcommittee
To continue hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense and to prescribe military personnel levels for fiscal year 1991.
SR-222

Energy and Natural Resources
To hold hearings on the nomination of Thomas L. Sansonetti, of Wyoming, to be Solicitor, Department of the Interior.
SD-366

Governmental Affairs
Federal Services, Post Office, and Civil Service Subcommittee
To hold hearings on federal employee's health benefits programs.
SD-342

Judiciary
To hold hearings on S.J. Res. 280, approving the findings of the Comptroller General of the United States contained in the GAO report, dated March 29, 1990, regarding employer sanctions, and S. 2446, to improve the employment verification system under the Immigration and Nationality Act.
SD-226

Small Business
Innovation, Technology and Productivity Subcommittee
To hold hearings to examine the barriers to the sale of U.S. automobile parts to Japanese automobile companies located in the United States and abroad.
SR-428A

Joint Economic
Technology and National Security Subcommittee
To hold hearings to examine the Soviet and East European economies.
SD-562

10:00 a.m.
Banking, Housing, and Urban Affairs
HUD/Moderate Rehabilitation Subcommittee
To hold hearings on the Department of Housing and Urban Development's (HUD's) staffing and organizational capacity.
SD-538

Labor and Human Resources
To hold hearings on S. 2056, to revise provisions of the Public Health Service Act to provide grants to States and to implement state health objective plans.
SD-430

APRIL 23

9:30 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agri-

cultural programs, focusing on the cost of production.
SH-216

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings to review export promotion and economic competitiveness.
SD-538

10:30 a.m.
Governmental Affairs
General Services, Federalism, and the District of Columbia Subcommittee
To hold hearings on proposed legislation authorizing funds for the Washington Metropolitan Transit Authority.
SD-342

1:30 p.m.
Banking, Housing, and Urban Affairs
HUD/Moderate Rehabilitation Subcommittee
To hold oversight hearings on management activities of the Department of Housing and Urban Development.
SD-538

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Forest Service of the Department of Agriculture.
SD-192

APRIL 24

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to resume consideration of proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:30 a.m.
Armed Services
Defense Industry and Technology Subcommittee
To resume hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense and to prescribe military personnel levels for fiscal year 1991, focusing on implementation of the Defense Management Report.
SH-216

Environment and Public Works
Business meeting, on pending calendar business.
SD-406

Select on Indian Affairs
To hold hearings on S. 1289, to improve the management of forests and woodlands and the production of forest resources on Indian lands.
SR-485

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Defense, focusing on the National Guard and Reserves.
SD-192

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Transportation Safety Board and the Federal Highway Administration.
SD-138

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's superconducting super collider program.
SD-366

Finance
To hold hearings on the changing trade relations between the United States and the Soviet Union.
SD-215

Labor and Human Resources
To hold hearings to examine the role of treatment and prevention in the national drug strategy.
SD-430

10:30 a.m.
Banking, Housing, and Urban Affairs
To resume hearings on proposed legislation to modernize the legal and regulatory structure of the financial services industry to increase competitiveness of U.S. institutions.
SD-538

11:00 a.m.
Environment and Public Works
To hold hearings on S. 2371, authorizing a National Academy of Sciences study of an environmental research institute, and S. 2176, to provide better enforcement of the environmental laws of the United States.
SD-406

2:00 p.m.
Labor and Human Resources
To hold hearings to examine the future of schools of public health.
SD-430

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

2:30 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance, focusing on refugee programs.
SD-138

APRIL 25

9:00 a.m.
Labor and Human Resources
Business meeting, to consider S. 722, Food Safety Amendments, S. 1425, Nutrition Labeling and Education Act, S. 436, Employee Health and Safety Whistleblower Protection Act, and other pending calendar business.
SD-430

9:30 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings to review FHA mortgage ceilings.
SD-538

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on the National Science Foundation and the upcoming scientific manpower crisis.
SR-253

Governmental Affairs
To hold oversight hearings on the operation of the Inspectors General's offices.
SD-342

10:00 a.m.
Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of the Attorney General.
S-146, Capitol

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Services Administration.
SD-116

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

10:30 a.m.
Finance
To hold hearings on U.S.-Japan trade negotiations, focusing on the Structural Impediments Initiative (SII) and Super 301 trade cases.
SD-215

2:00 p.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 1981, to permit the Bell Telephone Companies to conduct research on, design, and manufacture telecommunications equipment.
SR-253

Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 370, to establish the American Heritage Trust to provide funding for the preservation of America's natural, historical, cultural, and outdoor recreational heritage.
SD-366

2:30 p.m.
Agriculture, Nutrition, and Forestry
To hold hearings to examine the jurisdiction between the Commodity Futures Trading Commission and the Securities Exchange Commission.
SR-332

APRIL 26

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to resume consideration of proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Transportation Safety Board.
SR-253

9:30 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Aeronautics and Space Administration.
S-126, Capitol

10:00 a.m.
Appropriations
Defense Subcommittee
To hold closed hearings on proposed budget estimates for fiscal year 1991 for defense intelligence programs.
S-407, Capitol

Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of State.
S-146, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Accounting Office.
SD-138

Banking, Housing, and Urban Affairs
To resume hearings on proposed legislation to modernize the legal and regulatory structure of the financial services industry to increase competitiveness of U.S. institutions.
SD-538

Finance
To hold hearings on proposed legislation regarding economic implications of changes in Puerto Rico's political status, including S. 712, Puerto Rico Status Referendum Act.
SD-215

2:00 p.m.
Energy and Natural Resources
To resume oversight hearings on the Department of Energy's Decision Plan relating to the opening of the Waste Isolation Pilot Plant (WIPP) in Carlsbad, New Mexico, and on proposed legislation to withdraw the public lands surrounding the WIPP site.
SD-366

Environment and Public Works
Toxic Substances, Environmental Oversight, Research and Development Subcommittee
To hold hearings on proposed legislation authorizing funds for the Asbestos School Hazard Abatement Act and to review the implementation of the Asbestos Hazard Emergency Response Act and scientific questions surrounding asbestos exposure.
SD-406

Governmental Affairs
Oversight of Government Management Subcommittee
To hold hearings on S. 1957, to provide for the efficient and cost effective acquisition of nondevelopmental items for federal agencies.
SD-342

2:30 p.m.
Armed Services
Strategic Forces and Nuclear Deterrence Subcommittee
To resume hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense and to prescribe military personnel levels for fiscal year 1991, focusing on ICBM modernization.
SR-222

3:15 p.m.
Armed Services
To hold hearings on a report from Secretary of Defense Cheney on the results of the major aircraft review by the Department of Defense.
SR-253

APRIL 27

8:30 a.m.
Agriculture, Nutrition, and Forestry Business meeting, to continue consideration of proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1991 for the Federal Aviation Administration.
SR-253

10:00 a.m.
Banking, Housing, and Urban Affairs
HUD/Moderate Rehabilitation Subcommittee
To hold oversight hearings to review low-income tax credits.
SD-538

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Foundation on the Arts and Humanities, focusing on the National Endowment for the Arts.
SD-430

APRIL 30

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for fossil energy and clean coal technology programs of the Department of Energy.
S-128, Capitol

Select on Indian Affairs
To hold oversight hearings on provisions of S. 1203, to provide tax incentives for businesses on Indian reservations, and S. 1650, to allow an Indian employment opportunity credit for qualified employment expenses of eligible employers on Indian reservations; to be followed by a business meeting to mark-up S. 143, to establish the Indian Development Finance Corporation to provide development capital for Indian businesses.
SR-485

MAY 1

9:30 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's uranium enrichment program.
SD-366

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance.
SD-138

Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Supreme Court of the United States, the Judiciary, and the Federal Trade Commission.

To hold oversight hearings on the Indian Federal acknowledgement process, including S. 611 and S. 912, bills to establish administrative procedures to determine the status of certain Indian groups.
SR-485

HOUSE OF REPRESENTATIVES—*April 19, 1990*

The House met at 11 a.m.

The Reverend James Trusel, Bridgewater United Methodist Church, Bridgewater, PA, offered the following prayer:

Almighty God, we come before You in gratitude this morning—grateful for this new day and the challenge it brings, grateful for this great land of ours—filled each day with new life and new opportunities—grateful for the peace and freedom we enjoy; grateful for the high privilege of serving our fellow man in our individual and collective capacities.

As we face this new day and the challenges it presents, we acknowledge our need of divine guidance. There will be decisions facing each person, decisions that will affect the lives of a multitude of persons—decisons that won't come easily. And so, Father, we pray for wisdom and courage and guidance for each Member of this body—that the right decision might be made, this day and always. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Michigan [Mr. WOLPE] please come forward and lead the House in the Pledge of Allegiance.

Mr. WOLPE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

REV. JAMES TRUSEL

(Mr. KOLTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLTER. Mr. Speaker, it is with particular pride and privilege that I rise this morning to honor Rev. James A. Trusel, pastor of the Bridgewater United Methodist Church in Bridgewater, PA, located in my congressional district. Reverend Trusel has offered the opening prayer for today's legislative session.

Reverend Trusel began his ministry in 1963, when he was appointed to St. John United Methodist Church near Slippery Rock, PA. He subsequently served as pastor at the West Liberty United Methodist Church for 17 years. For the last 10 years, he has served as pastor at the Bridgewater Church.

Reverend Trusel has served his community with distinction. In addition to his formidable responsibilities as pastor, he has somehow found the time to be a leader in a variety of local civic activities, including his service as trustee for the Beaver Area School District education foundation, and as director of the Bridgewater Community Development Corporation.

I take pleasure in joining with Reverend Trusel's family—his wife, Pat, as well as his sons and grandchildren—in congratulating him on this exceptionally distinguished moment.

PERMISSION FOR MEMBER TO SIGN AND SUBMIT REQUESTS TO ADD NAMES TO LIST OF COSPONSORS ON H.R. 2273

Mr. HOYER. Mr. Speaker, I ask unanimous consent that I may be authorized to sign and submit requests to add the names of the following Members to the list of cosponsors on H.R. 2273: Mr. CRAIG WASHINGTON, Mr. CHARLES HATCHER, Mr. JOHN PAUL HAMMERSCHMIDT, and Mr. CHRIS SMITH of New Jersey.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

THE SPIRIT OF EARTH DAY IS IN EARTH, TX

(Mr. COMBEST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COMBEST. Mr. Speaker, there is a community in my congressional district named Earth, TX. I rise today to note that the people of Earth, TX are celebrating a special Earth Day. In Earth, sharing a day named after your town is cause for celebration. Now, while those of us in Texas may at times be accused of exaggerated claims, the folks in Earth, TX do not claim originality for Earth Day, but they are glad to share a good idea.

These people depend on good water and fresh air to grow their crops and raise their children. To them, the popular phrase, "the environment" has always been known simply as "the land."

There are still places where the skies are a deep blue, and where the tans and greens of the landscape promise a rich harvest. Earth Day reminds us of the realistic challenges of protecting our planet. Yet, we must also offer our children and ourselves the realistic hope of places like Earth, TX.

Today, they give our Nation a special, hello from Earth.

COMMEMORATION OF 20TH ANNIVERSARY OF EARTH DAY

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, in commemoration of the 20th anniversary of Earth Day this week Americans around the country are speaking out and participating in activities to help protect our world's fragile environment.

This week is also the time that President Bush is hosting an international conference on global warming, a conference he promised to convene during the 1988 campaign when he pledged to counter the greenhouse effect with the White House effect. Ironically, however, instead of calling for action to counteract the greenhouse effect, President Bush in his opening speech on Tuesday questioned whether there is indeed enough factual information to conclude that global climate change merits preventative action now.

Scientists may not agree on the speed with which global warming is occurring, but there is virtually no disagreement on the direction of global change. Moreover, many scientists have warned that global temperatures could rise 4 to 9 degrees by the middle of the next century if we do not take action now to stop the accumulation of the greenhouse gases.

I submit to the President that while there may be some factual uncertainty, this uncertainty does not necessarily mean that the situation is not as bad as we fear; it could just as easily prove to be worse than we could possibly imagine.

If there is some factual uncertainty about the extent of global climate change, would it not be wiser to err on the side of safety? Mr. President, the world is looking to the United States for leadership on this vital question. It is not a time for timidity, it is a time for action.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

NATIONAL "CANS-TO-CONGRESS" MAIL CAMPAIGN

(Mr. HENRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENRY. Mr. Speaker, earlier this week supporters of H.R. 586, the national bottle bill, launched a national cans to Congress, writing and mail campaign. Many Members will be receiving used beverage containers urging support of this legislation.

I would simply like to indicate to Members that we have made arrangements to have the containers picked up and a call to my office will arrange that and they will be delivered to a responsible recycling source.

Mr. Speaker, I would also like to indicate a most bizarre and unusual argument now being made in opposition to this legislation. That is, because of the value of the potentially recyclable glass, plastic and aluminum, that we should not recycle it through the deposit mechanism because it will undermine the cost recovery of broader recycling. It is as if St. Paul's question, "Shall we sin all the more so that grace may abound?", is answered in the affirmative. I certainly question that logic and would warn Members that they not fall prey to it.

COMMEMORATING EARTH DAY

(Mr. GEPHARDT asked and was given permission to address the House for 1 minute.)

Mr. GEPHARDT. Mr. Speaker, our Earth Day celebrations enable us to fulfill the biblical instruction to "Hurt not the Earth, neither the sea, nor the trees." But they can also realize a secular purpose as well.

Earth Day helps us hold politicians accountable for the sweet-sounding environmental promises they make at campaign time.

Many of us were amazed as our President, an ally of James Watt, said he wanted to be known as the "environmental President." We gave him the benefit of the doubt, and welcomed him to the environmental movement.

But now it's time to compare candidate Bush's promises with the reality of President Bush's performance.

Candidate Bush promised environmental cleanup but President Bush has delivered environmental coverup.

Candidate Bush promised "no net loss" of wetlands, while President Bush has watered down that commitment.

Candidate Bush promised action on global warming, but President Bush says we need more study.

Candidate Bush railed righteously against the pollution of Boston Harbor, but President Bush eliminated the funding to clean up Boston Harbor in his budget.

Perhaps in addition to Earth Day we need two more celebrations each year.

On June 21 we can celebrate Presidential Promises Day—because that's the longest day of the year.

And on December 22 we can commemorate Presidential Performance Day—because that's the shortest day of the year.

In reality, we must celebrate Earth Day every day because our commitment to a clean environment must survive perishable campaign promises.

□ 1110

INTRODUCTION OF THE NEWSPAPER RECYCLING INCENTIVES ACT OF 1990

(Mr. SLAUGHTER of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLAUGHTER of Virginia. Mr. Speaker, as publicly elected officials, we have the responsibility to shape those policies which will better enable the American people to share in a commitment toward preservation of our surroundings and an overall reduction of waste. Whether or not our efforts are directed toward cutting the Federal budget deficit through an elimination of spending or toward abating our national solid waste problems, we must stop wasting time. I believe that we, as Members of Congress, must also increase our role as active participants in the race toward effective waste elimination.

To this end, I have introduced today the Newspaper Recycling Incentives Act of 1990 in order to provide a tax credit to publishers of newspapers who use recycled newsprint. This demonstrates an effective commitment toward improving our resource recovery system and promoting an overall wellness for ourselves and for our environment.

BROKEN ENVIRONMENTAL PROMISES

(Mr. WISE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, as we all gather on Earth Day to promise anew our efforts to clean the environment, we should also review the results of past promises.

As the President plants both trees and promises this week, let Members review the record. In 1988, he made this promise to a Seattle business group, the President said, and I quote:

> We all want an EPA that is committed unequivocably to environmental protection. We want environmental research based on good research and sound data, and under my leadership, that is what we will have.

However, in late March the House of Representatives passed a bill to establish an independent, nonpartisan Bureau of Environmental Statistics within the EPA, and President Bush said he would veto that bill if it passed. Apparently, he does not want those independent statistics, and if successful, will prevent the public from getting its environmental data developed independently of political interference.

Mr. Speaker, we cannot stand these broken promises, Indeed, while the environmental planting of trees is nice, when it comes to the environment, we cannot stand a forest of broken promises.

EARTH DAY LEGACY: GREENSPACE FOR FLORIDA

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, 20 years ago this Sunday, April 22, 1970, it was a picture-perfect spring day in most parts of the country. It was the perfect setting for the very first Earth Day, the nationwide launching of America's environmental movement.

As part of the new movement, President Nixon halted construction of the Cross Florida Barge Canal in 1971 because of the threats it posed to Florida's fragile environment.

It's fitting that we begin the decade of the 1990's and commemorate the 20th anniversary of Earth Day by taking the saga of the barge canal to its logical conclusion: returning the canal lands to the State with ample environmental protection.

Under legislation introduced by myself and Senator BOB GRAHAM, and Senator CONNIE MACK what was once to be a canal will be turned into parks and recreation areas stretching from the Gulf of Mexico east to the St. John's River.

The national coordinator of the first Earth Day celebration was Dennis Hayes, former student body president at Stanford University. Opening the event 20 years ago in Washington, Hayes said, "We are building a movement, a movement with a broad base, a movement which transcends traditional political boundaries."

Mr. Hayes' vision of the environmental movement has proven true. Twenty years later we have come up with a bipartisan, bicameral solution to the barge canal question—a solution whose main objective is to see that much of 77,000 acres of Florida's untouched beauty is finally returned to the citizens of Florida and preserved for the benefit and enjoyment of present and future generations.

HYPOCRISY IN ADMINISTRATION'S ENVIRONMENTAL POLICY

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, today is the day for the President of the United States to present an Earth Day present to the people. Yes, Mr. President, we want you to put an end to the double standard of hyprocisy in which the Federal Government says, "Do as I say, not as I do."

In 1988, as a Presidential candidate, the President promised the American people, and I quote:

> Some of the worse polluters are our own Federal facilities. As President, I will insist that in the future, Federal agencies meet or exceed environmental standards.

Well, Mr. President, the future is now. The Federal facilities legislation which has passed this House and which enjoys the support of the National Association of Attorneys General, the Western Governors, all of the major environmentalist groups, and yes, your own EPA Director, find itself thwarted by whom? Well, the Attorney General of the United States, the Secretary of Defense of the United States, the head of the Department of Energy of the United States, and yes, your own budget guru, Dick Darman.

Mr. President, what you told the people in 1988 is not what is being delivered in 1990. Yesterday's toxic travelog shows that Federal facilities pollute our environment, and Uncle Sam is, in fact, not a good neighbor. Thousands of Federal facilities are polluting our Nation's backyards, drinking waters, and fouling our air, simply because you would rather break your promise than fulfill the reality of living up to the kinds of tasks of preserving and protecting our environment that was promised the American people in 1988.

Yes, Mr. President, end the double standard—clean up your own backyard first.

CONDEMN HOSTAGE TAKERS AND THEIR SUPPORTERS

(Mr. SCHIFF asked and was given permission to address the House for 1 minute.)

Mr. SCHIFF. Mr. Speaker, the world is again being treated to the spectacle of international terrorists dangling the possible freedom of an American hostage.

What is worse than these groups deliberately inflicting more pain and suffering on the families of the hostages is that there are so-called civilized governments which support their activities. These same governments pretend to be humanitarian heroes in arranging a hostage release—but only after previously doing everything possible to encourage the hostage taking in the first place.

And, what is still worse, is that some democratic governments in the world cast a blind eye to this monstrous behavior and work hand-in-glove with the very governments who back the terrorists in everything from commercial treaties to arms sales.

The democratic governments of the world should have absolutely no dealings with counties supporting international terrorism until each and every hostage has been released.

As a nation of concerned individuals, we hope that all hostages who have been held in captivity will be released immediately and that international pressure will prevent any future use of this barbaric tactic.

OUR POLLUTING WAYS ARE DESTROYING OUR WATERWAYS

(Mr. ESPY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ESPY. Mr. Speaker, here is a promise: The Bush administration would enforce environmental laws aggressively.

I think that this has been broken. Mr. Speaker, our polluting ways are destroying our waterways. We have all heard of troubled waters. That is exactly the state of our Nation's waterways today. They are troubled with the dumping of billions of pounds of toxic and hazardous chemicals each year.

In 1987 alone, 9.7 billion pounds of toxic chemicals were directly discharged into our national waterways. As a Congressman whose district borders the mighty Mississippi River, many of my constituents are directly hurt by these polluters. It is estimated that from Kentucky on down along the Mississippi River, the mortality rates are 14 percent higher than the rest of the Nation.

□ 1120

The mighty Mississippi River, our Nation's greatest waterway, has become our Nation's greatest sewer ditch.

Mr. Speaker, we have done little to save this natural treasure of nature. The current administration has said it will not set pollution standards for a number of polluting industries, including the hazardous waste treatment industry, until 1995. The result of this inaction means that this waste will be dumped into our Nation's waterways without Federal oversights.

Mr. Speaker, our polluting ways are quickly destroying our waterways.

PARLIAMENTARY INQUIRY

Mr. SOLOMON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore (Mr. DELLUMS). The gentleman will state his parliamentary inquiry.

Mr. SOLOMON. Mr. Speaker, I note there are placards by a microphone in the well, and there is no speaker over there for that particular placard.

I make the parliamentary inquiry just to voice a concern and to say that we have a speaker here who is about to speak on a different subject, and I would assume that when some Member desires to speak from that microphone, that Member will put the placard up and it will be taken down after the Member finishes speaking; is that correct?

The SPEAKER pro tempore. The gentleman well knows that anytime Members addressing the House wish to use a display, they can do it, and at the time they finish their presentation, the display is to be taken down.

Does that answer the gentleman's inquiry?

Mr. SOLOMON. It certainly does, Mr. Speaker, and I thank the Chair for his understanding.

THE SITUATION IN LITHUANIA AND NORWAY'S OFFER OF HELP

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, I will speak, as my friend, the gentleman from New York said, on a different subject, but I am going to say something kind about George Bush, which has not been said on the other side of the aisle here.

I would like to express my strong support of President Bush's policy of dialog in dealing with the situation in Lithuania, but I have to say, Mr. Speaker, that as we look at that situation, it is very important for us to recognize that as we convene this morning, the Parliament of Norway is at this moment debating whether or not they are going to provide the much needed energy supplies which the Gorbachev government has cut off to Lithuania.

I think it is very important, Mr. Speaker, for us to provide the kind of encouragement and support for dialog with the Soviets, which can only take place if this kind of supply effort which Norway is considering providing moves ahead.

PROTECT, DON'T STUDY

(Mr. VISCLOSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VISCLOSKY. Mr. Speaker, the President has promised that "it is unjust to allow the natural splendor bestowed to us to be compromised."

Remarks at Ducks Unlimited Symposium, June 8, 1990.

Regretfully, like so many other promises, this one has also been broken.

The National Park Service reports that visibility monitoring indicates that scenic vistas at over 60 national parks are affected by manmade pollution over 90 percent of the time.

For example, for over 100 days last year, manmade pollution made it impossible to see across the Grand Canyon. The source of the haze is not a mystery. Extensive Federal studies released last August report that the "canyon smog" comes from a single smoke-belching powerplant located 12 miles away.

The solution is no mystery either—tough new pollution controls are needed if clear skies are to be restored over America's greatest natural wonder. However, President Bush has said that more study is needed to make sure that the powerplant is the real culprit.

Mr. Speaker, we need another study like Washington needs more lawyers.

Mr. President, we do not need more studies.

We need real leadership and direction so that we can effectively protect our environment, not just study it.

INTRODUCTION OF LEGISLATION TO CONTROL GROWTH IN FEDERAL SPENDING

(Mr. SCHAEFER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHAEFER. Mr. Speaker, today I am introducing legislation that outlines a simple plan to deal with the Federal deficit. This measure calls on Congress to meet the Gramm-Rudman deficit target for fiscal year 1991 by restraining the growth in spending from the previous year. Furthermore, to forestall any attempt to increase the financial burden on the American taxpayer, any revenue increase enacted would be separated from general revenues, and used solely to reduce the outstanding national debt.

President Bush's baseline budget projects a revenue increase for fiscal year 1991 of $83 billion, while the Congressional Budget Office projects a smaller increase of $70 billion. This averages out to over $76 billion. With this growth we can meet the $36 billion reduction outlined by Gramm-Rudman and still have $40 billion left over, enough to provide nearly a 4-percent increase for Federal programs.

By controlling the growth in Federal spending we can control the Federal deficit. Please join me in supporting this rational approach to fiscal responsibility.

THE BUSH ADMINISTRATION'S BROKEN PROMISES ON PESTICIDES AND FOOD SAFETY

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, in October 1989, President Bush called for food safety legislation to consumers from unhealthy levels of pesticide exposure. That was the promise; what is the record?

The legislation the administration delivered fails to close one of the most egregious loopholes in current pesticide laws. The administration has taken no initiative to close the "circle of poison" which allows chemical manufacturers to export pesticides banned in this country and food treated with those products to be imported and delivered to the dinner tables of American consumers. Not only has the Bush administration failed to prevent the export of dangerous products so other consumers are not exposed to these substances, the administration has failed to stop foods contaminated with products banned in the United States from being shipped into and sold here.

Mr. Speaker, this is the President who wants to be known as the "environmental President," yet his record of action fails to deliver on his rhetoric. The American public and consumers all over the world, are still being exposed to chemicals which are threats to human health and the environment because the administration prefers to talk, not act. In recognition of Earth Week, now is the time for the administration to take an affirmative stand on this problem and deliver on its promise. Let's stop the importation of food treated with pesticides banned in the United States.

NORWAY CONTINUES NEGOTIATIONS TO SUPPLY ENERGY TO LITHUANIA

(Mr. ROHRABACHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROHRABACHER. Mr. Speaker, at this moment the Norwegian Government is negotiating with the new government of Lithuania, for the sale of vital oil and natural gas supplies. Free people everywhere will rejoice and be grateful to Norway if that deal is reached and if Norway is able to help the struggling Lithuanian democracy with the energy it needs to survive.

Mr. Speaker, the hearts of all Americans are with brave little Lithuania, a nation subjugated for 50 years, a result of a blackhearted deal between this centuries two worst dictators, Stalin and Hitler.

Mr. Speaker, Norway's resistance to Hitler's occupation is well remembered in the United States. Now Norway has a chance to finish the fight by helping the Lithuanians at this pivotal moment. In doing so, Norway will take a moral stand that will inspire the West and earn Norway the appreciation of freedom loving people everywhere.

Our message from the people of the United States to the people of Norway; say yes to the Lithuanians who are asking for your help now in their hour of need. Stand tall and the American people will stand behind you. Show the world Norway's courage and love of freedom by helping free the Lithuanians, at long last, from the Hitler-Stalin pact.

Mr. Speaker history may well report that when the grip of tyranny was shaken and the cause of peace and freedom was in the balance Norway stepped forward to do what was right and in doing so, won the admiration of the world.

AS THE ENVIRONMENTAL PRESIDENT; PRESIDENT BUSH FALLS SHORT

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, among the many environmental promises the President has broken, none is more conspicuous and potentially costly than his broken promises regarding the protection of our Nation's waters.

On the campaign trail the President could not make enough of these promises. He was going to be the environmental President. He stood in front of Boston Harbor and decried pollution. But then, once elected, he submitted a budget which contained no funds whatsoever to clean up the harbor even though Congress had authorized a clean-up.

On the campaign trail, the President kept making promises. He said oil drilling off the California and Florida coasts "would not substantially add to our energy resources." But once elected, the President backtracked again, refusing to even consider a permanent ban on oil drilling in the Florida Keys.

On the campaign trail, the President made another promise. He said that "we need a President who is going to clean up our oceans. I am that man." But once elected, that man delayed and neglected clean up efforts of the largest oil spill in our Nation's history. He allowed Exxon to abandon clean-up efforts in Prince William Sound in mid-September and he allowed Exxon to continue drilling and shipping Alaskan oil.

Mr. Speaker, we do not have an environmental President. All we have are broken promises.

IT IS NOT JUST PRODUCT LIABILITY LAW THAT NEEDS FIXING

(Mrs. JOHNSON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON of Connecticut. Mr. Speaker, the explosion of civil litigation in this country has reached crisis proportions, is heaping unconscionable costs on manufacturers, health care providers, consumers, and all of us, and is stifling the very creativity and inventiveness that has made us a strong nation throughout our history. It is time for Congress to do something constructive about it.

Like many of my colleagues, I am pleased to be a cosponsor of a bill to improve the product liability system but strongly believe we must go further; that is why I am introducing legislation today to address the problems in our medical malpractice liability system.

Mr. Speaker, my bill aims to help those least able to help themselves by giving Medicare participants a streamlined process to get prompt satisfaction after medical malpractice. Under the bill, seniors with malpractice claims would be able to skip lengthy, costly court battles and use a proven form of alternative dispute resolution to get compensation for their injuries. It will not only create greater equity for seniors but also will, in the long run, reduce defensive medical practices and, therefore, the cost of health care.

Binding arbitration and other forms of alternative dispute resolution have proven their worth in many States. My bill would give senior citizens a far more efficient system to seek redress and would greatly speed up awards to deserving parties.

Mr. Speaker, the facts are startling:

A report by the Harvard Medical Practice Study on New York hospitals found that out of the cases that led to moderate to severe disability, involved strong or certain evidence of negligence, and in which a malpractice claim was not filed, 78 percent of the injuries occurred in patients over the age of 70.

Access to medical care is gradually reduced because physicians leave practice early, limit the difficulty of the procedures they perform, refuse high-risk patients, and restrict what specialties they enter as new physicians. In a survey by the American College of Surgeons, 40 percent of their new members no longer accepted high-risk cases in consultation, and 28 percent were not performing certain procedures because of the risk of malpractice.

Today's legal environment causes physicians to practice defensive medicine, which means that they order more tests and x rays, refer patients for more second opinions, and maintain more records to document their actions. The cost of these often unnecessary services has been estimated at 15 to 30 percent of the total cost of health care.

The time for serious debate and significant reform is now and I hope my colleagues will take a close look at the bill I am introducing today.

□ 1130

THE BUSH ADMINISTRATION'S BROKEN PROMISE ON WETLANDS

(Mr. PALLONE asked and was given permission to address the House for 1 minute.)

Mr. PALLONE. Mr. Speaker, George Bush, both as a candidate and since being sworn in as President, is on record with repeated public statements intended to reassure the public on his commitment to the environment. Unfortunately, a regular pattern seems to be developing where the actions of this administration have been at odds with the President's rhetoric.

On the issue of wetlands conservation, the President has told environmentalists and outdoor sportsmen that he wants no net loss of wetlands. He has said that all existing wetlands, no matter how small, should be preserved.

But when the chance came for the President to translate this goal into policy, that commitment was suddenly absent. A landmark agreement between the EPA and the Army Corps of Engineers that would have led us toward the no net loss goal was critically weakened at the last minute. The loopholes that were added to the agreement at the 11th hour basically give a green light for environmentally unsound development to proceed. The press accounts blamed the White House Chief of Staff, Mr. Sununu, as the "bad guy" in this policy change. But the question that environmentalist were asking is: Who is in charge of the administration's policies affecting our natural resources, George Bush or John Sununu?

Mr. Speaker, with Earth Day approaching, proenvironment rhetoric has suddenly become very fashionable in Washington and throughout the country. But the American people will become increasingly cynical about all this rhetoric if their elected officials keep losing their nerve when the tough policy actions have to be taken. As far as wetlands conservation is concerned, it is now up to Congress now to fulfill the promise that the President has failed to keep.

TRIBUTE TO ROBERT E. CECILE, SYRACUSE CITY COUNCILOR

(Mr. WALSH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALSH. Mr. Speaker, last Thursday, April 12, 1990, the city of Syracuse was deeply saddened by the sudden and untimely death of one of its leading citizens, City Councilor Robert E. Cecile. It had been my pleasure to serve with Bob on the Syracuse Common Council. He was a dedicated, hard-working individual who accomplished what every good elected official hopes to attain—to serve the people with compassion and concern.

Constituents dealing with all levels of Government turn to their elected leaders for assistance in time of need. That is what we are here to do—serve the public. Bob Cecile exemplified the standard we should all use in helping those who elect us to office. Time and time again he went out of his way to assist those who could not help themselves. He walked the streets of his council district and took the time to listen to the people he represented. They respected and admired him for this and elected him to be their voice in local government. The people, as usual, made a wise choice.

Bob Cecile and I represent different political affiliations. He was a Democrat and I am a Republican. We never gave that a thought, because first and foremost we were friends. It is a friendship I will cherish all my life.

To his lovely wife, Norma, and their seven children, I extend my deepest sympathy. They have lost a wonderful husband and father, while our community mourns the loss of a great and caring leader.

We will all miss you, Bob—God bless.

THE BUSH ADMINISTRATION'S BROKEN PROMISE ON THE SUPERFUND

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Mr. Speaker, during a 1988 Washington State Business Luncheon, George Bush promised to speed up the cleanup of toxic waste dumps.

He has broken this promise.

As of December 1988, EPA has cleaned up only 38 of the 1,174 Superfund sites.

In 1989, the EPA added over 109 new sites to the list of priority cleanup sites while cleaning up only 8 new sites.

Of $4.5 billion allocated to Superfund since its inception, only $1.6 billion has been used to clean up sites. Nearly $1 billion has gone to overhead and $1.9 billion has yet to be used.

The Bush administration has extracted cleanup agreements from polluters to pay $1 billion in cleanup costs. But under most agreements, corporate polluters are allowed to determine the scope and pace of the cleanup. It is like letting the fox guard the henhouse.

Under Bush, there has been little positive change in the Superfund Program. Administration costs still drain important dollars from the programs cleanup budget. Corporate polluters, held responsible for a Superfund site, continue to prefer to use the least effective and least expensive methods to clean up a Superfund location. And more and more sites are added to the list while cleanup of sites already on the list moves far too slowly.

SALUTE TO OUR FIRST ENVIRONMENTALIST: THE AMERICAN SPORTSMAN

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

Mr. CONTE. Mr. Speaker, as we approach the 20th anniversary of Earth Day, I want to salute the pioneers of the conservation movement in this country: the American sportsman.

Since the turn of the century, sportsmen have lead the fight to protect our environment and have literally spent billions to conserve our irreplaceable natural resources. The record of accomplishment is impressive.

Since 1934, hunters have paid $357 million to purchase 97 million duck stamps.

Since 1939, sportsmen have paid $1.3 billion in additional taxes on hunting equipment under the Pittman-Robinson Program.

Since 1952, under the Dingell-Johnson and Wallop-Breaux Programs, anglers have paid a staggering $2.1 billion in additional taxes on fishing equipment.

And the private sector has made a tremendous impact as well. Since 1937, for example, Ducks Unlimited members donated $508 million to protect 5 million acres of vital habitat in Canada, Mexico and the United States.

Mr. Speaker, American sportsmen provided the foundation for the current environmental movement in this country, and even today, sportsmen comprise an invaluable component of our national effort to preserve and conserve our natural resources.

I salute this long and proud tradition of our first environmentalists: the American sportsman.

SUNUNU'S ENVIRONMENTAL WHITEWASH EFFECT

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, I rise today, just 3 days before Earth Day 1990, to lament the administration's failure to address adequately what well may be the gravest environmental threat now facing man- and womankind, namely global warming.

Mr. Speaker, when the Bush administration torpedoed the Hague Conference on Global Warming last November—destroying a consensus that had been built among 70 nations—the administration attempted to save face by announcing a conference on global warming, which finally was held this week.

Well, Mr. Speaker, this week's conference reads like a litany of broken promises by the Bush administration.

Most important, whereas the administration promised a conference to discuss policy, we instead got another discussion of research. Now of course research is of vital importance, Mr. Speaker, but it is high time for action. We will never have absolute, 100 percent certainty, but as scientists keep telling us, "we don't have to know everything to do anything."

The administration also acted in bad faith by failing to send the Nation's top environmental official, EPA Administrator Bill Reilly, to represent the United States. The reason is obvious: Reilly has been outspoken in his calls for immediate action to combat global warming.

And, Mr. Speaker, in a gaping oversight, the administration failed to invite China, the world's most populous nation, which in the near future could well become the world's greatest contributor to greenhouse gases. It boggles the mind. The President has no problem sending a secret delegation to China to "kowtow" to Beijing's aging despots, but he refuses to invite them to cooperate on solutions to the world's urgent environmental crisis.

Mr. Speaker, in March I authored an article in the New York Times which noted that despite the President's campaign promise to address the "Greenhouse Effect" with the "White House Effect," the President's Chief of Staff instead has delivered the "Whitewash Effect."

This week's meeting demonstrates that Mr. Sununu's environmental "Whitewash Effect" is alive and well.

PARLIAMENTARY INQUIRY

The SPEAKER pro tempore (Mr. DELLUMS). If the gentleman from Pennsylvania has a parliamentary inquiry, would the gentleman stand on his feet and propound the parliamentary inquiry and the Chair will be willing to answer the gentleman.

Mr. WALKER. Mr. Speaker, I do have a parliamentary inquiry. My question is whether or not the gentleman just in the well was proceeding under the 5-minute rule rather than the 1-minute rule.

The SPEAKER pro tempore. The Chair will say to the gentleman that the House is proceeding under the 1-minute rule. The Chair is trying to be fair to all Members on all sides.

SUPPORT THE B-2 TERMINATION ACT

(Mr. ROWLAND of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Connecticut. Mr. Speaker, in our continuing effort to inform the American people of the financial and strategic disaster of the B-2 bomber, I would like to comment on the so-called mission of the B-2 Stealth.

During an Armed Services Committee hearing last year, the Chief of Staff of the Air Force testified that the B-2 bomber would be used only after nuclear annihilation from an exchange of United States and Soviet ICBM's. Of course, this mission changes weekly.

One of the advantages touted by the proponents of the B-2 is that it, unlike ballistic missiles, is a more stabilizing weapons system, because it can be recalled.

General Welch's testimony points out that even the Air Force believes that the B-2 will be employed only after the United States and the Soviet Union have exchanged in excess of 5,000 ICBM warheads.

I pose two questions to my colleagues: First, who will be left to recall these bombers?

Second, at that point, why would you even want to?

Mr. Speaker, the B-2 is a technological marvel whose time and budget have passed. I encourage all our colleagues to join with us in supporting the B-2 Termination Act.

PRESIDENT BUSH'S RHETORIC ON THE ENVIRONMENT

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, people who will pay some attention to the 1988 Presidential campaign might have expected President Bush to show some interest in cleaning up Boston Harbor. They would have been wrong. The President's budget provides no funds whatsoever for Boston Harbor; but I want to defend him against the charge that he harbors some particular anger about Boston Harbor.

The fact is that Boston Harbor is not being treated any less effectively by the Bush administration than any other harbor. The President spent a lot of time in 1988 talking about his

commitment to the environment. Unfortunately, it has remained at the rhetoric level.

Now, I cannot blame him entirely. He fits into a tradition in America of politicians talking a lot more about the environment than they have been acting on it; but I think he misreads the current mood of the American people. I think the public understands the environmental issues better than a lot of people think they do. They are understanding of tradeoffs and they are prepared to make them.

We are in the position here as the Federal Government, with President Bush taking the lead, of ordering, dictating, mandating State and local governments to spend large amounts of money for good purposes, among them cleaning up water pollution, but we are providing no funds to help, and that is a great mistake.

THE IMPORTANCE OF THE 1990 CENSUS

(Mr. GOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSS. Mr. Speaker, the 1990 census is a massive, ambitious undertaking. With the work of thousands of census takers nationwide, we are attempting to sketch the most detailed picture of the American society.

We cannot underestimate the importance of an accurate 1990 census count—and the direct effect it will have on our lives.

The census count will be used for the next 10 years to help ensure that Federal resources are allocated fairly—so that fast-growth States like Florida get their fair share for such things as road improvements, housing, and health care.

But Mr. Speaker, I rise today because there is an ominous trend developing: So far the return-rate for census surveys has been much lower than anticipated. In Fort Myers, FL—a rapidly growing area that is customarily undercounted—just about half the surveys sent out have not yet been returned.

We already know about problems with distribution of forms—and the Census Bureau has taken steps to correct them. But the success of the 1990 census depends on individual participation. Mr. Speaker, we've got to get the word out to people that if that form is still sitting on a counter somewhere in their homes, it's not too late to send it in.

There is a great deal at stake here—it is vital that we all stand up and be counted.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. DELLUMS). The Chair would like to indicate to our colleagues on this side of the aisle that the Chair was constrained by a list of speakers previously suggested to the Speaker. That list has now been exhausted and the Chair will return to the regular order of recognition.

HOUSE MUST PASS ANNUNZIO MONEY LAUNDERING BILL

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, money laundering is a multibillion dollar industry in this country. Money laundering is the lifeblood of the illegal drug trade because it permits drug dealers to funnel their illegal profits into the legal economic system.

Earlier this week, the Justice Department announced that it was seeking information from 173 financial institutions in this country concerning accounts that apparently had been used to launder drug funds. There is no evidence at this point to show that the banks were knowingly involved in money laundering, although it is interesting that some of the banks on the list had previously been convicted of money laundering activity.

It is appalling that our Nation's financial system is being used to launder drug funds. We must take action to stop this criminal activity.

Next week the House will take up legislation that I have introduced, H.R. 3848, a comprehensive money laundering bill that, among other provisions, forces the closing of any financial institution convicted of money laundering after a hearing by the regulators. This so-called death penalty is a severe step, but if we are to have a war on drugs, it has to be a war, not a pillow fight.

I urge all Members of the House to support the Annunzio money laundering legislation, H.R. 3848, when it is before this body next week.

PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman from Pennsylvania may propound his parliamentary inquiry.

Mr. WALKER. Mr. Speaker, the Chair mentioned a moment ago something that I was unfamiliar with as a part of the procedures of the House of Representatives, and that is that 1-minute speeches would be designated on the basis of a previously agreed to list of speakers.

Is that a process which has changed recently? It was my impression that Members were to be recognized in the order in which they appeared on the front row.

The SPEAKER pro tempore. The Chair understands the gentleman's parliamentary inquiry. The Chair would respond to the gentleman by saying that the Chair clearly recognizes the discretion that the Chair has. The Speaker does have discretion in the order in which the Speaker chooses to recognize Members, for 1-minute speeches, and by a previous agreement the Speaker agreed to recognize listed Members. That list has now been exhausted. We have now returned to regular order.

Mr. WALKER. Mr. Speaker, I thank the Chair. A further parliamentary inquiry. If, for example, the minority were to submit a list of speakers that we wanted to have recognized on a particular subject during the 1-minute speeches, would that previously agreed to list also be considered by the Chair?

The SPEAKER pro tempore. The Chair would say to our colleague that the Speaker and the distinguished minority leader could come together and work out an agreement and under the discretionary powers of the Chair, the Chair could recognize a group of Members on either side of the aisle by previous agreement.

Mr. WALKER. So If I understand now, Mr. Speaker, the parliamentary process we are operating under is that the Chair has now adopted a process by which the majority leadership comes with a list on a particular subject and the Chair, at its discretion, recognizes those people, and if the minority leader were to request a similar kind of discretion for members on the minority side, that that in fact could be done. Is that correct?

The SPEAKER pro tempore. To the first part of the gentleman's question, the answer is that is exactly how the proceedings have gone today.

With respect to the B part of the gentleman's question, the gentleman is absolutely correct.

Mr. WALKER. Mr. Speaker, I thank the Chair.

□ 1150

EARTH DAY 1990

(Mr. MACHTLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACHTLEY. Mr. Speaker, on Sunday, April 22, we will celebrate Earth Day 1990, commemorating 20 years since the original celebration on this same day in 1970.

During the past two decades we have seen the American conservation movement explode in size and in scope. And, as the front-page headlines of the Washington Post announced this morning, we have watched the envi-

ronment as a national policy issue shift from the fringe to the mainstream.

Thanks to the efforts of those who have been promoting the environment for more than the past 20 years, the timing is right to have another Earth Day. Because of the popular attention to the environment, people are ready to make their lives conform to their new values on recycling, renewables, conservation. Because of the broad changes sweeping our globe, the world is ready to work on a multilateral level to achieve successes that were inconceivable only a short time ago.

Earth Day 1990 and each day is an opportunity we cannot afford to waste. We owe it to each other, and we owe it to our children. As Alden Whitman once wrote:

Our ideals, laws and customs should be based on the proposition that each generation in turn becomes the custodian, rather than the absolute owner of our resources—and each generation has the obligation to pass this inheritance on to the future.

NAVY OWES HARTWIG FAMILY A PUBLIC APOLOGY

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, today is the anniversary of the terrible disaster of the U.S.S. *Iowa* in which 47 young men died in that explosion. Today there is a memorial service in Virginia to that effect.

The Navy prematurely blamed one of my former constituents, S1c. Clayton Hartwig, in a very superficial report that they put out. Can anyone imagine how the parents and the members of the family today at that service must feel, not only with the realization that their son died in an unfortunate explosion but being blamed nationally for that terrible disaster?

I am very pleased that under the leadership of the chairman of the Subcommittee on Investigations for the Committee on Armed Services, the gentleman from Massachusetts [Mr. MAVROULES] found that, indeed, there was absolutely no proof that S1c. Clayton Hartwig committed that terrible disastrous crime.

In addition, I have asked for a GAO report which we think will be out in June to investigate the Navy's report. We want the future of our men and women who serve in the Navy and other armed services to be assured, and we certainly do not want individuals blamed for a crime they did not commit.

Mr. Speaker, I think the Navy owes that family and the American people a public apology to say the least.

TALK, TALK, TALK BY THE CONGRESS

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker and Members, I have been struck listening to the last 45 minutes of rhetoric. It seems all we do here in the Congress is talk, talk, talk, talk, talk, talk, talk, talk, talk, talk about the environment. One has to ask the question of whether the Congress is capable of doing anything other than talk about the environment.

The fact is for 35 years the Democrats have controlled the Congress of the United States. If we really have all of these environmental problems, how can they blame them on an administration that has been in power for less than 14 months?

I would suggest, as I look at this administration's 14-month record, that for the first time in 13 years we are going to see clean air legislation thanks to their leadership; for the first time ever, we are going to see the Environmental Protection Agency elevated to Cabinet-level status; for the first time ever, we are going to get some real ground-water legislation; we are going to continue what we did in 1985 in expanding and preserving our wetlands; we are going to continue our efforts on conservation reserves; and we are going to do dramatic pesticide reform.

Not bad for 14 months compared to 35 years.

SHAME ON BLUE CROSS

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, Pamela Pirozzi has had surgery and chemo for breast cancer. She now needs a sophisticated bone-marrow procedure to save her life.

Pamela Pirozzi has insurance. She should not have any trouble getting this coverage, right? Wrong. She went to Blue Cross-Blue Shield of Virginia, and they said no, and, in fact, they came up with one legal excuse after another.

The sad part of this case for Pamela Priozzi is she has had a tougher fight with Blue Cross than she has had with cancer. And I will tell the Members, she won her case in court. But here is what the doctors say: if Blue Cross decides to appeal the case, in that length of time Pamela Perosi may die.

They took $420 every single month. They never denied the payment. But now they use excuse after excuse.

Blue Cross, get off it. Take care of your claim with Pamela Pirozzi, and Members of Congress should think, when 37 million Americans do not have health insurance, what is their plight if a person like Pamela Pirozzi who has insurance, gets the shaft?

This is not health care. This is wealth care. Shame on you, Blue Cross.

ARE THE DEMOCRATS RUNNING SCARED?

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, who is the second-most-popular President in the history of this great country of ours? He is Ronald Reagan. Who is the most popular President this country has ever known? He is President George Bush.

By most polls around the country today, George Bush has an 81-percent approval rating. And to you Democrats there in the well who have been standing up bashing poor President George Bush all day long, I say it is good to know that you are among only 19 percent of Americans. You know, if I were a Democrat, and I used to be one, I would be running scared, too. Against a President who has 81-percent popularity, I would be running scared, too.

Yes, he has thrown his weight behind elevating the EPA, the Environmental Protection Agency, to Cabinet-level status. Yes, he has thrown his weight behind the Clean Air Act to stop that acid rain from coming into the Catskills and the Adirondacks where I live. Yes, he has thrown his weight behind it. And you people are blocking it.

Why? Where is the Clean Air Act? I am on the Committee on Rules, and I want to see a rule. I ask for one every week. It never shows up.

What is the matter? Are you Democrats running scared?

REMEMBERING THOSE LOST ABOARD THE U.S.S. "IOWA"

(Mr. PICKETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKETT. Mr. Speaker, 1 year ago today 47 young Americans died when an explosion occurred in gun turret two aboard the U.S.S. *Iowa* in one of the worst peacetime military accidents in our history.

While the shock and sadness we all felt may have subsided, the families and friends of those lost still live this tragedy. In the finest Navy tradition, the captain and crew of the *Iowa*, with new resolve and determination, went quietly back to work. Many of the families are in Norfolk today for services to memorialize this occasion.

But these young people were not lost in vain, Mr. Speaker, and there is a

larger and more enduring memorial to which they are entitled. During the past year, the Berlin Wall has come down, democracy is on the rise throughout Eastern Europe, social and political reforms are surging in the Soviet Union, and free elections were held in Nicaragua.

These are the ultimate rewards of their endeavors and this is the appropriate memorial to the valiant young men of the *Iowa*. They, like so many others in peace and in war, gave their last full measure of devotion in the service of the country they loved.

So on this first anniversary of the *Iowa* tragedy, let us memorialize those lost in the conviction of liberty for all people and in the steadfastness of our Nation in its resolve for peace.

IS THERE ANY DOUBT WE SHOULD RECOGNIZE LITHUANIA?

(Mr. DORNAN of California asked and was given permission to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, here is a real entry from a real living human being's diary on the last day of his life. He was one of 15,000 Polish officers, intellectuals, senior police commanders gunned down in the Katyn Forest near Smolensk. His name was Major Adam Solski.

There is nothing poetic about his last words, because he did not know he was going to be shot in the back of the head that day by the predecessors to the Soviet KGB, the NKVD. The date was April 9, 1940. That date rings in American history, because 2 years later there occurred the Bataan death march. Katyn was a death march for Poles who numbered about three times more than the Americans and Filipinos who died on the Bataan Peninsula 2 years later.

Mr. Speaker, I will read three paragraphs including what Major Adam Solski wrote:

Polish Maj. Adam Solski stood among the pines of Katyn Forest together with about 100 fellow officers. Soviet security men were prodding them with bayonets to make them stand still.

He was writing hastily in his small pocket notebook: "9 April [1940] . . . they brought [us] somewhere in the forest. Here personal search. They took away my watch—time 6:30 [a.m.]. I was asked for my wedding ring . . . took my rubles, belt and pen knife . . ." This was the last sentence he ever wrote.

In 1943, this diary was found on his body. He had been shot in the head. He was one of the 4,400 bodies in eight mass graves—all murdered by a shot in the head.

Mr. Speaker, the Soviet Union has now admitted their guilt for this atrocity. The same people who committed this atrocity were the same people who sat at Nuremberg and judged other war criminals. Yet they were guilty of the first major horror crime of World War II, the execution of 15,000 Polish officers.

Given the bloody history of the Soviet Union, is there any doubt we should recognize Lithuania or that we should recognize Norway's decision to send them oil? Today's crisis in Lithuania grew out of that same horrible period that produced the Katyn Forest massacre. This was the terror of 1940, the crushing of Poland, the crushing of Lithuania, Latvia, Estonia. We must never forget.

□ 1200

CHINA MUST PARTICIPATE IN INTERNATIONAL AGREEMENT ON GLOBAL WARMING

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, yesterday the administration concluded a 17-nation conference on global warming and climate change, a conference which should help focus world attention on this important issue.

However, the administration failed to invite to this conference the world's largest coal burner and the third biggest generator of carbon dioxide, the People's Republic of China. As the Chinese Government pushes its plans for economic expansion, many fear that pollution will dramatically increase unless there is international pressure to use proper safeguards.

It is ironic that this same American administration claimed it was in America's best interest to do very little in response to the Chinese Government's brutal crackdown on the democracy movement in Tiananmen Square. They said it was in America's best interest not to pass legislation extending the visas of Chinese students who feared political repression and jail.

But now, on the important issue of reducing air pollution throughout the world, the administration suggests that it is in the best interest of America not to include the Chinese Government in serious negotiations.

As a member of the Committee on Energy and Commerce, which just completed its consideration of clean air legislation, I know how difficult these kinds of negotiations can be. While we all deplore the tragedy at Tiananmen Square, any international agreement on global warming would have only limited impact without the participation of the People's Republic of China. It is in the best interests of all Americans that we seek to reduce dangerous air pollutants throughout the world.

PRAY THAT NORWAY WILL DO WHAT IS RIGHT FOR LITHUANIA

(Mr. McEWEN asked and was given permission to address the House for 1 minute.)

Mr. McEWEN. Mr. Speaker, it was 50 years ago that two of the world's greatest butchers, Joseph Stalin and Adolf Hitler, got together through their Foreign Ministers and entered into a pact, the Molotov-Ribbentrop Agreement, whereby Hitler said I will take Poland, Joe; you take Estonia, Lithuania, and Latvia. So they rolled their tanks in against each other, but then stopped in agreement with their nonaggression pact.

The United States refused to recognize the occupation of Lithuania as justified and has refused to to this day. And that occupation has now been challenged by the democratically elected Parliament of Lithuania, which has declared its independence.

In response to that, the progeny of Joseph Stalin has chosen to shut off energy to that country. At this moment, 10 after 6 in Norway, the Parliament is discussing whether or not to replace the energy denied them by Mikhail Gorbachev from Norway.

Mr. Speaker, I say congratulations to Norway for this consideration. I urge them to do it. Those who recognize that freedom should be honored wherever it exists, pray that Norway will do what is right for Lithuania and not allow those people to freeze.

THE ACCESS TO EDUCATION FOR ECONOMIC SECURITY ACT

(Ms. SLAUGHTER of New York asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SLAUGHTER of New York. Mr. Speaker, in the United States today the number of homeless children exceeds the population of the city of Atlanta. These children lack more than just a home. They lack continuity and security. They lack adequate nutrition and regular health care services. Too many of these children lack consistent access to an education.

Every one of these children has the potential to contribute to the growth of our country or to be a financial drain on it. An education is a crucial element of their development. And, a well educated work force is undoubtedly the best tool we have for securing our Nation's economic future. For homeless children, education is even more important because often it serves an important stabilizing force. In a world where nothing else remains constant, school provides an environment that helps meet emotional as well as academic needs.

Mr. Speaker, today I have introduced the Access to Education for Economic Security Act with my distin-

guished colleagues Mr. MILLER of California and Mr. SCHUMER. This bill removes barriers that prevent classroom learning for homeless children by building upon structures created in the Stewart B. McKinney Homeless Assistance Act of 1987. In addition, this bill provides necessary financial and technical support to State and local educational agencies.

Homeless children face tremendous obstacles in their pursuit of an education. Even routine paperwork—obtaining medical and academic records or birth certificates—can be a complicated procedure for families with no permanent address. The legislation we have introducted today requires that States remove these, and all barriers, and encourage the attendance, enrollment and school success of homeless children and youth.

Of course, the Federal Government must work to solve our Nation's housing crisis. But that won't happen overnight.

Without an education, homeless children run a high risk of continuing a cycle of poverty and homelessness instead of achieving all that they can. This is an issue that hits every single taxpaying American in the pocketbook. Common sense should tell us that we cannot afford to write off these young minds. We invest now in our insurance for the future, or we will pay later to support an uneducated, unskilled, unemployed population. The United States cannot afford to throw away its future, a future which depends on our children.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 586

Mr. FAWELL. Mr. Speaker, I ask unanimous consent to have my name removed from cosponsorship of H.R. 586.

The SPEAKER pro tempore (Mr. DELLUMS). Is there objection to the request of the gentleman from Illinois?

There was no objection.

URGE SUPPORT OF LITHUANIA BY NORWAY

(Mr. FAWELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAWELL. Mr. Speaker, I understand that the Norwegian Government is considering supplying needed oil to the free people of Lithuania. I certainly fully support such a valiant step.

I applaud the voice of free people across this world that have stood shoulder to shoulder with the courageous people of Lithuania. I deplore the heavy hand of the Soviet Union in trying to suppress the efforts of a people seeking to better their own lives.

So I say congratulations to Norway and to free people everywhere for making the Soviet Union acutely aware that freedom cannot be surreptitiously put down.

A half a century ago the Lithuanina people forcibly lost their independence, and the time certainly is now that all the world recognize that independence.

RECOGNIZE EARTH DAY AND RESPECT OUR EARTH

(Ms. LONG asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. LONG. Mr. Speaker, if we were renting the Earth and our lease were up, I don't think we would be getting our security deposit back.

There is no question that our planet has been damaged, and that the environment in which we live is in urgent need of repair.

However, since the first Earth Day in 1970, progress has been made on a number of fronts. The Environmental Protection Agency was established, the original Clean Air Act became law, and maybe most important of all—people have a better understanding that once the environment is damaged, it takes a long time, sometime hundreds of years, to put things back in their place.

While we have made some progress, much still needs to be done. The landfills of our Nation are filling to capacity. Landfills in each of the 10 counties in my district are nearing capacity and some have closed. Oilspills seem to be taking place regularly, and incidents similar to the garbage barge may become increasingly common if we remain the "throw away" Nation that we are at present.

Mr. Speaker, my guess is that we are going to need this Earth Day and other Earth Days far into the future to bring the importance of these issues to the forefront of national debate. We must all do our part by recognizing Earth Day, 1990 and respecting our Earth.

CONGRESS SHOULD WORK TO IMPROVE THE ENVIRONMENT IN A NONPARTISAN FASHION

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I rise to say that I think that Earth Day is very important. I used to teach environmental studies. I think we are making progress. I think the recent action of the other body on the clean air bill is an important first step in the right direction on a very major issue.

But there is something a little sad and almost pathetic about some of the organized Democratic Party efforts in this Chamber to partisanize Earth Day. The fact is in the Senate there were 34 Republicans and 16 Democrats who gave Senator MITCHELL the key victory on getting a signable clean air bill out of the Senate.

The fact is there is a bipartisan coalition working on the clean air bill. I would call on the Democatic leadership to join Republicans in putting into effect more recycling activities here on Capitol Hill and working to improve the environment, instead of trying to exploit the environment for purely narrow and partisan purposes.

ENVIRONMENT NEEDS ACTION MORE THAN WORDS

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, unfortunately official duties here in the House today prevented my being in Frankfort, KY, our State capital, to receive an award from the Kentucky Environmental Quality Commission.

The award is the Earth Day 20 Award, which is given to commemorate or to recognize my efforts in behalf of the environment of the Commonwealth of Kentucky and of the country.

I am proud to share the award that I received in absentia today with Governor Wilkinson, State Senator Gerald Neal of Jefferson County, Principal Calvert Hydes of Wheatly Elementary School, the director of our zoo, Dr. Bill Foster, and Radio Station WFPL FM, for a series they did.

Mr. Speaker, there are many pieces of important environmental legislation pending in the Congress. But for my part, I have some priorities. One, we should raise the Environmental Protection Agency to full Cabinet rank. We should increase Federal support for the use of recycled materials. We should definitely pass a very tough uncompromising Clean Air Act, and we should call a White House Conference on Solid Waste Management and Disposal.

Mr. Speaker, far more than words, the environment, 20 years after the original Earth Day, needs our attention and our quick action.

AMERICANS SHOULD COME TOGETHER WITH THE IDEA OF PROTECTING THE ENVIRONMENT

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, within the last couple of days I have learned that the Democratic Congressional Committee decided to put on the air a

very vicious ad with regard to the environment, criticizing the administration and criticizing Republicans in general.

I thought that surely this must be a mistake, because that ad referenced Earth Day and referenced the Democratic Party's participation.

I thought surely that this was not something that we wanted to make into a partisan issue.

Then I listened to the speeches on the floor today, and I realized that it was not a mistake, that this is part of a coordinated effort by the Democratic Party to make a partisan issue out of Earth Day.

Now, I thought Earth Day was put together with the idea that we would be united as a country, that we as Americans would come together with the idea of protecting the environment. That there might be differences of opinion with regard to detail, but that we were united around the idea that protecting the Earth for the future was something that all of us should do.

□ 1210

To have this made into a partisan activity I think is a little disturbing and I am sorry to see that that partisanship was brought to the House Chamber today.

GLOBAL WARMING

(Mr. WEISS asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, Earth Day should be a call for action to all of us in Congress to address our most pressing environmental problems. Global warming is one of those. But the response of President Bush is woefully inadequate.

At a conference on global warming, the only response the President issued was to request more research on the subject.

Mr. President, there is no debate about the fact the Earth's temperature is rising. Average global temperatures have been rising over the last 100 years. Of more concern are the many computer models predicting that the Earth's temperatures will rise at an even faster rate in the future.

We also know the chief causes of global warming. The concentrations of carbon dioxide, methane, and nitrous oxide are well above preindustrial levels. Western industrial nations, the United States included, are the chief contributors of these gases. But the United States has not fully met its responsibility to reduce them.

Further study of global warming only prolongs much needed action. We should be joining—indeed we should be leading—the Western industrial countries in our response to global warming. Since President Bush has abandoned this leadership role, it is up to Congress to reassert it.

CARTOONS JOIN THE WAR ON DRUGS

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, and Members of the House, the Senate and House Judiciary Committees had the pleasure this morning of previewing a cartoon special that is going to be presented on Saturday morning at 10:30 eastern time, 9:30 central time and whatever time it is on the west coast. It is a special thing where all the Hollywood personalities got together and created a cartoon gang against drug abuse. And it is a wonderful effort to include Bugs Bunny, Daffy Duck, and Heuy, Louey, and Dewey and so forth.

What this does, is, believe it or not, to blend wonderfully into our three-pronged effort on the war on drugs; one is law enforcement, as we all know, second, treatment of addicts and people who have been victimized by the scourge of drugs, and third, the most important one, education.

There is no better medium for our youngsters between the ages of 5 and 14 or 5 and 12 than the cartoon. There are people, juveniles of age 60 who are still watching cartoons, let alone those youngsters.

We wish to endorse the concept and to say that the are many different ways in education in the war on drugs.

TAKING EASTERN AIRLINES BEYOND MR. LORENZO'S GRASP

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEFAZIO. Mr. Speaker, Frank Lorenzo set out to destroy a fine airline in order to enrich himself and his holding company. Thanks in good part to the help he received from the President, Mr. Lorenzo succeeded beyond his wildest dreams.

He upstreamed hundreds of millions of dollars of assets to his own coffers and sold Eastern, its employees, and the traveling public down the river.

When the employees sounded the alarm and went on strike 1 year ago and the National Mediation Board recommended a back-to-work order, the President did nothing. When the Congress passed legislation to set up an impartial commission to recommend solutions to the Eastern crisis, the President did worse than nothing; he vetoed the legislation.

When we tried some months ago to override his veto, the White House pulled out all stops to beat our override effort and our efforts to aid Eastern Airlines.

Is it the fine management of Mr. Lorenzo the President deferred to, or is it the $100,000 he contributed to the President's election?

In any case, the sad result is the same, Eastern is bankrupt, but finally, due to the action of a Federal judge, beyond Mr. Lorenzo's greedy grasp.

THE AFRICAN ELEPHANT PRESERVATION ACT OF 1990

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, today my distinguished colleague from Rhode Island, Congresswoman CLAUDINE SCHNEIDER, and I are introducing the African Elephant Preservation Act, a bill to provide additional protection for our largest and one of our most beloved land mammals.

The bill will provide that protection by strongly encouraging the People's Republic of China to end its current practice of importing and exporting elephant ivory.

In October of last year, the Convention on International Trade In Endangered Species of Wild Fauna and Flora—or CITES, as it is known—overwhelmingly voted to provide the African elephant with it highest level of protection by placing that animal on its appendix I list. By so doing, CITES decreed that on January 19, 1990, all commercial trade in elephant products should cease.

Mr. Speaker, regrettably, the People's Republic of China is the only non-African CITES member nation which refuses to abide by that decree and the People's Republic of China has, in fact, filed a reservation of noncompliance.

While the People's Republic of China historically has not been a major consumer of elephant ivory, there is great concern that those unscrupulous individuals who make millions of dollars from the illegal ivory trade, will now begin to export poached ivory to that country. The illegal ivory trade currently accounts for 95 percent of all international ivory shipments.

In fact, there is recent evidence that a large shipment of ivory was sent from Hong Kong to the People's Republic of China. Hong Kong has the largest stockpile of ivory, estimated to total approximately 474 tons.

Since the population of African elephants has plummeted from 1.5 million animals in 1979 to fewer than 400,000 today, it is critical that we do everything we can to eliminate the demand for elephant ivory.

By withdrawing its reservation, the People's Republic of China would ensure that its market, which is potentially huge, would be closed to illegal

ivory shipments. In addition, its action would help devalue the price of elephant ivory and would reduce the incentive for further slaughter of these magnificent creatures.

Mr. Speaker, were the People's Republic of China to withdraw its reservation, it would have my sincere gratitude as well as the appreciation of millions of people throughout the world who care deeply about saving this irreplaceable species.

Having traveled to Africa, I can tell you that the elephant is the flagship species for that continent. Once it is gone, it will be gone forever, and with it will have gone dozens of other species that are inseparably linked to the elephant's habitat. It is not too late, however, to save these species—if the People's Republic of China and a few other non-CITES members decide to stop trading in elephant products.

Mr. Speaker, under the terms of my legislation, the People's Republic of China would have until January 1, 1991, to withdraw its reservation. During that time, our Government could negotiate with officials of the People's Republic of China to convince them to take this course of action.

If, however, the People's Republic of China chose to continue to take a reservation, then the President would be required to direct our Secretary of the Treasury to prohibit the importation of all fish and wildlife products into the United States from the People's Republic of China.

Mr. Speaker, in 1988, the United States imported 255.5 million pounds of edible and nonedible fishery products from the People's Republic of China. The financial value of these products was $341 million. Conversely, we exported about 12.6 million pounds, or $17 million worth of fishery products to the People's Republic of China.

Clearly, the People's Republic of China has a tremendous amount to lose by continuing to take a reservation to the CITES action and by refusing to stop assisting those poachers who kill elephants regardless of their age, sex, or size of their tusks.

I have met with the Chinese Ambassador personally, and I've sent two followup letters urging the People's Republic of China to remove its reservation. Unfortunately, that Government has yet to take any action.

Frankly, I would like nothing more than to tell my colleagues that the People's Republic of China is fully committed to saving the African elephant. By withdrawing its reservation, it would clearly demonstrate that commitment and would, in my judgment, remove the possibility that legislation such as mine would be considered.

By the same token, I am committed to saving the African elephant. To do so, I will seek, if necessary, the enactment of this legislation. During the next several months, the House Merchant Marine and Fisheries Committee will be considering several wildlife protection bills. In addition, it will be debating legislation extending a governing international fishing agreement with the People's Republic of China. You can be sure that as a member of the Merchant Marine and Fisheries Committee, I will not hesitate to offer the African Elephant Preservation act as an amendment to any or all of these measures.

I believe that unless the People's Republic of China stops trading in elephant products, legislation like mine will inevitably be adopted. I believe it will be extremely difficult for Members of Congress, including those interested in improving relations with the People's Republic of China, to oppose these efforts.

Mr. Speaker, it is my sincere hope that the People's Republic of China will soon remove its reservation and will join with the more than 100 nations of the world who have already stopped all commercial trade in elephant products. This would be the best course of action for not only the People's Republic of China but also for the African elephant, which is struggling for its survival.

Mr. Speaker, I urge my colleagues to join with Congresswoman SCHNEIDER and me in encouraging the People's Republic of China to immediately remove its CITES reservation so that the destruction of the African elephant can stop.

TRIBUTE TO THE LATE HONORABLE SPARK MATSUNAGA

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINETA. Mr. Speaker, there are many great words etched in stone here in Washington.

Binding these words together is a special resolve: To seek the unique voices among us for the decency and determination to better ourselves and our Nation.

Senator SPARK MATSUNAGA—our great friend and colleague from the State of Hawaii—was such a voice.

SPARK drew his strength from people—and he responded with warmth, persistence, and inspired public service.

During the Second World War, SPARK was a highly decorated member of the All-Nisei 100th Battalion and 442d Regimental Combat Team—the most honored in the history of the United States.

Forty-five years later, he led the fight in Congress to redress the injustices endured by the 120,000 Americans of Japanese ancestry who were interned by the U.S. Government during the very war in which he and so many others fought so bravely.

SPARK's determination to correct those historic injustices was realized in the Civil Liberties Act of 1988—a law that stands as a living testament to his dedication to our great Constitution and the rights of every American.

SPARK passed away on Sunday, April 15. But his ideals will continue to live in us all so long as there are wrongs to right, people in need of justice, and a world in need of peace.

OPPOSITION TO AMENDMENT TO BE OFFERED BY MR. RICHARDSON TO H.R. 644

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, I understand an amendment to H.R. 644 will be offered by my colleague from New Mexico, Mr. RICHARDSON, to his own bill today. I wish to speak in opposition to his amendment.

First, I object to the manner in which this amendment is being sought. I sit on the Mining and Natural Resources Subcommittee of the Interior Committee. That is the subcommittee that should have reviewed and debated the issue of foreclosing a mining claimant's opportunity to receive a patent to his or her valid mining claim.

Mr. Speaker, this is a very important part of the coming debate on the viability of the mining law of 1872. Our subcommittee chairman, Mr. RAHALL, introduced a bill in January to repeal this law and substitute a leasing-like system, albeit one without royalty provisions. Senator BUMPERS introduced a bill during the first session of this Congress to substitute an outright leasing system for the mining law. The revision of the location and patent system for "hardrock" minerals on the public lands of the West is a stated goal of many environmental organizations.

I understand that only 178 acres of placer mining claims would fall within the protected river corridor in this bill. Nevertheless, it is the principle of amending the mining law's effect upon existing mining claims, no matter how few, to which I object, particularly when other recourse is available.

Second, Mr. Speaker, the offered amendment is totally unnecessary because it does not bring effect to the purposes for which the withdrawal is being made, that is, protecting the East Fork of the Jemez River from degradation. Under existing law, the patent that may be issued for a mining claim within a wild and scenic river corridor is limited to the mineral estate only, unless a vested right to a full fee patent exists. The Department

of the Interior has interpreted this to mean that entitlement to a full fee patent exists only for those claims for which patent applications had been filed and all the adjudicatory steps had been completed by the date of designation.

The placer claims within the corridor that this bill would designate have not reached such stage of adjudication as yet, I'm told. In all likelihood, therefore, the miner here will receive a patent only to the mineral deposit and not the surface estate.

Why then are we embarking on this course of action? I agree that the resources of the Jemez and Pecos Rivers segment to be designated are worthy of protection. My question is how will denial of a title to the mineral estate achieve this end? The amendment offered specifically states that it does not preclude mining operations on valid claims. Mr. Speaker, I submit that the real intent of this amendment is to indeed preclude mining by taking away the right to a patent. Why? Because with a patent in hand, even one limited to the minerals only, the claim owner could more effectively resist unreasonable and burdensome regulation of activities upon his claims.

I believe that the Congress should own up to the fact that by passage of this amendment it is simply attempting to defeat mining without having to buy out these claims for which a private property right has been, or very likely will be, established. As such, Mr. Speaker, I must strongly object.

□ 1220

LORENZO OUSTED FROM EASTERN AIRLINES

(Mr. BOSCO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOSCO. Mr. Speaker, all Americans have something to be grateful for today: Frank Lorenzo no longer owns and manages Eastern Airlines. The bankruptcy court in New York yesterday removed Lorenzo and his management from the airlines and replaced them with a trustee, a person who Lorenzo had actually fired from the management of Continental Airlines a few years ago.

On a number of occasions, President Bush refused to step in and save Eastern Airlines, its employees, and its investors. As a result, this once great airline has now been destroyed. Thirty thousand of its employees have lost their jobs, many of them, their pensions, their health benefits, their homes, their children's college tuition. Investors are now offered 2½ cents cash on the dollar for their investment. All this could have been avoided if the President did not take the hands off, laissez faire attitude that he did.

One major issue does remain for the Government, and that is the underfunding of Eastern pension funds. The trustee and the Government should move today to keep those funds from Mr. Lorenzo's other business entities—namely Continental Airlines and Texas Air.

A decade of greed and incompetent management by Frank Lorenzo is coming to an end. Sadly, many innocent people and their families, and a once great airline have been destroyed in the meantime.

INTRODUCTION OF NONBIODEGRADABLE CONTAINERS TAXATION

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, some months ago my wife and I had the privilege and opportunity to visit a remote island in the Bahamas. Eagerly we left our plane, went to our villa, walked down toward the beach, saw the sparkling beautiful ocean, breathed the beautiful clean air, and observed a littered beach. Styrofoam and plastic containers were all over the beach, similar to the way our beaches are.

This got me thinking about what we are doing on disposable containers that were nonbiodegradable. As a result, I have drafted and am filing next Tuesday a bill that for the first time will tax nonbiodegradable containers that are used in industry and that are used in the home. It is time, if we are going to be serious about Earth Day, that we start looking at what we are doing to our beaches, our roadsides, and our landfills. We have got to stop using all of these nonbiodegradable containers that are not reusable.

Any Member that would like to become an original cosponsor of this particular bill, call my office for details as we will be filing it next Tuesday.

REMOVE EQUALITY BARRIERS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, I would like to take this opportunity to address an issue which strikes at the core of American values—the fact that our 1986 immigration law has caused massive discrimination against U.S. citizens. When Congress passed this law, I was one of many Members of this body who expressed concern that it would cause discrimination. We included provisions in the law which intended to protect against discrimination and asked the GAO to evaluate the effects of the law. The results have been returned—the GAO found that the law has caused a widespread pattern of discrimination against Hispanics, Asians, and others who look foreign to employers. This finding triggered a 30-day procedure in which the Congress can repeal that discriminatory law; I have introduced a resolution which would do just that.

Mr. Speaker, the finding that 900,000 employers, nearly 20 percent of the GAO survey, are involved in discriminatory practices is significant and requires the immediate attention of the Congress. As a result of the 1986 Immigration Act, U.S. citizens are unjustly losing job opportunities simply because of their name, accent, or skin color. I urge my colleagues to give this civil rights crisis the attention it deserves. To do anything else sends a signal to Hispanics, Asians, and other minorities that Congress does not care about equal opportunity for them. Mr. Speaker, let's remove barriers to equality, not create them—employer sanctions should be repealed.

BOLD, BRAVE NORWAY TO HELP LITHUANIA

(Mr. KYL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KYL. Mr. Speaker, on our right is a famous painting of the Father of our country, George Washington; on my left is an equally famous painting of a man who helped the United States in its revolutionary hour of need, General Lafayette, from the country of France. Many believe that without the assistance of France, the United States would not have gained its independence.

Today, there are people in this world, in small countries like Lithuania, who, like the United States over 200 years ago, yearn again for their independence. They had it once but it was taken away from them by the Soviet Union. The United States feels bound not to help the people, as we were helped in our hour of need. However, there is a country thinking of providing oil and gas to the people of Lithuania. That country is Norway. If the United States will not stand up to Time magazine's Man of the Year, President Gorbachev, who is going to deny the people of what he considers his own country, oil and gas, I hope that our friends from Norway are brave and bold enough to do that, for the small country and the poor people of Lithuania. They deserve no less.

CHESAPEAKE BAY FOCUS ON ENVIRONMENTAL EFFORTS

(Mr. McMILLEN of Maryland asked and was given permission to address

the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLEN of Maryland. Mr. Speaker, Earth Day holds a special significance for each Member. In the State of Maryland, the Chesapeake Bay is the focus of many of our environmental efforts.

I was pleased that in our recent Committee on Energy and Commerce deliberations on the Clean Air Act Amendments of 1990, special consideration was given to the bay and the regulation of air toxics. Many airborne toxics, we have learned, bioaccumulate in the food chain, causing potential risk to human health and marine life.

It is my hope that this air toxics provision for the Chesapeake Bay will be part of the legislation that emerges from this Congress. More importantly, if it is, the Environmental Protection Agency must enforce its provisions. We have seen too many times before where the EPA, the national stewards of our environment, have been derelict in their responsibilities to conserve our natural resources. If the Chesapeake Bay is to be preserved for generations to come, EPA's enforcement of the laws must be consistent and vigilant.

CONGRATULATIONS TO NORWAY

(Mr. COX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COX. Mr. Speaker, as all of America and the free world knows, the Soviet Union has made good on its threat to cut off oil and gas supplies to Lithuania. Hours before the Soviet Union did so, a high-level delegation from Lithuania took a trip to Oslo, Norway, to negotiate from that country, oil and gas supplies to make up the difference.

I just received a fax from my friend and colleague in the Norwegian Government, Mr. Carl Hagen, who is the chairman of the Progress Party, Norway's third largest party. I would like to read from it briefly.

"The Government of Norway," he says, "must say in no uncertain terms that Norway is willing to discuss sale of its state-owned oil to Lithuania on terms favorable to the people of Lithuania. The Government of Norway must show the world that Norway is assisting and helping neighboring countries. It must take a stand and show the way for our allies to follow."

Mr. Speaker, America should take its hat off to the heroic people of Norway. They are indeed showing the way for everyone. They are indeed coming to the aid of our mutual friends who are leading a peaceful revolution in Lithuania. We should do everything we can in America to support all of them.

COSPONSOR THE MICKEY LELAND PEACE DIVIDEND HOUSING ASSISTANCE ACT OF 1990

(Mr. FLAKE asked and was given permission to address the House for 1 minute.)

Mr. FLAKE. Mr. Speaker, today, we face the most crucial test of our national will. In an era of decreasing superpower aggression, we have the ability to recategorize our Federal spending priorities to meet our human resource needs. By the year 2000, if current trends are not corrected, nearly 19 million Americans will be unable to afford housing.

On Tuesday, April 24, 1990, we will be introducing the Mickey Leland Peace Dividend Housing Act of 1990. This vitally needed legislation will provide a variety of housing assistance to all Americans based on need and is structured to meet the demand for low-income housing by the end of the century. Our Government has not only the ability but the responsibility to develop an effective and equitable housing program. Because budget authority for housing has decreased by approximately 75 percent since 1981, day by day we slip further away as a nation from the goals of the 1949 National Housing Act to provide "a decent home and suitable living environment for every American family * * *."

This legislation is intended to be part of refocusing our resources to provide programs that invest in our greatest resource—human capital. This means a greater emphasis on education programs, food, health care, programs to help the disabled and the disadvantaged and programs to end all barriers to opportunity. Most importantly, this means supplying every American family with a decent and affordable home. These parts, taken as a whole comprise the foundation necessary for economic development and technological advancement. To allow increasing numbers of people to exist on the brink of homelessness, when adequate resources exist, shows a lack of resolve to ensure the survival of the family in this country. Adequate food and shelter are the bedrock requirement for a productive, healthy citizenry.

Provisions of this legislation will provide housing assistance to people living at the poverty level who pay over 50 percent of their income in rent; to people who live in housing without heat, electricity, or plumbing; to families living in dramatically overcrowded conditions and for those who are homeless. The Leland proposal will include: Section 8 rental assistance, public housing modernization and construction, rural housing assistance, homeless assistance and production of affordable housing by nonprofit organizations. New programs are also provided to ensure the safety and security of housing provided under this act, as well as to allow access to community services, training, day care and bridges to bring people into self-sufficiency. In addition, the legislation provides mechanisms to ensure that the taxpayer's money is spent effectively. This is first and foremost a housing program based on accountability for achieving the desired results.

Funding for this proposal will not come cheaply or quickly. Postponing solutions to our housing problems can only serve to exacerbate our existing problems and push more people over the brink into homelessness. Our Nation has always shown that when the will of the Nation exists to solve problems or address human needs, we as a nation will rise to the occasion. Where the public will exists, a way will be found. With our changing defense needs, the Congressional Budget Office [CBO] estimates that combined current and future proposals on conventional force reductions and demobilization in Europe could result in a potential savings to our defense budget of $30 billion annually, the opportunity exists.

The Leland bill would provide for 3,815,000 additional units of housing over 5 years. Funding costs for these housing programs will be no more than necessary to meet the need and based on current assumptions would average $25 billion over current programs. With a foundation of an education, healthy, housed population we can develop and sustain the economic prosperity that we so desperately desire. If we can spend over $160 billion to bail out the savings and loan industry, we can surely spend two cents on each Federal dollar for housing.

Let us take a step together, both as Democrats and as Republicans, to reaffirm the resolve of the Congress to adhere to our housing policies which make safe, decent, and affordable housing a reality for all Americans. We can do no less for our children. If you wish to cosponsor, please contact David Liss at 5-3461.

EAST FORK OF THE JEMEZ RIVER AND THE PECOS RIVER WILD AND SCENIC RIVERS ADDITION ACT OF 1989

Mr. GORDON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 360 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 360

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R.

644) to amend the Wild and Scenic Rivers Act by designating segments of the East Fork of the Jemez and Pecos Rivers in New Mexico as components of the National Wild and Scenic Rivers System, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and which shall not exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. DELLUMS). The gentleman from Tennessee [Mr. GORDON] is recognized for 1 hour.

Mr. GORDON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 360 is an open rule providing for the consideration of H.R. 644, a bill to amend the Wild and Scenic Rivers Act by designating the East Fork of the Jemez and Pecos Rivers in New Mexico. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs.

House Resolution 360 provides that it shall be in order to consider the amendment in the nature of a substitute now printed in the bill as original text for the purpose of amendment under the 5-minute rule. The rule also provides that the substitute shall be read by section and that each section of the substitute shall be considered as having been read.

At the conclusion of the consideration of the bill for amendment, the rule provides that the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute. Finally, the rule provides that the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. Speaker, House Resolution 360 is a simple open rule allowing any Member to offer any germane amendment to H.R. 644. H.R. 644 would add segments of the Jemez and Pecos Rivers in New Mexico to the National Wild and Scenic Rivers System and their inclusion in the system is supported by the New Mexico delegation of both the House and the Senate as well as the National Forest Service.

Mr. Speaker, I urge adoption of the resolution.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, I thank my colleague, the gentleman from Tennessee [Mr. GORDON], for yielding 30 minutes to me.

Mr. Speaker, I would like to commend the chairman and ranking Republican member of the Committee on Interior and Insular Affairs, the gentleman from Arizona [Mr. UDALL] and the gentleman from Alaska [Mr. YOUNG] for their leadership in working out this legislation.

Mr. Speaker, the rule before us today is an open rule. There are no waivers of the Budget Act, there are no waivers of the House rules, and there are no restrictions on the normal amending process.

I commend the chairman of the Rules Committee, the gentleman from Massachusetts [Mr. MOAKLEY] and my colleagues on the Rules Committee for reporting this kind of a rule. It is the right way to proceed on this bill.

Mr. Speaker, I support this rule so that the House may proceed to move promptly to the consideration of the bill to amend the Wild and Scenic Rivers Act by designating the East Fork of the Jemez and Pecos Rivers in New Mexico.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. GORDON. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. DELLUMS). Pursuant to House Resolution 360 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 644.

□ 1244

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 644) to amend the Wild and Scenic Rivers Act by designating segments of the East Fork of the Jemez and Pecos Rivers in New Mexico as components of the National Wild and Scenic Rivers System, with Mr. PICKETT in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Minnesota [Mr. VENTO] will be recognized for 30 minutes, and the gentleman from California [Mr. LAGOMARSINO] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 644, introduced by Representative BILL RICHARDSON, would designate segments of the Jemez and Pecos Rivers in New Mexico as components of the National Wild and Scenic Rivers System.

The river segments identified in H.R. 644 were studied as part of the development of the Santa Fe National Forest Plan and found eligible for wild and scenic designation. These river segments contain significant natural, scenic and recreational values, including highly popular trout fisheries.

The East Fork of the Jemez originates in the geologically significant Valles Caldera and is located in the heart of the most popular recreation area in the Jemez Mountains. Within the 11-mile river segment recommended for designation there are scenic rugged canyons, thick forests and occasional lush meadows. The river also provides habitat for the State-listed Jemez Mountain salamander, a species unique to the Jemez Mountains.

The Pecos River, renowned in folk tales of the West, originates high in the Pecos wilderness within the Santa Fe National Forest. The 20.5-mile river segment within the national forest boundary includes rugged granite canyons and waterfalls, interspersed with small high mountain meadows.

The administration and public witness testified before the Interior Committee in support of designation and the committee acted favorably on this measure last August. Further, companion legislation has also passed in the Senate.

Unfortunately, just before the House was to consider the legislation last September, a patent application was filed on Federal lands within the proposed Jemez wild and scenic river corridor. While that claim has not been patented, the unfettered development of such a claim could have a severe impact on the very values for which this river is being designated as wild and scenic. As such, our colleague, Representative RICHARDSON, who represents the area in question, has developed an amendment which I will join

him in offering today. The amendment will address this matter in the most responsible way possible, recognizing the interests of the parties involved.

I want to take this opportunity to commend our colleague, Representative RICHARDSON, the sponsor of the legislation. I have worked closely with him on several wild and scenic designations and he has been a forceful advocate on national conservation issues within the State of New Mexico, and elsewhere.

Mr. Chairman, the Richardson amendment is the only outstanding issue with this legislation. I hope at the appropriate time the House will favorably act on that amendment and provide suitable protection of the values for which we seek to designate these rivers as wild and scenic. H.R. 644, as amended, is a good river conservation proposal that will be of benefit not only to New Mexico but to the country as well.

I support H.R. 644 and urge its favorable consideration by the House.

Mr. Chairman, I reserve the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 644, a bill to designate the East Fork of the Jemez and the Pecos Rivers in New Mexico as components of the Wild and Scenic Rivers System. This bill would designate a total of approximately 32 miles of these rivers as wild, scenic, or recreational rivers in accord with the Wild and Scenic River Act of 1968.

Mr. Chairman, the wild and scenic river provisions, as outlined, have been carefully considered in a public forum during development of the Santa Fe National Forest Plan. This proposal is fully endorsed by the administration and almost all of the land involved is under jurisdiction of the Forest Service and currently managed for semiprimitive recreation.

I would like to commend the gentlemen from New Mexico Mr. RICHARDSON and Mr. SCHIFF, for bringing this measure before our subcommittee; During his service on our committee Mr. RICHARDSON has brought a number of important conservation measures up for consideration. I urge my colleagues to join me in supporting the designation of these rivers.

Mr. VENTO. Mr. Chairman, I yield such time as he may consume to the gentleman from New Mexico [Mr. RICHARDSON], the sponsor of this initiative.

Mr. RICHARDSON. First of all, Mr. Chairman, my thanks to the chairman of the subcommittee, the gentleman from Minnesota [Mr. VENTO], for his leadership in pursuing this legislation. My thanks to the gentleman from California [Mr. LAGOMARSINO], a member of the Committee on Interior and Insular Affairs, truly an outstanding Members of the Congress in the conservation area, and my colleague, the gentleman from New Mexico [Mr. SCHIFF], a newly elected Member from the First Congressional District of New Mexico. Mr. Chairman, many of his constituents benefit from this legislation. I also thank the bipartisan Senate delegation from New Mexico, the Forest Service, and the Bush administration, for their support on this legislation, H.R. 644.

As the gentleman from California [Mr. LAGOMARSINO] mentioned, Mr. Chairman, this legislation was drafted in consultation with the Forest Service. It is part of the Santa Fe Forest Service plan. It is a bill that is very important, not just to the State of New Mexico, but to the whole endangered river system in this country.

Mr. Chairman, let me very briefly discuss what this legislation would do and what we are talking about.

The Jemez and Pecos Rivers have tremendous wilderness value and are among the most heavily used recreational regions in New Mexico. Both rivers offer the finest trout fishing in the State of New Mexico. The East Fork of the Jemez River originates in the geologically significant Valles Caldera and is at the heart of the most popular recreation area in the Jemez Mountains. The Jemez Mountains and River have great historical and sacred significance for several native American tribes in the area, particularly the Jemez Pueblo.

Mr. Chairman, due to the threat of development along the river and in the Jemez Mountains, the East Fork of the Jemez River has been placed on the 10 most endangered American rivers list by American Rivers, the Nation's leading river conservation group.

This bill was introduced on January 24, 1989, and these two rivers, the East Fork and Pecos Rivers, again were recommended for wild and scenic designation in 1987, by the Forest Service and its management plan for the Santa Fe National Forest. The Forest Service has been most supportive of efforts to achieve wild and scenic designation for these rivers.

Mr. Chairman, H.R. 644 includes an 11-mile segment of the East Fork of the Jemez River and a 20-mile segment of the Pecos River in the national Wild and Scenic Rivers System. The Subcommittee on National Parks and Public Lands held hearings on the bill on July 25, 1989, and subsequently a markup on August 1, 1989. The Committee on Interior and Insular Affairs considered the bill on August 2, 1989, and recommended the bill favorably to the House floor by a voice vote.

□ 1250

The Senate has also acted favorably on this legislation.

Mr. Chairman, this is important legislation, as I said, not just for the State of New Mexico, but for the entire endangered river system in our country.

At one point, Mr. Chairman, I will be offering an amendment, along with my good friend, the gentleman from New Mexico [Mr. SCHIFF], and the gentleman from Minnesota [Mr. VENTO], that simply states that, subject to valid existing rights, no surface patent may be issued with respect to any claims in the river corridor areas protected by H.R. 644.

This amendment is not intended to deny existing claimholders their right to mine. In fact, the amendment explicitly states:

> Nothing in this paragraph shall be construed as precluding mining operations on any valid existing claim.

Subject to the regulations already prescribed by the National Wild and Scenic Rivers Act.

Mr. Chairman, this is most likely the only amendment that will be offered. It is supported on a bipartisan basis. As I said before, the Forest Service has assisted in its drafting. I would urge support for the bill and for the amendment that I will be offering with the gentleman from New Mexico [Mr. SCHIFF] and the gentleman from Minnesota [Mr. VENTO] at a later point in the proceedings.

Mr. LAGOMARSINO. Mr. Chairman, I yield 5 minutes to the gentleman from New Mexico [Mr. SCHIFF].

Mr. SCHIFF. Mr. Chairman, I want to rise in suport of both the bill and the amendment being offered by myself and my colleague, the gentleman from New Mexico [Mr. RICHARDSON].

Mr. Chairman, my view of Federal land use issues is one of an attempt to balance the different issues. We have many legitimate requests and needs to use in Federal lands.

I think it is important to the public that we try to achieve all those needs as well as possibly, whether they are wilderness or recreation or cattle grazing or agricultural mining and so forth.

I think in this particular case, however, perservation is the major issue. I think the amendment in particular would guarantee that certain land along the river would not be subject to patent.

I think it is important if this area of river is going to be made part of the Wild and Scenic Rivers Act and protected as such that it be fully protected from any other encroachment.

Therefore, I urge all my colleagues to vote yes both on the bill and on the amendment.

Mr. VENTO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered by sections as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

Mr. VENTO. Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The text of the committee amendment in the nature of a substitute is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "East Fork of the Jemez River and the Pecos River Wild and Scenic Rivers Addition Act of 1989".

SEC. 2. WILD AND SCENIC RIVER DESIGNATIONS.

Section 3(a) of the Wild and Scenic Rivers Act (82 Stat. 906; 16 U.S.C. 1274(a)) is amended by adding the following new paragraph at the end:

"( ) EAST FORK OF JEMEZ, NEW MEXICO.—The 11-mile segment from the Santa Fe National Forest boundary to its confluence with the Rio San Antonio; to be administered by the Secretary of Agriculture in the following classifications:

"(1) the 2-mile segment from the Santa Fe National Forest boundary to the second crossing of State Highway 4, near Las Conchas Trailhead, as a recreational river; and

"(2) the 4-mile segment from the second crossing of State Highway 4, near Las Conchas Trailhead, to the third crossing of State Highway 4, approximately one and one-quarter miles upstream from Jemez Falls, as a wild river; and

"(3) the 5-mile segment from the third crossing of State Highway 4, approximately one and one-quarter miles upstream from Jemez Falls, to its confluence with the Rio San Antonio, as a scenic river.

"( ) PECOS RIVER, NEW MEXICO.—The 20.5-mile segment from its headwaters to the townsite of Tererro; to be administered by the Secretary of Agriculture in the following classifications:

"(1) the 13.5-mile segment from its headwaters to the Pecos Wilderness boundary, as a wild river; and

"(2) the 7-mile segment from the Pecos Wilderness boundary to the townsite of Tererro, as a recreational river.".

AMENDMENT OFFERED BY MR. RICHARDSON

Mr. RICHARDSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RICHARDSON: Page 2, line 14, strike "(1)" and insert "(A)".

Page 2, line 18, strike "(2)" and insert "(B)".

Page 2, line 23, strike "(3)" and insert "(C)".

Page 2, after line 26, and page 3, after line 9, insert: "After the enactment of this paragraph, Federal lands within the boundaries of the segments designated under this paragraph or which constitute the bed or bank or are situated within one-quarter mile of the ordinary highwater mark on each side of such segments are withdrawn, subject to valid existing rights, from all forms of appropriation under the mining laws and from operation of the mineral leasing laws of the United States, and no patent may be issued for the surface estate with respect to any mining claim located on such lands. Nothing in this paragraph shall be construed as precluding mining operations on any valid existing claim, subject to applicable regulations under section 9.

Page 3, line 5, strike "(1)" and insert "(A)".

Page 3, line 7, strike "(2)" and insert "(B)".

Strike the closing quotation marks and period on page 3, line 9, and insert a closing quotation marks and period after the amendment above after line 9.

Mr. RICHARDSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. RICHARDSON. Mr. Chairman, let me just state once again that this is an amendment that is supported on a bipartisan basis, that has the support of the gentleman from New Mexico [Mr. SCHIFF]. In fact, he is the coauthor of this amendment, along with the gentleman from Minnesota [Mr. VENTO], the chairman of the subcommittee.

It has been endorsed by the Nation's leading environmental organizations, the Sierra Club, the Wilderness Society, Friends of the Earth, American Rivers, and the Audubon Society. These groups have sent letters to every Member of the House to express their support for the Richardson-Vento-Schiff amendment.

Let me also say, Mr. Chairman, that I wish to thank the U.S. Forest Service for their help in drafting this amendment. I think this is an amendment that is supported on a bipartisan basis by our colleagues in the other body. It is, as I said before, a piece of legislation that is very important, not just to the State of New Mexico, but to the whole country. As we approach Earth Day, I think it is that much more important.

Mr. Chairman, let me explain the need for this amendment and why it was not considered in the committee. After the committee considered H.R. 644, a mining company applied for patent, for ownership of 188 acres worth of mining claims within the river quarter. This matter was not considered at the committee level because the Forest Service had been assured by the Copar Pumice Co. that it would not attempt to patent its claim. Not more than 3 weeks after the Interior Committee forwarded the bill, Copar Pumice filed for patent on 1,700 acres in the area, 180 acres within the river corridor.

This company went forward with its claim and patent applications with the full knowledge that the east fork of the Jemez was under congressional consideration for inclusion in the National Wild and Scenic Rivers System. Due to this dangerous situation, American rivers, the Nation's leading river conservation organization, has placed the east fork of the Jemez River on its list of the 10 most endangered American rivers.

If the patent is approved, Mr. Chairman, the Federal Government would be required to sell this land for $2.50 an acre, for the purpose of strip mining along the east fork of the Jemez River. Our efforts to protect the east fork by including it in the National Wild and Scenic Rivers Systems would be for nought.

So simply put, this amendment by myself, the gentleman from Minnesota [Mr. VENTO] and the gentleman from New Mexico [Mr. SCHIFF] states that:

Subject to valid existing rights, no surface patent may be issued with respect to any claims in the river corridor areas protected by H.R. 644.

The amendment, once again, is not intended to deny existing claimholders their right to mine.

In fact, the amendment explicitly states:

Nothing in this paragraph shall be construed as precluding mining operations on any valid existing claim.

Subject to the regulations already prescribed by the National Wild and Scenic Rivers Act.

This amendment will prevent patenting of surface claims in the river corridor. The amendment maintains this land in the Federal domain. Therefore, should mining take place along the river, Federal law would require claimholders to restore the land after mining.

The Richardson-Vento-Schiff amendment is the only way to assure that needed reclamation will take place and that the area along these rivers is managed by Congress, as was intended in the National Wild and Scenic Rivers Act.

Again, Mr. Chairman, this amendment has been worked out in consultation with the U.S. Forest Service, the chairman of the Subcommittee on National Parks and Public Lands.

The gentleman from Minnesota [Mr. VENTO] is offering this amendment today, along with me and the gentleman from New Mexico [Mr. SCHIFF]. I believe the chairman of the Subcommittee on Mining and Natural Resources, the gentleman from West Virginia [Mr. RAHAL], is also supportive of this amendment.

Mr. Chairman, this is an important environmental vote. This is an impor-

tant environmental bill. I stress again that there is no partisanship involved. It is supported in the State of New Mexico by Republicans and Democrats alike. The bill is supported too, as has been mentioned by the gentleman from California [Mr. LAGOMARSINO], by the administration through the Forest Service.

Mr. Chairman, I want to stress once again that we are not talking about amending here the 1872 mining law. I think that will be addressed in further legislation.

So Mr. Chairman, again this is an important bill. This is an important amendment. I urge support for the Richardson-Schiff-Vento amendment.

Mr. SKEEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the bill, but in opposition to the amendment being offered by my colleague from New Mexico, Mr. RICHARDSON.

There is no one in our delegation who opposes the intent of H.R. 644 as it was reported out of the Interior Committee. I certainly agree that we should designate parts of the Jemez and Pecos Rivers for wild and scenic protection status. However, I must object to the need for the amendment that is being debated this afternoon. I believe current law and regulations offer the level of protection the amendment purports to provide.

It appears that valid mining claims have been made on property that lies within the boundary of the proposed wild and scenic river. A patent application has been filed by the claim owner and the Forest Service with the Department of the Interior will determine the validity of the claims.

As required by Forest Service regulations regarding mining operations that would cause significant surface disturbance, the claimant has filed an approved reclamation plan.

As current law states, substantive environmental regulations apply whether mining operations are conducted on private or public lands. Beyond that, because only the mineral deposit can be patented under current law after a designation of wild and scenic, the surface estate will remain public land, thereby this land will continue to be subject to reasonable Forest Service regulation.

Those regulations include the reclamation of any surface area disturbed during a mining operation.

The central question needs to be asked—does this amendment accomplish any more than what current law and regulation provides in protecting the Jemez River? I say no.

Title to the surface mining claims that are patented within wild and scenic river boundaries is not passed. That is, the Federal Government retains ownership of the land even though title to the orebody is passed.

So if the surface area within the proposed wild and scenic river boundary cannot be patented, and the claimant exercises his valid claim, he would be required to reclaim any surface area he disturbed.

Because the current Wild and Scenic Rivers Act disallows a patent to the surface estate even for claims with a "valid and existing right," and because sufficient authority already exists for reasonable regulation of surface disturbing activities, this amendment accomplishes no more than what current law provides.

My colleagues should support the designation of part of the Jemez and Pecos Rivers as wild and scenic. But they should do so without unnecessary amendment such as the one currently being debated.

□ 1300

Mr. VENTO. Mr. Chairman, I rise in strong support, of course, of this amendment.

Mr. Chairman, I think that there are a lot of intricacies here we can get into.

Basically what is happening here is this, that we had a legislative proposal to designate a wild and scenic river in the Jemez and Pecos Rivers. At the same time we have proceeding, much to our chagrin and assurances to the contrary, a regulatory action going forth with regard to a mining claim. These two are diametrically opposed. One would designate a wild and scenic river. One would, of course, patent. Patent just is not the right to mine, it is the right to the surface, it is the right to a substantial type of surface modification in this wild and scenic corridor which would be at odds with, and as I said, a contradiction of the basic designation that is going on. So we have going on two tracks, a regulatory track, and a legal track, two different uses of the same area.

The fact of the matter is that, I think, as someone who is interested in trying to clarify this, in other words, we have, the Congress does, a right to in fact designate this river and to prevent this type of misuse or abuse to this particular type of wild and scenic river. That is what is going on.

Someone is saying, well, this is a patent, and administratively that the Congress cannot deal with this. We have to leave this contradiction go forward, and we have to take our chances with it.

The fact of the matter is, Mr. Chairman and others, I am not willing, and I do not think the gentleman from New Mexico is willing, to go the roll of the dice so as to protect this particular Jemez River corridor. That is what the issue is about.

We are trying to resolve that so that we do not leave it with an administrative cloud as to whether they decide for sufficient reasons to, in fact, patent this. Especially I think it is interesting in the fact that there were assurances given at some point that there would not be an effort to patent this. But for the fact that we had not passed this a month ahead of the time and it was signed into law, we would have avoided the particular problem that is presented to us.

I think it is good to resolve this so we do not have this legal cloud or this threat over this wild and scenic area.

As I pointed out, someone, of course, advocates that this is simply something sacrosanct, to mining. The fact is that once a patent is made, these lands, this 178 acre area along this wild and scenic river candidate would, in fact, be available for anything, for subdivision, for a whole host of other uses that have nothing to do with the type of pumice claim that is being made here. So it could be used for a whole variety of things and, of course, made at the lofty price of $2.50 an acre for that area.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. VENTO. I am happy to yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Chairman, I certainly thank the distinguished chairman for yielding.

The question in my mind is, and I know that being a little redundant is not really a sin and buying insurance, and I can assure the gentleman that I would agree except for the fact that this is a surface mineral involved as an ore body, and somebody is going to have to make the distinction somewhere along the line of what is the difference between the surface and an ore body, because they are the same.

I do not think this amendment does one iota toward making that discernment or discrimination, and that is the point I am making, which is that I think it is going to have to be left to some regulatory body to make that decision somewhere down the line, and we are not going to do it in this amendment.

Mr. VENTO. Mr. Chairman, I thank the gentleman for his view and his insight.

I think that this does accomplish the purposes that we are dealing with.

Mining of the deposit will not be stopped by this amendment. Obviously we intend, of course, to deal with what happens on the surface in terms of this issue. The gentleman in that respect is correct.

But I would hope we could all support this amendment. I think we are trying to clarify it, trying to protect the surface, and trying to deal with the issue at hand.

Mr. Chairman, I would hope that we would be able to move ahead so that we could prevent, for instance, not only just the mining that occurs here, which is in and of itself a concern, but

to give the opportunity, if it is under a valid, existing right, if it is, in fact, a valid, existing right, then it comes under the provisions of regulation. If it is not, it comes under a patented claim and comes under the 1872 mining law which, as I say, for a minuscule price per acre, we could see condos developed there, we could see timber cut in the area, and it would likely to result in devastation of the entire qualities for which we are designating this resource.

I would hope that we would adopt this amendment. I think it does what needs to be done and puts, I think, an answer here legislatively at the time that we are dealing with this as opposed to leaving it up in the air for a regulatory agency to wholly decide.

Mr. RAHALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Richardson amendment.

The question being raised by the gentleman from New Mexico's amendment is relatively simple: Do we continue to allow public domain lands to be sold off in a willy-nilly fashion for a mere $2.50 an acre?

This gentleman from West Virginia, the chairman of the Subcommittee on Mining and Natural Resources, has spent a great deal of time investigating this very question.

My response is, and this body's response has been, to just say no to the rip-off of the public's land for fast food hamburger prices.

Today, this body is considering a matter involving the mining law of 1872. This law allows mining claims to be staked on public domain lands for certain minerals and gives the claimholder the option of seeking title to the land, at 1872 prices, from the Federal Government.

The mining claims in question within the proposed Jemez River corridor are for pumice, a material used in the manufacture of stone-washed blue jeans. This gentleman will not argue the popularity of stone-washed blue jeans. I may even own a pair and I am certain many of our children do as well.

Moreover, it remains to be seen whether all of the claims were staked for minerals that are, in fact, even subject to the mining law in the first place. There is good reason to believe that some, if not most, of the pumice embraced by these mining claims is not eligible to be located under the mining law of 1872, but rather, is subject to sale by the Federal Government under the Materials Act of 1947.

Be that as it may, the gentleman is taking a conservative approach with this amendment. He is not seeking to extinguish the claims or prohibit the lawful mining of the pumice. In fact, the legislation would even allow for a patent to be issued to the mineral estate if the claims are found to be valid.

All that the gentleman is asking is that we maintain the surface estate of the lands, lands that will in fact be incorporated into the National Wild and Scenic Rivers System, in public ownership.

This is nothing new.

The mere fact that a mining claim exists, and that application for patent has been made, does not carry with it a vested right to a patent.

It is a well settled matter that the Congress can, and has on numerous occasions, placed limitations on the issuance of patents to mining claims on public domain lands. This is done without extinguishing any valid existing right or invoking a taking of property.

In fact, section 9(a) of the Wild and Scenic Rivers Act states that, subject to valid existing rights, a patent may be issued to a mining claim in a protected river corridor for the mineral deposit only. The surface estate would remain in public ownership.

The Richardson amendment recognizes current law, and, moreover the fact that the claim holder in question does not possess a valid existing right to obtain a full fee patent for the claims within the Jemez River corridor.

I would urge all of my colleagues to vote for the Richardson amendment.

□ 1310

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico [Mr. RICHARDSON].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. HARRIS] having assumed the chair, Mr. PICKETT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 644) to amend the Wild and Scenic Rivers Act by designating segments of the East Fork of the Jemez and Pecos Rivers in New Mexico as components of the National Wild and Scenic Rivers System, pursuant to House Resolution 360, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. VENTO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 391, nays 1, not voting 41, as follows:

□ 1334

The Clerk announced the following pair:

On this vote:

Mr. Bonior for, with Mr. Stump against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RICHARDSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 644, the bill just passed.

The SPEAKER pro tempore (Mr. HARRIS). Is there objection to the request of the gentleman from New Mexico?

There was no objection.

PERSONAL EXPLANATION

HON. BILL NELSON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. NELSON of Florida. Mr. Speaker, had I been present I would have voted "aye" on rollcall No. 75.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 98

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent that my name be withdrawn as a cosponsor of H.R. 98, the Guam Commonwealth Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have taken this time so that I might inquire of the distinguished majority leader, the gentleman from Missouri [Mr. GEPHARDT] the program for the balance of this week and next week.

Mr. GEPHARDT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the distinguished majority leader.

Mr. GEPHARDT. I thank the gentleman for yielding.

Mr. Speaker, I would like to go through the schedule:

The House's business is finished for the day.

On tomorrow we will not have legislative business.

On Monday, April 23, the House will meet at noon, and again there will be no legislative business.

On Tuesday, April 24, the House will meet at noon to consider eight suspension bills. Recorded votes on the suspensions will be postponed until after debate on all the suspensions.

The suspensions are as follows:

House Resolution 354, regarding human rights in Liberia.

Senate Concurrent Resolution 106, concerning Jerusalem and the peace process.

H.R. 2514, thrift savings plan technical amendments.

House Joint Resolution —, technical corrections to the Ethics Reform Act of 1989.

H.R. 3961, to name a building in Birmingham, AL "The Robert S. Vance Federal Building and U.S. Courthouse."

House Resolution 4035, to name a building in Santa Rosa, CA "The John F. Shea Federal Building."

H.R. 3545, reauthorizing the Chesapeake and Ohio Canal National Historical Park Commission.

H.R. 3811, recognizing the centennials of national parks.

On Wednesday, April 25, and Thursday, April 26, we will be taking up H.R. 3848, Depository Institution Money Laundering Amendments of 1990, open rule, 1 hour of debate; H.R. 4380, authorizing the appropriations for the superconducting super collider, open rule, 1 hour of debate, and a concurrent resolution having to do with the budget for fiscal year 1991, subject to a rule.

The plan now is that the rule on the budget will be taken up in the Committee on Rules on Tuesday. The rule might be taken up on Wednesday and we would begin work on the budget on Thursday.

On Friday, April 27, the House will not be in session.

Mr. MICHEL. If I might inquire, the gentleman said we would take up the rule on the budget on Wednesday. Would there be a chance for any general debate on Wednesday or would all general debate and everything happen on Thursday?

Mr. GEPHARDT. If the gentleman would yield further, it is possible. All those specific decisions have not been made yet, but it is possible we could have general debate on Wednesday.

Mr. MICHEL. I thank the gentleman.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Speaker, I simply say to the distinguished majority leader that we are making deliberate speed to get the bill to the committee and out of the com-

mittee to the floor. It would be my hope that the majority would consider the scheduled debate on Wednesday.

□ 1340

We have a lot of debate required, allowed under the Humphrey-Hawkins section of the bill. I think it would be very helpful to the House if it fits the business that the majority has scheduled, to begin work on Wednesday.

Mr. GEPHARDT. If the minority leader will continue to yield, I appreciate the thought. We will try to see what we can get done that day. We obviously want to get the budget completed.

Mr. MICHEL. Mr. Speaker, I think if my information is correct, permission will probably be requested then for filing on Monday for the report; is that a request that would come from the majority leader later after our dialog?

Mr. GEPHARDT. I think that is correct.

Mr. GINGRICH. Mr. Speaker, if the distinguished minority leader will yield, I would like to ask two things of the majority leader: First, as I understand on April 30, a Monday, votes have been scheduled. Are we still anticipating votes, and if so, what legislation is expected? I think Members would like to be able to change their schedule if, in fact, we are not going to have votes that day.

Mr. GEPHARDT. If the gentleman will continue to yield, I am not in a position at this moment to be able to give Members a final answer on Monday, April 30. However, we will try to have an answer for Members before the close of business next Tuesday. My hope is that we can avoid votes on that day, but we are not yet in a position to do it. The reason is the budget, and where we are on the budget by that time. We want to make sure we can get this budget out of here as quickly as possible.

Mr. GINGRICH. If the gentleman will yield further, I must ask in the spirit of collegial friendship of the majority leader who made a strong 1-minute earlier, and I wanted to ask two things. First, since apparently the Democrats this week are talking about the environment and blaming George Bush, when might we expect the clean air bill to be on the floor? We think the Democratic leadership ought to actually deliver legislation, as well as attack the President. We wonder when we might have that on the floor?

Mr. GEPHARDT. As the gentleman knows, great progress has been made in the Committee on Energy and Commerce, and it has been a bipartisan progress, I might add.

The report is to be filed imminently. We believe the bill will be on the floor by the midpart of May, maybe earlier than that.

Mr. GINGRICH. As the gentleman knows, we in the House have been working on a bipartisan basis and in the other body it was a bipartisan coalition that bailed out Senator MITCHELL when we provided 34 of the 50 votes on the key vote, so it was a little painful when we saw this narrow partisanship come up.

Let me say the gentlewoman from Rhode Island [Ms. SCHNEIDER] is leading a press conference this afternoon on recycling on Capitol Hill. I hope the Democratic leadership would be as eager to rush into helping Capitol Hill become a model of recycling as it has been to blame George Bush. I encourage the majority leader to follow up on his 1-minute speech by making Capitol Hill more of a recycling center.

Mr. GEPHARDT. I thank the gentleman.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

HOUR OF MEETING ON WEDNESDAY, APRIL 25, 1990

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday, April 24, it adjourn to meet at noon on Wednesday, April 25, 1990.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ADJOURNMENT TO MONDAY, APRIL 23, 1990

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday, April 23, 1990, at 12 noon.

The SPEAKER pro tempore (Mr. HARRIS). Is there objection to the request of the gentleman from Missouri?

There was no objection.

PERMISSION FOR COMMITTEE ON THE BUDGET TO HAVE UNTIL 6 P.M., MONDAY, APRIL 23, 1990, TO FILE PRIVILEGED REPORT ON CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1991

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that the Committee on the Budget have until 6 p.m., Monday, April 23, to file a privileged report on the concurrent resolution on the budget for fiscal year 1991.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

□ 1230

WORLD TRADE ORGANIZATION

(Mr. WALGREN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.)

Mr. WALGREN. Mr. Speaker, in a speech earlier this week, U.S. Trade Representative Carla Hills looked with some expectation beyond the trade negotiations now occurring under the General Agreement on Trade and Tariffs to the day when all countries would join in a World Trade Organization, bound by agreed upon rules enforced fairly and efficiently.

I commend Ambassador Hills for her vision and want to encourage her in the commitment to make it a reality. The world trading order is at a crossroads. We can continue to follow the present course characterized by confused and ambiguous rules that often result in unfair trade damage inflicted on one country—often the United States—to serve the national interests of another, or we can work toward an ongoing process to integrate what are very different national economies in a way that can serve both the world's overall interests in expanding trade and at the same time take account of the difficulties often created on a national level by international trade.

Ambassador Hills believes that the current GATT negotiations are the world's best opportunity to lay the foundation for the international economic growth. She should be encouraged to seek the fairest outcome for U.S. interests in that process. But she has also begun to look beyond the present to build a new World Trade Organization that could make a critical contribution to resolving conflicts arising in the future. The administration should be encouraged in that effort as well.

Mr. Speaker, under permission to include extraneous matter, I include a copy of the Ambassador's speech given on April 16 to the North Texas Commission in Dallas.

2001: A TRADE ODYSSEY

(By Ambassador Carla Hills)

I want you to take a short journey into the not too distant future. The date: January 1, 2001. The place: Dallas. You are president of a manufacturing company with 100 employees, annual sales of $15 million, and big problems.

It is difficult to keep your mind on the Cotton Bowl, despite the fact that SMU is in a cliff-hanger with Oklahoma. That's because your company did very badly last year. You finally gave up trying to market

your products in Europe and the Pacific Rim: there was just too much protectionism, too many trade barriers. You were forced to layoff a third of your employees and take a huge write-off on new equipment you'd purchased in anticipation of the extra business, but which now sits idle.

Then some of your most important product designs were stolen by a gray marketeer in India who is making cheap knock-offs and selling them in your markets. You spent $1 million in legal fees trying to stop it, but now your lawyers tell you that there is nothing you can do about it.

Is it you? Are you such a bad manager? No, your other friends in business are telling similar horror stories.

So you wonder: How did things ever get this bad? What went wrong? When did it start? Who's to blame?

It all began in 1990 when, after four years of hard-nosed negotiating in Geneva, the United States was unable to get its trading partners to agree to sweeping new rules for the General Agreement on Tariffs and Trade, or GATT.

Funny, but you had never heard of GATT until recently. Just the other day the newspaper did a story about the decline of world trade in the decade since the GATT's demise. The writer said that for the latter half of the 20th century, the GATT was the most important trade agreement involving nearly 100 countries and covering better than 80 percent of world trade. It was even referred to as the "Constitution of Trade."

You learned that after the GATT was signed in 1947, seven successful rounds of tariff cuts by the world's great trading nations permitted trade to soar from $60 billion to break the $3 trillion mark in 1990. As a result, the global economy grew faster in those 40 years than in any four decades of world history.

But 1990 was a turning point for the GATT. World trade had outgrown the rules that had served so well for so long. Areas inadequately covered by GATT rules, like agriculture, or not covered at all like services, investment, and intellectual property, had taken on much greater importance in global trade.

To make matters worse, many developing countries claimed exemption from the rules already in place. No longer at the margin of the trading system, they accounted for half a trillion dollars in trade.

Thus in 1990, more than $1 trillion in goods and services was not adequately covered by internationally agreed rules of fair play. That trillion dollars of trade, in industries vital to America's future prosperity, amounted to a third of world commerce. But, because the rules were weak, trade disputes turned into trade wars. Instead of uniting nations, trade started to divide them.

That was why the United States pushed hard to launch the new round of GATT talks in 1986, and why President Bush made the successful conclusion of the GATT negotiations in December 1990, America's Number 1 trade priority.

However, inadequate public support in the United States prevented government negotiations from pressing for the needed improvements in the rules. Recalcitrant nations were not convinced of the depth of American commitment to trade reform. Ultimately, no agreement was reached.

Then American firms found it increasingly difficult to break into new and vital overseas markets. Government subsidies continued to skew the marketplace. And, inadequate protection of intellectual property saw more and more American ideas pirated by dishonest businessmen abroad.

Well, how do you like the future? Not a pleasant picture, is it? As you can see, our international trade talks are not abstract discussions of arcane economic principles. The accords we seek in Geneva are essential to our future prosperity. Together we can prevent the dismal outcome I have outlined. Luckily, there still is time; not a lot, but enough.

AN OVERVIEW OF U.S. TRADE POLICY

That is why President Bush, who fervently believes in the economic and social benefits that flow from open markets, has us in a full-court press in our trade negotiations around the world. Our orders from the President: Unlock once-sealed markets so that trade can expand, and negotiate a clear set of enforceable rules that will curb unfair trade practices.

We seek to implement that policy in three ways:

First and foremost, we are laboring very hard to achieve a successful conclusion of the current round of international trade talks ongoing under the auspices of the GATT. We believe that a good agreement could transform an aging trading system of international trade rules into a passport for free trade.

Second, we are conducting market-opening negotiations with our key trading partners. These negotiations cover the entire range of American enterprise—from avocados to zincography.

Lastly, we are using our own trade laws to pry open the markets of racalcitrant nations.

THE INTERNATIONAL TRADE TALKS

As I said, a successful completion of the GATT talks in Geneva is our first priority. Look at what we are trying to achieve in this round. We seek to:

Expand market access for trade in goods; we have challenged our trading partners to envision a future tariff-free world;

Achieve fundamental reform of agriculture, to cut the $72 billion of income lost annually from world protection of agricultural markets;

Rein in the hundreds of billions of dollars of trade distorting government subsidies with which governments bribe the market instead of letting entrepreneurs win a share on the basis of price and quality;

Create a swift and effective means to resolve our trade disputes;

Ensure that the rules that we have and those that we are negotiating apply to developing countries; and finally,

Develop equitable rules for the new areas of services, investment, and intellectual property.

Opening markets will benefit all business, but particularly small businesses, which now account for 20 percent of our exports and create four out of five new jobs.

Improving protection of our intellectual property will shield our producers of fine chemicals, pharmaceuticals, films, and textbooks from the $60 billion theft of their basic know-how that occurs each year.

Eliminating the protectionist policies that exist worldwide in agriculture will put $11 billion in the pockets of American farmers—that's an extra $3,400 for each and every one of them.

There is simply no question about it: This round of the GATT is a bold and ambitious undertaking. It may be the last, best chance this century to create the trading rules we need for the next century.

INTEGRATION INTO A GLOBAL TRADING ORDER

The vision underlying all of these efforts is our belief in the benefits that will come from a integrated global trading order. We see the negotiations under GATT and our talks with individual nations as an important force to maximize each nation's prosperity and security, while broadening and strengthening its economic ties to the world.

A solid agreement coming out of this round of GATT talks can be the unifying force for integration from Budapest to Brasilia. Only through such an agreement will each nation alone, and the world as a whole, gain the assurance that can come from a strong set of fair and enforceable global trade rules.

DO WE NEED A WORLD TRADE ORGANIZATION?

If we can achieve a solid agreement, then we could enthusiastically concur with those who suggest that we go beyond the current round of the GATT and create a new institution to govern our trading system—a World Trade Organization.

But let me be clear, simply building a new edifice cannot be a substitute for the substantive rules we so sorely need. We must have the laws before we can build the courthouse.

For a World Trade Organization to succeed it will require the confidence of all it serves that it will safeguard their national interests. We believe that such confidence will be inspired if member nations know that they can rely upon clear and enforceable rules.

The trade organization we envision could be an overarching institution linking the new the new rules to the old rules, and providing a consistent means for the swift resolution of disputes.

Some may view this new organization with apprehension. Indeed, any further elaboration will require close consultation with our trading partners, as well as with Congress and American industry. But, I challenge anyone to name a single country that has been economically dominated through free trade.

Furthermore, a World Trade Organization could be a positive vehicle for cooperation between the United States, Europe, and Japan by keeping trade channels open and thus aiding the growth and progress of both the developed and the developing world. It could also enable smaller countries, who fear that the world is fissioning into trade blocs, to find a forum for raising issues of concern.

A successful GATT agreement this December can fuel the engine of growth for the 21st century; a World Trade Organization could be the engineer who helps keep the throttle wide open.

ANOTHER VISION OF THE FUTURE

I began today with an ominous trip into the future. Let me take you now on a more pleasant one. Again, the year is 2001, and the place is Dallas.

You are feeling good. You are the chairman of the board of a large manufacturer. Last year, your 1,000 employees could barely keep up with the orders from your sales reps in Tokyo, Brasilia, Berlin, Moscow, and Warsaw. Your Delhi office was able to swiftly stop a knock-off manufacturer from making cheap imitations of your hottest product by using new intellectual property rules negotiated in 1990 at the GATT talks. And, your accounting department says sales look like they are going to top $150 million for the first time.

Oh by the way, SMU beat Oklahoma in the Cotton Bowl 50 to nothing.

WE NEED YOUR SUPPORT

Nineteen-ninety is a pivotal year for the world economy. Down one path lie open markets, expanded trade, economic growth, and prosperity. Down the other lie closed markets, nations turned inward, and gravely diminished prosperity for all.

You and I need to heighten public awareness that the rules we are negotiating in the GATT to curb unfair trade practices and to open markets mean more revenues for our industries and more jobs for our people.

So, when you leave here, talk to your suppliers, buyers, employees, friends and neighbors. Ask them to urge their congressmen and senators to support our positions at the GATT trade talks. Tell them that open markets mean revenues for our industries and more jobs for our people.

And if GATT sounds too much like jargon, tell them that it means Growth, Access, and free Trade Today. And that my friends, is good for America.

HALL OF SHAME—WHAT A DIFFERENCE A YEAR MAKES

(Mr. THOMAS A. LUKEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. THOMAS A. LUKEN. Mr. Speaker, what a difference a year makes. The Department of Energy weapons plants are making headlines across the country again.

In Cincinnati the screaming banner is: "Fernald is No. 1 Polluter." Pollution Hall of Shame citations are nothing new for Fernald in my district.

But what are we talking about in pollution? We are talking about radioactivity, what the GAO terms cancer-causing radioactivity. The GAO calls it a "high risk for a threat to health."

And what is the excuse by the Department of Energy? The Department of Energy says it is not an immediate threat to health. Do we know what they mean? They mean you have got cancer, and you might not die for 10 or 20 or 30 years.

But here is the latest headlines. What a difference a year makes. Secretary Watkins said there would be a culture change in the Department of Energy. The culture change has occurred. Reporters are barred from the plant. Reporters are barred from the Department of Energy plant. That is not Lithuania, that is not South America, that is Cincinnati, OH, and the reporters are barred from going with their Congressman through that plant, which is a nuclear cesspool.

Mr. Speaker, I include with my remarks the headlines and articles to which I made reference, as follows:

[From the Cincinnati, Enquirer, Apr. 11, 1990]

LUKEN WON'T TOUR FERNALD IF REPORTERS BARRED

(By M.A.J. McKenna)

U.S. Rep. Thomas A. Luken said he won't tour the Fernald uranium-processing plant this morning if the reporters he invited are barred from the facility.

Luken was told late Tuesday afternoon by the U.S. Department of Energy that Cincinnati reporters would not be allowed in the plant, with him at 9:30 a.m. Instead, Luken could have a press conference at 12:30 p.m. after his tour.

That "is how we've chosen to accommodate the information needs of the news media," DOE spokesman Steve Wyatt said Tuesday evening. "It's basically the standard method for visits by high-level officials to any DOE facility."

That isn't Luken's understanding.

"The Congressman has told the press that he'll be there at 9:30 a.m. and he hopes they're there too," a member of Luken's Washington, D.C., staff said Tuesday.

"If DOE refuses to let the press in, they can turn everyone away from the gates, including him. He views the press as representing the public, and he's not going to participate (in the tour) if the public's participation is denied."

SECOND CONTROVERSY

Wyatt declined to say what might happen if a confrontation developed between Luken and plant officials.

This isn't the first time that Luken's plans to tour the plant have provoked controversy. Luken several times requested that Energy Secretary James Watkins accompany him on this morning's tour; Watkins repeatedly has refused. Peter Brush, acting assistant secretary for environment, safety and health, is attending instead.

Also accompanying Luken are Catherine McCord of the U.S. Environmental Protection Agency and Lisa Crawford, spokeswoman for the citizens' group Fernald Residents for Environmental Safety and Health.

[From the Cincinnati Enquirer, Apr. 19, 1990]

FERNALD IS NO. 1 POLLUTER—HIGH HEALTH RISK CITED IN REVIEW

(By Anne Willetter)

WASHINGTON.—The Fernald uranium processing plant in northwest Hamilton County tops the nation's nuclear weapons plants in health-threatening pollution, Congress' audit arm said Wednesday.

A review of Department of Energy (DOE) data since 1986 showed that Fernald has been cited for 31 serious environmental problems that pose "a high risk for a threat to health to occur," according to a General Accounting Office (GAO) study.

Pollution hall-of-shame citations are nothing new for Fernald, which stores millions of pounds of uranium and chemical waste in pits, silos and drums and has contaminated the groundwater.

But the GAO study showed how Fernald stacked up against 30 other facilities in DOE inspections:

First among DOE sites with 31 serious environmental problems, plus 37 less serious ones, for 68 total.

Third among 18 sites in safety and health problems with 186.

The report contained no details on the inspections, so it was impossible to determine whether Fernald was being measured against the same standards as, for instance, the much larger Hanford Reservation in eastern Washington state. Hanford had 58 environmental problems, 10 in the high-risk category.

DOE officials had not seen the report Wednesday and could not comment on the rankings.

The GAO study also found that hundreds of environmental, health and safety problems at the weapons plants had not been corrected years after their discovery. Only 34% of 1,731 health and safety problems and none of 1,277 environmental problems had been resolved, the report said.

"We know the problems are complex, but that is no excuse for DOE's failure even to come up with plans to clean up the hundreds of nuclear hazards that threaten people's lives and the environment," said Sen. Howard Metzenbaum, an Ohio Democrat who requested the study.

DOE spokesman Robert J. Griffin noted that Energy Secretary James Watkins has put in place a 10-point plan to make plants cleaner and safer.

"We're talking about 30 years of neglect," he said. "You are not going to turn something like this around in two or three years."

Despite Fernald's high health-and-safety ranking, it had no problems in the top category—"clear and present danger to workers or the public." Of its 186 citations, 85 were for failure to comply with DOE orders—the least serious category—and 90 were not put in a category.

Examples of problem areas were emergency readiness, fire protection and radiological protection. The report showed that 46 of Fernald's problems—24%—had been corrected.

Other DOE plants in Ohio fared better. The Piketon uranium enrichment plant ranked second in serious environmental problems with 16. The plant recorded only 39 health and safety problems and 18 had been corrected.

The Mound Laboratory near Dayton ranked 13th in environmental problems with 45. Nine were considered a threat to health.

[From the Cincinnati Enquirer, Apr. 12, 1990]

DOE SHUTS MEDIA OUT OF FERNALD TOUR

(By M.A.J. McKenna)

Fourteen Cincinnati reporters and photographers were barred from the Fernald uranium-processing plant Wednesday morning, triggering an angry reaction from U.S. Rep. Thomas Luken, who refused to enter the plant without them.

"DOE had adopted some kind of Gestapo tactics," he said in an impromptu press conference by the plant's front-door guard post, shortly after being told that media whose presence had been approved previously by the U.S. Department of Energy (DOE) would not be allowed to accompany him.

"This is not South Africa, this is not Lithuania—the press are a window to the public and they should be allowed to accompany a public official," Luken said.

OTHERS ANGERED

His anger was shared by residents and environmental and union officials who were scheduled to accompany him. They also expressed bewilderment at the abrupt change in policy. Reporters, including members of the Enquirer's staff, have toured the plant many times before, alone and with politicians.

Several representatives of DOE's Washington, D.C., headquarters staff were at the plant Wednesday morning, including Peter Brush, acting assistant secretary for environmental safety and health, who planned to accompany Luken around the plant after Energy Secretary James Watkins declined.

They also refused to meet with reporters. Several hours later, they released a statement from Brush, which said, in part: "It would be inappropriate to turn this senior briefing into a roving press conference all over the Fernald site."

"They've absolutely blown it today," said Lisa Crawford, spokeswoman for Fernald Residents for Environmental Safety and Health, which has fought DOE over increased access to information about the plant's pollution. "What little we gained here has been lost—the barricades have gone back up."

Fernald, 18 miles northwest of Cincinnati, processes uranium as part of the chain of federal nuclear-weapons plants. It has been criticized for numerous environmental problems that range from stockpiled radioactive and hazardous waste to polluted ground water and emissions of uranium dust.

Wednesday's confrontation came as Luken attempted to inspect recently discovered problems, including leaking barrels and pools of contaminated water under buildings.

Luken had been told Tuesday that the DOE, which owns the plant, would not allow reporters to accompany him on the tour. Luken said he would not enter the plant without the media.

Reporters arriving Wednesday morning were met by security guards and escorted without explanation to a trailer a quarter-mile from the plant's main entrance. Several of them evaded the guards and caught up with Luken's party inside the gates, but were denied any explanation for the blanket ban.

Representatives of Westinghouse Materials Co. of Ohio, the plant's operator, were not allowed to speak to the media.

"I don't think this is over," said Luken, who called the DOE staff's behavior "shocking and unprecedentsd." "I don't intend to take 'No' for an answer,"

EARTH DAY 1990

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 5 minutes.

Mr. ALEXANDER. Mr. Speaker, Sunday, April 22, is the 20th Earth Day. This is the day on which the Nation comes together to focus on the environment, and the issues of human habitation on Planet Earth.

Arkansas is "The Natural State." In areas as diverse as soil and water conservation, public lands stewardship, and wetlands restoration, we are among the Nation's leaders.

The following article, reprinted from U.S. News & World Report, summarizes some of the important environmental issues confronting our Nation and the world in the 1990's.

Arkansas can also lead the way in dealing with some of these issues. One example is the production and use of clean-burning ethanol fuels. Ethanol can help our friends in the Nation's big cities breathe air that isn't poison; it can decrease our dependence on imported oil and foreign credit; and it can provide an economic bonanza to Arkansas farmers.

I challenge all of my fellow Arkansans to come up with other Arkansas answers to the environmental problems mentioned in the article.

LIVING WITH OUR LEGACY

(By Betsy Carpenter)

At Florida Technological University, students put a rusty green Chevy on trial for polluting the air. Finding it guilty, they sentenced it to death by sledgehammer and carried out the execution. It was Earth Day 1970, and with similar acts of symbolism around the country, 20 million Americans assisted at what turned out to be the birth of the modern environmental movement. Now, on Earth Day's 20th anniversary, environmentalism has soaked deep into American culture, and none too soon. The ecological woes of 1970 appear almost provincial when compared with those of 1990.

Today, it often seems that the planet itself is on the verge of physical collapse. On the first Earth Day, citizens were concerned that Lake Erie was dying, that the bald eagle was winging toward extinction, that the highways were strewn with litter and that city-dwellers were breathing in smog. Now, acid rain is killing fish in lakes from New England to the Netherlands. A great hole has been ripped in the earth's protective ozone layer, threatening us with cancer-causing rays. We've destroyed millions of acres of tropical forest, killing off plant and animal species at an alarming rate. Deserts are eating up arable land, and the possibility of dramatic climate change looms large.

Despite this catalog of calamities, however, there is reason to believe the world will be in better shape before Earth Day's 30th birthday. Several broad lessons can be drawn from the past two decades and used to guide future efforts to protect and correct the environment:

Society is capable of reversing environmental degradation if it can muster the political will. Green sentiment has waxed and waned over the years, but there is no doubt that America has made significant progress on the two problems deemed most pressing on the original Earth Day: Water and air pollution.

Cleaning up is almost always more complicated than we originally imagined. The struggle to clean up the country's waterways has shown that often it is the hidden or unknown agent that wreaks the most havoc.

Strategies to prevent pollution are much more effective over all than strategies that attempt to control contaminants. Our successes with reducing lead and DDT demonstrate this unequivocally.

The most staggering of our problems are international and will require a global response. The discovery of the ozone hole and the possibility of global warming bring home the fact that pollution knows no national boundaries.

By all accounts, America's political will to clean up is on the rise. According to a recent Gallup Poll, fully 79 percent of people age 30 to 49 now call themselves environmentalists. Two out of 3 Americans say that pollution is a "very serious threat," according to a Roper Poll. And people are joining environmental groups in droves. In the past 15 years, membership in groups like the Sierra Club and the Nature Conservancy has surged from 4 million to 12 million.

These spiraling numbers reflect a radical change in the public perception of nature and how it should be treated. Where once nature was viewed as powerful, capricious and teeming with life, today it is invariably described as fragile, delicate and sensitive. Says Environmental Protection Agency chief William Reilly, "As a little boy, I was brought up to believe I was at the mercy of nature." Now, he says, "there's a recognition that we can wreck the planet."

This remarkable shift in public opinion is evident all around the world. In October, 1988, 300,000 Lithuanians signed a petition against a nuclear power plant. In Poland, outrage over the environment—80 percent of the Vistula River is too filthy even for industrial use—helped fuel last spring's revolution. Norway has volunteered to contribute 0.1 percent of its gross national product (equivalent to about $64 million) to an international climate fund if other countries join in. And so far, more than 40 nations have approved the Montreal Protocol on protecting the stratospheric ozone layer.

The world has not always wreathed itself in green, however. Twenty years ago, the Earth Day protests and festivals had a distinctly countercultural flavor. In Washington, D.C., marchers crowded downtown streets, singing, "All we are saying is give Earth a chance." In West Virginia, demonstrators dumped litter on the Clarksburg courthouse steps. Emphasizing the environmentalists' place on the political fringe, one Georgia politician argued that it was no coincidence that Earth Day fell on Lenin's birthday.

But soon after, the environmental movement picked up respectability and power as many of the demonstrators who marched on Washington stayed and began building the green lobby. During the early 1970s, Congress tackled almost every environmental ill. A raft of legislation called for setting air-quality standards, cleaning up rivers and lakes, protecting coastal areas, regulating pesticides, safeguarding drinking water and protecting endangered species.

Just as it was beginning to gain momentum, however, the environmental movement lost steam. When the energy crisis threatened to stall the U.S. economy in the early 1970s, green concerns quickly took a back seat. Indeed, by 1974, President Ford had proposed an acceleration of his administration's leasing program for offshore gas and oil drilling. Such environmental backsliding was even more pronounced during the '80s. Walter Mondale was fond of noting that Reagan "would rather take a polluter to lunch than to court," and, indeed, the probusiness, antiregulation Reagan administration worked overtime to roll back early green victories.

Despite the wavering of political will during the 1980s, the past 20 years have produced some very tangible accomplishments. Among the most visible and quantifiable is the expansion of protected areas. Since 1970, federal parklands in the United States—excluding Alaska—have jumped 2 million acres to 26 million. In Alaska alone, 45 million additional acres have been protected, bringing that state's total to 54 million acres. Also, the extent of the waterways included in the National Wild and Scenic Rivers System has increased by more than 12 times, to 9,281 miles.

America's most notable success has been water cleanup. In the late 1960s, water pollution was pervasive. Sewage-filled lakes, like Michigan's Lake Lansing or Bugle Lake in Wisconsin, were choked with algae; beaches were posted against swimming and shellfishing. And hundreds of rivers were dead or dying. The Nashua, which runs through New Hampshire and Massachusetts, was so thick with sludge from paper mills that local folks used to describe it as "too thick to pour and too thin to plow." Like other rivers edged with mills, it ran dif-

ferent colors depending on the dye lot of the day. Public outrage over water pollution crystallized on June 22, 1969, when an oily slick on Ohio's Cuyahoga River burst into flames and floated downstream through Cleveland.

In 1972, Congress passed the Clean Water Act, requiring states to whip their rivers into "fishable [and] swimmable" shape by 1983. The law effectively tightened the emission of sewage and industrial chemicals from discharge pipes into U.S. waterways and, as a result, improvements came quickly. According to the Association of State and Interstate Water Pollution Control Administrators, today, 47,000 miles of rivers and streams and almost 400,000 lake acres are appreciably cleaner. In fact, some urban rivers, such as the Potomac near Washington, D.C., which in the 1970s often had greasy mats of debris floating on the surface, are now safe for swimming most of the time.

Hidden polluters. But cleaning up the waterways has proven to be infinitely more complicated than anyone originally imagined. As so often happens controlling one source of pollution exposes others that have been ignored or considered negligible. Within a few years after the Clean Water Act cut emissions from discharge pipes, experts realized that chemicals washed into waterways by runoff after a rainfall—"nonpoint sources"—were formidable contributors to the water-pollution problem. Indeed experts now estimate that two thirds of stream pollution comes not from villainous-looking industrial sources but from invisible nonpoint sources, most of them agricultural. Experts estimate that nonpoint sources will be particularly troublesome in the drive to clean up estuaries and coastal waters. There, the primary pollutants are sewage and the water that sheets off streets, which often is loaded with oil, salt and rubber.

Experts have also discovered belatedly that wetlands and marshes, once considered little more than breeding grounds for mosquitoes and other pests, are actually a valuable ecological resource. Among other things, they help control shoreline erosion and act as filtering systems to purify water, and they are disappearing at a rate of 450,000 acres a year in the United States.

Another anitipollution effort that received a boost from Earth day and has met with at least modest success is the drive to improve air quality, although gains have been uneven because air pollution encompasses a stew of chemicals. Levels of lead, which causes serious health effects, including mental retardation in children, have dropped precipitously, due largely to the introduction of lead-free gasoline in 1975. Between 1970 and 1988, total annual lead emissions plunged by 96 percent. Airborne dirt, dust and soot also dropped by about 63 percent between 1970 and 1988 as a result of stiffer emissions controls and cleaner fuels.

But on other air pollutants, the record is not so good. Sulfur oxides, which are major contributors to acid rain, fell by just 27 percent between 1970 and 1987. Ozone, the most harmful component of urban smog, actually rose by 2 percent over the last decade. Carbon monoxide, an odorless, poisonous gas produced primarily by cars, has dropped steadily, but 44 urban areas continue to have levels that exceed federal standards.

The track record on air pollution underscores the hard-earned lesson that real achievements come not from tacking on control devices but from simply eliminating the pollutant. The levels of lead in children's blood, for example, have fallen by more than one third because the United States was able—by legal declaration—to prohibit leaded fuel and thus prevent lead pollution. By contrast, we have had less success with ozone and carbon monoxide because, though legislation required that catalytic converters be installed on cars and trucks to control emissions, the number of vehicles on the road has nearly doubled in the past two decades and the typical car is traveling more miles per year.

Global action. As environmentalism enters its third decade, it is increasingly clear that no one country working alone can solve ecological problems. First, pollution does not respect international borders. In fact, in densely populated Europe, the transboundary problem is so severe that West German Environment Minister Klaus Töpfer argues that spending one deutschemark in East Germany on anti-air-pollution measures does more for the health of the average West German than spending five times that amount at home.

Second, the developing world will be responsible for an increasingly large share of the world's total pollution burden. At bottom, economic activity generates pollution, whether it is acid rain, toxic waste or smog. Accordingly, it is industrialized countries that currently spew out the lion's share of contaminants. But experts agree that the highest rates of economic growth in the next few decades will occur in the less developed countries. If they do not develop in an ecologically sound fashion, the increased pollution they produce could completely overwhelm any cuts made by industrialized nations.

Building international cooperation is proving to be difficult, however. Pollution prevention and control are expensive (at present the United States spends about $100 billion each year on pollution reduction) and are therefore seen as a luxury to countries that are struggling with massive problems like famine, epidemics and widespread illiteracy.

First World countries cannot ask their poorer neighbors to forestall economic growth, but they can encourage green alternatives to quick and dirty development. If the international community does not want China to burn its huge reserves of coal, for instance, it might offer to help that country design and build new energy technologies—solar-thermal power plants, for instance, which collect sunlight to produce steam that spins electrical generators.

The job of cleaning up the planet is daunting, but it is not impossible. In all likelihood the world has not yet passed the point of no return. Twenty years ago, many thought that the solution was to eschew technology and get back to nature—retreat into the forest, build a log cabin. Technology has helped get the planet into this mess, but it also can help find a path out. After all, a fuel-efficient furnace is a lot easier on the environment than a wood-burning stove.

FRED FUNG: BAY AREA INSTITUTION, RETIRES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, one of the great restaurateurs of the San Francisco Bay area, Fred Fung of Trader Vic's, has—I am sad to say—decided to retire.

As Fred says, after 40 years, "I've decided to hang up my chopsticks—spend time with Elsie—and fish."

Fred has been a true friend to thousands of people throughout the bay and has served as one of the greatest hosts I've ever met. I've known Fred for over 33 years—a third of a century now—and he has been a friend to my entire family and has shared in many of our special evenings of birthdays and other celebrations.

Fred Fung has also worked with the Asian community and has helped promote equality and advancement for innumerable families.

I know I join thousands of Californians in wishing him a great retirement and more fish than he can count.

As Fred says, it is not really goodbye, but until * * *.

IN RECOGNITION OF DR. JIM C. BARNETT UPON BEING ELECTED AS PRESIDENT OF THE SOUTHERN MEDICAL ASSOCIATION.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. PARKER] is recognized for 5 minutes.

Mr. PARKER. Mr. Speaker, today I stand in the Halls of Congress, in the people's chamber, to speak in honor of a great citizen of my district, Dr. Jim C. Barnett.

Dr. Barnett was elected president-elect of the Southern Medical Association during the First General Session of the Association at its 83d Annual Scientific Assembly held in Washington, DC.

The Southern Medical Association is a voluntary association of physicians with a membership of over 50,000 throughout its territory of 16 Southern States and the District of Columbia, the sole purpose of which is to foster the art of science and medicine.

Dr. Barnett was born in Edinburg, MS and is now a family practitioner and surgeon in Brookhaven, MS. He graduated from Tylertown High School, and after attending Millsaps College in Jackson, MS, and Tulane University in New Orleans, LA, entered the University of Mississippi School of Medicine. Dr. Barnett received his M.D. from Southwestern Medical College, Dallas, TX and later served as flight surgeon in the U.S. Navy.

As a member of the staff of King's Daughters Hospital of Brookhaven, Dr. Barnett served as chief of staff. He served two terms as president of the South Central Medical Society; is a past State president of the Flying Physicians Association; is a member of the State Board of Mental Health, serving twice as chairman of the board, and currently serves as a member on the council on legislation of the Mississippi State Medical Association.

Since joining the Southern Medical Association in 1972, Dr. Barnett has served as councilor for the State of Mississippi; member of the executive committee of the council; vice-chairman of the council; chairman of the council, and has just completed a term as vice

president of the Southern Medical Association.

Mr. Speaker, I am proud to say that Jim Barnett is my friend and to have this opportunity to recognize this great doctor and citizen from Mississippi. I am confident that the Southern Medical Association will benefit from his leadership just as we, in Mississippi, have benefited from his commitment to excellence.

REMEMBERING THE KATYN FOREST MASSACRE

The SPEAKER pro tempore (Mr. CHAPMAN). Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, 50 years ago, in a remote woods of Eastern Europe called Katyn, the hopes and the future of Polish democracy disappeared into a mass grave. The best and the brightest of the officers of the Polish army and the intellectual leaders of that unfortunate country were brutally and systematically murdered.

In the titanic clash of two of the most infamous dictators in the history of the world, Poland was crushed, first by Stalin and then by Hitler. There were so many crimes—so many murders—so many horrific acts—that civilized people recoil from the memory of those dreadful days.

But we cannot forget; we must not forget. By keeping alive the memory of those millions who suffered and died at the hands of Stalin's NKVD and Hitler's Gestapo, we can assure the world that it will never happen again.

We will remember, and we will learn. But we have to learn the truth, not the lies of propaganda machines.

In 1951, this House determined to discover the truth about Katyn forest. Those who were guilty had to be exposed. The horror of the deaths of 15,000 Polish officers had to be recognized. And the truth emerged.

The select committee established by House Resolution 390 of the 82d Congress was charged to conduct a full and complete investigation of this barbarous crime. Appointed as the chief investigator was my good friend, later a Member of Congress and a distinguished Chicagoan, Roman Pucinski. That select committee did its job. It discovered the truth. Even though a war had been fought and won, and battling armies had crossed and recrossed the land, and 10 years had passed, that select committee discovered the truth and published it.

That truth, hinted at, denied, covered up, and ignored, was that the infamous NKVD troops of Josef Stalin were responsible. That was not a popular truth. They were our World War II allies. "Good Old Joe" dined with our President. We were on the same side. But the 15,000 Poles were dead. And Stalin killed them. That is what our select committee found.

Mr. Speaker, this report helped set the stage for the unbelievable changes now taking place in Eastern Europe, because it exposed the Stalinist government as proven liars and murderers. In the last Congress, I had the 1951 report reprinted to keep that truth alive, and I believe that it is just as important today as it was then.

Only this year, and only after revolutionary upheavals within the Soviet Union, has that government been willing to accept responsibility for that terrible massacre. Only this year have the Soviet people been able to hear the truth. Only after 50 years of denial.

The nations of the world can never begin to repay Poland for the loss of the flower of its youth. What possible reparation can compensate for the loss of a whole generation? We can never adequately repay the families of those brave young men. What Stalin did is unforgivable, uncompensable. The new leadership of the Soviet Union will have to decide for their country what could possibly be done for Poland as national atonement. Now, on the 50th anniversary of the massacre, all Americans should know that the truth has prevailed, and all Americans should now commit ourselves to take every measure to assure that it will never happen again.

CONGRATULATIONS TO MARTIN LUTHER KING HIGH SCHOOL BASKETBALL TEAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. HAYES] is recognized for 5 minutes.

Mr. HAYES of Illinois. Mr. Speaker, it is with a great deal of pride and admiration that I rise today to pay tribute to the Martin Luther King, Jr., High School's boys basketball team. King High School is an inner city school located on the south side of Chicago in the First Congressional District, the district that I proudly represent. For years King High School has led the way in Chicago's public league basketball program, producing many fine athletes and scholars.

The King High School boys basketball team recently captured the Illinois State Boys Basketball Championship. In addition to being State champions, USA Today and Scholastic Sports America, an ESPN cable network program, has named King their National Boys Basketball Champions and with a record of 32 to 0 who would argue.

I commend coach Landon Cox for his 245 to 29 career record at King High School. I also commend him for his diligent work in assisting numerous basketball players in gaining admission to prominent colleges and universities.

Coach Cox in cooperation with King's exemplary faculty, student-body, and community supporters have instituted a first-class basketball program. I am especially honored to stand here today because the program at King High School balances athletic ability with academic excellence. These youngsters are not only slam-dunking and three-sixtying with the basketball, but they are also successful students. Their dedication and tenacity are an inspiration to our community, and to our Nation.

□ 1350

A REVIEW OF COMMUNIST ATROCITIES

The SPEAKER pro tempore (Mr. CHAPMAN). Under a previous order of the House, the gentleman from California [Mr. DORNAN] is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, I want to continue a theme I spoke about this morning during my 1-minute speech about the savagery of communism after the Stalin-Hitler Pact was signed in the summer of 1939. I will repeat what I said in my 1-minute speech this morning, personalizing the massacre in the Katyn Forest in the name of one Polish Army major. This name is pretty easy to memorize. It is Adam Solski. Maj. Adam Solski.

The greatest killing in all of recorded history—World War II—started 8 days after the signing of the Hitler-Stalin Pact on August 23, 1939. What Stalin got out of the pact was half of Poland and the three Baltic nations, which had been flowering under two decades of freedom since World War I—Estonia, Latvia, and Lithuania. Of course, that blood pact, negotiated by Von Ribbentrop for Hitler and by Molatov for Joseph Stalin, came back to haunt the Soviet Union on June 22, 1941 in Operation Barbarossa when one of Hell's Legions, the Nazis, attacked the other of Hell's Legions, the Soviets. Stalin had run a regime of terror, bloodshed, horror, concentration camps, and Gulag camps. Any other leader in all of history would have fallen or been assassinated but Stalin managed to survive and flourish. By June 1941, or by the beginning of the fall of 1941, millions of Russian citizens, particularly in the Ukraine, had been killed, entire armies had been kidnaped, and hundreds of thousands of Soviets had been taken prisoner, all of them eventually to die under the cruel hands of their Nazi tormentors.

Let me return to the Katyn massacre.

The specific massacre in the Katyn Forest I have known about all my adult life, thanks to my mother and father who carefully tutored me in the horrors of Stalinism and communism in general as soon as these facts became known to the West in the middle of World War II.

Germany, to deflect attention from what they were doing—at the same time they were setting up the major killing camps—invited Swiss Red Cross people to come into the Katyn Forest which they had overrun after they turned on Stalin to look at the massacre of over 4,000 Polish Army officers

and high-ranking politicians, some women among them, major police officers and police commanders from cities across Poland. And here are the words in his last diary entry of Maj. Adam Solski. He stood among the pines of this Katyn Forest with about 100 fellow officers. You cannot murder 4,000-plus people without breaking them up into groups of at least 100 so you can overwhelm them with your firepower. He was writing hastily in a small pocket notebook. He dated it 9 April, and it was 1940, of course. I quote now directly from this dead Polish officer's diary.

They brought us somewhere in the forest. Here personal search. They took away my watch. Time, 6:30 a.m. I was asked for my wedding ring. Took my rubles, my belt, and penknife.

That is the last entry in his diary.

Like the majority of the other murdered victims which amounted to almost 50 percent of the entire officer and NCO corps of the Polish Army, overrun now from both directions, the Russians took the Poles' overcoats, what they call great coats, thick wool coats with high collars, and they pulled up the back of the coat, pulling it up over the shoulders and bending it up over the head. This incapacitated the arms, which were already bound under their coats. Then the Russians would fire a single bullet from a German gun into the base of the skull through the back inside of the coat which is now up over their heads, and then dumped the dead in mass graves which the conquering Germans discovered and invited the Red Cross in to look at. The Swiss Red Cross said this was definitely a Soviet atrocity.

The West was sort of deaf to this because we were now allied with the Soviet Union. As Churchill had put it, he would have made a deal with the devil himself to overcome the horrors of Nazism across occupied Europe and that is exactly what we did. The irony was that only 5 years after this massacre, in the German city of Nuremberg, where the war crime trials were going on, we had a tacit agreement with the Russians to leave the Katyn Forest massacre off the agenda. It was sort of up in the air, sort of typical Communist nonhistory, and to our shame we went along with it.

Now, 50 years to the month after this massacre, we now have the government in Moscow—this is a hopeful sign for the future—admitting to this horrible mass slaughter which began a series of horrors, most of them on the part of the Nazi government, that are without parellel in all of history.

I want to read a little bit from an article. This is where I quoted the diary from. It is by J.K. Zwadney. He is a professor emeritus at Claremont graduate school at Pomona College in California. He goes on to write about this Katyn Forest massacre.

In 1943 Major Adam Solski's diary was found on his body. He had been shot in the head, 1 of 4,400 bodies in 8 mass graves, all murdered by a single shot in the head. On Friday—

That is just this last Friday

the Kremlin admitted the Soviet Union attacked Poland on September 17, 1939.

Hitler had started his attack 17 days earlier, on the first of September.

They captured 250,000 Polish soldiers, including general officers, and they placed them in 138 camps and prisons.

A quarter of a million people is a lot of human beings.

How many of them survived is difficult to establish even to this day. However, we do know that about 14,500 of them were in fact murdered, among them 8,300 to 8,400 officers. We are beginning to gain some precision now in numbers as Polish survivors are finally willing to speak out, now that they are out from under the direct heel of communism.

As more information becomes available because of this Kremlin admission, there will be even more questions. All of the murdered were originally imprisoned in three camps. By the way, I hope that some American students out there among the million people who watch these special orders on C-SPAN everyday, will take notes on this and do research on it. It would be a good topic on which to write term papers, whether an eighth grade paper, junior high, high school or college project. I hope our students will write and learn about this Katyn Forest massacre.

The first camp is Kozelsk. The second camp is Ostashkov. And then Stero Bielsk.

Where are the graves of the rest of the murdered 10,000 people, and who specifically murdered them, About 4,400 bodies, as I mentioned, were discovered in the mass graves of the Katyn Forest, which, by the way, is no longer in Poland. At the end of World War II, in a rush to seek some sort of a peace, we sold out so much in the Crimean area of Yalta. Churchill was there with a broken heart, and Roosevelt was going to be dead within less than 2 months. This was at the end of February, and Roosevelt died on April 12, 1945. We did anything to placate the world's greatest mass killer, Joseph Stalin, who sat there at the table with a dying Roosevelt and a heartsick Churchill. By doing so we continued the atrocities of World War II.

□ 1400

By the way, Mr. Speaker, my source for identifying Joseph Stalin as the greatest mass murderer, the greatest first degree murderer, in all of recorded history is none other than the dualtitled general secretary, slash president, of the Soviet Union, Mikhail Sergeyevich Gorbachev.

In August 1988, in my seventh or eighth trip to the Soviet Union, I had come to Moscow after having ridden the trans-Siberian railroad from Mongolia all the way across to Moscow. In Moscow I was informed that I had missed a television show called "Reformation"; I think that was the title, by 1 or 2 days. In that program Gorbachev told his nation, all 11 time zones of it, all 15 so-called republics, that Stalin had murdered more people than Adolf Hitler. That is not hard to accept since Stalin ruled with a bloody heel for 29 years, whereas Hitler's Third Reich, thanks to the United States of America's entry into the war, lasted 12 horrible years—not the thousand years he said it would. Stalin, I repeat, had 29 years.

Who is the second greatest killer in all of history? Hitler—Hitler and Stalin killed more human beings than Genghis Khan, Tamerlane, Napoleon, and Julius Caesar put together. And not all of these were swift deaths; some of these were agonizing deaths. People died in gulag camps from torture and deprivation that the human mind cannot even comprehend. Put all of these past dictators together, and they do not equal these two killers.

The Stalin-Hitler Pact of 1939—I am going to give Stalin, the bigger killer, top billing—caused the crushing of Lithuania, Estonia, Latvia, and the ripping apart of Poland. We are still dealing with the results of this pact today so I want students to research these camps and what transpired as a result.

Now we find the 4,400 bodies in the Katyn Forest. These were prisoners from the first camp I mentioned, Kozelsk. Most of them were officers. Some of the murdered men were generals. Talk about violating the Geneva Convention. From sergeants to generals, men were murdered like dogs in the night in the woods of the Katyn Forest area. Again this area is now part of the Soviet Union. The east side of Poland was ripped off, a third of the entire country, by Stalin. The Katyn Forest moved, from Polish woods into a part of the Ukraine not too far, I believe, from the old Polish city of Smolensk.

Medical examinations established that most of these officers were murdered in April and May 1940. That is when the Soviet Union was at peace and collaborating with Adolf Hitler, the world's No. 2 alltime killer. The murderers were personnel of the Soviet security forces, the NKVD.

Now, Mr. Speaker, the Soviet secret police has gone through four titles. First, there was the Cheka, run by Felix Derzhinski. The KGB headquarters is on Derzhinski Square in Moscow. Stalin's and Lenin's main killer was Derzhinski. He founded the Cheka, the secret police, and pat-

terned it after the czarist secret police. Then it became the NKVD, four letters, then the NVD, and now the KGB. No change in officer corps or leadership during these four progressions and title changes. So it was the predecessor of the KGB which perpetrated this massacre. The history of this is locked up in the KGB archives.

Mr. Speaker, we have no rumors of anybody trying to burn these archives or suppress history. But that does us little good unless the Soviet authorities let people know the truth.

The cause of death in each instance: A shot in the back of the head from a German revolver to make it appear the work of the Germans.

What about the Polish prisoners from 1939 who went to the Soviet Union? Where are the Polish prisoners from Ostashkov? There were about 8,500, and they disappeared in the spring of 1940. There seem to be two versions of their fate; No. 1, that they were evacuated in small parties from that camp via stations; these are railroad stations: Bologoje, and Wiazama, and possibly Kalinin. You see that name appearing in the press today, Kelinin. Then the traces vanish.

Or theory No. 2, and get this one. Get the horror of this. Forceably boarded onto two barges, which then were subsequently towed out into the White Sea and deliberately sunk miles from shore. Now in those Baltic waters are no little wood bores and spores that you find down in the Mediterranean or the Caribbean that eat up old wrecks. This is why the Swedish historians were able to bring off from the bottom of the harbor in Stockholm, and I visited this ship, the Wasa, sunk in 1633. Two-thirds of the hull was brought up, part of it rebuilt, and it is kept in a constantly humid room as a living maritime museum. These barges are in cold enough water at the bottom of the Baltic that we may someday find evidence of this atrocity.

Just think of the greatest maritime disasters and all loss of life. The *Eastland* sunk outside of Chicago and 800–900 people died. The *Titanic*, just over 1,500, and the newspapers in those days, with a more poetic sense of eternity, would say, "Souls lost at sea." The H.M.S. *Hood*, sunk by the *Bismarck* with one gunshot right down the main funnel into the main magazine, blew apart. It sunk in less than a minute. Loss at sea: 1,500.

In the case of the Polish prisoners there were several thousand, maybe 4,000 people, 2,000 on each barge, jammed together shoulder to shoulder, on these barges. This is worse than we treat cattle. Imagine the scene when it became apparent that they would be deliberately sunk at sea. Imagine the thousands of bodies struggling to survive, souls lost in the Baltic. Such is the horror associated with the bodies we found in the Katyn Forest, all admitted to last Friday.

Where are the Polish prisoners from Stero Bielsk? There were about 4,000 of them. They also disappeared that same spring of 1940. Again two versions.

Version No. 1: that they were evacuated from the camp via Carkow. Again the traces vanished near a place called Dergachi, and, No. 2, that they were also sunk along with the Ostashkov group out in the White Sea. So, there could be over 8,000 people drowned deliberately at sea, a phenomenal war crime that we were not allowed to know much about at the end of World War II because of our complicity, our arrangement with the Soviet Union. By that time the Soviets had millions of people starving to death in gulag camps. There were crazy attempts to build railroads north out toward the Arctic Sea following some rivers where tens of thousands of workers froze to death, starved to death. The half-finished raillines are still there today with the rusting railroad engines and, in some cases, the fully completed but now rotting railroad stations.

All the experiments with human lives which took place under Stalin continued, but to a lesser degree under all of the Soviet dictators, right up to, and including, Mr. Gorbachev. To his credit, he has shut down all of the political prisoner camps out in the wastes of Siberia.

□ 1410

Back to the Katyn Forest. Where are the rest of those murdered from Camp Koszelsk? The exhumation at Katyn took place in 1943. I mentioned that the Germans, blood all over their hands, were trying to create a good image for themselves, which is why they brought in the Swiss Red Cross.

How many details remain unknown? How many graves are there in the Katyn Forest? It is still not totally excavated because now, as I said, it is in the so-called Republic of Ukraina, U.S.S.R.

How many bodies are in grave No. 8? That is a fruitful area for research. It was only partially explored by the Germans. After all, they had other duties on their hands. They had to start building the six exterminating camps inside Poland. This was when they started grisly business of murdering 12 million, 6 million of them the Jews of Europe. About 4 million Jews were killed at one double camp complex, Auschwitz-Birkenau alone. I visited that in the summer of 1988 on my way out of the Soviet Union with my son, Mark. We rented a car in Warsaw and visited all six death camps. These are not concentration camps where you concentrate people and maybe starve them to death or shoot isolated prisoners or kill hundreds for madeup offenses against the camp commandants. These six camps in Poland, going clockwise, were Treblinka, Sobibor, Belzec, Auschwitz-Berkenau. Auschwitz-Berkenau was 10 times bigger than the mother camp of Auschwitz. Finally circling back clockwise to Warsaw at night we visited Kelmo. These six camps alone accounted for over 80 percent of the European Jews that were slaughtered. So the Germans were one hell-bound group of people to be calling in the Red Cross. But the fact that it was the Nazis who exposed the crime should not have diminished the importance of the Katyn massacres after World War II was over. It should have been investigated, particularly when we had to sit with Stalinist officers on the Nuremberg trials condemning properly determined war criminals to death. Here were people with blood on their hands condemning Nazis to death. These Stalin Communists were equally as horrible and were torturing people in the Gulag camps of the Soviet Union. At the very same moment the Nuremberg trials were going on.

What happened to the six Polish women who were in Camp Kozelsk? The body of only one was found in all of the mass graves exhumed to this date. In fact, there are many other important questions that can only be answered by the Soviet Government.

Where are the military chaplains? There were many of them. It is known that they were removed from the camps by Soviet authorities before Christmas, 1939. Now, imagine, Poland is overrun at the beginning of World War II, September and October 1939. People begin to disappear into the Soviet Union at Christmas and then the Katyn Forest massacres happened 4 months later in April. Only one Catholic priest, shot in the head like the rest, was found in the Katyn Forest. How did the rest of all the other chaplains eke out their days as captives of communism?

Most of us, all of us maybe, will never know until our death day when we ask for the knowledge of eternity and a loving God. What happened to those heroes, who like most heroes in all civilization die unknown to their fellow men and women.

Where, for example, is Maj. B. Steinberg. I wish I knew what the "B." stood for. Where is Major Steinberg? He was the chief rabbi of the Polish Armed Forces, who was taken from Camp Sterobielsk in December 1939.

Dr. S. Schochet identifies 262 of the Polish officers of Katyn as of Jewish origin.

We still do not know who gave the direct order for the execution. Was it Joseph Stalin? Was it his then head of Secret Police, Lavrenti Beria? Remember who Beria was? He was the one who when Stalin died was smiling, leaning over his body in the Kremlin.

Then Stalin let out a death rattle and, bury the thought, it was as if Stalin was still alive. Suddenly Beria went from smiling at the death of his mentor to groveling and kissing his hand. "Oh, Joseph, Joseph," for fear Stalin would come back to life. Mercifully for the world, on March 5, 1953, Stalin did not come back to life and Beria was probably murdered shortly thereafter.

Here are names I am not familiar with, other Soviet murderers, W.N. Mierkulow; L.F. Rajchman; W.N. Zarubin. That last name is in quotes because even the historian, Dr. Zawadni, is not sure of the spelling Zarubin.

These were the elite officers of the KGB predecessors, the NKVD. If they were not responsible for the direct order for the executions, they were probably involved in the planning of it.

Let us face it, no lower ranking Soviet Communist officers are going to put bullets into the heads of Polish general officers in captivity when some of their own general officers, dozens of them, are being knocked off by Stalin. General officers are not excuted by even field grade officers without orders all the way from the Kremlin.

Now, who were these executioners? According to Dr. Zawadni's information, after the mass execution, there were orders and distinctions awarded—do you know what we are talking about here, folks? Medals. You know how big the Soviets are on medals, "Hero of the U.S.S.R.", hero medals, big red stars hanging on red ribbons, hanging from gold bars; orders, medals, distinctions were given to personnel participating in what they called a "Mission."

Soviet historians should look at the list of decorated NKVD officers from that period. Then we would know who carried out this mission of horror and bloodshed.

The list of names may overlap with the list of murderers. Maybe some other NKVD murderers were getting other decorations for that period in the spring of 1940.

Now, here is someting for you young men and women who want to research this further. Dr. Zawadni has written a book with a poetic title, a haunting title, "Death in the Forest." It cites 43 names of NKVD personnel who planned and carried out the massacre.

The book is "Death in the Forest." I will be getting that book from the Library of Congress this afternoon.

Dr. Zawadni writes:

> It is deemed necessary on behalf of civilization and justice that the new Polish government should initiate the first full official government inquiry, or even better, create a tribunal to inquire into the responsibility and the circumstances of the death of 45 percent of the Polish officer corps of 1939

A government based on justice, and I believe the current Polish Government now is, has a moral obligation, a legal obligation, and just as importantly, a political obligation toward all freedom loving people in the world to ascertain the truth, to establish responsibility, to demand a penalty for the murderers and to seek financial compensation for the thousands of bereaved families.

I am going to be contacting this week or what remains of it Dr. Zawadni to ask him to please fly to this Capitol, and I will get a room in this beautiful building built for freedom and ask him to educate as many Congressmen and women on both sides of the aisle as he can and try to circulate excerpts into what we call "Dear Colleague" letters of his book, "Death in the Forest."

The most recent statement of a Soviet scholar, a courageous lady, Natalia Lebedava, appeared this last March 25, 1990, in the Weekly Moscow News. It cuts through the ambiguity, and here is what she says about placing the guilt:

> Examination of the materials suggests that the Polish officers and policemen—

Remember, I said hundred of chiefs from all villages and cities around Poland—

> and these policemen were shot in April and May of 1940 by NKVD operation groups.

That is from a Soviet historian and scholar with the courage to be put in print in Moscow just last month.

□ 1420

This was further confirmed last Thursday by Radio Moscow and by Moscow newspaper reports based on previously secret wartime archives. This is why I am not a pessimistic conservative frozen with some paralysis who believes these events are a clever plot by Gorbachev to retrench communism or to eventually retake Europe in a harsher way. I know that fantastic spiritual forces have been unleashed in the Soviet Union and its 15 so-called Republics, and that liberation has taken place in Europe. For all of their horrible crimes, Communists are still in power in Romania. In Czechoslovakia, the two parts of this artificially created country are still nervous about one another. They are trying to come up with a hyphenated name now so that the Slovaks, in the East, don't feel that they are dominated by the higher numbers of the Czechs. Poland is still trying to fight out of the 50-year destruction starting with World War II, and going through another four and one-half decades of communism, 50 years of the destruction of a mercantile heritage. They do not even know how to retail market goods anymore. Thank God some of their farmers were able to cling to their farms unlike the Ukraine, where Stalin deliberately killed 5 to 15 million kulaks who owned their farms and resisted collectivization under a communism that still breathes in China, in those 15 Republics, in Albania, in North Korea, in all of Communist-conquered Vietnam, in Laos, in Cambodia, and Nicaragua.

I am going down with Vice President QUAYLE Thursday, a week from today, to watch the heroic Dona Violeta Chamorro sworn in as President of Nicaragua, one less Communist hell story on the face of the Earth.

What is today the 29th anniversary of? The anniversary of the third day of the Bay of Pigs invasion. It was on this very day 29 years ago that Pepe, the code name of the beach commander standing in the waves and the surf, hand-to-hand combat all around him, calling to America through the CIA operative, "Where is the air cover? For God's sake, give us the air cover. We are being hit with tanks, planes, jet planes are strafing the beach." These were two T-33 trainers we had given to Cuba, and Castro put .50-caliber machine guns on them. "Help us. We are dying in the water in hand-to-hand combat." But young John F. Kennedy, less than 3 months in office, turned his back on the Bay of Pigs. He tried to make up for it years later in the Orange Bowl when he held up the flag of the 2506 Brigade and said, "Someday this flag will fly again over a free Cuba." Well, it will fly over a free Cuba in this decade, thanks to the great things that are happening. As a result of the Reagan and Bush policies.

But it does not mean that we should forget the Nazi-Stalin horror and terror stories that went on during and after the Second World War and right up until this current time. Now this does not mean that I do not wish Gorbachev well, but he is never going to succeed in trying to make communism work. He is eventually going to have to turn Lithuania loose, along with Latvia, Estonia, and probably even Armenia.

At least Germany now, with East Germany joined, has apologized to the Jews of the world, has apologized in specific to Israel. Now the East German Communists, out from under communism, are going to pay reparations to Israel, and accept the full guilt as their West German brothers have done for four decades for their horrible part in World War II.

Look at this from the Wall Street Journal of April 19, today. It says, "Communism equals fascism." I will be reading this cold turkey:

> Many scholars have noted that the fascism of Hitler's National Socialists resembled communism more than it did any form of conservatism. Now the Czechs have linked communism with fascism as a matter of law. Tomas Sokol, the Prague public prosecutor, threatens to outlaw the Commu-

nist Party under an existing statute prohibiting fascism.

Poetic justice, folks.

Mr. Sokol says communism and nazism are movements aimed at the destruction of all democratic rights.

That is a quote.

Destruction of all democratic rights, through terror and social demagoguery. East Europeans understand these ideologies, having had to live under both.

But I think my fellow colleagues and fellow Americans, Mr. Speaker, will have trouble understanding that we have more apologists for communism in the United States of America and Canada and some NATO countries than there are left in any of the six countries that are moving slowly toward full freedom in middle Europe. Marxist professors and other apologists all over the United States are saying that what has happened in Eastern Europe rids us of the worst face of communism, the harsh Stalinist face. They claim it is like a reformation, and communism can come back more pure than ever. But this disregards that communism and fascism are twin brother ideologies of terror and horror. One is socialism based on race, nazism, and the other is socialism based on class, communism. They were rivals, not enemies. As Hitler himself said, "There is more that binds us to Bolshevism than separates us from it." It is a cruel joke of history that both appeared on the world stage at the same time.

Now I want to come to the focus of why I am talking about something that the Soviet Communists have admitted to a week ago Friday. I want to memorize that date. Friday was April 13, Thomas Jefferson's birthday.

On Friday, April 13, Moscow, the Kremlin, the mother wart of communism, admitted to the Katyn massacre. Here is the focus of it: Lithuania today, Estonia next week, Latvia next month or shortly thereafter.

The one thing that the White House, and I do not want to personalize it down to somebody I consider one of the finest Presidents we have ever had in the United States and a personal friend, so I will say the White House, the White House, my friend Mr. Baker over at State Department, the Secretary of State; they must realize that this is a moment in history in which they cannot come up short. We must help these three Baltic nations.

There is a wall of resistance at the White House right now to meeting delegations from Estonia, Latvia, and Lithuania. These three countries have never been unrecognized by the United States of America.

Countries that I used to hold in high esteem like little New Zealand, does in population to Lithuania, Latvia, and Estonia, recognized the Communist conquest of these three Baltic countries, but our Nation never has.

When I arrived in this House, there were two historical facts that I found most of my colleagues did not know, whether they be conservative or liberal, male, female, majority side, or minority side. The first was that the Soviet Union had three votes in the General Assembly to one for every other country in the world. This was another dying Roosevelt acquiescence to the bloody killer, Uncle Joe.

The Ukraine already has a seat in the United Nations. I should not say "the Ukraine"; it is not just a region; it is a country; Ukraine, Ukrainia. If they ever decide to break away, and there is a religious movement starting there, they can say to the Kremlin, "Hey, we already have our seat in the United Nations. We are already a nation recognized with a vote in the General Assembly." Occasionally they even come up to chair the Security Council as a Republic of the Soviet Union.

Also, Byelorussia, which ethnically is about 80 percent Russian has a U.N. seat. This, too, is one of the so-called Republics. The Soviet Union has three seats.

The second fact is that Estonia, Latvia, and Lithuania have always been recognized by the United States. Indeed, we recognize them now as we did for those 20 beautiful years of freedom between the two great catastrophic wars of this century. We have always recognized them as nations.

Right out of the north portico front door of the White House runs 16th Street, which is why we call the White House 1600 Pennsylvania Avenue.

□ 1430

On the righthand side of 16th Street is the AFL–CIO, one of the first buildings in D.C. The Motion Picture Association where Jack Valenti works, a couple of beautiful hotels, including the Hilton, stand nearby. And right next to the Hilton, a stone's throw away, is the Russian Embassy. If you keep driving up 16th Street far enough, you will come to, on the other side from the Soviet Embassy, the Embassy of the Nation of Lithuania. It has been downgraded to a legation because they have been under communism for half a century. But they have always had a living presence in the Capital of the United States on 16th Street.

The Latvian Embassy is less than a quarter of a mile north and one street over on 17th Street, the Latvian Embassy. It has always been there, since the twenties. Never unrecognized as a nation.

I just met with an Estonia hero. They call their legislature a congress, just like ours. It has a formal title, Congress of Estonia.

The head of the Estonian National Independence Party, I just met with him in the Sam Rayburn Room, Tunne Kelam, has finally, as an adult male, been allowed for the first time in his life to travel around the world. He has been circumnavigating the globe, Australia, New Zealand, everywhere around the world, all over Europe. Yet he cannot get an appointment at the White House. He cannot see anybody from the National Security Council. He sees lower name officers at the State Department. I do not even recognize their names. And this man is the chairman, in addition to his other titles, of a friendship unit between the Congress of Estonia and the Congress of the United States of America.

He spoke last night, April 18. Here is the forum announcement for the Institute of Politics at Harvard no less.

He spoke. There was also a woman, Lowrey Wyman, who is not Baltic in ethnic heritage. She is an attorney and a fellow at the Russian Research Center at Harvard University. She was recently a guest of the Lithuanian Government. She is a firebrand for freedom for Lithuania at Harvard.

Mr. Kelam, this distinguished Estonian gentleman, cannot get a hearing at the White House. I will make some calls this afternoon. I do not know what luck I will have.

I did not mention, the Estonian Embassy, they mistakenly moved it to New York. I recommended to Mr. Kelam that he find a broken-down brownstone somewhere in Washington, DC. Leave the legation for Estonia in New York where it moved shortly after the Second World War as a consulate, as a trade center, but get your legation, your Embassy, back here inside the beltway, into the District of Columbia, so that I can take groups of Congressmen from both sides of the aisle and we can go have a little tea and discuss freedom, up 16th Street, over at 17th Street, for Lithuania, Latvia, and wherever Estonia comes.

I recommended that they come up here to Congress, since they do have an entree here, and try and get one of these old broken-down brownstones that has not been rehabilitated into a million-dollar mansion, maybe behind the Library of Congress, the largest library with more works on freedom than anything that has ever been known since the burning of the library in Alexandria. Let them come right up here on Capitol Hill and fight for freedom for Estonia.

Mr. President, I know what a freedom fighter you are and a lover of freedom you are. Every person in every NATO country, every person who fights for freedom for Vietnam, all the people that live in Little Saigon in my district, your day will come, you Vietnamese; they all want Lithuania set free. To you Cubans your day will come. You are already organizing in south Florida. You are already selling

off some of your assets, waiting for the downfall of Castro to go the way of Danny Ortega, his young student, and his brother and the other seven Communist thugs in Nicaragua.

We know you Cuban-Americans are going to fight for freedom. You have your first Cuban-American Congresswoman in this House now. But the first people up to bat right now, to use a baseball term, are the Lithuanians, and then the Latvians and the Estonians. We must fight for the freedom of these three small Baltic nations. They must be at least given the minimal amount of freedom that Finland has had since the Second World War. On March 5 1946, 7 precise years before Stalin finally went to his judgment day, Winston Churchill came to a small college in Fulton, MO, called Westminster. Probably the name of the college intrigued him as a man of Westminster, where he served in the Parliament.

He gave the speech that coined the term "Iron Curtain." He did not even emphasize it. It was one rolling sentence, from Stettin in the Baltic right near the three Baltic nations I am discussing to Trieste in the Adriatic, an Iron Curtain has fallen over the middle of Europe.

Well, only two countries squeaked out from under the Iron Curtain. One was Austria, because we still had a four-power arrangement there, and our American, British, and French men were riding in Jeeps with Soviet soldiers.

And Finland. Finland was given its independence, which has grown carefully over the years.

I asked Mr. Tunne Kelam if my historical assumption was correct that Finland got out from under the Iron Curtain because the Soviet Government and the Kremlin was so psyched out by the heroism of the Finnish people that they just had to let the Finns go because they were so tough?

He said precisely, Congressman. That is the true history of it.

Well, let me close, Mr. Speaker, with a plea to a country that when I say its name I enjoy thinking about their history, back to the Vikings, which is where redheaded Irishmen get the color of their hair, like me. But when I say the name, I think of courage, steadfastness, the only underground in the Second World War not contaminated by communism, one or two, but the only one I know of. That country is Norway.

I like to say the name. I love to visit there. Norway. What a heroic people. A small country, just over 4 million people, about the same size again as Lithuania.

Norway has an unbelievable opportunity. They are considering in their Congress a decision to provide energy to Lithuania. It is night there now but they will take it up again when we are asleep in the morning hours. They will debate whether they should make up for this ugly cutoff of natural gas to Lithuania that Gorbachev has ordered from the Kremlin.

Norway, across the Baltics, a fellow Scandinavian people, can make up this difference. Norway is a country of courage and resoluteness, whose people fought heroically against the Nazi killing machine in World War II. They had a great underground, partially stopping the Nazi development of atomic weaponry because British commandoes and the Norwegian underground destroyed the heavy water plants in Norway in the middle of the Second World War.

I beg you Norwegians, reach out across that tiny little Baltic Sea and help your brothers and sisters in Lithuania. And I guarantee you I will fight with all the breath in me to have your country's leader, the Prime Minister of Norway, stand up here to address a joint session.

I will start a movement to have a joint session of Congress and invite the head of Norway. I was thinking I would do this for Lithuania, to get Vytautus Landsbergis over here, but he cannot leave his country. Because if he left Lithuania, Gorbachev would slam the door shut, and then he would be trying to work from exile, this musician, this 57-year-old professor of music, who has become the heroic figure of this year in the world struggle for freedom.

If Landsbergis cannot stand here and address a joint session of Congress, all of our senior military leaders, all of the nine Supreme Court justices, all of the ambassadors from all of the countries of Asia and Africa and Europe and all the corners of Oceana, if Landsbergis cannot stand up there, then we will invite the Prime Minister of Norway to stand up there as his surrogate and tell us about why tiny countries in the world are important in the greater scheme of freedom for the larger countries in the world.

Please, Mr. Speaker, my closing words, through you, is to Norway: To stand tall and help your Lithuanian Scandinavian brothers in their moment of trial and tribulation as they try to break free from under the heel of a dying and corrupt communism.

□ 1440

ANOTHER TOOL IN THE WAR ON DRUGS

The SPEAKER pro tempore (Mr. CHAPMAN). Under a previous order of the House, the gentleman from Texas [Mr. WASHINGTON] is recognized for 60 minutes.

Mr. WASHINGTON. Mr. Speaker, I rise today to address the House and the American public on a matter of some concern, and I use a special order for the opportunity to do so.

In the very short period of time since I have been a Member of Congress it has come to my attention that we are doing many things to fight the war on drugs. We are busy about the business in this Congress of making more money available for those who have become addicted to drugs in order that they can receive the treatment that they need and deserve. We are going to spend more money in this session of Congress to address the question of additional law enforcement so that our law enforcement officers will have the tools that they need in order to fight their part of the war on drugs. In addition to that, we are putting more money into education so that our young people can learn about the horrors of drugs before they have the misfortune of coming in contact with one of those dreaded persons in our communities who would and often do expose young people to the horrors of drugs.

There are many bills pending in this Congress that address in one aspect or another the general question of drugs and the question of crime in general. I have noticed, however, that most of our efforts with respect to the criminal penalties as they relate to drugs starts with the second and third tier. We spend a good deal of time, and we appropriately should do so, spending money, providing resources for law enforcement in order that we may ferret out and catch the criminal who is the drug dealer.

It occurs to me, however, from what little I know, that the people in the Andes Mountains and other countries where cocaine primarily is produced, and I am speaking specifically of the drug cocaine, do not send those drugs to the United States of America on consignment. The most severe penalty available for a banker who puts the money in circulation that ends up in the hands of a drug dealer, that ends up in the hands of the cartels in Central and South America and comes from banks right here in the United States, the most severe penalty available under current law for those individuals is 10 years' imprisonment and a steep fine up to $1 million.

It seems to me, as Sam Ervin said some years ago during the Watergate investigation, if we want to get to the root of a criminal problem, follow the money. We have failed to follow the money in this Congress and in preceding Congresses. We have failed to follow the money so that we can get at the persons who stand to gain the very most from putting drugs on our streets.

We do not provide adequate punishment for those who start the spiral, those who begin the spiral before it gets to the second tier, to the third

tier and to the fourth tier, because the person at the very top who stands to gain the most is, in fact, the person who receives the least punishment, and thereby we send the wrong signal to the American people. They do not believe we are serious about the so-called war on drugs because they know every time we lock up an undereducated drug dealer there are five to take his or her place. We are never going to rid our country of the scourge of drugs as long as we start at the top, and we consider the top to be those individuals who are selling drugs out on the street.

We do not attempt to get at the people who put the money in circulation. The U.S. Government prints all of the money that is available as legal tender in this country. It is printed right here in Washington at the Bureau of Engraving and Printing. We print all of the money. That money cannot be gotten by an average citizen. That money goes directly from the Bureau of Engraving and Printing to Federal Reserve banks. The money goes from Federal Reserve banks to credit unions, to savings and loans, to State banks and to national banks. One cannot walk up to a window of a Federal Reserve bank and cash a check. They only do business with other banks and other institutions such as credit unions and savings and loans.

It seems to me that every time we print a $100 bill we know the serial number of that $100 bill, we know to which Federal Reserve bank it goes, and ultimately we know to what national bank or State bank that money goes. Yet when that money ends up in the middle of a drug raid, and it is still in a bank wrapper with millions and millions of dollars of sequentially numbered and serialed $100 bills, if we trace that back to the banker who puts that money in circulation, the most punishment that person can receive, Mr. Speaker, is 10 years' imprisonment and a $1 million fine. If that person is a low-level employee or even a high-level employee of a bank, and they see the opportunity to gain millions and millions and hundreds of millions of dollars when all they have to do is sit there and take the chance of a 10-year imprisonment or $1 million fine, we are shooting with a BB in the war on drugs and we need to take out a cannon.

H.R. 4554, which is a bill that I introduced yesterday, is such a cannon. What it will provide is that if a person is charged with the offense of being a bank officer or an employee and participating in a drug transaction such that the Federal Government can trace back to the individual as being responsible for that money getting in the hands of drug dealers to begin with, and a jury will believe beyond a reasonable doubt, if evidence is offered such that a jury will believe beyond a reasonable doubt that that individual is the reason that the drugs got into circulation, by putting the money in circulation, because again the drug dealers in Central America do not send the drugs up here and say sell the drugs and send me my part, they get cash on the barrelhead, and if we do not send money to Central America they do not send drugs back to the United States of America.

So the way to address this problem, at least one additional way I submit, Mr. Speaker, is to support the adoption and the early passage of H.R. 4554. What the bill specifically does is provide for a different punishment. In the event that a Federal court is faced with an individual before him or her who has been convicted by a jury of their peers, and has been proven beyond a reasonable doubt that that person while acting as a bank officer or employee participated in putting money in circulation that ended up in the hands of drug dealers, that person will receive a punishment of life imprisonment without parole.

If we are interested in fighting a war on drugs, we cannot ignore the biggest drug dealer of all, that is the person who lives in the banks, the person who resides in the banks, the person who rides around in chauffeur-driven limousines, the person who takes the ill-gotten gain from the drug market in this country, that injures and cripples and ruins our young people throughout their lives, and sits out in the middle of a bay on a half million dollar yacht and laughs at us because we are not fighting a war on drugs. We are fighting a war on drugs that gets at the penny-ante dealers out there making nickel and dime money, who spend all of their money buying Mr. T starter sets to put around their necks, and drive around in BMW's, and they do not have a house or a place to live. But the real drug dealer is the person who lives here, who lives in the mansion here or in New York, or in some other city, or out in Westchester or some other nice secluded place, who is genteel and civil, who never touches drugs, but who only puts the money in circulation, because they know the worst that can happen if they get caught is that they will end up with a 10-year sentence in prison and a $1 million fine when they have taken the chance and they have made hundreds of millions of dollars on drug transactions.

So I think it is time for us to take out a cannon. This bill has been referred by the Speaker to the House Committee on the Judiciary. I will request an early and prompt hearing before the Judiciary Committee with the view that this bill will receive the unanimous consent of that committee, and hopefully the unanimous consent of this body as well as the Senate of the United States of America. And when H.R. 4554 becomes law, then we will have a punishment that will fit the crime. We will say that not only will we punish the small drug dealers by giving them life imprisonment, but we will give that banker life imprisonment, because it seems to me if we remove the money, then the drug dealer who makes $1,000 a day does not have any money to send to Central America. It takes millions of dollars and hundreds of millions of dollars in suitcases going down to Central America to get drugs brought back here.

H.R. 4554 is an idea whose time has come, Mr. Speaker. That bill will require, as I say, life imprisonment without parole for the most serious offenders in our society, those who buy their ill-gotten gains, live they think above the law.

I am serving notice on them, the law has finally reached you, and your punishment will fit your crime.

Mr. Speaker, I yield back the balance of my time.

□ 1450

TRIBUTE TO ROBERT G. SARLO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah [Mr. HANSEN] is recognized for 60 minutes.

Mr. HANSEN. Mr. Speaker, Robert G. Sarlo, founder and director of the Homeless Veterans Fellowship, is a former Vietnam veteran currently employed by the Department of Defense in Ogden UT. As is true of many veterans, Bob found that some of the most difficult battles he had to fight—both from without and within—were not in a foreign land, but right here in America after he returned home. His many struggles included a period of homelessness, which, according to Bob, brought him to the mercy and healing power of God, and set him on the path to recovery and a renewed life of productivity and service.

Bob is a man of great caring and empathy, and has a deep sensitivity for the pain and suffering of his human family. In early 1989, he became increasingly aware of the growing number of homeless in the Ogden, UT area where he lives, and began mingling with these street folks. He was alarmed to discover that the majority of the homeless men, several hundred in Ogden alone, were veterans. For many of these, his brothers in arms, the war was still raging; others had totally abandoned hope and accepted defeat.

Upon exploring the various services available to veterans, Bob was dismayed to find that homeless veterans were typically warehoused from shelter to shelter, with no opportunity to regain the dignity they had sacrificed in service to their country or to be

reintegrated into society as healthy, productive citizens. Bob quickly recognized the need for a nontraditional approach to serving the veterans, and envisioned a project to set up a transitional home for veterans wherein they could be safely incubated while they received the counseling, training, and nurturing needed to enable them to stand on their own feet.

After identifying two HUD homes centrally located in Ogden City, Bob persuaded HUD officials at the local, regional and national level to grant him for $1 per year leases on these houses, overcoming the first major obstacle bringing his vision to reality. Bob's plan, as you can imagine, met with considerable opposition from neighboring residents, and the Ogden City Council was initially hesitant to endorse the transitional housing project. However, Bob's sincere, honest presentation, his unflappable commitment and his compelling arguments in favor of the benefits to both veterans and the community as a whole finally won the hearts of his opponents and the project received city approval.

Now, keep in mind this is not done by Government grants, this is not asking the Government for anything; this is a man on his own deciding he is going to help his buddies and the fellows he worked with in Vietnam. He said, "Let us get together, guys, and we are going to find you a home. You don't have to live under a culvert, you don't have to live out in the street, we are going to do something for you."

Bob then turned to the State of Utah and was given $15,000 to help rehabilitate and operate the two houses. This is the only place I know where he got money from the Government to operate these two houses.

Bob then singlehandedly rallied the enthusiastic support of local businesses and charitable organizations; he went to places that had closed up like the old hotel in Utah. He said, "Let us have some of your furniture," and they gladly gave it to him.

The two homes are now well stocked with furniture, clothing and food, offering housing for up to eight men.

Mr. Speaker, The Homeless Veteran's Fellowship, as Bob's dream is now known, welcomed its first resident just after Christmas. The man, upon arriving at the house, was amazed to learn he had not been offered just another cot and blanket in a cold, impersonal shelter, but in his elated words, "a home." And with a home comes hope and help and the opportunity to start a new life with dignity. Today, years after we have left Vietnam, Bob states with great caring and conviction, "There are still wounded out there, and I'm going in after them."

Bob Sarlo has my deepest respect and admiration. He is a shining example of what President Bush meant when he spoke of a thousand points of light; of a people caring and sharing. He saw a problem many people in America were otherwise ignoring, and chose to act because he really cared and shared. He represents the best in all of us, and demonstrates just how big a difference one man can indeed make.

I really acknowledge a great young man, a veteran who decided upon his own to try to turn around and help people. That is what America is really about, those who we know in our own hearts and minds want to share and help those who are less fortunate than we are.

Bob Sarlo is a great example of that.

TRIBUTE TO THE LATE HONORABLE SPARK MATSUNAGA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Hawaii [Mr. AKAKA] is recognized for 5 minutes.

Mr. AKAKA. Mr. Speaker, it is with a heavy heart that I take the floor today to mourn the loss of a statesman, a poet, a peacemaker, and a friend—our colleague, SPARK MATSUNAGA.

The Halls of Congress will seem less grand and the quality of the debate will be a little weaker because he is no longer with us.

SPARK, we will miss you.

To recognize his 40 years of service to his country, I have introduced legislation to establish the Spark Matsunaga Scholarship Program and rename the U.S. Institute of Peace in his honor. It is a fitting tribute to SPARK that the organization he labored to create should bear his name.

Throughout his long career, Senator MATSUNAGA was devoted to the cause of peace, and it was due to his efforts that the Institute of Peace was established. This legislation will be a constant reminder of his vision, determination, and achievements on behalf of this noble cause.

Yesterday, I joined a number of our House and Senate colleagues at the memorial service in Honolulu. SPARK will be buried later today at the National Memorial Cemetery of the Pacific at Punchbowl. I know you share my great sadness and sense of deep personal loss over his death.

I have also reserved time for a special order at the close of business next Tuesday so that the many Members who served with him and were touched by his friendship can join me in honoring our dear friend.

UPDATE ON THE SAVINGS AND LOAN ASSOCIATION BAILOUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 30 minutes.

Mr. OWENS of New York. Mr. Speaker, again I would like to speak on the very important subject of the savings and loan association bailout.

As I returned to my district, I found we were confronted in New York City and New York State with extensive budget cuts, budget cuts for local services, budget cuts which will impact upon important things like providing housing for the homeless, providing more adequate education system, and providing better health care.

These local cuts at the State and city levels are not divorced from what is happening here in Washington. What most people have forgotten—they proceed to blame the mayor and blame the Governor—is that we have experienced considerable Federal cuts of funds that were helping cities and States before.

Particularly dramatic is the issue of revenue sharing, which was cut under the Reagan administration. We no longer have a revenue-sharing program which can relieve or could, if it existed, relieve a large part of the burden of the cuts that are being imposed now on cities in New York State.

□ 1500

Across the country in other States and other localities, there is also a budget crunch. School boards are feeling the squeeze, school budgets are being voted down, people are continuing to send the largest amount of the taxes that they pay to Washington. We just experienced an income tax deadline on Monday, April 16, and the largest segment of your tax bill always goes to the Federal Government.

Under a program like revenue sharing, it came back. Under a program like the building of low-income housing, it came back. It provided housing for homeless so that local government and State government did not have that burden.

In numerous ways before 1980, we had more of the Federal dollars coming back to the localities and the States to take care of problems at that level. Since then, we have dropped many of those programs and States and localities are feeling that squeeze again.

I am here to attempt to alert the American people to exactly what is happening with respect to the tremendous amount of tax dollars that we are sending to Washington. There is a portion of those dollars that could be coming back to the localities. It could help relieve our burdens, but is not coming back for the worst of reasons. It is not just the deficit that was also an unnecessary pile up of debt for an overinflated expenditure, set of expenditures on defense. Not just a deficit which was an evil unto itself, but now we have the savings and loan association bailout, the bailout which

was estimated to cost about $156 or $157 billion at the time we passed the legislation, and is now estimated to cost more than $500 billion. Now we are talking now about a figure that has been offered by the head of the General Accounting Office. GAO has estimated now that the bailout may cost as much as $500 billion. Five hundred billion dollars is more than the present defense budget, and the defense budget is large enough. Five hundred billion dollars is a half a trillion. That is half the total budget. That is the estimate of what this bailout of the savings and loan association will cost this country before it is all finished.

There are still people who are laboring under the misassumption, the wrong assumption, that it is necessary to do this, because in order to pay off the depositors that we are legally obligated to pay off, we have to spend the money. That is the wrong assumption. The bailout is as big as it is, and is growing, escalating all the time, because we have gone far beyond the necessity to pay off the depositors who had deposits in the savings and loan association up to the amount of $100,000. That continuing piece of misinformation has made a large segment of the American people uninterested in the problems of the savings and loan association because they conclude we have an obligation, it is a legal obligation no matter how much it costs, and we have to live up to that obligation. That is not the case. We have gone beyond, in this bailout, beyond paying the money to the depositors that we have guaranteed with our Federal backup guarantees. The savings and loan bailout attempts, the bailout attempts to guarantee that everybody who had money in a particular savings and loan association will not lose any money, even those people beyond the $100,000, and many of those people, of course, are banks and corporations. The largest amount of deposits above $100,000 are deposits from foreign concerns, foreign businesses. Japanese bankers and Arab sheiks. Those are the people who have large amounts of money above the $100,000.

We are not just paying off the depositors that we have guaranteed. We are going beyond that because we are trying to not upset any foreigners who have put money into our banks. The idea is that the credibility of our banking system would be questioned. People would become upset across the world and stop depositing money in American banks, if we allowed the savings and loan association to follow the course that they normally should follow. We are guaranteeing the foreigners their money, in order to make certain they do not pull out large sums of money that they have deposited in our banks, in other ways.

Now that may be a laudable mission, to attempt to guarantee everybody's money, but it is not a mission that has been agreed to by the American taxpayers, not a mission we will find anywhere in law. This is an improvisation to deal with the situation as it is viewed by people in the administration. We do not have to pay off people who have more than $100,000. We should not be paying off people that have more than $100,000. The bill becomes too great. Private enterprise and the free market economy dictate that there will be losses by people who take risk. What we are doing is subsidizing banks, and we are interfering with a free market economy in order to maintain a credibility of our own banks. That goes beyond anything that is a law anywhere.

My problem is that the bill is so tremendous, $500 billion, and the action is so unusual. It is unusual in the sense that the American Government has intervened into the private sector, and subsidizing the banks. That is so unusual, that it should have more discussion here in Washington. There should be more discussion in the Congress. The administration should be speaking more about it, but nothing of that kind is happening.

Irangate and Watergate, Teapot Dome—all of those scandals were tiny in comparison with the kind of scandal we are facing with the savings and loan associations. However, there is nobody who speaks continuously. There is not enough discussion to educate the American people.

I said the last time I spoke on the floor that there are some books being written. There are, of course, hundreds of articles being written now. Slowly, the media has picked up on it. There are television and radio discussions of the savings and loan scandal, but still, there is no guidance. There is no official voice speaking here in Washington.

Irangate required or stimulated the White House and the Senate to get together and form a joint investigatory body. There were hearings held jointly by the House and the Senate. They were highly publicized, and the American people learned the story of what had happened with Iran-Contragate. The case of Watergate, we had hearings. The investigations led, eventually, to the resignation of a President. The American people got a full education as to what Watergate was all about. However, here we have the S&L that dwarfs Watergate and will have consequences for years to come, for the next generation even, and nobody has called for a joint panel or some highly visible investigation.

Today I wrote to the chairman of the Committee on Government Operations, the gentleman from Michigan [Mr. CONYERS], and requested that he set up a committee-level panel to investigate not only the savings and loan scandal but also HUD. These are examples of federally guaranteed programs that we know have gone bad. We know they are in trouble. There are probably other Federal guarantee programs that are in trouble, but just to focus on savings and loan and HUD, I requested the chairman of the Committee on Government Operations, and probably I should go further and ask to speak to him. I think it would be very much in order if the Speaker of the House would set up a special committee to go further than the Committee on Banking or the committees of jurisdiction, and really discuss the implications of the savings and loan scandal.

Next week we are scheduled to take up the budget resolution. There have been many discussions in the Committee on Budget and various groups have testified before that committee about all kinds of concerns. The Congressional Black Caucus quality of life budget was discussed with the Committee on Budget. Numerous things that are very important have been discussed with the Committee on Budget, but very little talk has taken place, very little discussion taken place with respect to the savings and loan association, and money that will be needed to bail it out. Somehow we will go through the whole budget process and not discuss one of the biggest items in the budget. We are going to say that that is off budget again. We are going to say it has no impact on the expenditures, but in truth, there is only one Department of the Treasury in the United States of America.

There is only one mint. Only one mint which prints the money, and eventually all of the debts and burdens, fiscal burdens of the government, come to the same place—the taxpayers.

□ 1510

I would like to urge taxpayers who do want to get some additional information to examine some of the books that are being published. There is one gentleman named Edward J. Kane who has published several books. Mr. Kane has published a few special reports and pamphlets, in addition to several books on the savings and loan insurance crisis.

Mr. Kane has published one entitled "The Savings and Loan Insurance Mess: How did it Happen." That was published by the Urban Institute Press in Washington in 1989, last year.

Mr. Kane published an article in Challenge entitled "The Bush Plan is No Cure for the Savings and Loan Insurance Malady." That was in Challenge magazine.

Mr. Kane published another article entitled "The Unending Deposit Insurance Mess." That was in Science. An-

other one is: "How Incentive-Incompatible Deposit-Insurance Funds Fail." That was published as a working paper by Mr. Kane and by the National Bureau of Economic Research.

The National Bureau of Economic Research also published another report or working paper entitled "No Room for Weak Links in the Chain of Deposit Insurance Reform," by Mr. Kane.

There is another article entitled "Who Should Learn What From the Failure and Delayed Bailout of the ODGF?" That was a National Bureau of Economic Research working paper also.

Some other authors who have published important and enlightening books on this item are Mr. James Ring Adams, who wrote a book entitled "The Big Fix: Inside the S&L Scandal." That was published by Wiley Press.

"The Thrift Industry: History and Background" was written by Jim Lewis, and that is another important piece that might enlighten persons who are interested.

Donald L. Maggin is the author of a book entitled "Bankers, Builders, Knaves, and Thieves: The $300 Million Scan at ESM." That was published by Contemporary Books located in Chicago.

Paul Zane Pilzer was written a book entitled "Other People's Money: The Inside Story of the S&L Mess." Simon and Schuster published that book last year, in 1989.

Michael J. Stitch published a book entitled "How to Profit From the Savings and Loan Crisis," and that is by the Wilchester Publishing Co. in Houston.

Then Stephen Pizzo, who was recently featured on television in a special program on Nightline, published a book entitled "Inside Job: The Looting of America's Savings and Loans." That was published by McGraw-Hill, and it came out late last year.

Of course, all these books were published and all these articles were written before the escalation of the S&L scandal. They are all dealing with figures related to 1989. The recent revelation by the GAO that it may cost $500 billion instead of $157 billion was not known at the time these books were written. In August 1989, after the President signed the S&L bill into law, critics began to quietly predict that it would cost more than the immediate cash of $50 billion and the estimated amount of $157 billion before it was over. Still we have not officially taken steps to update that original legislation. I suspect that after the election this year we probably will deal in an open way with the problem that by that time will have gotten much worse as a result of the delay.

The first great error we committed here in Washington was to sit back quietly while all this was mushrooming to begin with. We had no other issue, and while we had no other issue, greedy thrift owners and their crooked friends were spending taxpayers' dollars on everything from prime ribs to prostitutes.

Let me just give a few examples, since personalizing it makes it possible for us to understand. The calamity was so great that when we use statistics alone, it is impossible to understand how great a crime has been committed, so let us give some examples of some of the things that were happening and where our peace dividend has gone.

A classic example, Mr. Speaker, of the scandalous abuses within the S&L industry involves one fellow named Edward McBirney III, a 33-year-old who was said to be a real estate whiz. He ran an "Animal House" version of a savings and loan association, according to the publication, Texas Monthly. His life and his brief banking career were little more than a whirlwind of parties and profligacy. In March 1986 he embarked on a Las Vegas fun spree with 50 friends and customers. According to the Texas Monthly, his guests were flown into town on a borrowed 727, and they were housed in suites at the Dunes. Four women appeared at a cocktail party in his suite and performed a striptease. McBirney was known for writing up deals on the butcher-paper tablecloths of his favorite restaurant. In 1984 and 1985 his Sunbelt Savings and Loan Association shelled out $1.3 million for Halloween and Christmas parties including $32,000 in compensation that he paid to his wife for planning them, according to a civil suit that has been filed by the government-run successor bank against McBirney. In 1985 and 1986, the Dallas-based thrift allegedly paid more than $12 million in dividends to shareholders, and Mr. McBirney was the shareholder who received the largest amount from this dividend.

Let us give another example. Mr. Donald Dixon is the owner of the Vernon Savings and Loan Association, which was shut down on March 20, 1987. At the time the Vernon Savings and Loan Association was shut down, 95 percent of its loans were in default.

Mr. Speaker, those loans, 95 of every 100 loans that Vernon had issued, had gone down the tank, not because of incompetence. No one could be that incompetant. Banks do not hire incompetant people. It had to be a conspiracy which produced 95 percent out of every 100 loans as bad loans.

Its larger than life owner, Mr. Donald Dixon, and his wife Dana could be and have been referred to as the "Bonnie and Clyde" of the thrift industry. The Dixons took friends on a whirlwind 2-week tour to Europe aboard a chartered aircraft, paid for by this bank, of course, an experience which Mrs. Dixon called a flying house party. They ate at seven three-star restaurants in France. Dixon contended that they did it because he was conducting a market study for his plan to open an upscale restaurant in Dallas.

The total cost of the Dixon's European adventures was $68,000, and this bill has been forwarded to the U.S. taxpayers. When you add to their tab a $2.6 million yacht, a Rolls-Royce and Ferrari dealership in California, along with two homes near San Diego, you have some idea of what the taxpayers' tally is covering. The final tally also includes $561,874 for personal expenses, including groceries, liquor, stereos, et cetera, as well as maid services.

To date, according to the House Banking Committee, Mr. Dixon is the target of a massive Federal investigation, with a $540 million civil lawsuit, the largest ever brought by the Resolution Trust Corporation and the Department of Justice.

Mr. Patrick King, who was the manager of Mr. Dixon's bank, the Vernon Savings & Loan Association, has been sentenced to 30 years in prison, but Mr. Dixon has not yet been touched with any criminal prosecutions. Of course, there is a statute of limitations in each State. That statute of limitations just might run out before Mr. Dixon is prosecuted.

I give these examples as just one way of trying to communicate with a baffled set of taxpayers out there so they might learn exactly what is involved in this savings and loan association debacle. Never before in the history of the country has there been a scandal of this kind, and never before have legislators and decisionmakers in Washington been so silent about a scandal. There is a need to discuss it more. There is a need perhaps for the taxpayers outside of Washington and all those Governors and those mayors out there who are facing budget cuts and receiving direct criticism from the taxpayers to be alerted as to exactly what the problem is. We have a situation where, with the largest tax bill, the largest income from a tax bill of the Federal Government, those funds are going down the drain to rescue a set of racketeering enterprisers, and this benefits no one.

We have gone far beyond the duty of the American people to pay back the depositors. We are into socialized banking, where the Government is interfering with the free market and running banks, where the Government is taking responsibility to sell or to negotiate on the assets that were the property of these failed banks. We have started a whole new bureaucracy called the Resolution Trust Corporation. They have hired 2,500 employees so far. I do not know whether they use

the civil service system or a merit system of some kind, and I do not know how they get a job there, but I am told that many of the same people who worked in the banks that failed, some of the people who were responsible for the problem, are being rehired at large salaries to help solve the problem.

□ 1520

In addition, Mr. Speaker, I am also told that some of the people responsible for the problem are now buying back some of the properties at very low cost.

This scandal will not go away. It is going to get worse. It is going to continue to escalate and get messier as time goes on.

The scandal that we should not allow to happen is silence here in Washington. There needs to be more discussion. There needs to be an investigation conducted at a high level. There needs to be a highly visible effort to educate the American people, and it is our duty, as Members of Congress, to see to it that that happens.

The savings and loan association mess, scandal, has stolen the peace dividend already. We ought to admit that, and at least discuss it and let the American people how what is happening.

LENIN LIVES

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute.)

Mr. DANNEMEYER. Mr. Speaker, "Environment" has become a sort of magic word, to be invoked whenever there is a need to either arouse or pacify a public easily swayed, much in the same way that "entitlement" is a codeword for increased government spending and peace is the rallying cry for those wanting freedom to surrender.

The issue is not littering or pollution or hazardous waste; it is not acid rain, clean air, or deforestation. No intelligent person with an ounce of civic responsibility could advocate those things. But there are ways to address those problems. Other causes such as global warning and the ozone hole are more problematic; there is conflicting evidence which induces me to suspect we are being sold a bill of goods.

It is not surprising that the so-called environmental movement is attempting to rally public opinion. And they have been very effective in doing so; the massive attention focused on Earth Day is the most complete propaganda snow job since last year's perestroika in Lithuania.

So let's remember what we are really commemorating on April 22. It is not Earth Day, it is Lenin's birthday. The same Lenin whose doctrines have been discredited and disgraced, and whose chains the people of Eastern Europe have finally traded for freedom. Those persons who promote environment using the symbol of global tyranny have another purpose in mind: International—read elitist—control over our lives.

So when you lose your job in Cleveland, Kansas City or Birmingham, because of decisions made in Brussels or Zurich or Moscow, remember the fourth Sunday in April 1990 when you celebrated Lenin's birthday.

THE AMERICAN OPPORTUNITIES WORKSHOP

The SPEAKER pro tempore (Mr. CHAPMAN). Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I am going to talk today about the American Opportunities Workshop and the effort we are engaged in to develop new approaches and new solutions for the 1990's.

On May 19 we are going to sponsor, through an organization called GOPAC, a nationwide workshop on new solutions for the 1990's. We are emphasizing the idea that the bureaucratic welfare state and the permissive attitudes that have come to characterize it simply do not work, that it is possible to develop new and better solutions to health care, to education, to the environment, to the problem of crime and drugs by using a more sensible and more commonsense approach, that we can apply the basic principles that have made America successful, principles that might best be illustrated by what we would call the triangle of American success, a triangle which has on one side entrepreneurial enterprise; on the second side, technological progress and innovation; and on the third side, basic American values, and our point is that, if you take those three, entrepreneurial free enterprise, technological progress and innovation, and basic American values, and you develop a new approach, a new solution, to education, to running a big city, to the problem of the environment, to health care, to the concerns we have for drugs and violent crime, that almost invariably any solution inside that triangle will work better than the bureaucratic welfare state and will work better than permissive attitudes.

Mr. Speaker, we are going to have on May 19, at 10 o'clock eastern time, 9 central, and 10 o'clock mountain time and 9 on the Pacific coast, a 1-hour television program, a workshop on a nationwide basis, from five sites live. We will be live in San Diego, CA, from Orange City, IA, from Detroit, MI, from Portland, ME, and from Noonan, GA. It is a nonpartisan program. We will have Democrats on the program. We will have State Representative Polly Williams of Wisconsin who is a Democrat, former Attorney General Griffin Bell. He was Attorney General of the United States under Jimmy Carter, and there will be a number of other people who represent a more independent viewpoint, and of course many Republicans. President George Bush will be on the program on video tape, as will Vice President QUAYLE and Secretary of Housing, Jack Kemp.

Our goal in that 1 hour is to initiate the idea, to communicate clearly, that there are new approaches, there are new solutions, that, as Jim Pinkerton said in a brilliant speech to the New World Society called the new paradigm:

> It is possible to develop a new model, or a new paradigm, which is more powerful and more likely to succeed than the bureaucratic welfare state and permissive attitudes.

Recently, working on the American Opportunities Workshop, and any of my colleagues who would like to participate or would like to have folks back home participate by contacting GOPAC or contacting my office can find out more about what will happen on May 19 in the American Opportunities Workshop, but, as I have been working on this idea of new approaches and thinking things through in a new way, of the fact that here we are in a world changing rapidly, and some people would have us use the same old ideas, and the fact is that the liberal, union dominated, big city machine system built on permissive attitudes of the bureaucratic welfare state simply will not solve problems, that, if you want personal security from drugs and violent crime, we need new solutions. If you want true economic security by emphasizing the opportunities and the entrepreneurship that is available in the world market, then you need new solutions. If you want to truly secure an effective community with adequate health care, and adequate education, and a sound environment as well as a sound economy, then I think you need new solutions, and, if you want to truly make America secure in terms of national security in a world where dictatorships, like Iraq, and Iran, and Syria and Libya may soon have chemical and nuclear weapons, ballistic missiles, then I think again you need new solutions.

So, we are trying to develop a basic approach to new solutions at a time when the world is changing, and I have noticed in the newspapers a number of changes happening around the world, that what we are trying to do here in the United States is not just something that is American, but, in fact, is part of a worldwide activity. I noticed, for example, in U.S. News & World Report recently, on April 2, the point was made that the East German voters, when they finally were allowed

to have a free election, they did not just vote for people who were sort of Communist, they did not just vote for people who were socialist, they did not vote for people who were bureaucrats.

Mr. Speaker, let me quote precisely what was said on page 28 of U.S. News & World Report on April 2:

> The voters are saying in the slogan of the East German winners, "No more social experiments." They are looking for economic growth, not economic redistribution, and while they want a safety net, they have little confidence in the government's ability to direct the whole economy. They prefer politicians who affirm cultural values to bureaucratic busybodies who want to reform them. History is not, it seems, an endless move to the left.

Mr. Speaker, I thought that passage by Michael Barone in U.S. News was extremely revealing, and I think that it gets us right to the core of what is happening. I might mention in passing, by the way, that Michael Barone has a brilliant new book out entitled, "Our Country, America from Roosevelt to Reagan," and I might say that that might be the best book on government and politics in my lifetime. I think it is a remarkable study about how Franklin Roosevelt developed modern American government and how it evolved over the last 50 years.

However, Mr. Speaker, I want to emphasize the point that you could literally take what is happening in East Germany, or in Poland, or in Hungary, and apply it to America's big cities.

□ 1530

After all, if we are against big bureaucracies, does not Washington, DC, fit the pattern of Warsaw? If we are worried about big bureaucracy, does not New York City fit the pattern of Budapest? If we are worried about big bureaucracies, is not Philadelphia as big a bureaucratic system as you might find in Prague?

So I think it is very, very important that we look very, very much at this question of rethinking and replacing the bureaucratic welfare state and establishing basic American values, rather than permissive attitudes.

There is an interesting side note as a sign of how much the world is changing. The current frontrunner in the election for President of Peru was supposed to be Mario Vargas Llosa, who is the poet laureate of Peru and a tremendous writer and a man who himself represented a dramatic change. Vargas Llosa was campaigning on a coalition promise that they would reform Peru, that they would privatize much of the bureaucracy, that they would be much more inclined to favor jobs and entrepreneurship and creating new approaches. Everyone expected that Mario Vargas Llosa, who I have quoted before, in talking about the need to replace the bureaucratic welfare state, that he would win because he was the most dramatic and the boldest candidate. Yet all of a sudden at the very last, during the recent first round of elections in Peru, Alberto Fujimori came from nowhere and suddenly showed up as the leading contender and almost won.

Now, it is a fascinating story, because Alberto Fujimori is a Japanese-Peruvean. That is, he comes from Japanese descent. His parents are Japanese, and Fujimori represents an even more dramatic, an even bolder, an even more radical approach to replacing the bureaucratic welfare state.

Mr. Fujimori's campaign slogan, "work, honesty and technology," was brought to my attention by one of my colleagues who said, "You know, that sounds a lot like what you are trying to talk about in the American Opportunities Workshop." We are emphasizing honest, hard work, as the most important American value, and we are suggesting that honest, hard work is an essential part of where America has to go. A lot of people who are responding in America to the need for change come out of the evangelical movement, just as in Romania it was the evangelical movement which played a major role in establishing change in Romania, just as we are seeing in a number of other countries in Eastern Europe, including Russia, an important role being played by active churches.

Well, it turns out that when you begin to investigate Alberto Fujimori's campaign that the Protestant evangelicals, who are only 4 percent of Peru's 20 million people, that represent about a third of the candidates for Congress in Mr. Fujimori's slate, are active in his campaign, and his campaign is a facinating one. It is called Change 90 and it emphasized his commitment to trying to create a more dynamic, a more open-ended future for Peru.

Now, he argues that they have to work in new ways, that his ultimate goal is a free economy.

I want to start with this notion, that in a world where we are seeing the East Germans replace their bureaucracy, in a world where we are seeing the Hungarians replace their bureaucracy, in a world where change is occurring so rapidly that we see a Japanese-Peruvean as the frontrunner for President, competing with a novelist poet, a totally new kind of politics, maybe it is time for Americans to accept the principle, as I said earlier, that in a changing world the same old ideas simply are not working.

Let me give you an example of what I mean by the bureaucratic welfare state and why it is so difficult to create the right kind of behavior. Let me show you how directly this impacts on the war on drugs.

Donald Graham, the publisher of the Post, recently wrote an article talking about being a policeman. It was entitled, "Policing: It's a Tougher Job Now." It is his reaction to riding in the fifth district police cars for 20 hours, spread over 3 nights. More than a third of the radio calls that those cars handled related in some way to drugs. Almost all involved crack.

Now, he goes through a series of specifics. He makes some very interesting points, I think.

He says:

> Twenty years ago drug traffic concentrated on only one corner in the old Ninth Precinct—8th and H NE. Now the police can show me pockets of drug dealers on 20 corners in the same neighborhood. The pervasiveness of crack seemed more like the level of alcoholism in 1969 than the level of heroin.
>
> I asked police officials if I could spend some time riding near my old beat to compare today's police work with that of 20 years ago. Along with the rides came a firsthand look at a tiny sliver (please note: I was only looking at police work—not the equally important education-and-treatment side) of the crack war. I came away confused and troubled about who's winning.
>
> The heroin epidemic of 20 years ago passed in part because of tougher law enforcement. Presidents Johnson and Nixon almost doubled the number of police, from 2,600 to 5,100. A court reform law resulted in many more stiff sentences for convicted felons. The causes of the crime wave were complex, but putting a couple of thousand bad guys in jail did a lot to end it. In a blunderbuss way, the huge numbers of police officers walking on commercial streets reduced the chances for holdups. Robberies and murders went down.
>
> Now the city is trying some of the same tactics. But will the results be the same? The drug-dealer-shooting-drug-dealer homicides of 1988-90 are unlikely to be stamped out by more police. (These shootings, unlike liquor store holdups, are unlikely to be in places that attract the chance presence of a footman.) The pervasiveness of crack will make it tougher to break the back of the problem. "We can move the problem, and we can clean up a neighborhood where we have the cooperation of most of the citizens," said a police official. "If many of the young men in a neighborhood are involved in the drug trade, you may not be able to solve the problem through law enforcement."
>
> But the raw charge of energy coming from a huge infusion of young police officers can be felt throughout the District. They city's battle with drug crime is at a very pivotal moment right now. The police academy is straining, pumping out recruits, literally day and night (it's working on two shifts). The numbers of police have climbed to 4,000 and will go to 5,000 within a year. At the same time, hundreds of 20-year police—precisely those added when Johnson and Nixon beefed up the force in 1969-70—are retiring.

He goes on to point out the following, that we have more to do than just deal with the number of policemen.

> Police always complain about the handling of their cases by the court system, but anecdotally, the amount of grousing about good arrests no-papered, serious crimes resolved by misdemeanor pleas and felonies resulting in no jail time seems to be very high.
>
> The city is about to add 1,000 new police officers. The prisons have no place to put the felons being arrested by today's police.

In this context, it seems a pathetic joke that more than a year has gone by since federal drug administrator William Bennett offered to find new prison space for D.C. and no new beds are built or planned. Mr. Bennett and Mayor Barry cannot contain their loathing for each other long enough to sit down and find a new prison site.

Police officers are risking their lives each night making arrests that the court system must wash out to sea for lack of prosecutors, judges and, above all, prison beds. The causes of crack abuse go far beyond anything law enforcement alone can deal with. At a minimum, though, the city needs the ability to send felons to jail in order to fight it.

Now, I want to make a point here before going on to his description of how the bureaucracy directly affects the policeman. Winning the war on drugs and violent crime, which is the most important crisis facing America, is going to require on all-out effort, and it has to start with an understanding that the bureaucratic welfare state and permissive attitudes have created much of our current problem. Notice that in Don Graham's essay, back in 1969 to 1970 when the murder rate first peaked, the answer was to dramatically increase the number of policemen from 2,600 to 5,100; but the bureaucratic welfare state has a bias against policemen. When leftwing mayors look at how to balance the budget, they always seem to cut the police first or the prisons or the prosecutors. When you realize, for example, the Manhattan attorney's office in New York City has four homicide investigators, you realize what a joke it is to ask the question why is New York so dangerous. It is so dangerous because despite a $27 billion budget, despite 300,000 full-time employees, the fact is that liberals do not want to hire enough police, they do not want to build enough prisons and they do not want to hire enough judges and enough prosecutors to get criminals off the streets for a long time.

□ 1540

Similarly, how can we expect the new policemen to maintain their morale when they know that once again, as we were in the late 1960's, we are back in the period where policemen can arrest the criminal, and within days the criminal is going to be right back out there dealing in drugs? In fact, being arrested right now for all too many drug dealers is a nuisance rather than a problem. It is simply one of the occupational hazards of their job.

To solve that, we are going to have to have more judges. We are going to have to have more prosecutors and we are going to have to build more prisons.

Senator PHIL GRAMM and I have introduced a bill that does just that. The Gramm-Gingrich bill provides for a very tough sentencing program, with mandatory sentences. It provides for building new prisons including temporary prisons on an emergency basis. The Gramm-Gingrich bill provides for the use of military bases that are declared surplus, because I think one of the first steps of the peace dividend should be to turn over some military bases into camps that we can use to hold violent criminals and drug dealers so they are not released back on the street for the absence of prison space. The Gramm-Gingrich bill also provides that there be very steep penalties for the users. It provides 10 percent of your gross income for first use of drugs, 20 percent for second use, and 30 percent for third. That will stop sports figures and rock stars from using drugs and thinking that after all, the current fines are so small they are not much more than the cost of their limousine for a week.

Finally, the Gramm-Gingrich bill provides that prisoners would work, that they be paid a salary, and that we would then deduct the cost of keeping them in prison from their salary. Is this a tough approach? You bet you; but I would argue, just as in the article by Michael Barone from U.S. News, that the American people "prefer politicians who affirm cultural values to bureaucratic busybodies who want to reform them." For 30 years we have tried permissive attitudes in the bureaucratic welfare state, with crime and drugs, and it has not worked, and I think it is time to try a new solution, a much tougher solution, a solution based on basic American values starting with honest hard work.

That gets me back to what the bureaucratic welfare state does to the concept of honest hard work. Let me quote again from Don Graham:

Police officers, like people, come in all types. There are good ones and bad ones. I asked to ride with the good ones, and I did. All you can do in the presence of good police work is pause and admire the people who do it. What motivates a good police officer? If one police officer is hard-working and conscientious and one is lazy and less concerned, both will be paid the same. Citizens rarely write to praise effective police work. A more active officer is more likely to draw complaints than one who spends his time drinking coffee. Amazingly, the department still has a promotion system in which effectiveness at a patrolman's job has nothing to do with promotion. Who makes sergeant is based partly on an exam and partly on a brief interview with two police officials and a citizen who are supposed to be unacquainted with the officer they are interviewing. The fear of favoritism is so strong that Hubbard and Galway, when they come to be considered for promotion, go in on equal terms with cops considered far less effective at their job.

I think that what we have to confront here is the absolute reality that the bureaucratic welfare state which avoids merit, it avoids judgment, it avoids deciding how to reward people who do better than others, the bureaucratic welfare state actually weakens the incentives for good behavior, whether it is merit pay for police, or merit pay for teachers.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to congratulate him on the statement he is making and to tell him that I think that much of the country probably agrees that we have not done sufficient kinds of things to deal with the problems of crime and permissiveness and a number of other issues that he has raised.

I asked him to yield because there is an item that has come to my attention based upon a debate that we had about this very subject on the House floor yesterday. The gentleman will remember that on the House floor yesterday we sought to bring to the floor the President's crime bill, feeling that this House now has gone too long in not enacting tough new provisions to deal with the plague of crime that is sweeping the country. We were turned down on that request yesterday. The Democratic majority voted almost unanimously.

It was a bipartisan effort to bring the bill to the floor, but there was almost a unanimous vote by the majority party not to bring up that crime bill. In the course of the debate yesterday, the chairman of the Committee on the Judiciary, the gentleman from Texas [Mr. BROOKS], came to the floor and made an eloquent plea for Members not to take this issue out of the hands of the committee and to allow that bill to stay in the committee rather than to be brought to the floor under the procedures that we were advancing. In the course of his remarks, he made this statement, and I am quoting the statement from the videotape of the House proceedings of yesterday; he made this statement:

And all of us have voted for crime bills almost every year for the last few years. We have got almost as many crime bills passed as they have crimes committed.

The reason why I thought that statement was rather interesting when he made it was because it seemed to me to sum up an attitudinal situation with regard to this Member who is one of the most powerful Members with regard to the crime issue.

I have to interpret that statement as saying that this is not an issue which is important for us to act on in a quick manner, because we have already solved the problem, because we have already got too many crime bills out there anyhow. I do not think the American people would agree with that statement.

But here is my point: What came to my attention today is that when we go to the CONGRESSIONAL RECORD of today to try to find that statement, it is not there. The gentleman from Texas removed that rather important statement that he made on the House floor yesterday pleading for his position, from the CONGRESSIONAL RECORD.

Once again, I would say to the gentleman that this is precisely the question that we have raised on numerous occasions on the House floor, that there is a task force now studying, of whether or not Members of Congress should be responsible for the statements they make on the floor and whether or not they should be responsible enough to be held accountable by having those statements appear in the RECORD as they were stated on the House floor. Once again we have a significant statement being made that was then removed from the CONGRESSIONAL RECORD so history would not record that the gentleman from Texas, the chairman of the Committee on the Judiciary, said, "We have got almost as many crime bills passed as they have crimes committed."

Mr. GINGRICH. Can I ask the gentleman a question? Because I am a little puzzled here. Was that statement made as a part of a dialog that involved other Members? Is it part of a debate in which other Members were trying to communicate how they felt about it?

Mr. WALKER. Let me say to the gentleman, if he has a copy of the CONGRESSIONAL RECORD there, if he goes to page H1526 he will find on page H1526 a speech by the gentleman from Texas [Mr. BROOKS] in which he details his position with regard to the action that we had on the floor and, yes, it was a part of a general debate, but this was a speech by the chairman of the Committee on the Judiciary. It is down about the third or fourth paragraph is where he makes the remarks to which I have referred that have now been excised from the CONGRESSIONAL RECORD.

The remarks, as reported there, appear on the tape, but all of a sudden there is this gaping hole where the remarks to which I have referred have been excised and so, therefore, we have a situation where the CONGRESSIONAL RECORD, rather than being an accurate reflection of the debate yesterday, is an inaccurate reflection of the debate yesterday, has remarks in it from the chairman of the Committee on the Judiciary as he wishes he would have said them rather than the way in which he actually said them, and I am concerned about that.

The task force that we have looking into this matter, I think, should be very concerned about this, and it is a part of an ongoing pattern of abuse that I find particularly disturbing at a time when we are discussing, of all things, the crime bill.

Mr. GINGRICH. Let me say that I think it is very important for us that the CONGRESSIONAL RECORD be accurate and, second, that people understand that our efforts to get the Democratic leadership to bring various drug and crime bills to the floor is a very important factor here.

The fact is that the U.S. Government does have steps it can take which will help us win the war on drugs and violent crime. The President of the United States has sent up proposals which have now been, I believe, 10 months.

Mr. WALKER. Ten months in the committee.

Mr. GINGRICH. And the Democrats in Congress have not met those proposals.

□ 1550

Chief Justice Rehnquist has called for 69 more judges because he said that there are not enough Federal judges to try all of the savings and loan cases and to try all of the drug cases. So we have a real need to have 69 more Federal judges, which I understand the Democrats have not been willing to bring forward. So in effect there are drug dealers who are not being tried because we cannot get the Federal judges because the Democrats do not want to pass them.

I think that it is inappropriate for a Member to change what he said in a dialog in which other Members were involved.

Mr. WALKER. Well, if the gentleman would yield, the problem is that the remarks that he changed indicate that he does not believe that there is any particular need for any new crime bills. The gentleman has just detailed a couple of reasons why the President's crime bill is important and why we need to report it, but the chairman of the Judiciary Committee, which controls the crime bills in this Congress, was indicating in the statement that I read that he does not believe that there is very much need for any new crime bills, because he says:

> All of us that voted for crime bills almost every year for the past few years, we have got almost as many crime bills passed as they have crimes committed.

That does not sound like a very serious concern about getting additional crime legislation to the House floor, and yet that ended up not appearing in the CONGRESSIONAL RECORD.

Mr. GINGRICH. May I ask the gentleman a question, because I am curious. I do not seem to remember, particularly considering that statement was made in Washington, DC, where they have enough crimes in a given day that that would be a big number, even if he had said as many crimes as were committed, as many murders as were committed last week.

It was sort of an outrageous comment. I am sure he meant it purely in jest and I am sure when he looked at it he found it embarrassing that he had been joking about crime.

But I am curious, do you remember other than the omnibus crime package under President Reagan, do you remember any major crime legislation we have passed?

Mr. WALKER. Well, of course we passed the omnibus drug bill in the last Congress.

Mr. GINGRICH. That was under President Reagan also.

Mr. WALKER. That was under President Reagan, that is correct. And we have not cleared any major crime legislation during the Bush administration, despite the fact that the Bush administration has sent a crime and drug package up here as the gentleman points out many months ago.

The gentleman will remember a few years ago, the only way we got a crime bill to the floor was a very interesting parliamentary maneuver where we were able to attach it to a supplemental appropriation bill at the last moment and were able to put this whole package of amendments on the floor because they had been passed by the Senate.

The Judiciary Committee has not been very fond of reporting crime bills anyhow, and I am afraid that their attitude is not particularly positive in this case.

Now we learn that they do not even want the public record to reflect what that attitude may be.

Mr. GINGRICH. Maybe if that was our attitude, we would not necessarily want the public to know it either.

Let me say that this whole problem of the bureaucratic welfare state and the way in which we are not able to solve the crime problem, I want to quote one more section from Don Graham, because it illustrates just how ridiculous America's biggest cities are getting and just how bad the bureaucratic welfare state has gotten.

Let me read this closing quote from Don Graham. He said:

> At the 5th District 16-year-old headquarters, Deputy Chief Fred Raines never has to water his potted plant. He just moved it under the biggest roof leak in his office. When it rains, it pours throughout the building. Sections of wall and ceiling have fallen. One day last week no bathrooms in the building worked, a frequent occurrence, cops said. There isn't much the rest of us can do to help police in their jobs, but the street is tough enough. It would be nice if the city's Department of Administrative Services would give the police a place to come in out of the rain.

Now, I want to expand upon what Don Graham said, because I think it has to be said more strongly. There is a reason I believe for every American to be enraged at the collapse of the bureaucratic welfare state, and at the

absolute failure of permissive attitudes, because there are real human costs.

The District of Columbia is not short of money, it is short of honesty and it is short of management. If it had an honest government and if it had a managed government that spent the money intelligently, if it applied common sense, if it broke up the bureaucracy and used entrepreneurial free enterprise, if it applied technological progress and innovation, and if it believed in honest hard work, the District of Columbia's city government would in fact be able to have a police department that did not leak, and they would be able to have a police department that had bathrooms that worked.

And it is an outrage that we ask our policemen to go out on the streets, and we cannot find a city government honest enough and effective enough to be able to do the job.

But some people might say I am just trying to attack the District of Columbia. But that is not the case. The New York City government, $27 billion in the city budget 300,000 full-time employees.

Now, my guess is if the New York City budget, simply by attrition, replaced half of this year's vacancies with policemen and put them on the street, and if the New York City government would simply give up the union work rules that make the bureaucracy so inefficient, that New York City would be 25 percent better and safer and more prosperous in a year without an additional penny from the taxpayer.

The point of my discussion today of the American Opportunities Workshop on May 19, and the point of talking about replacing the bureaucratic welfare state and permissive attitudes with a more common sense approach, and of recognizing that in a changing world we cannot stay with the same old ideas, in particular with the ideas which have failed so deeply.

Finally, let me repeat one last time what the voters have been saying in East Germany, as quoted by Michael Barone in U.S. News & World Report, and let me suggest that the people of America, if they will get active, if they will get registered, if they will get involved, they can have as big a change in the bureaucratic welfare state, they can have as big a change in the war on drugs and violent crime, as the people of Eastern Europe.

The voters are saying in the slogan of the East German winners, no more socialist experiments. They are looking for economic growth, not economic redistribution. While they want a safety net, they have little confidence in the government's ability to correct the whole economy. They prefer politicians who affirm cultural values to bureaucratic busybodies who want to reform them. History is not, it seems, an endless move to the left.

I just want to close by urging my colleagues, take a look at the Gramm-Gingrich bill on drugs and violent crime. Take a look at the American Opportunities Workshop and contact Will Pack and see what is going to be happening on that program, and recognize that if we apply common sense, if we apply the values that have worked for America, we can solve the problems we are talking about.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BONIOR (at the request of Mr. GEPHARDT) for today on account of illness.

Mr. GRANT (at the request of Mr. GEPHARDT) for April 18 and 19 for attending the birth of Madison Kathleen Grant.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PAXON) to revise and extend their remarks and include extraneous material:)

Mr. MILLER of Washington, for 5 minutes, today.

Mr. YOUNG of Florida, for 60 minutes, on April 24.

Mrs. BENTLEY, for 60 minutes each day, on April 25, 26, and 30, and May 1, 3, 8, 9, and 10.

(The following Members (at the request of Mr. MCNULTY) to revise and extend their remarks and include extraneous material:)

Mr. ALEXANDER, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. PARKER, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HAYES of Illinois, for 5 minutes, today.

Mr. AKAKA, for 5 minutes, today.

Mr. GAYDOS, for 60 minutes, on April 25.

(The following Member (at the request of Mr. DORNAN of California) to revise and extend their remarks and include extraneous material:)

Mr. HANSEN, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. ROE and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,725.

(The following Members (at the request of Mr. PAXON) and to include extraneous matter:)

Mr. WELDON.

Mr. FIELDS.

Mr. SOLOMON.

Mr. FISH in two instances.

Mr. LENT.

Mr. SCHAEFER.

Ms. ROS-LEHTINEN in two instances.

Mr. GREEN in two instances.

Mr. DOUGLAS.

Mr. STANGELAND.

Mrs. JOHNSON of Connecticut.

Mrs. BENTLEY.

Mr. MACHTLEY in five instances.

Mr. LEHMAN of Florida.

(The following Members (at the request of Mr. MCNULTY) and to include extraneous matter:)

Mr. ROE.

Mr. LAFALCE.

Mr. FUSTER.

Ms. SLAUGHTER of New York.

Mr. MATSUI.

Mr. BONIOR.

Mr. MOODY.

Mr. MANTON.

Mr. UDALL.

Mr. JACOBS.

Mr. DONNELLY.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims Rights Week."

ADJOURNMENT

Mr. GINGRICH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 57 minutes p.m.) under its previous order, the House adjourned until Monday, April 23, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3020. A letter from the Secretary, Department of Defense, transmitting the 1990 joint military net assessment, pursuant to 10 U.S.C. 113(j); to the Committee on Armed Services.

3021. A letter from the Secretary of Agriculture, transmitting a report on the Rural Housing Demonstration Housing Program, pursuant to 42 U.S.C. 1476(b); to the Committee on Banking, Finance and Urban Affairs.

3022. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-191, "Representative and Senators Term of Office, Duties, and Use of Private Funds for Public Purposes Amendment Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3023. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-190, "Infant and Child

Abandonment Prevention Amendment Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3024. A letter from the Secretary of Education, transmitting a copy: "Final Regulations—Federal State and Local Partnership for Educational Improvement," pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

3025. A letter from the Attorney General of the United States, transmitting a copy of a research report entitled, "Juveniles Taken Into Custody: Developing National Statistics, December 1989"; to the Committee on Education and Labor.

3026. A letter from the Chairman, Council on Environmental Quality, transmitting a draft of proposed legislation to authorize appropriations for the Office of Environmental Quality for fiscal years 1991 and 1992, and for other purposes, pursuant to 31 U.S.C. 1110; to the Committee on Merchant Marine and Fisheries.

3027. A letter from the Board of Trustees, the Federal Hospital Insurance Trust Fund, transmitting the 1990 annual report of the Federal Hospital Insurance Trust Fund, pursuant to 42 U.S.C. 1817(b)(2) (H. Doc. No. 101-174); to the Committee on Ways and Means and ordered to be printed.

3028. A letter from the Board of Trustees, the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds, transmitting the 1990 annual report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds, pursuant to 42 U.S.C. 201(c)(2) (H. Doc. No. 101-175); to the Committee on Ways and Means and ordered to be printed.

3029. A letter from the Assistant Secretary of Defense for Production and Logistics, transmitting a report on the effects of Navy shipbuilding and repair on U.S. public and private shipyards and the supporting industrial base; jointly, to the Committees on Armed Services and Appropriations.

3030. A letter from the Board of Trustees, the Federal Supplementary Medical Insurance Trust Fund, transmitting the 1990 annual report of the Federal Supplementary Medical Insurance Trust Fund, pursuant to 42 U.S.C. 1841(b)(2) (H. Doc. No. 101-173); jointly, to the Committees on Ways and Means and Energy and Commerce, and ordered to be printed.

3031. A letter from the Assistant Secretary for Policy, Budget and Administration, Department of the Interior, transmitting the fifth report on the implementation of section 318(h) of the Interior and Related Agencies Appropriations Act for Fiscal Year 1990, pursuant to Public Law 101-121, section 318(h) (103 Stat. 750); jointly, to the Committees on Agriculture, Appropriations, Interior and Insular Affairs, and Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 4283. A bill to authorize expenditures for fiscal year 1991 for the operation and maintenance of the Panama Canal, and for other purposes; with an amendment (Rept. 101-451). Referred to the Committee of the Whole House on the State of the Union.

Mr. FORD of Michigan: Committee on Post Office and Civil Service. H.R. 2514. A bill amending subchapter III of chapter 84 of title 5, United States Code; with an amendment (Rept. 101-452). Referred to the Committee of the Whole House on the State of the Union.

Mr. ANDERSON. Committee on Public Works and Transportation. H.R. 3961. A bill to redesignate the Federal building at 1800 5th Avenue, North, in Birmingham, AL, as the "Robert S. Vance Federal Building"; with amendments (Rept. 101-453). Referred to the House Calendar.

Mr. ANDERSON. Committee on Public Works and Transportation. H.R. 4035. A bill to redesignate the Federal building located at 777 Sonoma Avenue in Santa Rosa, CA, as the "John F. Shea Federal Building"; with an amendment (Rept. 101-454). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STAGGERS:

H.R. 4556. A bill to prohibit the operation of landfills within 3 miles of the Potomac River; to the Committee on Energy and Commerce.

By Mr. MONTGOMERY (for himself, Mr. STUMP, Mr. HAMMERSCHMIDT, and Mr. ROWLAND of Georgia):

H.R. 4557. A bill to amend title 38, United States Code, to improve the capability of the Department of Veterans Affairs to recruit and retain physicians and dentists through increases in special pay authorities, to revise and improve recruitment and retention of nurses in the Department by providing greater flexibility in the pay system for nurses, to authorize collective bargaining over conditions of employment for health-care employees of the Department of Veterans Affairs, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. AKAKA:

H.R. 4558. A bill to establish a foundation in honor of Senator Spark M. Matsunaga to provide scholarships and fellowships to outstanding students, and to provide monetary awards to individuals who advance instruction, in the fields of peace studies and conflict resolution; and for other purposes; jointly, to the Committees on Education and Labor and Foreign Affairs.

By Mr. BILBRAY:

H.R. 4559. A bill to establish the Red Rock Canyon National Conservation Area; to the Committee on Interior and Insular Affairs.

By Mr. DREIER of California (for himself, Mr. HATCHER, Mr. COX, Mr. LAUGHLIN, Mr. MCEWEN, and Mr. ROHRABACHER):

H.R. 4560. A bill to establish a program for greater stability and support [PROGRESS] for Eastern Europe; jointly, to the Committees on Ways and Means; Banking, Finance and Urban Affairs; Foreign Affairs; Energy and Commerce; and Small Business.

By Mr. CARR:

H.R. 4561. A bill to amend the Solid Waste Disposal Act to prohibit the transportation of solid waste from the State in which the waste was generated to another State for purposes of treatment, storage, or disposal, unless the State in which the waste was generated has, in effect, a law prohibiting nonreturnable beverage containers; to the Committee on Energy and Commerce.

By Mr. ENGEL:

H.R. 4562. A bill to amend the Export Administration Act of 1979 to direct the Secretary of Commerce to establish indexing procedures to remove obsolete items from the commodity control list; to the Committee on Foreign Affairs.

By Mr. FIELDS (for himself and Ms. SCHNEIDER):

H.R. 4563. A bill to amend the African Elephant Conservation Act to prohibit importation of fish and wildlife from the People's Republic of China if that country does not withdraw their reservation regarding listing the African elephant as an endangered species under appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora; jointly, to the Committees on Merchant Marine and Fisheries and Ways and Means.

By Mr. GUNDERSON:

H.R. 4564. A bill to delay the effective date of final regulations of the Secretary of the Treasury implementing the labeling requirements of the Alcoholic Beverage Labeling Act of 1988; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. HOAGLAND (for himself, Mr. MCMILLEN of Maryland, Mr. NEAL of North Carolina, Mr. GEREN, Mr. BEVILL, Mr. LEHMAN of California, Mr. LANCASTER, Mr. HUBBARD, Mr. FLAKE, Mr. MORRISON of Connecticut, Mr. JOHNSTON of Florida, Mr. FUSTER, Mr. MCCLOSKEY, Mr. FRANK, Ms. OAKAR, Mr. BARNARD, Mr. MFUME, Mr. TOWNS, Mr. AKAKA, Mrs. UNSOELD, Mr. PARKER, Mr. ESPY, Mr. HOCHBRUECKNER, Mr. AUCOIN, Mr. KLECZKA, Mr. ENGEL, Mr. GRANDY, Mr. GALLO, Mr. SHUMWAY, Mr. BARTLETT, Mr. WHITTAKER, Mr. KOLBE, Mr. DAVIS, Mr. MCCOLLUM, Mr. GILLMOR, Mr. BALLENGER, Mr. BAKER, Mr. PAXON, Mr. ROTH, Mr. LEWIS of Florida, Mr. RIDGE, Mr. BEREUTER, Mr. PARRIS, Mrs. ROUKEMA, Mr. SAXTON, and Mr. QUILLEN):

H.R. 4565. A bill to amend certain provisions of the Home Owners' Loan Act relating to limitations on loans to one borrower by savings associations and to provide a transition period for the implementation of such limitations; to the Committee on Banking, Finance and Urban Affairs.

By Mrs. JOHNSON of Connecticut:

H.R. 4566. A bill to amend title XVIII of the Social Security Act to require the arbitration of medical malpractice claims brought by Medicare beneficiaries; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. JOHNSON of South Dakota (for himself and Mr. CAMPBELL of Colorado):

H.R. 4567. A bill to authorize an exchange of lands in South Dakota and Colorado; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. KENNEDY (for himself, Mr. OBERSTAR, Mr. MARKEY, Mr. GORDON, Mr. FLAKE, Mr. MCDERMOTT, and Mr. PALONE):

H.R. 4568. A bill to amend title 23, United States Code, to provide a minimum level of funding for bicycle transportation and pedestrian walkways; to the Committee on Public Works and Transportation.

By Mr. LAFALCE:

H.R. 4569. A bill to provide assistance for projects designed to aid economic development in, and improve the health of the people of, certain Central European countries and other countries with emerging market economies; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEVINE of California:

H.R. 4570. A bill to amend section 438 of the General Education Provisions Act to permit the release of records of disciplinary proceedings to victims of violent crime; to the Committee on Education and Labor.

By Mr. MATSUI (for himself and Mr. SCHULZE):

H.R. 4571. A bill to amend the Internal Revenue Code of 1986 to permit penalty-free withdrawals from individual retirement plans for first home acquisitions by taxpayers or their children or grandchildren; to the Committee on Ways and Means.

By Mr. SENSENBRENNER:

H.R. 4572. A bill to amend title XVIII of the Social Security Act to require Medicare carriers to publish medical review screens and associated screening parameters before applying such screen and parameters; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Ms. SLAUGHTER of New York:

H.R. 4573. A bill to amend the Internal Revenue Code of 1986 to extend the treatment of qualified small issue bonds through 1995; to the Committee on Ways and Means.

By Ms. SLAUGHTER of New York (for herself, Mr. MILLER of California, and Mr. SCHUMER):

H.R. 4574. A bill to amend the Stewart B. McKinney Homeless Assistance Act to reauthorize provisions relating to the provision of education to homeless children and homeless youths, to establish a program of grants to State and local education agencies for the provision of support services to such children and youths, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs and Education and Labor.

By Mr. SLAUGHTER of Virginia:

H.R. 4575. A bill to amend the Internal Revenue Code of 1986 to allow newspapers a credit against income tax for using recycled newsprint; to the Committee on Ways and Means.

By Mr. STALLINGS (for himself, Mr. WISE, Mr. FORD of Michigan, Mr. ENGLISH, Mr. TALLON, Mr. GUNDERSON, Mr. SKELTON, Mr. OBEY, Mr. GRANDY, Mr. RAHALL, Mr. PENNY, Mr. CAMPBELL of Colorado, Mr. ESPY, Mr. THOMAS of Wyoming, Mr. HATCHER, Mr. EVANS, and Mr. JONTZ):

H.R. 4576. A bill to establish a program of grants to improve the utilization of rural schools and school systems, improve job opportunities and the business environment in rural areas, and provide needed social services to rural areas; to the Committee on Agriculture.

By Mr. STANGELAND:

H.R. 4577. A bill to amend the Solid Waste Disposal Act to establish programs to provide loan guarantees and grants to small businesses for the closure, replacement, and upgrade of underground storage tanks and for the maintenance of release detection systems for such tanks, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. TALLON:

H.R. 4578. A bill to allow holders of unclaimed Postal Savings System certificates of deposit to file claims for such certificates; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

By Mr. WYDEN:

H.R. 4579. A bill to amend the Toxic Substances Control Act to require the Administrator of the Environmental Protection Agency to provide for the identification and monitoring of environmental areas of concern for the presence and effects of toxic substances, and for other purposes; to the Committee on Energy and Commerce.

By Mr. YOUNG of Florida (for himself and Mr. WAXMAN):

H.R. 4580. A bill to amend the Public Health Service Act to extend the program for a registry of voluntary bone marrow donors; to the Committee on Energy and Commerce.

By Mr. DORNAN of California:

H. Con. Res. 306. Concurrent resolution expressing the sense of the Congress that the people of the United States should be protected from ballistic missile attack with near-term development of phase I elements of the strategic defense initiative; to the Committee on Armed Services.

By Mr. SAWYER:

H. Con. Res. 307. Concurrent resolution to establish an Albert Einstein Fellowship Program; to the Committee on House Administration.

By Mr. SCHAEFER:

H. Con. Res. 308. Concurrent resolution declaring that the deficit target for fiscal year 1991 set forth in the Balanced Budget and Emergency Deficit Control Act of 1985 should be met by limiting the growth in spending, and for other purposes; jointly, to the Committees on Government Operations and Ways and Means.

By Mr. SMITH of New Jersey (for himself, Mr. FASCELL, Mr. BROOMFIELD, Mr. YATRON, Mr. BEREUTER, Mr. CROCKETT, Mr. LAGOMARSINO, Ms. ROS-LEHTINEN, Mr. GOSS, Mr. OWENS of Utah, Mr. BURTON of Indiana, Mr. LANTOS, Mr. GALLEGLY, Mr. SOLOMON, Mr. ACKERMAN, Mr. HYDE, Mr. BOSCO, Mr. MILLER of Washington, Mr. WEISS, Mr. GINGRICH, Mr. DWYER of New Jersey, Mr. ARMEY, Mr. FRANK, Mr. LENT, Mr. MAVROULES, Mr. WEBER, Mr. DORNAN of California, Mr. GALLO, Mr. SIKORSKI, Mr. RINALDO, Mr. SMITH of New Hampshire, Mr. WALKER, Mr. WILSON, and Mrs. MORELLA):

H. Res. 381. Resolution relating to human rights abuses by the Government of Cuba and reprisals by the Cuban Government against those Cuban citizens who testified before the Cuba Working Group of the United Nations Human Rights Commission; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

364. By the SPEAKER: Memorial of the Legislature of the State of Indiana, relative to restoring funds cut from the budget for unemployment insurance staff and operations; to the Committee on Ways and Means.

365. Also, memorial of the Senate of the State of Michigan, relative to providing supplemental appropriations to the Michigan Employment Security Commission; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

PETITIONS, ETC.

Under clause 1 of rule XXII,

159. The SPEAKER presented a petition of the Duluth City Council, Duluth, MN, relative to the reauthorization of the Low-Income Home Energy Assistance Program; which was referred, jointly, to the Committees on Energy and Commerce and Education and Labor.

SENATE—*Thursday, April 19, 1990*

(Legislative day of Wednesday, April 18, 1990)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable JOSEPH I. LIEBERMAN, a Senator from the State of Connecticut.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

The Lord is my shepherd; I shall not want. He maketh me to lie down in green pastures: he leadeth me beside the still waters. He restoreth my soul: He leadeth me in the paths of righteousness for his name's sake. Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me. Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil; my cup runneth over. Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord forever.—Psalm 23.

Eternal God, gracious faithful Shepherd, as we express our appreciation for the life and service and friendship of a beloved leader, Senator SPARK MATSUNAGA, we are profoundly grateful for the Shepherd's Psalm, written by a great king, one of the outstanding rulers in history. We praise Thee for his word that his Shepherd, the Lord himself, is with us through the valley of the shadow of death. We share the king's hope that death opens the door to the house of the Lord where we may dwell forever.

Thank Thee, Father. In the name of Jesus, the Life and Light of the world. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, April 19, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOSEPH I. LIEBERMAN, a Senator from the State of Connecticut, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. LIEBERMAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the standing order, the acting majority leader, the distinguished Senator from Georgia [Mr. NUNN] is recognized.

RESERVATION OF LEADER TIME

Mr. NUNN. Mr. President, I ask unanimous consent that the time for the majority leader and minority leader be reserved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. NUNN. Mr. President, what is the business before the Senate?

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business for not to exceed 2 hours, to be under the control of the Senator from Georgia [Mr. NUNN] for his use and the use of members of the Armed Services Committee.

Mr. NUNN. I thank the Chair.

A NEW MILITARY STRATEGY

INTRODUCTION

Mr. NUNN. Mr. President, in the last few weeks I have delivered two speeches on our national security and our budget challenges. In the first presentation, I outlined the problems that the blanks in the Defense Department's incomplete 5-year defense plan and the amended defense budget request for fiscal year 1991 pose for our committee and Congress as a whole. In the second presentation, I assessed the recent changes in the world scene and their implications for the threat environment of the 1990's. In my remarks today, I will discuss the major changes that I believe should be made in our military strategy in light of these changes in the threat abroad and also in light of the fiscal realities here at home.

In the early 1980's, at the request of former Ambassador David Abshire, I had the privilege and honor of cochairing with then Congressman Dick Cheney a study group at the Center for Strategic and International Studies, also known as CSIS, on the subject of grand strategy. As a result of that experience, both Dick Cheney and I well understand how difficult it is to formulate a coherent military strategy, let alone a grand strategy, even when the world is not being turned upside down as it is today.

In a speech I made in connection with the CSIS project, I noted that military strategy has been defined as: "the art of looking for danger, finding it everywhere, diagnosing it inaccurately, and prescribing the wrong remedy." I will keep this definition in mind as I address the subject of strategy again today because it is a difficult subject.

In presenting these remarks, I hope to contribute to a much-needed and overdue debate and dialog on military strategy. As I discussed in my remarks to the Senate on March 29, the threat has changed significantly over the last year, and many of these changes present opportunities for substantial reduction in U.S. military expenditures over the next several years. The question today is not whether we reduce military spending. That is inevitable. The question is whether we reduce military spending pursuant to a sensible military strategy that meets the threats of today and tomorrow.

At the outset, I think it is important to distinguish between national security strategy, which is a very broad, and military strategy, which is a narrow component of national security strategy. National security strategy is designed to protect and preserve broad and enduring national interests and goals. It seeks to meld a wide array of means to achieve these ends, including political, diplomatic, arms control, economic as well as military instruments of policy. Military strategy, on the other hand, is a narrower component of national security strategy and describes how we structure our military forces, based on the threat and the

available resources, in support of our broad interests and goals.

PRESIDENT'S REPORT ON NATIONAL SECURITY STRATEGY

Last month, President Bush submitted to Congress his administration's national security strategy report for 1990. In this report, the President summarizes our Nation's broad national interests and objectives as follows:

The survival of the United States as a free and independent Nation, with its fundamental values intact and its institutions and people secure.

A healthy and growing U.S. economy to ensure opportunity for individual prosperity and a resource base for national endeavors at home and abroad.

A stable and secure world, fostering political freedom, human rights, and democratic institutions.

Healthy, cooperative and politically vigorous relations with allies and friendly nations.

The President then went on to pose a series of questions for the future, as follows:

How can we ensure continued international stability as U.S./Soviet bipolarity gives way to global interdependence and multipolarity?

What will be America's continuing leadership role—and the new roles of leadership assumed by our allies?

What are the risks that today's positive strategic trends will be reversed, and how do we take due account of them in our long-term planning?

How much risk can be prudently accepted in an era of strategic change, fiscal austerity, and great uncertainty?

While maintaining a balance of power with the Soviet Union as an inescapable American priority, how can we adapt our forces for the continuing challenge of contingencies elsewhere in the world?

How do we maintain the cohesion among allies and friends that remains indispensable to common security and prosperity, as the perceived threat of a common danger weakens?

What will be the structure of the new Europe—politically, economically, and militarily—as the Eastern countries move toward democracy and Germany moves toward unification?

If military factors loom less large in a world of a more secure East-West balance, how shall we marshal the other instruments of policy to promote our interests and objectives?

President Bush's strategy report raises the right questions concerning the security issues facing America. In considering the fiscal year 1991 defense budget request, we must begin answering these questions.

THE NEED FOR A NEW MILITARY STRATEGY

In an excellent recent paper on U.S. military strategy for the 1990's, Senator BILL COHEN and Senator JOHN MCCAIN properly urged caution in changing our defense posture. But they went on to make two important points that we should all keep in mind in the continuing debate over our national security policy.

First, they noted that "The specter of the Cold War's possible return * * * cannot be used to defer a reconsideration of defense policy that was warranted even before the events of the last 6 months."

Second, they stated that "we believe the American people will support the budget levels that are needed only if they believe our defense policies correspond to the changing world scene."

Mr. President, I agree with Senator COHEN and Senator MCCAIN. We must act now to design a new military strategy to meet the changed threat and to help shape our defense budget priorities.

KEY MILITARY MISSIONS

With an eye both to recent changes in the world and future defense budgets, I would suggest the following key tasks which we should ask and expect our military forces to accomplish:

Deter any attack on the American homeland;

Deter the use of nuclear weapons by the Soviet Union or any other nuclear-armed adversary against our homeland, against our allies, or against our military forces deployed in any region of the world;

Join with our allies to deter Soviet conventional aggression in Europe—at lower levels of forces as the threat decreases, and with the capability to rebuild to higher levels in time, should the Soviets attempt to reestablish a credible invasion threat;

Help defend our friends and allies in Korea, the Far East and Pacific, the Middle East, Southwest Asia, and Latin America with United States military capabilities tailored to complement—but not substitute for or duplicate—their own military capabilities—complement—but not substitute for or duplicate—the capabilities of our allies;

Be prepared to conduct forcible entry in small- or medium-scale contingencies;

Ensure that the sea lines of communication remain open;

Counter drug trafficking, terrorism, and other unconventional military threats; and

Provide accurate, timely and responsive intelligence in conjunction with other elements of the intelligence community concerning changes in the global threat environment.

ESSENTIAL ELEMENTS OF A NEW MILITARY STRATEGY

If we are to design a new military strategy that effectively relates our means to the ends outlined above, I believe we should be guided by five essential elements:

First, although nuclear deterrence will provide the critical underpinning of our military strategy for now and for the foreseeable future, it should be achievable at significantly lower levels of weaponry and with a much higher degree of stability; and by "Stability" I mean reduced incentives for either side to strike first with strategic nuclear weapons in any situation.

Second, our forward deployed forces, or overseas forces, should be reduced consistent with the changes in the threat while placing much greater emphasis on increased specialization among allied nations and much greater reliance on reinforcement with deployable U.S. combat forces to support our allies.

Third, more of our forces should be put in the reserves, specifically structured for a reinforcement mission.

Fourth, we should employ a concept of what I call flexible readiness, by which I mean, high readiness for certain forces and adjustable readiness for other forces.

Fifth, our defense management and resource strategy should be guided by the phrase suggested by former Ambassador David Abshire: "think smarter, not richer." Under this approach, I would include greater emphasis on flying before buying; reduced costs of procuring and maintaining weapons, including improving existing platforms and reducing new starts; innovative research to preserve our technological superiority; and preserving a viable defense industrial base.

These five elements constitute the framework I suggest for a revised military strategy. I want to take a few moments to discuss each of these five elements in greater detail.

I. DETERRENCE OF NUCLEAR WAR

The first essential element of a new military strategy is deterrence of nuclear war at lower levels of nuclear weaponry with a much higher degree of stability. This element includes two components: Deterrence of a direct Soviet nuclear strike against the United States and deterrence of a Soviet use of nuclear weapons in conjunction with aggression against a United States ally. In addition, we must join with our allies and other nations, including the Soviet Union and China, to limit the proliferation of nuclear weapons and the spread of missile technology. We must also intensify our efforts with other nations to prevent the use of any weapon of mass destruction by any nation or terrorist group. And, of course, that goes beyond simply one nation's mission. It is the mission of all the civilized world.

A. STRATEGIC NUCLEAR DETERRENCE

In my remarks to the Senate on March 29 regarding threat assessment, I stated "In contrast to the momentous reductions in the Soviet conventional threat, Soviet modernization of its strategic nuclear forces has tended to continue apace." For this reason, U.S. nuclear forces will remain the bedrock of deterrence and modernization of our nuclear forces will be required.

At the same time, the decrease in the Soviet conventional threat holds important implications for the Soviet nuclear threat. As I said in my remarks last month: "As the likelihood of a conventional war in Europe has significantly decreased, a nuclear war originating from escalation of a European conflict has also significantly decreased."

In future remarks, I will discuss in some detail my views on the implications of this development for our strategic posture, our objectives in arms control, and the appropriate role of strategic defenses.

B. SHORT-RANGE NUCLEAR FORCES

The emergence of newly-democratic governments in Eastern Europe; the scheduled withdrawal of Soviet forces from Hungary and Czechoslovakia; and the likelihood of equal ceilings on tanks, artillery, aircraft and other categories of military equipment being established in a treaty on conventional forces in Europe, known now as CFE, also have significant implications for the Alliance's short-range nuclear forces' known as SNF, and tactical air-delivered nuclear weaponry.

The United States currently provides NATO with several thousand nuclear bombs and weapons for delivery by artillery, by the short-range Lance missile, and by tactical aircraft. In addition, a number of U.S. submarine launched ballistic missiles [SLBM's] have been designated for NATO, and the Supreme Allied Commander in Europe [SACEUR] has the option of requesting other U.S. strategic and nonstrategic nuclear capabilities.

B. (1) NATO DOCTRINE

NATO doctrine has looked to nuclear weapons to serve three critical functions:

First, to provide deterrence against a Soviet first-use of nuclear weapons in Europe.

Second, to deter any massing by the enemy of its tank armies and thereby contribute to NATO's overall deterrence of conventional attack by the Soviet Union and the Warsaw Pact.

Third, to compensate for conventional inadequacies should deterrence fail. Consistent with its doctrine of flexible response, NATO has maintained that any Warsaw Pact attack could be halted and the hostilities terminated at an early stage by demonstrating that the Alliance was prepared to initiate nuclear war to defend its freedom. That has been and continues to be the NATO rationale for nuclear weapons.

B. (2) FUTURE NUCLEAR POSTURE

In a post-CFE situation of conventional parity—particularly one in which Soviet tank armies have withdrawn from Eastern Europe—NATO's reliance on the threat of an early first use of short-range nuclear weapons to deter conventional attack is no longer credible. I do not believe there is a role in a new military strategy for land-based nuclear weapons whose range is so limited that they could only detonate on the soil of our allies or the newly emerging democracies in Eastern Europe. Ground-based nuclear missiles and nuclear artillery in Europe should be phased out, preferably pursuant to NATO and Warsaw Pact discussions and agreements on a mutual basis.

Even if this is accomplished, however, a requirement will exist to deter Soviet use of nuclear weapons in Europe. Nuclear systems which are deployed on European soil, including the British and French nuclear forces, represent a credible retaliatory threat. Air-delivered weapons allow significantly greater flexibility for military planners, permit basing of nuclear capabilities in several NATO countries, and do not pose the significant security and political problems that accompany systems whose range is far more limited.

With these considerations in mind, I suggest that NATO emphasize tactical air-delivered nuclear bombs and missiles, including what is known as TASM or tactical air to surface missile, and adjust its modernization and arms control planning accordingly. For purposes both of shared risks and survivability, NATO's tactical air-delivered nuclear weapons should be widely deployed at airfields throughout NATO, including but not limited to the Federal Republic of Germany.

II. REINFORCEMENT STRATEGY—REDUCE FORWARD-DEPLOYED FORCES, INCREASE SPECIALIZATION AND EMPHASIZE REINFORCEMENT

The second element for a new U.S. military strategy is to reduce forward-deployed U.S. forces, increase specialization among allied nations, and emphasize a reinforcement capability, including the use of reserves to augment the remaining forward-deployed U.S. forces. This element applies primarily in Europe, but it also applies to a certain extent in Korea and it also applies, I think, in other regions of the world.

A. POST-CFE EUROPE

In my remarks on the Senate floor last month, I presented two key conclusions regarding the recent changes in the threat:

First, the threat of a large-scale Warsaw Pact attack against Western Europe has virtually been eliminated and the chances of any Soviet go-it-alone attack are very remote.

Second, any Soviet effort to reestablish a credible threat of a large-scale conventional attack on NATO would be very difficult and would require a vastly extended mobilization, thereby giving NATO many months of warning time.

In my remarks, I emphasized the profound implication of these developments for NATO's military strategy:

> [T]he critical point is this: even if one deems it necessary to hedge against the possibility, however, remote, of a reestablishment of a Soviet invasion threat against Western Europe, it does not necessarily follow that the appropriate precaution is to maintain huge American standing armies on guard in Europe. * * * NATO's criterion should be whether the Alliance is capable of maintaining deterrence at lower levels and mobilizing and rebuilding to higher levels in time should a Soviet buildup begin.

NATO, as an alliance still has an important role to play in safeguarding Western security—militarily, politically, and diplomatically. However, in these changed circumstances, the burden of proof is on NATO to demonstrate to its publics that it remains relevant. As former NATO Ambassador David Abshire has said, "NATO should undertake—with highest political visibility—twin studies that update its political and military strategies." A study by a recognized group of wise men equivalent to the 1967 Harmel Report could play an important role in establishing a new transatlantic consensus of the Alliance's defense needs and defense posture for the future.

I know that President Bush is meeting with President Mitterrand. I know there are a lot of discussions going on. I cannot overemphasize the importance of NATO undertaking a highly visible study, led by that I mean the top leadership of each country to determine and lead the way in pointing toward NATO's future and its future role under vastly changed conditions.

I believe this study must take into account three realities. They are harsh realities, but they are, I think, very important, underlying changes.

First, NATO's reliance on the threat of early first use of short-range nuclear weapons to deter a conventional attack is no longer credible.

Second, NATO's assumption that the United States will maintain 195,000 troops in Central Europe is no longer realistic.

Third, NATO's current strategy for forward defense at the inter-German border is no longer viable.

A. (1) REDUCE U.S. FORCES IN EUROPE

In light of future instabilities in Europe which are likely, if not inevitable, caution and prudence are clearly in order as we build down our military forces in NATO. American troops in Europe can and should and, I would say, must play a stabilizing role during this period of transition. Nevertheless, the greatly lengthened warning time of a credible Soviet conventional attack against NATO allows the United States to reduce the size of our standing armies defending well forward and to emphasize reinforcement instead.

Mr. President, the administration's view that 195,000 U.S. troops in Central Europe—assuming we get to that level in arms control talks with the So-

viets on an equal floor kind of arrangement—is a floor below which the United States cannot reduce is not, I think, the right assumption. I think we must begin planning for a significantly lower level in the years ahead. I agree with former Secretary of Defense James Schlesinger that we should start planning on a residual force in Europe on the order of 75,000 to 100,000 troops within 5 years.

These reductions not only go hand in hand with the decrease in the threat, they will also be required by changing German attitudes on the fundamental issues of sovereignty and nationalism. Opposition to a large United States military presence in Germany will increasingly come from the cumulative annoyance associated with training, exercises, maneuvers, and low-level flying. In addition, the major shortage in Germany of housing, hospitals, schools and open land is stimulating rising German desires to take United States military facilities and land areas and convert them to German civil uses.

Recently I received a letter from a member of the German Parliament, who is a member of the Defense Committee and a strong supporter of NATO. I have the letter here. He pointed out that within his constituency there are over 4,000 German families on waiting lists for apartments or other housing, and that the local hospitals are overtaxed. He then went on to list the U.S. bases, barracks and medical facilities in his district, including their acreage and recreational potential.

His request to me was that the first United States soldiers to be withdrawn from Germany be taken from his district.

As former Secretary of Defense James Schlesinger told our committee:

> Whatever its present inclinations, a German government will be obliged to pay heed to public opinion. We should begin to prepare now for that development, already foreseeable.

I agree with former Secretary Schlesinger on this matter.

A. (2) NEW FEATURES OF NATO STRATEGY

I think we need to look where we have been to determine where NATO's strategy should go.

For many years, NATO's strategy in the center region has been to defend well forward, along the West German border with East Germany and Czechoslovakia. This border has been divided into eight corps sectors, and the ground defense of each sector has been assigned to the national forces of a single country. Within each corps sector, logistics and support is also the sole responsibility of the country defending that sector. This is, of course, the opposite of "specialization"—because within its area of responsibility each nation replicates virtually all of the military capabilities in the other national sectors. In addition, the traditional strategy of "defending forward" is about to be transformed—whether we are ready or not—by the uniting of the two Germanys.

Assuming Soviet unilateral and CFE agreed reductions are completed, the changes in both the threat and Alliance geography offer the opportunity to sharply modify the traditional concept of Corps areas of responsibility within NATO. NATO must have a new strategy, one that is developed by the Alliance as a whole. The United States cannot and should not be the only voice in that overall strategy deliberation. We are part of the picture, but we are not the whole picture. My ideas as to the role our Nation should play in a new NATO strategy I will present this morning.

First, we must insist on greater specialization of roles and missions among NATO nations. The European members of NATO should assume the primary responsibility for the initial forward ground defenses, which should be heavily antiarmor and not rely on large numbers of forward-deployed U.S. ground forces. The U.S. ground force commitment to NATO should be restructured to provide NATO's mobile strategic reserves, rather than NATO's forward defenders.

Second, the U.S. peacetime ground presence in Europe should be largely lead elements of combat units and combat support units. These support units should include tactical planning elements, intelligence and surveillance units, command and control forces, and "reception" forces along the lines suggested by former Army Chief of Staff Gen. "Shy" Meyer.

Third, the United States should continue to maintain large prepositioned stocks of combat and support equipment in Europe. With this, an initial United States reinforcement of NATO could be accomplished by transporting Army combat personnel from the United States to Europe, where they would break out their prepositioned combat equipment and move to reinforce NATO's ground forces.

Fourth, the United States should maintain some tactical Air Force units in Europe for both conventional and nuclear missions, and would commit to provide significant numbers of reinforcing tactical aircraft from the United States to Europe. This pledge, however, must be contingent on NATO providing adequate numbers of semi-hardened aircraft shelters, fuel and munitions storage, and maintenance and operations areas at colocated operating bases [COB's] in Europe.

Fifth, since United States ground forces in Europe would be reduced in numbers and consist mainly of combat support units, it should be possible to greatly reduce tour lengths and, therefore, to also be able to reduce the number of accompanying dependents.

Finally, the United States should make a determined effort to obtain agreement from France in advance for the United States use of French ports, airfields, and air bases for United States reinforcing units in a period of emergency. No United States forces would need to be stationed in France in peacetime, but occasional joint exercises of reentry capability would greatly increase NATO's deterrent posture.

KOREA

In my March 29 threat assessment, I stated that North Korea continues to pose an invasion threat against our ally, South Korea. I believe that a continued United States military presence on the Korean peninsula is required to make clear to North Korea that an attack on the South will constitute an attack on the United States. Our capabilities to reinforce South Korea with tactical, naval and long-range air power are significant. The United States needs to continue to provide other forms of support to South Korea—intelligence; command, control and communications capabilities; and reconnaissance and surveillance capabilities.

Since the border with North Korea is only a few miles from South Korea's capital, Seoul, the objective of South Korean and United States military planners has been, of necessity, to defend far forward, and to blunt any massive North Korean attack without yielding territory. This can only be achieved by applying prompt and massive firepower against the assaulting waves of enemy forces. Tactical air power is one way of providing the needed firepower, and that is the main role of the U.S. Air Force in the region. The U.S. Army, however, consists largely of mechanized infantry units, which do not provide high, sustained firepower. The South Koreans have no shortage of infantry.

Again, in keeping with the concept of specialization, I believe United States ground combat forces in Korea should emphasize long-range artillery, including the multiple launch rocket system, known as MLRS. Our role should be to provide increased high-firepower support to Korean front-line defenders with United States units assigned to support specific South Korean units. This augmented firepower approach should permit a significant drawdown, over time, of United States stationed forces in Korea.

OTHER AREAS

In locations where the United States does not have prepositioned equipment and stationed forces, there is a broad range of contingencies to which U.S. forces projection capabilities must be able to credibly respond.

Many contingencies would present threats of one sort or another to

United States interests. Of course, where our vital interests may be threatened, we need to be capable of military intervention. But we should, whenever possible, attempt to manage the threats through diplomatic, economic and other nonmilitary measures, with the option of increased—and increasingly visible—military presence in the area.

FORCE PROJECTION MISSION

The United States must be capable of performing a range of force projection missions.

At the low end of the spectrum of operational intensity are missions whereby a U.S. presence is intended to deter rash actions and stabilize potential crises. Nation-building and training of foreign military forces would also be included in this category.

The next level of support would be for the United States to provide noncombat military support—things like intelligence information, surveillance and warning, logistical assistance, and perhaps rear-area security. Combat situations involving the U.S. military could range from firepower support of indigenous forces, from either aircraft or naval gunfire, through full-blown intervention by a U.S. expeditionary force.

PERSIAN GULF AND SOUTHWEST ASIA

Contingencies in and around the Persian Gulf, on the Arabian peninsula, and in Southwest Asia are a demanding case and pose serious problems for United States military planners. In the not-too-distant past, conflicts have occurred there between Israel and several of the Arab States, between the two Yemens, and between Iran and Iraq, in addition to the continuing strife in Lebanon. The United States has important security interests in Israel, Egypt, Saudi Arabia and several of the other Gulf States. In addition, the economies of the Western World are critically linked to the free flow of oil from the Middle East producing states. Our own economy increasingly and, in my view, shares a growing dependence on Middle Eastern oil as both domestic production and that of several major hemispheric producers have begun to decline.

The Persian Gulf region is also one of the most heavily armed regions in the world. Tanks abound, many countries have modern, high-performance tactical aircraft, and ballistic missiles are widely proliferated, including both suface-to-surface and antiship missiles. Any U.S. intervention in support of a friendly government must expect to encounter a high-threat environment. Our ability to provide this assistance will require an improved logistics infrastructure in the region, including prepositioned supplies and materiel.

NECESSARY RESTRUCTURING

Current U.S. capabilities for intervention at a distance, where there are few bases and a limited infrastructure, are not fully suited to our needs. Today the United States has the greatest force projection capability of any country in the world, but we are also very far from most of the potential trouble spots in the world. However, in general, Army light forces are rapidly deployable but lack sufficient firepower, sustainability and ground mobility; Army heavy forces are too heavy and too slow to deploy; and in recent years Marine Corps forces have allowed their increase in equipment to outstrip their already inadequate amphibious lift. To meet potential force projection missions, we must restructure our forces in accordance with the following priorities:

We must give priority to forces that are inherently mobile and rapidly deployable—maritime-based expeditionary forces, long-range and tactical air forces, and light combat forces that can be quickly transported using amphibious lift, sealift, and airlift assets.

Technology must be applied so that in the future our contingency forces have reduced weight and increased mobility but with improved firepower and survivability.

Special attention must be devoted to the proper mix of air, sea, and amphibious lift, including fast sea lift, to ensure deterrence by providing a ready capability for response to contingencies.

We must also continue to improve, as we in the Congress have emphasized in recent years, our special operations capabilities.

GREATER UTILIZATION OF THE RESERVES

The third element, Mr. President, relating to the strategy that I propose today emphasizes greater utilization of our Reserve forces. In this period of increased warning time and fiscal austerity, we must conduct a fundamental reexamination of the use of the Reserves in the military services. I understand full well that it will be a very difficult challenge for the services, but it is one which must be addressed.

There are some areas in which entire missions can be transferred to our Reserve components. As a corollary, active duty personnel have to be more involved in the Reserves. We must also be prepared to use the existing authority to call up the Reserves at early stages of potential crises if this element of the strategy is to be successful. That involves political leadership, usually civilian leadership.

At the time of the recent escorting of the reflagged tankers in the Persian Gulf, almost all of the Navy minesweeper ships were in the Naval Reserve. When it became necessary to deploy the minesweepers to the Persian Gulf, the Navy took the Reserve crews off the ships and replaced them with active duty crews. This delayed the deployment of the ships. It also sent the wrong message to both the Active and the Reserve forces. It told the Reserves that their skills and training would not be used in a contingency, and it told the Active Forces that "we cannot afford to rely on the Reserves." If we are going to have and rely on the Reserve forces—as I believe we must—and have a true total force policy, we must be willing to call up the reserves in the future.

A. ARMY

In the Army, the greatly increased warning time of conventional conflict in Europe increasingly allows the heavy armor mission to be shifted to the Reserve components. Army Guard and Reserve units should be designed to be capable of reaching full combat readiness within a scheduled period ranging from weeks to months of a mobilization decision, all well within the available warning times and matched to available airlift and sealift, as well as the Soviet buildup curve.

B. AIR FORCE

Within the Defense Department, the Air Force has been a leader in the effective utilization of the Reserve components. The Air National Guard and the Air Force Reserve already have made very substantial contributions to the overall Air Force missions. Even greater use of the Air Reserve components can be made in the areas of strategic and tactical airlift, close air support and air forces oriented toward a major contingency in Europe. This might require increased assignment of active pilots to expanded Reserve squadrons.

C. NAVY

Turning to the Navy, with the scaling back of the Soviet Navy out-of-area operations and other changes in the threat, the United States Navy policy that virtually all deployable ships have to either be at sea or be able to get underway in days becomes increasingly unnecessary and unaffordable. The Navy must get more serious about the use of Reserves to handle a portion of the Navy's fleet. To the active Navy, the word "Reserve" must not be synonymous with the word "mothball."

Funds will no longer be available to support all of the Navy's fleet at the operational tempos of the cold war. Thus, the Navy will be faced with choosing between reduced operational tempos, including more ships in a reserve status, or a much smaller, all-active Navy.

The leading advocate of the 600-ship Navy, former Navy Secretary John Lehman, recommended recently that more of the Navy's ships should be transferred into the Navy Reserve. The Navy will have to find innovative ways of managing a Reserve-dominated operation for a larger portion of their current fleet.

I am not suggesting that all categories of Navy ships and aircraft can be

transferred into the Navy Reserve. For instance, aircraft carriers and submarines would probably not be suitable for Reserve operation. However, ships or aircraft involved in sealift, antisubmarine warfare or sealane protection missions for NATO all lend themselves to increasing use of Reserves.

Additionally, our regional combatant commanders need to take a closer look at the requirements for carrier battle groups, so as not to place excessive at-sea demands on the balance of the active Navy. It is clear that in many instances we do not need an entire carrier battle group to "show the flag;" ships other than carriers and their escorts can perform this mission. Thus, there needs to be a reexamination of the presence mission, a recalculation of the size of a battle group when warranted, and an emphasis on the concept of ships operating independently of a carrier battle group, certainly in areas that do not have intensive and high threat environments.

By making these adjustments and by expanded use of the Reserves, I believe the Navy can meet future requirements with between 10 and 12 carrier battle groups.

IV. FLEXIBLE READINESS

The fourth essential element, is what I call flexible readiness. I define flexible readiness as the adjustment of the readiness status of various forces based on the threat, the amount of warning time, the likelihood these forces will go into action, and the ability to transport them to battle. In practical terms, the military departments currently utilize a form of flexible readiness. The units that would be the "first to fight" are the first to be equipped with the newest hardware and are manned at the highest levels. Other units, not assigned for early deployment, have older equipment and are normally manned at less than full strength.

A. SERVICE CHOICES

The reduction in the conventional threat and the severe fiscal pressures mean that the size of all military services will decrease, but the services face an important choice in how much their forces will decrease.

We can have a relatively larger force structure, but with the readiness of those forces based on the threat, the warning time, the likelihood of use, and the ability of our ships and planes to get them to battle.

If the services are reluctant to move in this direction, and there are indications they are, but if they continue to be, they will face a substantially smaller force structure than is currently being discussed in any element of the Pentagon based on the fiscal realities as I see them.

B. FORCES AFFECTED

My preferred alternative is flexible readiness. Under this alternative, the military services would keep certain high priority forces, such as strategic forces, strategic nuclear forces, expeditionary forces, forward deployed forces, special operations forces, and selected intelligence units, at a very high state of readiness. Forces that are not in the high readiness category could be sustained at adjusted readiness levels. More importantly, they could be maintained, and must be maintained, so that their readiness can be quickly increased if we observe major changes in the threat.

Those military forces that are best suited for the kinds of threats that are most likely in coming years would be kept at high readiness levels. But those forces oriented to encounter less likely threats—such as a major conventional land battle in Europe against Soviet forces—could be retained in the force structure but at readiness levels tailored to the substantially longer warning time of any increase in the threat.

C. BE READY TO GET READY

Mr. President, this is a controversial area. I recognize that. I know there is going to be a lot of debate. I just want to say a word as that debate begins. A carefully planned flexible readiness approach will not produce a hollow military. We did have serious morale problems in the 1970's but there were reasons for that. The reasons we had those problems then were because many units were told they had to be ready to carry out their mission in a matter of days but they knew they were not staffed, equipped or trained to do it, and they knew we had a very large threat.

We will not have morale problems if our military personnel in selected units understand that their mission is to get ready to mobilize and rapidly increase combat capability rather than to face an immediate deployment time. In other words, their mission is to "be ready to get ready."

D. THE NEED TO DECIDE

The Military Services and the Defense Department will need to recommend a course of action to the Congress soon. For example, does the Army want to shrink by substantially more in order to keep all active divisions at high readiness levels, or would they rather maintain a somewhat larger force structure with some forces at high readiness and others at adjusted readiness? Does the Navy want to shrink by substantially more with all ships at high readiness levels, or would they rather maintain a somewhat larger Navy with major elements at high readiness and others at adjusted readiness? Does the Air Force want to cut out substantially more of its active tactical fighter wings in order to keep all of the remaining wings on a war footing, or would they rather keep a somewhat larger force with some units at high readiness and others at adjusted readiness?

My preference is to maintain a larger force under the flexible readiness concept. I believe that this option best matches our force structure to the threats we are most likely to face, within the resources that will be available.

V. A NEW MANAGEMENT AND RESOURCE STRATEGY: "THINK SMARTER, NOT RICHER"

I have borrowed former Ambassador David Abshire's phrase to describe the fifth, and final, element of a new military strategy: "think smarter not richer."

I will be addressing this concept in more detail in the near future, but I want to point out today that no discussion of a new military strategy can ignore the major changes that are needed in our defense management and resources strategy.

For example, we must return to the principle of flying before buying. In too many cases we have overlapped development, testing and production of weapons systems, only to have to spend large amounts of money to make weapons work right after they are in the field which is very expensive. There are real concerns about the concurrency—research and development on weapons already in production—on a number of major weapons acquisition programs. With the changes in the threat, we must take the time to get it right the first time.

We must emphasize reduced ownership costs for maintenance, logistics, manpower, and support in the design of new weapons systems. The argument should not be whether we should apply new technology not just for sophistication but also for affordability and maintainability. We must also put greater emphasis on the improvement of existing platforms and systems, since we will be able to afford fewer new starts in the future.

We must put greater emphasis on innovative concepts in our research and development efforts to maintain our technological superiority. This applies particularly to systems and capabilities that offer the prospect of "breakthrough" or "leapfrogging" capabilities.

Finally, we must move aggressively to preserve and maintain a viable defense industrial base. This will be particularly important and challenging as the overall level of defense spending—and future defense investment—is adjusted over the next 5 years.

STRATEGY AND INTERNATIONAL CHANGE

Finally, Mr. President, I want to underscore that the military strategy I have outlined remains a component part of our overall national security strategy, which itself must be responsive to the changing international environment of the 1990's. As President Bush has stated, developments in the

Communist world suggest the possibility of moving beyond containment to a more cooperative relationship with the Soviet Union. Assuming that the U.S.S.R. continues to implement its announced unilateral reductions in Europe, assuming that Soviet forces are withdrawn from Czechoslovakia and Hungary, assuming that the CFE Treaty is completed, assuming that democracy takes root in Eastern Europe, and assuming that the process of reform continues in the Soviet Union, we should indeed be able to move to a new policy. This policy, however, must have some flexibility and must take into account the possibility of setbacks.

Some nine decades ago Lenin wrote a pamphlet about reform in the Czarist Russia of that day which he titled "One Step Forward, Two Steps Back." Developments in Lithuania and elsewhere in the U.S.S.R. make clear that the process of reform in today's Russia is also likely to be uneven, whether or not President Gorbachev remains in power. In the most optimistic case, I suspect we will see "two steps forward, one step back." We must be prepared for that.

MEASURED COOPERATION

However, it is not too early to consider what central concept we should be prepared to move toward, as further international change allows. My suggestion would be a policy of "measured cooperation," of cooperation calibrated so that our preparedness to cooperate with the Soviet Union and other countries is in rough proportion to their commitment to human rights, democracy and a market economy.

I hope that developments within the U.S.S.R. and other Communist regimes will allow "measured cooperation" to supersede containment on a broad scale. We must give more attention to fostering a cooperative world order and to managing potential risks before they escalate into direct threats.

If we are able to move from containment toward measured cooperation, we will need to adjust further our military strategy so that it properly reflects a changing national security strategy. We therefore will need to keep both our national security strategy and our military strategy under continuous and careful review. It has to be a dynamic process. It has to take into account changes as they occur.

CONCLUSION

Mr. President, the sudden collapse of the Communist empire over the past year has created both a new requirement and a new opportunity for a defense strategy that responds to the changed threat and realistically relates our means to our ends. Our past demobilizations—after the two World Wars, after Korea, and after Vietnam—have led, ultimately, to vastly higher defense budgets to make up for the errors of our drawdown. With a new military strategy to govern our force structure decisions and our budgetary actions, we can avoid falling into this same trap.

Mr. President, in the next few days I shall present to the Senate my thoughts on how best to implement the kind of military strategy I have outlined, and I will give my own estimates of what we should be spending on defense for fiscal year 1991 and over the next 5 years to follow consistent with this new strategy.

Mr. President, I yield the floor.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER (Mr. DASCHLE). The Senator from Georgia controls the time.

Mr. NUNN. Mr. President, I yield to the Senator from Nebraska such time as he may desire.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. I thank my friend and colleague from Georgia.

I thank the Chair.

Mr. President, I want to salute and be associated with the excellent remarks and programs outlined by the chairman of the Armed Services Committee on which I am very pleased to serve. I have served on that committee ever since I came to the U.S. Senate.

Senator NUNN is providing great leadership with the second now of two speeches and more to follow. Senator NUNN has consulted extensively with those of us on the Armed Services Committee. What he is saying I think can best be described as a general consensus among those on the Armed Services Committee, at least the majority, as to the direction we should be following as we recognize the significantly reduced threat, and what we are going to do constructively and responsibly to declare a peace dividend that obviously is necessary.

I thank Senator NUNN. I thank him for working with the other members of the committee. I simply say to the Senate that there are more far-reaching ideas and conclusions in addition to the budget numbers that will be coming forth as a recommendation in the near future.

Those suggestions that will be authored principally by the chairman of the committee, and supported by the members of that committee as a whole, indicate that we are indeed privileged to have SAM NUNN of Georgia as the distinguished chairman of the Armed Services Committee.

Particularly, I want to point out a few of the key things that I thought the chairman referred to. First, the flexible readiness concept is one, obviously, whose time has come. A year ago now, I do not believe that any of us could have said that flexible readiness was here. But there is a major change going on today in the overall posture of the security and national defense interests of the United States. There is a geopolitical revolution or evolution, depending on which word you like to choose, but we have to come to grips with it, and we have to be more realistic, I suggest, on the recommendations that have thus far come to us from the administration.

I also want to salute the thoughtfulness and the straightforward approach the chairman took with regard to greater reliance on the Guard and Reserve forces. It seems to me that this is an absolute necessity that thus far has not been emphasized by the administration.

Only yesterday, in a hearing of the Guard and Reserve officials in the Armed Services Committee, I came to the conclusion that I am not sure that the overall strategy and planning has taken into full account the very legitimate role, very effective role, that the Guard and Reserve can play and will begin a gradual, thoughtful build-down.

Lastly, I think Senator NUNN for his emphasis on the future reduction of our troops in the NATO countries significantly below the $195,000 floor that the administration is recommending. With the significantly reduced threat—and I put the caveat only in that if that significantly reduced threat continues, and it is obvious to me as one member of the committee, that the numbers referenced by Senator NUNN and attributed to former Secretary of Defense James Schlesinger are far more reasonable. In fact, if the threat continues to decline, I can see a time in the next few years when the number of combat troops that the United States has in NATO would be down to a very limited few.

If we are going to make the reductions that most of us seem to think should be made, then we are going to have to make some sacrifices, and I believe that for the overall security interests in the United States, while we will remain a firm member of NATO, I think our role has to change, and for the better, if we recognize that 40 years after the end of World War II we still have far too many troops and their dependents stationed in the NATO countries. It does not make good sense for NATO, it seems to me, and it does not make good sense for the United States' interests as a whole.

I thank the Chairman, for his excellent remarks, and for the leadership he is providing in this very important area.

Mr. NUNN. Mr. President, I want to thank my colleague from Nebraska for his very complimentary remarks about the presentation I made. There are going to be a number of these areas that will be very controversial. As the Senator from Nebraska observed, when I get down to how to implement this strategy—and I hope to be able to

present my thoughts on that subject in the next couple of days—then target practice will really begin. I understand the nature of that. That is what we are here for.

But I appreciate the Senator's words and, more than that, I appreciate his leadership. He heads the Subcommittee on Strategic Forces. He will be making a number of very important decisions relating to both our strategic nuclear forces and tactical nuclear forces in Europe, and his leadership is an inspiration to all of us. I thank the Senator for his remarks and most of all for his outstanding leadership.

Mr. DOLE. Mr. President, the leader time has been reserved.

The PRESIDING OFFICER. The Republican leader is recognized under the leader time.

LET US CLEAN UP THE SEWER MONEY

Mr. DOLE. Mr. President, last month the New York Times ran an editorial blasting the so-called sewer money in the campaign finance system. The Times wrote that campaign finance reform will be wholly undermined if the tide of unreported sewer money continues to flow unabated over the political landscape.

DEFINING THE PROBLEM

Not surprisingly, the Times editorial was high on rhetoric—high on spoonfed partisanship—but low on content—and it failed to offer an accurate or comprehensive definition of what we really mean by the sewer-money—or soft-money—problem.

It focussed almost exclusively on party soft money, which under current law is all disclosed—all regulated—at either the Federal or State level. And it ignored the real soft-money problem stemming from the unreported, unregulated special-interest activities of corporations, labor unions, and trade associations.

In the broadest terms, soft money is political money outside of the source restrictions, contribution limits, and disclosure requirements of the Federal Election Campaign Act and its regulations. That's the academic definition, and it is the definition most widely accepted by the campaign finance experts.

But the real abuses of soft money come to life only when you look behind the academic definition and when you see what soft money means in real-life and in real-life campaigns.

Soft money is the $850,000 in corporate cash that Charles Keating contributed to a tax-exempt 501(c)(3) organization that was supposedly dedicated to nonpartisan voter registration.

Soft money is the millions of dollars spent by unions, corporations, and trade associations on the so-called administrative expenses of their special-interest political action committees.

Soft money is the millions of dollars spent on door-to-door canvassing and other campaign activities by the Citizen's Action Network, a supposedly nonpartisan tax-exempt organization now under investigation by the Federal Election Commission.

Soft money is the millions of dollars spent on phone banks by special economic interests during the waning days of a campaign.

And soft money is the $45 million spent by corporations and labor unions on voter registration and get-out-the-vote activities during the 1988 Presidential primaries and general election—activities that operated without public reporting and as a soft-money substitute for what the political parties should be doing in the sunlight of disclosure.

The Labor Department estimates that unions collect more than $3.3 billion in annual dues from members and nonmembers alike—which happens to be greater than the gross national product of more than 75 countries. Needless to say, only a statistics genius—or perhaps a fortuneteller or Democratic Party Operative—can accurately estimate how much of this money actually gets pumped into the campaign finance pipeline each year.

So soft money can mean a lot of things, and it can have many different faces. But under any definition, soft money means money that is unreported, unregulated, under the table, and unquestionably a key ingredient of the so-called special interest problem that now plagues Congress and breeds the growing cynicism among the American public.

THE SOLUTION

Sixteen years ago, Congress thought it had cleaned up the campaign finance mess when it passed the Federal Election Campaign Act of 1974. The act has certainly done some good, but one of its most enduring legacies is the gaping loophole that has led to the creation of the soft-money Frankenstein—which now operates outside the scope of any Federal or State regulation.

When Congress considers another round of campaign finance reform—perhaps as early as next week—the Senate can close the soft-money loophole by taking the following steps:

First, Congress should prohibit all tax-exempt, 501(c) organizations from engaging in activities designed to influence the election of a specific Federal candidate. If you are tax-exempt, you should not be playing the political game.

Second, Congress should restrict tax-exempt organizations from engaging in voter registration and get-out-the-vote activities if a candidate or a Member of Congress actively solicits money for the organization. When these voter registration outfits are identified with a specific political figure from a specific political party, you do not have to be Sherlock Holmes to realize that nonpartisanship is not likely to be one of the organization's top priorities.

And, third, Congress should codify the Supreme Court's Beck decision, which stands for a very simple, but important, proposition: No American should be compelled—against his or her own will—to give up a hard-earned and healthy chunk of the weekly pay check simply to finance someone's political candidacy or some organization's political agenda. That is unfair, and Congress should say so.

If Congress could take these three simple steps, we would go a long way toward putting the soft-money special-interest operators out of business for good.

PARTY-BUILDING ACTIVITIES

I know some soft-money critics are concerned about party-building activities like voter registration and get-out-the-vote that are conducted on behalf of a party's entire slate of Federal and State candidates. They are concerned about wealthy contributors who indirectly benefit Federal candidates through their contributions to the State parties. And they claim—correctly—that these soft State dollars—although totally legal under State law—are being used as an indirect supplement to the campaign coffers of Federal candidates.

Take a quick look at the 1988 Presidential election and you will see that these concerns are justified. And, no doubt about it, they should be addressed in any serious campaign finance reform proposal. If a campaign contribution ends up helping a Federal candidate—whether or not it is originally made to a State party—this contribution should be reported and regulated at the Federal level to the greatest extent possible.

To accomplish this goal, all party committees—both national and State—should be required to maintain separate Federal and State accounts if they are participating in Federal and State elections. This is basically current law, but some refinements are in order.

National and State party committees should also be required to report all of their accounts with the Federal Election Commission. This means full disclosure of the Federal account, full disclosure of the State account, and full disclosure of the building funds account. No exceptions, and no loopholes.

I am pleased to say that these were two of the key soft-money recommendations made by the bipartisan campaign finance reform panel, which was commissioned last February by myself

and by the distinguished majority leader, Senator MITCHELL.

In addition, the party committees should be required by law to finance—with Federal funds—an established percentage of any overhead and party-building program that benefits both Federal and State candidates. This would ensure that Federal candidates are financed with hard reported and regulated Federal dollars. It would also ensure that the legitimate party-building activities of the national party committees are not unnecessarily restricted.

CONCLUSION

Mr. President, if we are really concerned about cleaning up the campaign sewer money, then it is about time to spray the sewer stench with a big can of legislative Lysol.

And when the Senate finally does consider campaign finance reform, it is our duty to say no to the soft-money operators who hide behind their tax-exempt status. It is our duty to say no to the millions of dollars in coerced union dues that now run amok in the campaign finance pipeline. And it is our duty to say no to the millions of dollars spent by corporations and trade associations on PAC administrative expenses and on other unreported campaign activities.

So, I would say if the New York Times is really concerned about campaign finance reform, the so-called sewer money, I hope they will carefully read my remarks and incorporate such abuses in their next editorial.

Mr. President, I ask unanimous consent that I may have an additional 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISITING JERUSALEM—AND REVISITING THE JERUSALEM RESOLUTION

Mr. DOLE. Mr. President, on March 22, the Senate agreed to Senate Concurrent Resolution 106—the Moynihan resolution on Jerusalem.

I and four other Senators—MCCLURE, METZENBAUM, MURKOWSKI, and SIMPSON—have just returned from a visit to the Middle East. We made stops in Syria, Egypt, Jordan, Iraq, and Israel.

We heard a lot about the resolution—and what we heard leads me to say a few words today about the resolution; and, more important, about the process of dealing with such resolutions around here.

Now, let me say up front: I do not have any quarrel with Senator MOYNIHAN, or his principal Republican cosponsor, Senator BOSCHWITZ, on this resolution. They are outstanding Senators, and strong supporters of Israel.

And, by the way, I happen to think my record of 26 years in Congress demonstrates that I am a strong supporter of Israel, too.

But they believe strongly in the views expressed in Senate Concurrent Resolution 106. And I have no quarrel with that.

They played by the rules, fair and square. Nothing I am about to say is intended to cast any aspersion on them.

But I am concerned about the process.

Senate Concurrent Resolution 106 was submitted on March 20, in 2 days, it had 84 cosponsors.

It came to the floor, in what we call wrap-up at the end of the day, on March 22. There was no debate. In my recollection, the text of the resolution was not even read into the RECORD. We had a voice vote. And the resolution was adopted. And I doubt that half of the sponsors even knew what they signed or what had been adopted.

"Now you see it—now you don't."

Again, the resolution had 84 cosponsors. By my count, 43 Senators signed on during the first 24 hours after being submitted, 40 more joined in on the second day. I was one of them.

We all know how it works around here. And again let me say: This is the way it works for all of us—not just Senator MOYNIHAN and Senator BOSCHWITZ. At one time or another, we all do it.

We carry our resolution, or our letter, into the cloakroom. We buttonhole every Senator who walks in, and push them for an immediate signature. Half the time, the signer does not even read the text.

Most of the time that does not matter. Most of the time they are good resolutions—not controversial, or not viewed as controversial by anybody else.

But in this particular case it mattered a lot.

Senator Concurrent Resolution 106 deals with one of the most sensitive and emotional issues in the Middle East—the status of the city of Jerusalem. The resolution declares Jerusalem the capital of Israel—the position of the Israeli Government; a position 180 degrees contrary to the views of the Arab States and the Palestinians.

Most important, the resolution declares on an issue that our Government—and many outside observers—see as better left to negotiations among the parties involved, rather than decided by unilateral action.

Several weeks ago, President Bush spoke one sentence—one, single sentence—on this same subject. That one sentence sparked an explosion of heated rhetoric in the Middle East—and probably also sparked this resolution.

Stressing that I do not buy this—many Israelis do believe that the President's few words were enough to bring down the Shamir government. That is how sensitive this issue is in Israel and in the region.

The main point is—the issue of Jerusalem is serious business. It is not "national silkworm week," or "underwater breathing week." Many of the resolutions passed are about in that area.

This is very serious business—and we ought to take it very seriously.

This resolution, and other sensitive resolutions, should be given the kind of consideration they deserve.

And let me do something we do not do much around here: Admit I made a mistake. I bear a personal responsibility here. I am supposed to be one of the gatekeepers, to make certain about the flow of legislation. I should have said more loudly: Wait a second, let us look at this. I certainly should not have signed on to this resolution.

The administration bears some responsibility, too. I was concerned about the text, and asked my staff to check on the administration's views. I am the Republican leader—and I like to know what the administration thinks on matters like this.

The answer I got was like the answer I get a lot: We do not like it, but we are not going to throw ourselves on any swords over this issue. It does not mean anything. And so that was it.

The point is, we are all wrong. The process is wrong. And the results can be very damaging.

During the recess, as I said, I visited the Middle East—along with Senators MCCLURE, METZENBAUM, MURKOWSKI, and SIMPSON. I list them for the RECORD. I am not suggesting they share my views on this matter. They can speak for themselves.

But we were there—we visited Syria, Egypt, Jordan, Iraq, and Israel. Everywhere we went, Senate Concurrent Resolution 106 was on the agenda. We did not put it there. The leaders we spoke with put it there and they put it on the top of the agenda.

Egypt's President Mubarak opened our meeting by raising the resolution. Jordan's King Hussein spent 20 to 30 minutes discussing it, and gave me a letter on the subject.

As we returned to our hotel that evening, after our dinner with King Hussein, we were met by about 200 antiresolution demonstrators. They felt very strongly about it.

The other Arabs leaders we met—Syria's President Assad, and Iraq's President Hussein—mentioned the issue, too.

We went to see those leaders to talk about the critical and immediate issues of the peace process—a process that has been dragging on for many months.

Instead, we spent a lot of time talking about a sense-of-the-Senate resolution that sailed through in about 15 seconds.

And I do not want to judge the motives of those leaders in raising the issue—to some of them, at least, it is a very important and highly charged issue on its merits.

Whatever anyone else may think about it, they regard Jerusalem as a part of their homeland and they have a strong emotional attachment to it.

They also see the important precedent that a final resolution of the status of Jerusalem could represent. Israel established control over east Jerusalem as a result of the 1967 war. They did it, in effect, by force.

There are certainly aspects of the Jerusalem situation that are different from the occupied territories, but the case could be made that, if the United States and the international community recognize Israel's sovereignty over all of Jerusalem, and I mean all of Jerusalem, that would be an important step toward ceding Israel's sovereignty over all of the territories over which Israel established control by force.

I am not trying to argue that point either way. I am only trying to underscore how sensitive and how complex this issue is.

In any case, if the Arab leaders are looking for an excuse to avoid the broader peace process issue, Senate Concurrent Resolution 106 gave it to them on a silver platter.

The real point, though, is not whether I or even whether 100 Senators believe that Jerusalem should or should not be the capital of Israel. The issue is whether the Senate of the United States should be jumping into the middle of an extremely sensitive situation, without looking, in many cases without even thinking first.

During our visit to Jerusalem we met with Teddy Kollek, who has served as mayor of Jerusalem for nearly 25 years. No one on this Earth loves Jerusalem more than he does and no one individual enjoys such respect from all the inhabitants city—Jewish, Arab, and Christian alike.

Let me stress this. Teddy Kollek personally believes that Jerusalem is now, and should always remain the capital of Israel. He makes no bones about it. In fact he sent me a telegram which I received this morning and he takes a back seat to no one in his advocacy of that position.

But he also happens to believe that pushing Senate Concurrent Resolution 106 right now was a big mistake. He volunteered that. We did not ask him. He just volunteered it at a breakfast meeting. He thought it was ill timed. He told our delegation clearly and unequivocally that this was the case.

There have been some press accounts purporting to represent a different view. But in his discussion with us it was stated by him, not us. We did not ask the question, he raised it voluntarily, and he was straightforward and clear. He wants to see us, see the United States, recognize Jerusalem as the capital of Israel. But he saw Senate Concurrent Resolution 106 as an ill-timed idea, since it merely stirred up controversy at a time when only extremists on both sides are helped by more controversy. It did not help him, it did not help the people of Jerusalem, and those who believe Jerusalem is the capital of Israel, or Israel itself.

That is Teddy Kollek's view and he personally authorized me to state it as his view.

But again the real issue is not his view or mine or the Jerusalem issue. A conversation I had Tuesday with the distinguished majority leader, Senator MITCHELL, underscores the point. Senator MITCHELL told me on a trip he recently completed to the Soviet Union, the Soviets spent a good deal of time talking about yet another resolution, the one we recently did on Lithuania.

I cite that, not to suggest there was anything wrong in the text of that resolution but merely to underscore the basic point that when we deal with such sensitive resolutions, we ought to think carefully about all the ramifications. At least it ought to be read. There ought to be some debate. It ought to lay over, maybe, a day, so people will have a time to reflect on it.

The bottom line issue is not the Jerusalem resolution, per se. That is just a "case in point" of the broader question of the whole process we have for dealing with these issues. These kind of resolutions, hastily prepared and even more hastily passed, are nonsense, and dangerous nonsense, and we ought to do something about it.

Mr. President, it is too late to "unscramble the egg" of the Jerusalem issue. The damage is done, if there was any damage. And I am told by the Arab leaders there was. And the less said about the substance of that issue the better. But I do hope we can learn a small lesson from what happened.

We call ourselves the "greatest deliberative body in the world." When you travel around the world you find some people still think we are. They take what we do and what we say very seriously, as we were told time after time after time. They take it more seriously than, sometimes, we do ourselves. They care about the sense, and they care about the feelings, of the U.S. Senate. They believe there is still some sense in the Senate in what we do and what we say. And they despair, just as we should, when they see that sometimes, too often, what really we deal in, is the "nonsense of the Senate."

I remember the Senator from New Hampshire [Mr. RUDMAN] standing up when we were adopting a resolution on the baseball strike. I think he probably termed it correctly.

So, I agree, as I think many others agree, that I think we can do better. We could adopt resolutions on who ought to be the Prime Minister of Israel. They do not have a government now, they have a caretaker Prime Minister. We could agree to resolutions on who ought to have the West Bank and how we ought to resolve all the points that may be negotiated if there is a peace process started. But I do not think that is the role we should play, in the U.S. Senate. That is not our responsibility.

Oh, we could make some feel good, to pick out certain claims and have us agree to pass a resolution saying this territory belongs to this country, this territory belongs to this country or whatever.

I guess you learn a lesson sometimes when you travel around the world and you talk to the people who are reading what we pass. They may see it differently. While they may know it is done to please some American constituency or some other constituency, they also told us very bluntly how it affects them and their people.

So, whehter it is a resolution praising King Hussein or Egypt or Israel or whatever, it seems to me if it starts dealing with the substance that ought to be negotiated in the peace process, then we ought to leave it alone. Or we ought to have a debate. We ought to consider it carefully.

I ask unanimous consent to have printed in the RECORD a copy of the resolution. I think it might be helpful.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOLE. Some people might like to read it. I would like people to tell me what they mean by "Jerusalem," have some who signed on as cosponsors tell me what is Jerusalem; give me the boundaries. What do they believe we voted on? As I learned, or found, there are a lot of people who have different views on what is Jerusalem.

So, I suggest that, notwithstanding the resolution, which took a great deal of our time and which, frankly, I think surprised all of us, that we came back with a feeling that the peace process can be helpful and that we ought to do all we can to urge those principals—in this case, the United States, Israel, Egypt, then hopefully Jordan and other countries—to start the dialog.

As we indicated to Prime Minister Shamir and Mr. Peres, the two leading contenders for the Prime Ministership, the American people are impatient. We understand the grave questions and we understand the need to make certain the security of Israel is protected. That is the bottom line. We all share that view.

But we also believe that we ought to start a dialog, a view shared, I think,

by most Americans and most Americans in the Jewish community.

So I suggest there are a lot of things we can do in the U.S. Senate, probably a lot of resolution we can agree to. And a lot of them are very important to many people. I am certain this resolution was important, not only to the principal sponsors but to many Americans and many in Israel and many who feel strongly about the status of Jerusalem. In my view, the view shared by this administration and past administrations, not just Republican administrations but Democratic administrations, Jerusalem should remain an undivided city and the status of the city should be left to negotiations.

EXHIBIT 1

S. CON. RES. 106

Whereas the State of Israel has declared Jerusalem to be its capital;

Whereas from 1948 to 1967 Jerusalem was a divided city and Israeli citizens of all faiths were not permitted access to holy sites in the area controlled by Jordan;

Whereas since 1967 Jerusalem has been a united city administered by Israel and persons of all religious faiths have been guaranteed full access to holy sites within the city;

Whereas the President and the Secretary of State have demonstrated their strong desire to achieve a just and lasting peace in the Middle East and have worked diligently toward that end;

Whereas ambiguous statements by the Government of the United States concerning the right of Jews to live in all parts of Jerusalem raise concerns in Israel that Jerusalem might one day be redivided and access to religious sites in Jerusalem denied to Israeli citizens; and

Whereas such concerns inhibit and complicate the search for a lasting peace in the region: Now, therefore, be it

Resolved by the Senate (the House of Reperesentatives concurring), That the Congress—

(1) acknowledges that Jerusalem is and should remain the capital of the state of Israel;

(2) strongly believes that Jerusalem must remain an undivided city in which the rights of every ethnic religious group are protected; and

(3) calls upon all parties involved in the search for peace to maintain their strong efforts to bring about negotiations between Israel and Palestinian representatives.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF SPARK M. MATSUNAGA, LATE A SENATOR FROM HAWAII

Mr. INOUYE. Mr. President, on Saturday, April 15, while undergoing special cancer treatments in Toronto, Canada, our beloved colleague, SPARK M. MATSUNAGA, passed away. The life story of SPARK MATSUNAGA bears repeating in all American homes as a classic example of the American success story.

SPARK MASAYUKI MATSUNAGA was born on October 8, 1916, on the Island of Kauai, to parents who had emigrated from Japan to work on a sugar plantation. He worked at many jobs through high school and graduated with honors from the University of Hawaii, where he received a degree in education in 1941.

At the time World War II broke out, SPARK was in uniform as a second lieutenant in the U.S. Army. When President Franklin Roosevelt permitted the formation of all-Japanese American units, SPARK became a member of the 100th Infantry Battalion, which later became a part of the 442d Regimental Combat Team, one of the most highly decorated Army units in history. Whatever assignments SPARK MATSUNAGA received, he performed with skill and bravery. He fought in the historic battles of Monte Cassino, Anzio, and the liberation of Rome. He was wounded twice and earned the Bronze Star Medal for heroism. He returned home as a captain, with full honors.

Using the GI bill, SPARK went to Harvard Law School, where he received his law degree in 1951. He went to work as an assistant prosecuting attorney in Honolulu from 1952 to 1954. He was elected to the Territorial House of Representatives from 1954 to 1959, serving as majority leader in 1959.

SPARK MATSUNAGA came to Washington in 1962, and served in the U.S. House of Representatives for seven terms. In 1976, he was elected to the U.S. Senate. He has served with much distinction as a member of the Finance Committee, where he was a ranking member, and chairman of the Subcommittee on Taxation and Debt Management; on the Labor and Human Resources Committee, and chairman of its Subcommittee on Aging; and on the Veterans' Affairs Committee and Joint Committee on Taxation. He served in the Senate leadership as chief deputy Democratic whip and from the 95th through the 100th Congresses.

SPARK will always be respected for his outstanding legislative record that fulfilled his visions of peace, international cooperation, and assistance to those in need.

I will remember him for these achievements, and also recall with much fondness another part of him—his always friendly personality and love of "haiku," which is Japanese poetry. SPARK was much more than a colleague from the same State; there were also many similarities in the paths of our two lives—from our parents' work on the plantations, to our military service, to our decisions to enter law school and seek elected office.

I would like to share with my colleagues a conversation that SPARK and I had about 3 years ago during a quiet moment here in the Senate Chamber. We often spoke, of course, about legislative matters, especially those affecting our State of Hawaii. But this conversation was much more personal and philosophical, focusing on our views of life. I asked SPARK how he wished to be remembered. He replied that he wanted to be remembered as a friend. That answer intrigued me, and I asked what he meant by it.

SPARK said that, "I want to be remembered as a friend of peacemakers." That he will be, for it was his 22 years of lobbying efforts that resulted in the establishment in 1984 of the U.S. Institute for Peace. He had seen firsthand the horrors of war and was determined that our Nation devote itself to the pursuit of peace.

SPARK said, "I want to be remembered as a friend of the veterans, because if not for them, we would not be enjoying the fruits of democracy." As a ranking member of the Veterans' Affairs Committee, SPARK MATSUNAGA's imprint could be seen on virtually every major bill that passed the committee. He was engaged in efforts to establish a veterans medical center in Hawaii, to serve the aging and ailing military veterans in our islands. I am confident that we will be successful in carrying on this endeavor, and when this veterans hospital is constructed, I will ask that it forever bear his name, in remembrance of his contributions to veterans of our Nation.

SPARK said that, "I want to be friend of the men and women who serve our nation in faraway lands, who stand in harm's way so that we can sleep better at night." SPARK had the highest respect for our military and diplomatic personnel, for he recognized that they actively preserve our democratic freedoms and promote democracy abroad.

He said, "I have done my best for them, and I hope that the friendless consider me a friend." SPARK was indeed a voice of compassion for the homeless as well as the physically and mentally ill. When it may have been unpopular to do so, he waged a campaign for justice for Americans of Japanese ancestry who were interned during World War II. As my colleagues know, SPARK went from office to office seeking cosponsors for a measure authorizing an apology and monetary reparations for Japanese Americans whose patriotism was questioned. When it was introduced, it bore the names of 74 Senators—a remarkable feat—and it was enacted in 1988. He was a very tough, persistent soldier in politics as well as life.

And, SPARK said, "I hope that you're my friend." SPARK, you will always be my friend.

When he escorted visitors from Hawaii through the Capitol, SPARK would always pause in the House Chambers and point to the ceiling. While a Member of the House, SPARK happened one day to gaze upward at the ceiling and upon counting the stars pictured there, realized that there were only 48 stars representing the 50 States. Somehow Hawaii and Alaska had been forgotten. He waged a one-man crusade with House Speaker Sam Rayburn for the addition of the 49th and 50th stars. SPARK never forgot to point out to visitors the results of his success, not as a matter of personal vanity, but because he knew that his deeds were a source of pride for every citizen of Hawaii.

I would like to think that when we gaze up toward the nighttime skies there is now one more heavenly star, and that he is smiling down at us all.

Mr. President, I ask unanimous consent that articles and editorials from the New York Times, the Honolulu Star Bulletin, and the Honolulu Advertiser be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 16, 1990]

SPARK M. MATSUNAGA DIES AT 73; SENATOR LED FIGHT FOR REPARATIONS

(By Peter B. Flint)

Senator Spark M. Matsunaga of Hawaii, a longtime proponent of peaceful resolution of disputes and Soviet-American cooperation in space exploration, died of cancer early yesterday in Toronto General Hospital. He was 73 years old.

Mr. Matsunaga, a liberal Democrat who served 14 years in both the House and the Senate, announced last January he was being treated for prostate and bone cancer. He flew to Toronto last week for accelerated treatments, his press secretary, Edward J. Greaney, said yesterday.

Senator Matsunaga cast his final Senate votes from a wheelchair on April 5 in support of extension of the Clean Air Act. He espoused many measures to replenish the environment, including planes fueled by hydrogen in place of petroleum-based fuel and the development of wind power for commercial ships, a concept being pioneered in Japan.

HARDSHIP AND HUMILIATION

Mr. Matsunaga, a Japanese-American, was the main Senate leader for passage of a $1.25 billion 1988 law to give $20,000 and an apology to all Japanese-Americans sent to internment camps in World War II. Addressing the Senate, Mr. Matsunaga, who was wounded twice in Italy during the war, recounted an incident of an elderly internee who crossed a fence to retrieve a ball for his grandchild and was machine-gunned to death.

After the attack on Pearl Harbor, Mr. Matsunaga, though a second lieutenant in the American Army, was detained in a Wisconsin camp. He and other internees, after petitioning President Franklin Roosevelt, were allowed to form the 100th Infantry Battalion, which became one of the most highly decorated in history.

The Senator lobbied for 22 years before persuading Congress in 1984 to establish a peace academy, which awards graduate degrees for helping to settle disputes within and among nations.

In a statement yesterday, Gov. John D. Waihee 3d of Hawaii hailed Mr. Matsunaga's "humanitarianism" and added: "He will be remembered most for his vision of peace and his faith in the human spirit. In his memory we will carry on his quest. In his spirit we will strive for the highest of principles and the brightest of worlds."

AGNEW INCIDENT RECALLED

Mr. Matsunaga, a diminutive, convivial man known to longtime associates as "Sparkie," had less impact on legislation than the state's senior Democratic Senator, Daniel K. Inouye," also a decorated war veteran, but he fought hard for goals he cherished.

In 1968, he criticized Spiro T. Agnew for calling a reporter on his Vice President-campaign tour of Hawaii "a fat Jap." Mr. Agnew apologized and expressed regret at what he viewed as a decline in the American sense of humor.

Spark Masayuki Matsunaga was born on Oct. 8, 1916, on the island of Kauai to a poor Japanese immigrant family, worked at many jobs through high school and the University of Hawaii, where he earned many honors, including election to Phi Beta Kappa, and studied at Harvard Law School under the G.I. benefits bill, graduation in 1951.

He was then successively a Honolulu prosecutor, member and majority leader of the Hawaii territorial House of Representatives. He went to Washington in 1962, serving in the House for seven consecutive terms. In 1976, he was elected to the Senate.

Surviving are his wife, the former Helene Hatsumi Tokunaga, who lived with him in Kensington, Md., and Honolulu; three daughters, Karen Hardman, of Kensington; Diane Segars, of Mississippi, and Merle, of Thailand; two sons, Keene, of Anaheim, Calif., and Matthew, of Honolulul three brothers, Andrew, Satoru Ikeda and Yutaka Ikeda, all of Honolulu; two sisters, Dorothy Hironaga, of Honolulu, and Mitsuko Ueno, of Hanapepe, Hawaii, and three grandsons.

The body will be flown this week to Honolulu to lie in state before a state funeral and burial.

[From the Honolulu Star-Bulletin Apr. 16, 1990]

FOND MEMORIES OF MATSUNAGA ABOUND

Betty Jacob received a long-distance call from Hawaii Sen. Spark. M. Matsunaga early one morning in 1985.

"It was a 2 or 3 o'clock and he was concerned about my husband, Philip, who had suffered a stroke," Jacob recalled. "As we talked, he began to cry."

"You just don't meet people like that in politics," added the former co-director of the University of Hawaii's Institute of Peace.

Matsunaga, who died Saturday night in Toronto at age 73, was a man who cared as well as a dedicated public servant.

"He was a people person, who enjoyed one-to-one contact" said Naomi "Sister" Correa, state vice chairman of the Democratic Party, who first met Matsunaga in 1954 while working at the Territorial Legislature.

"That's why he enjoyed the kind of functions where he could spend a few minutes with each person. He always took the time to listen to them. I'm going to miss him very much," said Correa.

Masayuki Matsunaga was born in Kukuiula, Kauai, and earned the nickname "Sparky" during his camp days that later became his legal first name.

"He was always the slowest runner because he was the youngest," said Tadao Kawamoto of Kauai, who grew up with Matsunaga. "So we used to call him Sparkplug to get him to run faster. The name came from a comic book character."

While attending Kauai High School, Matsunaga earned extra money by doing yard work for Gladys Ainoa Brandt, a former principal at Kamehameha Schools.

"Sparky once told students at Kamehameha that he was my yardboy," Brandt said. "I'm just glad he never mentioned how much I paid him.

"He was a fine, young lad who really cared a lot about people," Brandt added. "I'll always remember that he wanted a peaceful world. It was an elusive goal but he never gave up trying to make it happen. That was Sparky."

Matsunaga went on to attend the University of Hawaii, where he graduated with scholastic honors and an ROTC commission in 1941.

During World War II, he served with D. Company of the 100th Infantry Battalion.

"Sparky was with us from the start as our executive officer," said Martin Tohara of Manoa, Matsunaga's first sergeant. "He got hit in neck while we were on a night march on Hill 600 in Italy when a land mine went off.

"You couldn't help but like the guy," Tohara added, "and he never changed, even as a senator. If you needed information, he'd be there. He had a caring feeling. We lost a good comrade and senator."

In 1954, three years after graduating with honors from Harvard Law School, Matsunaga was elected to the territorial House as the Democrats broke the Republicans' power base at the Legislature.

"All of us in the '54 group were motivated by the desire for changes in the community," said former three-term Gov. George Ariyoshi, who returned to Hawaii last night from Seattle.

"Through the years, Sparky has remained the same," said Ariyoshi. "I was personally very close to Sparky and considered him a real friend. You could always count on his word. It's a personal loss for me and also a loss to the community."

By the mid-1950s, Matsunaga was already pushing for statehood, which came in 1959.

In 1962, Matsunaga won a seat in the U.S. House of Representatives, the first of seven consecutive terms.

He moved to the Senate in 1976.

"I worked with him for 12 years (in Congress) and found him to be a tough worker who spent long hours on the job," said former Hawaii Rep. Patsy Mink.

The creation of the U.S. Institute of Peace, which began operations in 1966, and the law providing for $1.25 billion in redress payments to Japanese-Americans interned during World War II are among Matsunaga's notable accomplishments in a distinguished 27-year Congressional career.

"He was a very good negotiator, and that takes a lot of skill in Washington," said Jacob, a former national lobbyist for the Quakers, United Nations Relief and Reconstruction Agency and UNICEF. "Great people who do a great job in Washington have to be able to work behind the scenes."

It took 22 years, for example, before Matsunaga finally saw the Peace Institute become a reality.

"All the time I worked with him, he never did an underhanded thing. When he negotiated, it was clean. But he was clever," said Jacob.

Jacob noted that Matsunaga secured approval for the Peace Institute by attaching it as an amendment to a Defense Department Authorization Bill that was signed by President Reagan in October 1984.

"He was so skillful there was no way Reagan could avoid signing it," Jacob said.

Matsunaga, who was nominated in April by the UH Institute of Peace for the "Profiles in Courage Award" sponsored by the John F. Kennedy Library of Boston, was a world peace advocate long before he became a politician.

In an English paper written during his first year at the UH, Matsunaga said, "If we want peace, we must educate people to want peace. We must replace attitudes favorable to war with attitudes opposed to war."

Earl Nishimura, president of the United Japanese Society of Hawaii, said Matsunaga was instrumental in getting reparations for Hawaii residents who lost everything under marital law during World War II.

"Executive Order 9066 applied only to West Coast internees at first, but there were 2,000 Japanese-Americans living in Hawaii who were victims of arbitrary selection without due process," Nishimura said. "He was responsible for getting Hawaii internees included."

[From the Honolulu Advertiser, Apr. 16, 1990]

SPARKY: "LASTING IMPRINTS" FOR US ALL

In the middle of the Depression, a Kauai High School student of Japanese ancestry heard his haole social studies teacher discourse on the joys of American democracy. He asked the teacher in return:

"Is it in the name of American democracy to pay a white man doing the same work as an Oriental three times the wages paid to the Oriental?"

The teacher told young Spark Masayuki Matsunaga: "The only way you're going to change the system in Hawaii is to change the laws. I'd like to see you become a senator."

That was one of the stories that the gregarious Sparky liked to tell audiences around the Islands, or over lunches he hosted in the U.S. Capitol dining room during his 28-year career in the U.S. Congress.

As we all know, that teacher's prediction did come true. Matsunaga took his concern for "changing the system" into the world of law and politics, becoming one of the most liberal members of Congress (although he was, for a time, a staunch supporter of the war in Vietnam).

His flair for dramatizing injustice showed in 1950 when, as a Harvard law student, he pleaded in a U.S. Senate hearing for the United States to add a Hawaii star to its flag.

He told senators in a moving speech that he and his nisei comrades who fought so well in Europe "were fighting not only for America but to prove that despite their racial background they were as good Americans as any. They were fighting for recognition as plain Americans, not hyphenated Americans."

He served as a territorial legislator in the heady 1950s when Democrats ended decades of Republican domination. In 1962, he became the second person of Japanese ancestry (Dan Inouye was the first) to sit in the U.S. House.

Matsunaga was the consummate political insider who never lost his "local boy" style of campaigning at home even as he mastered the knack of wooing others on Capitol Hill.

In endorsing his campaign for re-election in 1970, The Advertiser said: "Even a layman, sitting in the visitors' gallery of the House and listening to Rep. Matsunaga argue persuasively for or against a measure, can sense the respect in which he is held by his colleagues."

Years later, columnist Jack Anderson called Matsunaga one of the five "most popular" members of the Senate.

It was natural that he should be the prime sponsor of legislation to give a national apology and reparations to his fellow Americans of Japanese ancestry interned during World War II. That long, noble cause finally was won in the twilight of his Senate career.

But Matsunaga also championed offbeat issues: peace, education, international cooperation in space, science-fiction technology such as hydrogen power. In pushing those pet causes he was a workhorse, not a showhorse.

"When I first got to the Senate I felt very out of place. Everybody else was running for president," he once chuckled.

Poetry was one of his avocations. His tireless lobbying to create the post of poet laureate was regarded by some as an oddity. But he was dead serious in believing that a country ought to revere its literary artists and that poetry was a window to the soul.

As we bid aloha to this good and honest man who worked so long and hard for his native Islands, one of his own poems comes to mind. Wounded at Monte Cassino as the 442nd Regimental Combat Team "Go for Broke" soldiers worked their way up the boot of Italy, Matsunaga wrote:

"When in the light of thought I ask myself:
Just who am I and what,
What lasting imprints good or ill,
Have I for future mortals wrought?"

Your imprints were many, Sparky, and they were good ones.

[From the Honolulu Star-Bulletin, Apr. 16, 1990]

SPARK MATSUNAGA: PUBLIC SERVANT

Spark M. Matsunaga's death at 73 of cancer in a Canadian hospital over the weekend has brought to an end a life dedicated to serving Hawaii.

His career in public office began in the territorial days as a legislator and an assistant prosecutor. It led to 27 years in Congress, including 14 years in the House. he was in the second year of his third U.S. Senate term when the cancer which had attacked his prostate and later spread to his bones took his life.

Matsunaga, like his younger but senior colleague, Sen. Daniel K. Inouye, was a wounded World War II veteran and member of the famous 100th Battalion/442nd Regimental Combat Team, in which Americans of Japanese ancestry fought in Italy and France. From that unit, the most decorated in the nation's history, came a number of returning veterans who entered Hawaii politics and have helped shape the direction of government and community life here to the present day.

The Matsunaga story is reflective of postwar politics in Hawaii—the rising democratic hopes of plantation families helped by the heroism of their sons, the progress of labor unions, the G.I. Bill, and a shared spirit of social reform, that led to Statehood.

Matsunaga had the additional advantages of having graduated from Harvard Law School and of having cultivated an effective public speaking manner with the help of a voice teacher at the University of Hawaii. Except for a 1959 setback in a failed bid for lieutenant governor, his public career continued uninterrupted and upward, leading to the U.S. House in 1962 and to the Senate in 1976, when he defeated his long-time House colleague, Patsy Mink, in a primary, and former Gov. William Quinn in the general election to succeed the retiring Hiram Fong.

The Matsunaga style stayed much the same in the Senate as in the House. He was a man of the people, proud of his office's record in serving Hawaii constituents. Visitors from Hawaii to the Capitol found the Matsunaga welcome something to rave about back home. The dining room lunches where other members of Congress would drop by to share pleasantries became legendary. The Matsunaga staff's guided Capitol tours were so detailed that other Hawaii congressional offices recommended them over their own.

In the House, Spark Matsunaga became a key inside player in the process by serving on the gatekeeping Rules Committee. He provided pivotal votes to help national legislation overcome the obstruction of conservative committee leadership and reach the floor.

In the Senate, he led efforts to gain federal reparations and apologies to thousands of Americans of Japanese ancestry who were interned during World War II. He rose to the number two spot on the influential Senate Finance Committee, and could have ascended to chairman had Sen. Lloyd Bentsen, D-Texas, who now heads it, become vice president.

Hawaii's sugar industry, its military needs, transportation and travel interests had a reliable ally in Spark Matsunaga. He also was an early sponsor of the Newspaper Preservation Act, took a lead role in legislation to establish a national institute for peace, and pushed through a measure to create a poet laureate's position, a job to which the late Robert Penn Warren was the first author appointed.

Space occupied Matsunaga's attention in the mid-1980s, when he wrote "The Mars Project," a book proposing joint U.S.-Soviet space ventures. The 1985 book contained personal insights of his boyhood on Kaual and his war experiences, and the challenging view that the Air Force, instead of NASA, should play a larger role in our international space program.

In the campaigns of 1982 and 1988, Senator Matsunaga won re-election handily. The Star-Bulletin endorsed him in both. Reports of ill health during his third campaign were dismissed as unfounded. But a series of ailments and accidents sidelined him through much of 1989, and the man who prided himself on near perfect attendance missed 85 of 312 roll calls during the latter part of the year.

In January, the Senator made known his cancer and a few weeks later its worsening condition. On some key votes he arrived in the Senate chamber in a wheelchair, drawing praise from his colleagues. Debate arose in the news media on whether he should step down, to try regaining his health and

to make way for someone who could represent Hawaii's interests more actively. That issue now mooted, questions still remain about candor and the health of public officials, whether the public business can continue to be served by a disabled or slowly recuperating legislator. But these are topics for another day.

The Star-Bulletin had expressed hopes for the Senator's recovery and extends its condolences to his family, friends and followers. Spark Matsunaga had for so many years invested Hawaii politics with a personal joy and energy, a quickness and smile that seemed befitting of his first name. Politics and its parade of personalities will continue, but for many in Hawaii some of the warmth has gone out of it with the passing of a man called Spark.

SPARK MATSUNAGA—A LOVER OF PEACE

Mr. MITCHELL. Mr. President, on Sunday, our beloved colleague, Senator SPARK MATSUNAGA, passed away. The Scriptures tell us, blessed are the peacemakers, for they shall be called the children of God. SPARK MATSUNAGA, our friend and our colleague, was a child of God, for he was truly a peacemaker. He devoted many years of effort to the work of peace. He wrote, worked for, and saw enacted the law that established the U.S. Institute for Peace. It is a part of his legacy which all people will benefit from in the years ahead.

SPARKY MATSUNAGA was a lover of peace who knew war well. His heroism in the Italian campaign during the Second World War is well known. His country recognized his service with two Purple Hearts and the Bronze Star. In all of our Nation's long and valiant history, no State has ever been represented in the Senate at the same time by two greater heroes or two finer men than has Hawaii by SPARK MATSUNAGA and DAN INOUYE.

SPARKY loved his country enough to risk his life for it in war. He loved his country enough to serve it in public office for many years. But most of all, SPARK MATSUNAGA loved his country enough to make it right when he knew it was wrong.

His magnificent effort to set right the grievous wrong done to Americans of Japanese descent during the war years was an act of political courage. But more than that, it was the act of a man who loved the ideals of his country enough to insist that his country live up to those ideals.

SPARK MATSUNAGA knew his Nation's destiny lay in exploration and daring. He knew his Nation's heart needed poetry; but most of all, he knew his Nation's soul demanded justice.

It was an honor and a pleasure to know him and to serve in the Senate with him. His warmth and good cheer were legendary here. Always pleasant, smiling, he made you feel good just to see him and be with him. Even in the end, when pain engulfed him and he had difficulty moving, he never complained and his smile and his soft laugh never left him.

In the mysterious but uplifting way in which democracy works, his personality reflected perfectly the State he represented and loved so much: Open, sunny, full of life.

For most human beings, life is a continuous search for respect. First, for self-respect, then the respect of others. There are many ways to earn respect; among them service to others. SPARK MATSUNAGA served others and, in the process, earned their respect.

We hope that the ceremony held yesterday in Hawaii, which I was privileged to attend, and which was attended by those who knew and loved him, will have meaning for SPARK's family and for his memory, but perhaps they will derive even more meaning from the knowledge that many, many other people who did not know him, who never heard his name will, as a result of his efforts, lead better, more peaceful, more meaningful lives.

No man could leave a better legacy.

Mr. President, I ask unanimous consent that it be in order for flowers to be placed on the desk occupied by Senator MATSUNAGA during today's session of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMEMBERING SPARK MATSUNAGA

Mr. DOLE. Mr. President, I certainly want to join the distinguished majority leader in his comments just made because it was with great sadness that all of us learned of the death on Easter Sunday of our long time friend and colleague, SPARK MATSUNAGA.

I knew SPARKY for many years. He was my friend. We served in the House together for 6 years. He was a member of the Senate Finance Committee for many, many more, including the time when I was chairman of that committee. Not many people know that, as stated by the majority leader, both he and his colleague, Senator INOUYE, were members of the 442d Regiment in Italy. Both were wounded and both had distinguished service after that. He was a genuine hero to the country and to the people of his State that he loved so much.

He also brought dignity and fairness to the business of this body. We will never forget his persistent and noble efforts to provide recognition and compensation to Japanese-Americans sent into internment camps in the Second World War. We will never forget the pride he felt when he won his 19-year crusade to establish the U.S. Institute of Peace. We will never forget SPARKY's delightful personality that graced this body for 14 years.

He also left a legacy of delighted constituents, because no one went more out of his way for his constituents than SPARK MATSUNAGA. He brightened the visit of any Hawaiian who made the long trip to Washington with a cheerful "aloha," a personal tour, and lunch in the Senate dining room. Many of us referred to it as the Matsunaga table, right in the center of the dining room. That was an experience that few of his constituents could ever forget.

SPARKY MATSUNAGA found great strength in his family and to them I join my colleagues in sending my sincerest condolences.

We will miss the contributions SPARK MATSUNAGA made to his country, to his State, and to this institution. But, most of all, we will miss our colleague and our friend.

There was a very appropriate editorial in today's Roll Call that I ask unanimous consent be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SPARK MATSUNAGA, 1916-90

Spark Matsunaga, one of the finest, kindest Members of the United States Senate, died last weekend at the age of 73. He had been pursued by poor health for six years—heart attack, ulcer, fracture, back ailments, flu, and cancer. But, through it all, he served in the Senate with tenacity, intelligence, and distinction. It's easy to forget, in an age when institutional criticism runs rampant, that many Members of Congress worked their way up to Washington the hard way, devoting themselves to lives of public service. Spark Matsunaga was such a man.

Born in 1916 to a poor Japanese immigrant family, he took jobs as a stevedore and a grocery clerk to save up the money to attend the University of Hawaii. When he graduated, he became a public school teacher—a career that was cut short by World War II. Matsunaga, like his eventual colleague in the U.S. Senate, Daniel Inouye, served with other Japanese-Americans in the famous 442nd Regimental Combat Team in Europe. He was wounded twice and highly decorated. After the war, he earned a law degree at Harvard and returned to Hawaii as a prosecuting attorney.

Public service was his life—teacher, soldier, prosecutor, territorial legislator, then Member of the U.S. House and Senate. He was a vigorous advocate for his constituents, for Japanese-Americans interned during World War II (he succeeded at last in winning compensation for them), for the poor, and for all Americans. He was a thoughtful, sweet, engaging man—one of our favorite people on the Hill. Spark Matsunaga will be sorely missed.

Mr. MITCHELL. Mr. President, I think that note should be taken on the public record of significance of the remarks by the distinguished Republican leader today, because in an ironic way, his life was intertwined with that of Senator MATSUNAGA's.

In my remarks I mentioned Senator MATSUNAGA's distinguished war record in the Second World War and that of Senator INOUYE. Of course, as my col-

leagues know but maybe not all Americans know, Senator DOLE himself was a much decorated hero in that campaign as well. Although I do not know whether he knew Senator MATSUNAGA at the time, it is an ironic twist of fate that both he and Senator MATSUNAGA should have displayed such valor at that time in their lives; both were wounded and both eventually made their way to positions of national leadership.

So, Mr. President, I think the words of the distiguished Republican leader are worthy of special note for that reason, and I am pleased to call that to the attention of my colleagues and the American people.

Mr. President, I yield the floor.

TRIBUTE TO SPARK MATSUNAGA

Mr. EXON. Mr. President, the Senate has received a severe loss with the passing of our beloved colleague, SPARK MATSUNAGA, the Senator from Hawaii.

He was a dear friend of mine. There are many words that I might utter to eulogize our lost brother, and express to his wife Helene, and the family, our sympathy and understanding of their loss.

Suffice it to say, Mr. President, words alone always seem insufficient in times like these. There were many significant accomplishments of God's sevant, SPARKY MATSUNAGA, service to his beloved Hawaii, and the blood that he gave in dedication to his country. But for me, let me simply say that above all else, SPARKY MATSUNAGA was a keeper of the faith, a truly loving and caring person, the likes of which the U.S. Senate may never have seen before and may never see again.

My memory of my dear friend will always be, and I will best remember him, for the embodiment, above all else, of what most of us would like to be remembered for. SPARKY MATSUNAGA was the kindest and most gentlemanly effective U.S. Senator that I have ever had the privilege to serve with.

Mr. President, I yield the floor.

TRIBUTE TO SPARK MATSUNAGA

Mr. NUNN. Mr. President, I would like to be associated with the remarks of the Senator from Nebraska about our departed colleague and friend, SPARK MATSUNAGA. SPARKY's voice of compassion, and his devotion to the ideals for which our Republic stands, will be missed by all who enjoyed the honor and privilege of serving with him in this Chamber.

SPARK served this Nation bravely and honorably in war, and sought to instruct it in the gentler art of peace, with a poet's graceful touch. His life exemplified his belief that the best way to achieve a goal was not through coercion, but friendly persuasion.

He was a legislator with vision who responded to the needs of his constituency while readily assuming the burdens of statesmanship. He believed deeply in the capacity of this institution to serve the public good. His devotion to the Senate was no more clearly demonstrated than by his appearance on this floor, while in ill health, to cast his vote for the Clean Air Act. It was an act of courage and determination that we all will admire for years to come.

SPARKY had a special knack for turning people's unfocused concern into concrete action. He will be remembered for his strong commitment to the State he helped establish, to justice for Japanese-Americans interned in World War II, and to the cause of peace.

We can be grateful for our memories of SPARKY—grateful that the Lord graced his lifetime with a global movement toward peace and democracy which he worked so hard to bring about. As we look at the new dawn in the East, let us remember that SPARKY brought the warmth of Hawaii's sunshine with him every day to the U.S. Senate.

Senator SPARK MATSUNAGA will be greatly missed, but thankfully his accomplishments are forever a part of the great patchwork of American life. To his wife Helene, and his entire family, I extend my condolences for their loss, and my personal respect to our friend—SPARK MATSUNAGA.

The PRESIDING OFFICER (Mr. KERRY). The Senator from Georgia.

SPARK MATSUNAGA

Mr. FOWLER. Mr. President, I cannot be more eloquent in my remembrances of our colleague and friend, SPARK MATSUNAGA, than my senior colleague from Georgia [Mr. NUNN]. So I will simply say that he was my friend; he was a friend of all Americans. We shall miss him.

I wish to associate myself with the remarks of my colleague, Senator NUNN.

SPARK MATSUNAGA: A MAN OF PEACE

Mr. SANFORD. Mr. President, last Sunday, the Nation lost a true patriot and humanitarian. Senator SPARK MATSUNAGA was a man who lived by the principles upon which the United States was built: justice, equality, and liberty. He will be deeply missed not only by the residents of Hawaii, but by all Americans who cherish peace, poetry, and courage.

My most vivid memory of SPARKY MATSUNAGA comes from a speech he made in 1987, as he introduced legislation on Japanese reparations. SPARKY, a veteran of World War II who earned a Bronze Star and two Purple Hearts, was overcome by emotion for the Japanese-Americans interned in American concentration camps during the war. His vivid recountment of the needless death of an elderly Japanese prisoner—shot while chasing an errant ball thrown by his grandson—lives in all of our memories to this day.

In that speech, SPARKY spoke to the ideal of America and to the terrible reality wrought by war and fear and ignorance. I would like to quote a few excerpts.

Mr. President, the greatness of any nation can be accurately measured by the laws under which its people are governed. This year we celebrate the bicentennial of that greatest of documents ever written by mortals which we have adopted as the supreme law of our land. In so doing, I am extremely pleased, if not exhilarated, to announce that on this day 71 Members of the august body have joined together in introducing legislation to remove that one ugly blot which has marred our National Constitution over the past 45 years. * * *

Those of us in this Chamber who are over 50 years of age no doubt recall exactly where we were and what we were doing on December 7, 1941, the day that Japan attacked the American naval base at Pearl Harbor. I myself was in active military service on the Island of Molokai in temporary command of an infantry company defending that island against the invaders. In fact, I was one of more than 1,500 men of Japanese ancestry who had volunteered for and were in active military service in Uncle Sam's uniform 6 months or more prior to the attack on Pearl Harbor, and who stood in defense of Hawaii against the enemy.

We remember vividly the atmosphere which prevailed in this country immediately following the bombing of Pearl Harbor. Rumors of a Japanese attack on the west coast of the United States were rampant and numerous false sightings of enemy war planes off the coast were reported. A great wave of fear and hysteria swept the United States, particularly along the west coast, where a relatively small population of Japanese Americans had for many years been subjected to racial discrimination and often violent attacks, even before the outbreak of World War II. * * *

During hearings held by the Commission on Wartime Relocation and Internment of Civilians, former internees, many telling their stories for the first time, told of infants, young mothers and elderly persons who died for lack of adequate medical care and facilities; of families who were separated, with elderly parents or in-laws going to one camp and their married children to another; of large families forced to live together in one small room; of the constant, nagging uncertainty about the future, both immediate and longterm; of internees who were shot and killed by guards when they inadvertently wandered too close to the camp fence; and of the strains which all of this placed on their families and on the close-knit Japanese American community as a whole.

A dramatic incident tells of a Dr. Tashiro whose father and son were playing pitch-catch ball. No one was to be seen between barbed wire fences after 6 o'clock.

It was a summer day; although past 6 o'clock, it was broad daylight. The grandfather missed the ball, and chased after it between the two fences. The guard in the watchtower yelled out, "Get back." The grandfather responded, "Oh, I am just going for the ball," and went after the ball.

The guard from the watchtower fired with his machine gun and killed him on the spot.

But perhaps the most traumatic experience, the one thing that has haunted Americans of Japanese ancestry for 45 years, was the stigma of being cast as disloyal to their own beloved country, the United States of America. One elderly internee, an American veteran of World War I, committed suicide rather than bear the brand of disloyalty to his country, the United States of America.

SPARKY dedicated his life to the service of his country. He distinguished himself on the beaches of Italy as a member of the all-Nisei 100th Battalion of the 442d Regimental Combat Team, one of the most decorated battalions in the history of this Nation. Equally important, SPARKY worked during his 27 years in the U.S. Congress to ensure that his country lived up to its constitutional responsibility toward those Americans wrongfully interred during World War II. He helped the United States atone for the injustice done to Japanese-Americans and promoted the principles upon which this Nation was founded.

SPARKY was a great conciliator; a man whose wartime experiences catalyzed his efforts to create the U.S. Institute for Peace. This academy provides a fitting tribute to his work for the peaceful resolution of national and international disputes.

In times of peace, we also remember SPARKY for his deep love of poetry, for his interest in space exploration, and for his effective service of the citizens of Hawaii. But most of all we remember him as a humanitarian and a friend.

The contemporary theologian, Jack Reimer, captured the spirit of SPARKY MATSUNAGA in this way:

We cannot merely pray to You, O God, to end war;
For we know that You have made the world in a way
That man must find his own path to peace
Within himself and with his neighbor. * * *
Therefore we pray to You instead, O God,
For strength, determination, and willpower,
To do instead of just to pray,
To become instead of merely to wish.

I hope and pray that SPARKY MATSUNAGA has found his own path to peace.

The PRESIDING OFFICER. The Chair recognizes Senator BOSCHWITZ.

SENATOR SPARK M. MATSUNAGA

Mr. BOSCHWITZ. Mr. President, I rise to say a few words about our colleague, SPARKY MATSUNAGA, who left us in an untimely manner on Easter Sunday. I got to know SPARKY first by name rather than by person in 1976 when he was running for the Senate for the first time and became involved in a very contentious primary. I received a call from one of my friends, who said, "There is a fellow out in Hawaii who needs your help." And I, indeed, got involved with him by being a donor to his compaign. This is before I was in the Senate, and it was a joy to help him at that time and later to get to know him. He won that primary and, of course, came to the Senate, and he became quick friends with me after I arrived here. You could not help but becoming a fast friend of SPARKY MATSUNAGA. He really was one of the most friendly Members of the Senate and looked across partisan lines, looked across the aisle and sought to make friends and sought to accommodate and be helpful to people of all political persuasions. We were not on the same committees, so we did not serve together on committees, so we did not share much legislative experience together. But, indeed, we found ways to help one another and we helped one another on a number of occasions.

Then I found myself in the unusual position, as chairman of the Republican Senatorial Campaign Committee, to operate in opposition to him. I had to go out and find somebody to run against him, which was not easy, because SPARKY won by 80 percent of the vote or more. I told him one day—I happened to be going out to the Far East, to Thailand. I said, "I am going to come back by way of Hawaii, SPARKY, and I want to recruit somebody to run against you, and I am going to talk to some people." He said, "Who are you going to talk to?" I said, "If you would give me a list of those people you have not taken out to lunch in the Senate dining room, I will start with them." That would have been a very short list indeed, Mr. President, because the center table of the Senate dining room, which accommodates about a dozen people, was filled every day by SPARK MATSUNAGA and whoever came from Hawaii. If they came from Hawaii and showed up before lunch, they had lunch with their Senator, and I think that he has taken most of the constituents in his State to lunch. So he laughed when I told him that I would start with a list of those he had not taken out to lunch. And when I went to Hawaii, somebody did indeed come forward. He did get less than 20 percent of the vote. SPARKY was well over 80 percent of the vote, as usual. And there was a cartoon of me in Hawaii, and it showed me with a board going up and down the beach looking for people to run against SPARKY MATSUNAGA because it really was thought to be a rather good-humored effort because SPARKY was indeed beloved by those in Hawaii, and for good cause. So, while it is the duty of a political party to find somebody to run against an incumbent, nevertheless it was not really a serious contest, and SPARKY and I had many fine conversations and enjoyable conversations talking about his reelection campaign.

SPARKY MATSUNAGA kept unusual hours. One night I was on a CBS program between 3 and 4 in the morning, and he told me the next day how good I was on this program. I might say it was prerecorded. I would not do something between 3 and 4 in the morning, but SPARKY was still up. He kept very unusual hours. He was calling people back in Hawaii to past midnight or 1 or 2 o'clock in the morning. I said, "My God, SPARKY, when do you go to bed?" He said, "About 5 o'clock." I said, "When do you get up?" He said, "About 7:30." I knew of few people who could accommodate life on so little sleep. But he signed all his mail, he answered it all personally. He knew his constituents. That is why he got 80, 82, 84 percent of the vote, obviously.

SPARKY MATSUNAGA was a dear man, a man that we will miss. I am sorry that I did not go to his funeral. The plane left here yesterday morning at 6:15. They flew out there on a 12-hour trip and then were there for 3 hours, and then they jumped back on the plane and got back at 10:30 this morning. Not wanting to join SPARKY before my time I decided that was not a trip I want to make, but that I would talk to Helene, his wife, and tell her of my love and high regard for SPARK MATSUNAGA and how Members of this Senate on both sides of the aisle will miss him because he was indeed to all of us a friend.

I yield the floor.

ON THE DEATH OF SENATOR SPARK MATSUNAGA

Mr. DURENBERGER. Mr. President, I did not have the honor of serving in the House with SPARKY MATSUNAGA like two of my colleagues who have spoken. As I often joke, I used my midlife crisis to come to the U.S. Senate in the middle of my forties.

I could never believe a U.S. Senator would be called SPARKY. Is this some kind of a pejorative? Are we putting him down or something like that? I got lucky enough to serve with him for 11 years on the Finance Committee, and in the last year-and-a-half on the Labor and Human Resources Committee, and we are the only two people who had served on those two committees.

What Senator PRYOR and Senator SARBANES have just said about SPARKY, I guess we would all say. This world is so full of people who spend their time finding fault and electing politicians to clean up all of the things that are wrong with this world, it has been such a wonderful experience to serve

with somebody who never found fault in anybody.

I think he thought it was his job to take care of Hawaii and Hawaiians on a lot of special policy issues. On some of the trade issues, where he was not a protectionist, he helped us on those issues. But, by gosh, when it came to the steamship companies and some of the things that were important to Hawaii, he was right there to take care of those special interests. Because it was those people who gave SPARKY life. And it was those people, I think, who made him the optimist.

That is why the big round table that was referred to, because he felt so good about those people that he represented in Hawaii.

I always hoped I would have that relationship with the people I represented. I always hoped that, as a Senator, somebody would say: He is always finding good in people.

I do not think they can do that with me. I do not think anybody would get up here and eulogize me in that sense. So it is a real pleasure to be able to stand here in memory of someone that all of us truly loved for the years that we knew him, and say we loved him because he loved us, because he loved everybody. And he expressed it.

He did not mind saying it. He did not mind showing it. If you called him SPARKY, he sparkled, and he was that for all of us.

Mr. President, it is with great sadness that I take to the floor to remember a true gentleman, and a man of dogged courage and wisdom, Senator SPARK MATSUNAGA. "SPARKY," as all of us knew him, died this past Easter Sunday after fighting prostate and bone cancer. He will be sorely missed by the people of Hawaii and by all of his collegues in the Congress.

Over the past 11 years, I worked with SPARKY in the Finance Committee to try to forestall protectionist inclinations from becoming legislative mistakes. And as the only two Senators to serve on the Finance and the Labor and Human Resources Committees, we shared a common commitment to improving the health and welfare of our Nation's most needy citizens.

Mr. President, SPARK MATSUNAGA was a man of peace who knew firsthand the ravages and indelible horrors that accompany war. That is why he spent more than 20 years, as a member of the House and the Senate, working to establish the U.S. Institute for Peace. As SPARKY commented when the law establishing the Institute was finally enacted: "Peacemaking is as much an art to be learned as war."

But I think history will best remember Senator SPARK MATSUNAGA for his lifelong crusade to try to right the wrong that was inflicted on American citizens of Japanese descent during the Second World War. This Friday marks the second anniversary of Senate passage of Senator MATSUNAGA's legislation endorsing the findings of the Commission on Wartime Relocation and Internment of Civilians and authorizing reparations for the Japanese-American families who were unlawfully interned during the Second World War.

But it was not just in the U.S. Senate that SPARKY served to defend the rights and freedoms guaranteed all Americans under our Constitution. In 1941, SPARKY was a second lieutenant in the U.S. Army. After the Japanese attack on Pearl Harbor, SPARKY—while still a member of the U.S. Army—was detained along with other internees in a Wisconsin camp. SPARKY, along with other internees petitioned President Roosevelt to be allowed to form the all-Nisei 100th Battalion of the 442d Regimental Combat Team. This became one of the most highly decorated and honored combat units in the history of the American military because of men like SPARK MATSUNAGA. He served in combat in North Africa and Europe and earned the Bronze Star, the Purple Heart with Oak Leaf Cluster, and the European-African-Middle-Eastern Campaign Medal with four Battle Stars.

Mr. President, there is a very special sense of civility that we as Members of the Senate bestow on each other as representatives of the 50 States. We often refer to each other as the "Distinguished Senator." SPARKY was not just a man who had earned the title "Distinguished Senator." SPARKY was a truly distinguished and honorable gentle human being, a man whose spirit of warmth and charity will long be remembered.

TRIBUTE TO SENATOR SPARK M. MATSUNAGA

Mr. THURMOND. Mr. President, it is with a deep sense of personal loss which I know is shared by my colleagues that I rise today to pay tribute to fellow Senator SPARK M. "SPARKY" MATSUNAGA. Senator MATSUNAGA was a World War II veteran, a man of the highest principles and a dedicated public servant. We all saw firsthand the dedication he exhibited in his courageous fight against cancer when he cast his final vote as a Senator from a wheelchair on the clean air bill. Such perseverance in the fact of adversity serves as an inspiration to us all.

Senator MATSUNAGA had a distinguished service record in World War II. The son of Japanese immigrants, he volunteered for active duty in 1941. He served with the 100th Infantry Battalion in Italy which later became the famed "Go for Broke" Regimental Combat Team—which Rollcall newspaper stated was the most decorated American military unit in history. He was twice wounded while serving in Italy and was awarded the Bronze Star Medal with a "V" clasp, a Purple Heart Medal with an Oak Leaf Cluster and the Army Commendation Medal. He will be long remembered for his efforts in collaboration with the war relocation authority to move Americans of Japanese ancestry from detention camps to homes and jobs in midwestern communities. As we all know, he continued working on behalf of Japanese-Americans during his years in Congress.

After the war, SPARKY MATSUNAGA worked as a veterans counselor for the U.S. Department of the Interior and the War Assets Administration. He was admitted to the Hawaii bar in 1952 and became assistant public prosecutor for the city and county of Honolulu.

He received his B.A. in education from the University of Hawaii in 1941, and earned his law degree from Harvard law school in 1951. At Harvard, he was a semifinalist in the Ames competition in oral advocacy. In addition, Senator MATSUNAGA received honorary doctor of laws and doctor of humane letters from several colleges and universities.

Senator MATSUNAGA began his long and distinguished career in public service in 1954, when he was elected to the House of Representatives for what was then the Territory of Hawaii. He was reelected in 1956 and 1958 and became the House majority leader in 1959. He was elected to Congress in 1962 and served on the House side until 1976, during which time he served as deputy majority whip. He was elected to the U.S. Senate in 1976 and became chief deputy Democratic whip for the 95th through the 100th Congresses. In 1979, his book "Rulemakers of the House" was published. Today, the book is required reading in political science and government study courses in 37 American universities.

SPARKY MATSUNAGA was a teacher, a prosecutor, a true war hero, a poet, and a most distinguished Member of Congress. My wife Nancy joins me in extending our deepest sympathies to his wife, Helene; and his five adult children, Mrs. Karen Hardman, Keene Matsunaga, Mrs. Diane Segars, Merle Matsunaga, and Matthew Matsunaga.

TRIBUTE TO SENATOR SPARK MATSUNAGA

Mr. PRYOR. Mr. President, most of our colleagues in this body realize on many occasions what a cumbersome, unrealistic life we live around here in the Senate, especially those long night sessions when we find ourselves stranded here basically marking time waiting for a vote and wondering what to do. Even as bad as those late nights are, Mr. President, from time to time there comes something good from

them. There is that rare opportunity and window of time when we have the chance to sort of informally visit with our friends and colleagues, to get to know them and their thoughts, and also to share experiences which makes this, I think, one of the most richly rewarding experiences in life.

One late evening, Mr. President, I was sitting at SPARKY MATSUNAGA's desk. I do not know why I asked him this question, but I said, "SPARKY, what were you doing the morning of December 7, 1941?" He said at that time he had just been inducted into the Army. He was on a training program. He and his group were stationed above Pearl Harbor, in the high hills above Pearl Harbor.

SPARKY MATSUNAGA said that he spent the next 2 hours watching the Japanese planes come into Pearl Harbor, bomb and damage and sink our ships. He watched lives being lost. His squadron was taken to the scene to see what assistance they could give.

I will never forget, Mr. President, he concluded that conversation that late evening on the floor as we informally visited, he said at that time, "I decided that I would commit my life to ending the senseless brutality of war and man's hatred for his fellow man."

He did that, Mr. President. He committed his energies, his resources, and his life to not only helping to end war but to bring a better understanding among people from all parts of this world.

He is going to be sorely missed here. I have always maintained that SPARKY was sort of one of the people who represented the conscience of the U.S. Senate. I never heard him speak ill of any individual Senator nor any individual human being. He was a man who was upbeat, who was optimistic, and who believed in the system.

Mr. President, finally, he was also a person who knew this building, every inch of this Capitol Building. He knew every portrait, he knew every statue, he knew every nook and cranny of the U.S. Capitol Building. Not only did he know its location, its proximity or where special rooms were, he also knew what it all meant. And that says a lot. He took great pride in basically becoming one of the historians of this building, its rich history and what it must mean to all Americans.

It was my pleasure, Mr. President, to have known SPARKY MATSUNAGA beginning in 1967 as a Member of the U.S. House of Representatives, and then ultimately, again in 1979 as I was honored to be elected to this body. He was always a compassionate and dear and gentle friend. We will all miss him sorely. And this Senate, this country, and Hawaii will always be better because he came our way.

I yield the floor.

TRIBUTE TO SENATOR SPARK M. MATSUNAGA

Mr. SARBANES. Mr. President, I rise to join my colleagues in this tribute to our dear and beloved colleague and friend, SPARKY MATSUNAGA. It is fitting and appropriate that his desktop here in the Senate Chamber should have on it today an Hawaiian lei because on occasions SPARKY would wear a lei around the Halls of the Congress in honor of the State he represented and loved so much.

I do not know of anyone who was a greater good will ambassador for his State than was SPARKY. As others have observed, you could go into the Senate dining room on any day of the week and find him at the large center table surrounded by constituents from Hawaii who had a standing offer from him that any time they came to Washington, he would take them to lunch. It is estimated that over the course of his tenure in the Senate he took to lunch well over half the population of the State of Hawaii. I cannot vouch for those numbers, but I do know that every day, there he was, and he would call you over to the table and you would have a chance to talk with the men and women, and even more importantly, the young boys and girls from his State. And you could sense how they were receiving from SPARKY a lesson in American democracy and how significant it was for them to have the benefit of the experience which he was offering to them.

It was significant for us as well to have the experience of knowing SPARKY, of being his friend and colleague.

When I first came to the House of Representatives after the election of 1970, SPARKY had already been there for four terms. He was elected to the House in 1962 after having served in the Hawaii Territorial House and, in fact, being the majority leader of that Territorial House.

I can recall the warmth with which he greeted me when I came to the House. How he went out of his way to be helpful, to be generous of spirit, to provide counsel, to be a good friend. I still remember those very early days in the House of Representatives when I was new and on occasion somewhat confused, how SPARKY reached out in an extraordinary way to be helpful, a quality which I think all of us know he reflected throughout his life.

We came to the Senate together in 1977 having been elected in 1976. His death has a particular meaning and impact for those of us who entered the Senate with him and saw the good and constructive work that he did and the dedicated and committed way in which he met his responsibilities.

I still recall the long and determined effort he made to establish the U.S. Peace Institute. As my colleague from Arkansas has just made reference, it was a commitment of SPARKY's, based on his own experience out of the Second World War, where he fought with great bravery and was much decorated.

He was committed to getting the Peace Institute established and worked at it year in and year out, finally with success. He based his care on the single but basic proposition that peacemaking is as much an art to be learned as war. Now we have such a Peace Institute which is engaged in the effort to underwrite studies of the ways to resolve conflicts without violence.

Let me finally say that I think all of us were bound to SPARKY by a personal bond resulting from his generosity of spirit and his warm, open, and indeed sunny disposition. I never knew him to say a mean word. He always sought you out with a warm comment, with a happy demeanor. He was brave and courageous until the very end. I can recall in the last days of his illness when he would be brought on the Senate floor in a wheelchair in order to vote—he was conscientious about that—Members would go over to talk to him. And even then, when it was clearly an effort for him to come and to participate and to cast his vote, when you started to talk with him, he was always upbeat, he was always optimistic, he was always obviously concerned with helping to lift you up and not have you go away from the conversation with him depressed.

We are going to miss him deeply in this body. He made a special contribution. I, for one, am grateful for the friendship that I had with him over these many years. And I extend to his wife, Helene, and their five children, my very deepest sympathies. May they take comfort in the knowledge that Hawaii America, indeed the world, are the better for SPARKY's contributions.

Mr. President, I yield the floor.

EULOGY FOR SENATOR SPARK MATSUNAGA

Mr. ADAMS. Mr. President, I was deeply saddened to hear that cancer had claimed the life of my dear friend and colleague, SPARK MATSUNAGA of Hawaii. Those of us who knew him, both in his brilliant career and life in public service as it was lived out, came to admire him even more as he fought valiantly against that dreaded disease of cancer these past months.

Shortly before our Easter recess, SPARK cast his last vote in the U.S. Senate. He was in a wheelchair. Though his body was ravaged, his mind was clear, his sense of humor was intact, and his commitment to serve the citizens of the State of Hawaii was undiminished. In his quiet and dignified way, SPARK MATSUNAGA earned a place in the history of this

country as a soldier, a statesman, a scholar, and a poet.

SPARK MATSUNAGA displayed the love of country so frequently shown by the sons and daughters of immigrants. Following his graduation from the University of Hawaii with a degree in education, SPARK was commissioned a second lieutenant in the U.S. Army Reserve, and later volunteered for active duty with Company K of the 299th Infantry. After the attack on Pearl Harbor, SPARK was detained by his own Government in a Wisconsin internment camp. He and a number of his fellow internees successfully petitioned President Franklin Roosevelt, and they were allowed to form the 100th Infantry Batallion.

He served in fierce combat in Italy with the 100th Battalion of the 442d Regimental Combat Team, earning two Purple Hearts and the Bronze Star Medal as part of one of the most heavily decorated and famous fighting units in the history of the United States military as it carried out its missions.

Following the war, SPARK worked for the Federal Government, and later earned a law degree from Harvard University. The U.S. Senate first heard from SPARK MATSUNAGA in 1950, when he testified before this body in support of statehood for Hawaii. Recalling the effort that he and his fallen comrades had contributed to our Nation's war effort, SPARK testified that they "were fighting not only for America but to prove that despite their racial background they were as good Americans as any. They were fighting for recognition as plain Americans, not hyphenated Americans." There is no need for a hyphen in any description of SPARK MATSUNAGA; he was a great American.

Before coming to Congress, SPARK had a diverse and challenging legal career as a prosecutor, territorial legislator, and private attorney. His 14-year career in the U.S. House of Representatives began in 1962, 2 years before my own arrival. During the many years we served together in the House, I remember him as dedicated to his work, and one of the best liked Members of the body.

When we met again in the U.S. Senate, where he had served since 1976, SPARK sat on the powerful Senate Finance Committee and had developed a reputation as one of this Chamber's leading experts on international trade. He was philosophically inclined toward free trade, though his considerable legislative skills could be brought to bear on protecting his own State's pineapple market and sugar cane prices.

SPARK never lost interest in his State or the voters who sent him to Washington—in fact, he held the Senate record for entertaining visiting constituents in the Senate dining room. Is there any among us who will not miss the thoughtful gift of macadamia nuts that SPARK gave to us each Christmas?

Our service together in the Senate lasted only 3 short years, but I had the pleasure of his company on the Labor and Human Resources Committee. I also was honored to testify at his side in support of legislation providing redress to Japanese-Americans who had been interned during the war in which he and so many other sons of Nisei parents fought so bravely.

SPARK MATSUNAGA was a soldier with the heart of a poet; a writer of haiku who sponsored the establishment of the position of national poet laureate; and a visionary who argued that peacemaking was an art to be studied and learned with the same vigor that is dedicated to the study of war. His 20-year effort to establish the U.S. Institute for Peace met with success in 1984, and that program stands as SPARK MATSUNAGA's legacy to his countrymen and to mankind.

It is the rare individual who can achieve great success and still maintain the best habits and friendships of a lifetime, but SPARK MATSUNAGA was such a person. He leaves behind a wife and five loving children, and the devoted citizens of an island State in the Pacific Ocean that sent him to Congress by resounding margins term after term. And in the hearts of his fellow Senators, who saw courage and dignity on display until the very end, SPARK MATSUNAGA leaves a legacy that will be passed on to others who serve in this body. Senate President pro tempore ROBERT BYRD put it so eloquently the day SPARKY came to the floor one last time: "There is a man. When comes another?"

Mr. President, there are no easy words that can adequately express the fondness of a farewell directed to SPARK MATSUNAGA. Perhaps the language of the native people of the State of Hawaii, and from the island of Kauai where he was born, expresses it best. Though the man is gone, his fighting spirit, his easy manner and gracious way, and, yes, his spark of intellect and decency that propelled him through life will linger on in the corridors of Congress. A word of greeting and farewell to a man who will always be with us: Aloha, SPARK.

Thank you, Mr. President.

TRIBUTE TO SENATOR SPARK M. MATSUNAGA

Mr. LEAHY. Mr. President, I thank my good friend from Wyoming for his comments about Senator MATSUNAGA, and others who have spoken and will speak for him.

I must say, Mr. President, it is somewhat difficult standing here, following comments just made, beside the desk of my seatmate in this Congress, Senator MATSUNAGA, and looking at the empty chair there, and also looking at the farewell mark on that, the Hawaiian lei that is upon his desk, signifying that he has left.

I think of that because we all know the number of times when SPARK would come to applaud one of us for something that he felt we had done right—and usually it was something that we had followed his lead on—and he would bring a Hawaiian lei and put it on us.

I remember walking into the Cloakroom once with one of those, and a couple of the Senators were sitting there saying, "Well, you finally listened to SPARK long enough." And like my friend ALAN SIMPSON, I had SPARK come back so persistently that he had worn me down.

Senator SIMPSON and I are both a tad taller than Senator MATSUNAGA was, but he tended to stand a lot taller than we did at times, when he would go after us on what we should do. And we did, Mr. President, because SPARK was such a good man, a man with so much heart.

When he would come on these issues of peace, on the issue of reparations to the Japanese-Americans who were treated so poorly by this country, every time he came Senator MATSUNAGA was not speaking for himself, but it was for others, It was always for the greater good.

Again, whether it was the Peace Academy or the reparations bill or so many others, you had to stop and realize that this was nothing that went to him; it went to others. Who can argue against studying peace at the level that we studied war? Who can argue that we had a great debt incurred to our own people, to fellow Americans in World War II? And now finally this generation had the obligation to respond to it, and while some of those Americans were still left alive. We realized what we did.

Many will speak of how hard SPARKY worked, and we all know that. He was the only person who could be here representing a State with a time zone 5 hours removed from Washington, DC, and still be talking to people throughout their normal working day back there and still put in a working day here.

I asked him once if he ever slept. It was almost like SPARK had not quite thought of that aspect of life. He did put in 2 or 3 hours of sleep here and there. I am not just sure where the here and there was, because there were constituents in Hawaii who would get the cheerful voice of SPARK on the phone at their own supper time, which would be after midnight our time, and yet, he would be at many early morning meetings with the rest of us here.

He was a man of great talents. The Washington Post has spoken of his

poetry expertise. I watched him sitting in the seat next to me, Mr. President, sometimes during the discussions that were somewhat boring on this floor, writing poetry.

Mr. President, I also think of some of the personal things—his kindness to me, to my wife, my children.

One interesting little item: SPARK MATSUNAGA found out early on that my mother is a first-generation Italian-American. He asked me whether my mother speaks Italian. I said, "Yes, that is her native tongue." He asked me how good my Italian was. I said it was very, very poor. I remember a little from talking to my grandparents, and most of that I have lost. He chided me on that.

I didn't think much of it, Mr. President, until a few weeks later when my mother was here. We were walking through the halls and ran into Senator MATSUNAGA, who immediately ignored me and started speaking in rapid-fire Italian to my mother. I think today of the smile that came across her face. I also think of the smile that came upon SPARK's face as he turned back to me and said, "There, that is what you should have learned to do."

I would have come by it a little more naturally than he had. He came to it out of sheer patriotism by serving in Italy during World War II with the American forces.

There will be many stories told about SPARK MATSUNAGA, Mr. President, but I will close with this. I considered it an honor sitting beside him, and I think of just a couple weeks ago when I saw him for the last time on the floor of the Senate. It was obvious he was in great pain and discomfort, but SPARK, even then, was asking about all the other Senators. He did not show even a sign of any concern for himself.

When he left, I think a lot of us knew we would probably not see him again. I remember the feelings expressed by Senators when they went back to the cloakroom, the sadness felt by so many, Republicans and Democrats alike—there is no difference there—because we knew that we would be losing not only a great Senator, but a very special friend.

Thank you, Mr. President.

Mr. WIRTH addressed the Chair.

The PRESIDING OFFICER (Mr. KOHL). The Chair recognizes the Senator from Colorado.

TRIBUTE TO SENATOR SPARK MATSUNAGA

Mr. WIRTH. Thank you, Mr. President.

In 1974 there was a political earthquake in the United States following Watergate and the Vietnam war. There was enormous political change. There were 79 Democrats elected for the first time in the House of Representatives, and 18 or 20 Republicans; a huge turnover.

We came to town, and there was a great deal of concern about who we were and what we were going to be. Carl Albert was then the Speaker of the House.

The person that Carl Albert entrusted as being kind of the shepherd for this new group coming to town was SPARK MATSUNAGA. That is where I first met him. here was this very quiet, courtly, polite Member of Congress, about halfway up the hierarchy, the person chosen by Carl Albert to be sort of shephard for all of these people coming from these divergent backgrounds at this time of enormous change.

That is a commentary on the respect with which this man was held in 1975, and right up to the time of his death. He always had that interest, concern, perspective, that wonderful, quiet humanity. That is who Carl Albert chose to be the steward of this flock of people from all over the country. That is what the people of Hawaii chose, as well, and chose so carefully.

He was a friend of mine, a mentor of mine, and I shall miss him, Mr. President.

SENATOR SPARK MATSUNAGA

Mr. HATFIELD. Mr. President, yesterday, I had the privilege of making some remarks at the funeral service for Senator SPARK MATSUNAGA. I would like to repeat those comments here.

There are those who briefly capture our attention with loud pronouncements and angry confrontations—and there are those who touch our lives forever with quiet strength and gentle compassion.

SPARK MATSUNAGA was not a loud man: although his voice was heard loud and clear. And he was not an angry man: although his fierce tenacity gave birth to several landmark pieces of legislation—most notedly legislation creating the United States Institute for Peace and providing reparations for Japanese internment victims.

In many ways, SPARK brought Hawaii—and its gentle calm—to Washington. The SPARK MATSUNAGA I knew and deeply admired was a peaceful man: a man at peace and a man of peace.

His life was a testament to the unshakable force of character, to the unmatched strength of decency. We shared the experience of war: but we also shared a commitment to peace.

SPARK M. MATSUNAGA

Mr. BENTSEN. Mr. President, SPARK MATSUNAGA's hobby was writing poetry. He had done it since he was a boy. In 1944, as a soldier wounded at the foot of Monte Cassino during the invasion of Italy, he took out his notebook and wrote these lines:

When in the light of thought I ask myself:
Just who am I and what,
What lasting imprints good or ill,
Have I for future mortals wrought?

Later, as a lawyer, SPARK MATSUNAGA summed up, many times before a jury. Now, at the end of his life, in our own summing up, we can answer the question he asked 4½ decades ago.

And the answer is contained in the flags flown at half mast over this Capitol. Few Americans have left more of a lasting imprint. We have lost a colleague and I have lost a friend. Hawaii has lost a tireless worker for its people. America has lost a distinguished public servant.

SPARK MATSUNAGA was a man of extraordinary courage—from his days in Italy in the Second World War until his final struggle against cancer. He never surrendered, never lost hope, never took defeat as anything more than a temporary setback.

We witnessed his courage; we also saw his vision and determination. He looked to the future and called for Soviet-American cooperation in exploring that last frontier of space. He insisted that we honor our commitments to veterans; he also pressed us to study the processes of peace as well as war.

SPARKY was tenacious, no doubt about that. He reasoned with us, twisting our arms with logic rather than force, gently pulling us to see things his way.

Eventually, we would agree. We agreed to establish the U.S. Institute of Peace. We agreed to measures promoting Hawaii's economy. We agreed to have a national poet laureate.

His greatest legislative achievement, of course, resulted from his battle to correct the injustice done Japanese-Americans interned in camps during World War II. It was a battle even his supporters thought impossible to win.

But in the end, he got us to agree to this view as well; he made us see, not only that a profound injustice had been done, but that words were not apology enough.

Mr. President, I sat next to SPARK MATSUNAGA on the Finance Committee. We learned from him about Hawaii's fascinating past, its vibrant present, and its promising future. He taught us to understand and appreciate the diversity of the 50th State.

And he taught us more. Throughout his public service, SPARK MATSUNAGA set high standards of conduct and performance. His very example challenged us to respond, in Lincoln's phrase, to the better angels of our nature.

Mr. President, that World War II service that earned SPARK MATSUNAGA his Purple Heart involves a story of sacrifice and heroism that stood out

even at a time of sacrifice. The Japanese-Americans who volunteered to fight were courageous and generous-spirited enough to overlook the injustice their own country had done to them. SPARK MATSUNAGA was one of those who volunteered to form the 100th Infantry Battalion. Later they linked up with the 442d Regimental Combat Team.

Texans remembered that team—which included Senator INOUYE as well. We remembered the way they came to the rescue of a battalion of Texans cut off by German troops in France. We remembered that as they advanced up the Italian boot, becoming the most highly decorated unit in the history of the United States, they became known for their slogan: "Go for Broke."

So, how do we answer the question SPARK MATSUNAGA asked himself at the foot of Monte Cassino? Did he leave the "lasting imprint" he so wanted to leave? You bet he did. He went for broke in war, and in over 30 years of his public life. I want to join my colleagues in extending sympathy to SPARKY's wife and family. As they mourn, I hope they dwell not on his passing but on his many, lasting accomplishments. He is gone, but we are better because he was here.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER (Mr. REID). The Senator from Utah.

SPARK MATSUNAGA

Mr. HATCH. Mr. President, I rise today on the Senate floor to speak for my friend, SPARK MATSUNAGA. This dear colleague was a fine man, and frankly, his manner very much belied his nickname, "SPARKY."

He went about his work as a Senator from Hawaii without an entourage of staff or a gaggle of reporters. Yet, his many achievements in life showed how hard he worked.

After graduating with honors from the University of Hawaii, he was commissioned a second lieutenant in the U.S. Army Reserve and volunteered for active duty in 1941.

He served with distinction in Europe and North Africa, and earned the Bronze Star and Purple Heart with oak leaf cluster, as well as numerous other military awards.

When the war was over, he chose law as his chosen career. He excelled at the Harvard Law School. He was a local prosecutor before entering private practice and served in the Hawaiian Territorial Legislature where he became majority leader in 1959. SPARKY was elected to the U.S. House of Representatives back in 1962 and to the Senate in 1976. He came in with my class. So I felt particularly close to him, especially since he was a member of the Labor and Human Resources Committee, and I worked with him on a regular basis. Hawaiians, regardless of their views on any given issue, can be proud of the way SPARK MATSUNAGA represented them here in Washington.

SPARKY was unfailingly kind and generous. He had a special place in his heart for those who were sick and elderly and alone. I know that is why he was so dedicated as a member of the Labor and Human Resources Committee. He was a champion of the Older Americans Act and the efforts to assist America's seniors.

SPARK MATSUNAGA fervently believed that if men can study the causes and tactics of war, they can also study peace. Today, the U.S. Institute for Peace exists because Senator SPARK MATSUNAGA believed in its concept and in its mission. I know because I was there, and there was a time when that Institute was not going to pass. He came to me and asked for help, and I, finally, out of just straight friendship with him, said, "I will be glad to help you." He was so sincere and dedicated in his own quiet and kindly, effective way, and he was able to motivate and move people until we had the Peace Institute which, hopefully, will help to bring peace throughout the world.

SPARKY also had a sense of humor. I recall an executive session in the Labor and Human Resources Committee several years ago. Then Senator QUAYLE wanted the committee to take up his proposal to waive the child labor laws for those young people who received the honor of being selected bat boys or bat girls for the Indianapolis minor league baseball team. Because the games were played in the evening, the Labor Department ruled that kids' participation was a violation of the Fair Labor Standards Act. It was, frankly, a little hard to believe the seriousness of the debate over allowing kids to realize the dream of association with real baseball players. But Members on both sides had strong opinions, and the Senate is our Nation's premier forum for debate.

Senator METZENBAUM brought a young guest to the committee that day. Eight-year-old Jeffrey McGuiggen was in Washington spending the day with Senator METZENBAUM as part of the Cincinnati chapter's "Dreams Come True Cystic Fibrosis Program." SPARKY, who typically refrained from getting into the fray, asked Jeffrey if he wanted to be a bat boy. Jeffrey answered, "Yes." SPARKY went on to say that he would support the Quayle amendment because he himself had been a bat boy when he was 14 years of age. The committee agreed that Senator MATSUNAGA had turned out all right for his experience as a bat boy. SPARKY then said his only concern was the admonishment by his father, who used to say in his Japanese accent, "Bat girls, bat boys make bat citizens." We all laughed. Both sides shared a good laugh with SPARKY.

I have to say that of those in the room who were busy debating the legal pros and cons of this Fair Labor Standards Act waiver, SPARKY got to the main point first. Jeffrey wanted to be a bat boy. Unfortunately, Senator MATSUNAGA was unsuccessful in convincing the rest of the committee that this issue had a human side to it; it was not just a matter for the lawyers and the legislators to regulate.

In the nomenclature voiced in D.C., SPARK MATSUNAGA was probably low profile, but he was effective as a junior Senator, and he accomplished a great deal of things that never made the front pages. In the last month of his life, when this yet-unconquerable disease caused him great pain and discomfort, SPARK MATSUNAGA was an inspiration to all of us. He never gave in to bitterness or self pity. I knew him personally. Many times we put our arms around each other and hugged each other. He was a winning, warm, decent, wonderful man. He was a "spark" in personality. He was the type of person you could not help but like. He was a decent man. He was the kind of person I feel proud to have served with in the U.S. Senate, as I do with so many others who have served in the Senate.

I just hope that his widow and his family realize how respected he was by all of us. That is one reason I came over to the floor, just to express what is in my heart with regard to this fine fellow. He meant so much to all of us, and he basically contributed so much to this country, to this body, to his State, and to so many people. I am grateful to him, and I am grateful I served with him on the Labor and Human Resources Committee and that we had him with us as long as we did. I wish his widow and his family the very best. Our prayers are with them, and our spirit is with them, and I hope that everybody in Hawaii realizes how very, very much we think of SPARKY and in what high esteem we hold him.

I notice my distinguished friend from Ohio is here to speak for Senator MATSUNAGA himself. I compliment him for having been such a good friend of SPARKY's and for being such a good friend of mine. I am grateful for the privilege of serving in this body. One of the reasons I am is because of people like SPARK MATSUNAGA. Mr. President, I yield the floor.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized for 7 minutes.

SPARK MATSUNAGA

Mr. METZENBAUM. Mr. President, the remarks of my good friend, the distinguished Senator from Utah, just

previous to mine pretty much indicate the story of SPARKY MATSUNAGA. Here is a leading member of the opposition party on the floor talking about our friend, SPARKY MATSUNAGA. This is a body that has many differences of opinion across the aisle, Democrats and Republicans, and sometimes on the same side of the aisle. But the fact is that SPARKY MATSUNAGA was one of those Senators whom everybody loved. SPARKY MATSUNAGA had no enemies in the U.S. Senate. And when he decided that there ought to be an Institute for Peace, nobody could say no to him, because the warmth of his personality, the sincerity of the human being, the depth of conviction, all combined to make him a rare person in this body. It is very difficult to be universally loved in a political body, but SPARKY MATSUNAGA was able to fill that kind of spot.

He was respected. He was the kind of Senator that everybody knew was fighting and concerned about the people in his own State, and I remember so often when we would go out in the evening, we would see his beloved wife Helene. She would be out socially. And where is SPARKY? SPARKY was back in the office talking to his constituents by long distance telephone, not one night a week, but every night of the week. He was dedicated to representing the people of that great State of Hawaii.

I just came from the Senate dining room; I had lunch there. There was a little twinge when I looked over to the center of the dining room and there was no SPARKY MATSUNAGA there today. In the past he would have, every single day, every single day, a group of Hawaiians who would be visiting Washington, and he would take them to lunch. I remember those occasions when he could not accommodate all of them at one luncheon, and he would have more than one luncheon in order to accommodate those visiting Washington, DC, from Hawaii. I just think that there are few people that ever achieved the sense of respect, the sense of love, the sense of caring, the sense of personal relationships that SPARKY MATSUNAGA achieved in this body. He will be remembered as a hero in the war, a champion for peace, a credit to this body and to the Nation.

But I will miss him, as I know will many of my other colleagues. He was my friend. He sat next to me on the Labor Committee. We kidded each other often.

When we first came here a lot of people got confused between Matsunaga and Metzenbaum and he would get people coming to his office for my office and they were mixed up on the two names. It may not sound that similar but people found that kind of confusion.

I will miss SPARKY MATSUNAGA, So will the people of Hawaii and so will this Nation. He served well and ably. He was truly one of our finest public servants.

I yield the floor.

SENATOR SPARK M. MATSUNAGA

Mr. BREAUX. Mr. President, I also will join with my distinguished colleague, the Senator from Ohio, in his remarks concerning our friend SPARKY. We all share in the loss this institution, this body and this Nation will experience as a result of SPARKY's passing on. We have lost one of our certainly most beloved Members and the world has lost one of its most eloquent and passionate advocates of world peace.

There are many ways in which we could remember and describe SPARKY MATSUNAGA and many of our colleagues will bring those to the attention of this body today. I think one clear universal memory was that he was a friend to everyone that he met. There were no strangers when it came to SPARK MATSUNAGA. He cared very deeply about people, especially those in his home State. He fought fervently on their behalf in the 26 years he served in the Congress, most in the House of Representatives, as well as here in the Senate.

The fact that Hawaii is a State today is due in large part to the untiring efforts of SPARKY. He was courageous. He was a war hero who sustained two battle injuries fighting valiantly for his country in World War II, and yet his experiences in Italy and North Africa affected him deeply. So much so, he dedicated much of himself to advancing the cause of world peace.

The U.S. Institute of Peace is a monument, not only to a noble cause, but it is a monument and tribute to one man's inspiration, tenacity and patience. He touched many lives. Through dedication to peace, he is likely to continue touching the lives of millions of people for generations to come.

It seems that the essence of SPARKY's life is he left the world a better place than he found it. To me there is no better tribute that we could pay to him than to say he was one who truly made a major difference.

My best memory of SPARKY, as many of the Members speak today, is his almost daily universal luncheon he shared with his constituents from the State of Hawaii at the middle table in the dining room. Many Members commented that SPARKY probably spent less on campaigns than any other Member and more on lunch expenses in the dining room, certainly, than any other Member in the Senate. It was his way of sharing his love for this institution, his love for the Senate, with the people of the State of Hawaii.

He genuinely loved this institution and we all loved him, and he will be greatly and sorely missed by all.

A TRIBUTE TO SPARKY MATSUNAGA

Mr. MOYNIHAN. Mr. President, I rise to join the Senate in paying tribute to SPARKY MATSUNAGA who, of course, died on Sunday. As I do, I look at his empty desk just in front of me with the flowers on it—the Hawaiian leis—that we have come to associate with him. They are there as a special tribute to his passing. But they were not an uncommon sight in the Senate in the 13½ years he served here. It was very common for him to receive flowers of this kind from visiting Hawaiians and he would simply bring them into the Chamber and put them on his desk in the most natural way, such that one became used to seeing flowers in a body otherwise without them.

It is a curious thing, when you come to think of it, that in most legislative bodies, in other parts of the world, one will find flowers—surrounding the main dais or perhaps in the background. But not in our rather severe, republican, austere, Chamber.

It was SPARK, SPARKY as we called him, who brought flowers in with him with that supreme gentleness that he brought to life. We are not much accustomed to referring to grown men as sweet. Indeed, I do not call many people sweet. And yet there was a sweetness to this man that overcame any reluctance to acknowledge it. It was a sweetness that could only emanate from an internal peace which he acquired so naturally from a marriage so strong, so enduring; from a love of his country so profound and so tested.

He was, after all, a warrior before he was any other thing. He fought in that great 100th Battalion up and down the mountainous spine of Italy in the worst fighting of the Second World War. Wounded repeatedly, but deterred never. Actually, before being a warrior, he was a boxer, a lightweight. He liked that part of his life. In all, these things were part of the infinite variety of this man.

I sat next to him for 13½ years in the Committee on Finance, and never did we spend a morning together but that I did not learn something new and admirable and inspiriting from him. One would have to find out the things that SPARK MATSUNAGA had done. Sometimes one had to drag them out of him. He, the most responsive and generous of persons to others, withheld part of himself simply out of an innate courtesy and an innate sense of not wanting to invade others' space or prerogative.

I recall once calling upon him in his office to ask that he be one of the first cosponsors of what became the Family Support Act of 1988; the first change in the welfare system in a half century. It was to be a redefinition of the welfare system; directed away from its original concern as a widow's pension toward the question of the socialization of children and the lives of persons in difficulty in the cities of the country. In the most casual way, SPARK said, "Of course, I will join you." In the most casual way, he mentioned that when he was at the Harvard Law School he had worked with a law professor and his wife, Drs. Sheldon and Eleanor Touroff Gzlueck, doing statistical analyses of problems of juvenile delinquency in the neighboring Irish-Italian town of Somerville, MA. I had at this time known SPARK for a dozen years. I said, "SPARK, you worked with Sheldon and Eleanor Glueck?" He said, "Oh, yes."

I said, "But, SPARK, you cannot not tell that to a friend. That is the classic sociological study of delinquency in the 20th century." Oh, yes, he knew. He was not unaware of the power of this particular study which analyzed the effects of broken families as a predictor of delinquent behavior: a very powerful predictor. The study appeared in 1952. SPARK graduated in 1951. There was first a 1950 study entitled "Unraveling Juvenile Delinquency," then a second entitled "Delinquency in the Making: Paths to Prevention." SPARK had worked on them both. The absolute, the essential key to both was the validity of their statistical analysis.

A whole new picture of the sources of delinquent behavior in children was presented to us; wholly new and, for the first time ever, based on data, research and the analysis of findings. The data was at first accepted with great interest, but then in a strange 15-year period or so it was rejected. It was said that they had not done the data right. One of the Gluecks actually died with their study under a certain cloud. But then a new generation came along and said no, they had done it right after all. In fact, they had done it very well indeed, and a thesis of great consequence came back into the mainstream of scholarship. And who, would you guess, had been working on the data? SPARK MATSUNAGA. And who, would you guess, had got it right the first time, even if others did not see that for awhile? And who, would you guess, would never mention it to a friend as it might seem to be presenting himself in a superior light—an easy thing to do when you are such a superior person? SPARK MATSUNAGA.

I do not know that we shall see his like again. We will not see again, save in his gallant fellow Senator from Hawaii, Senator INOUYE, a man forced in the most cruel circumstances to prove his patriotism to a nation that had put his people behind barbed wire but was then to emerge wounded, yes and scarred but not embittered. To the contrary, SPARK MATSUNAGA emerged larger and more affirming of his Nation and his people and also, Mr. President, never forgetting that there was justice yet to be remedied, a wrong yet to be righted. On this floor, at that desk, he stood and fought and won from the United States an apology to Japanese-Americans whom we so wronged in those dreadful days and years of the Second World War.

He will be remembered for that. But he will be remembered for himself, and he will live on in an institution to which he gave so much of his attention as a Senator, the Institute for Peace. There will be no more appropriate statement of this man, who began his life in strife—in the strife of racial antagonism, and in the clash of arms against the totalitarian powers of Europe—than that he would end up asking but one thing of the Senate as an institution, and that was and is a place where peace would be studied and men might make war no more.

We shall not see his like again. We have been blessed and graced with his presence.

Mr. President, I yield the floor.

SPARK M. MATSUNAGA

Mr. COCHRAN. Mr. President, the death of SPARK MATSUNAGA leaves me with a profound feeling of sadness and a deep sense of loss. We have lost one of the Senate's kindest and most dedicated Members.

I served with SPARK when we were both Members of the House of Representatives. He was a very visible, active and effective Member of the House. As a member of that body's prestigious Rules Committee, he helped decide which bills came before the House and the conditions under which they would be considered.

After we were elected to the Senate, I came to know him personally as a very warm, friendly and intelligent person. He never tried to impress you with his intelligence. He was very modest. But, he had a very keen mind. And, he worked very long hours.

He was my chairman on the Aging Subcommittee. I served as the ranking member on the Republican side. Together, we have held hearings on issues affecting elderly citizens and we have worked closely on legislation that came under our jurisdiction.

The Older Americans Act was reauthorized and improved, I think, as a result of his active and thoughtful leadership as chairman of this subcommittee.

Although I am sure he had to be uncomfortable and not feeling well during the past year, he never complained. I was with him in committee when he presided without giving in to the easier course of letting someone else handle the job.

I admired his courage, his stamina and his sense of responsibility to his duties as a Senator.

He had a very impressive career. He was a fine soldier, a conscientious Congressman, a very fine Senator, and genuinely likable man. I will miss him very much.

I extend to his wonderful family, particularly to his wife, Helene, and his children, my sincere condolences.

TRIBUTE TO SENATOR SPARK M. MATSUNAGA

Mr. REID. Mr. President, I would like to ask the Members of this ancient and distinguished body to join me in a moment of reflection. We have lost one of our own, and it is fitting that in the midst of conducting the Nation's business we pause for recollection of a man who devoted so much of his life to this body and to that business.

There are things that I could say about SPARKY MATSUNAGA, about his dedication to people, and to peace, and to the future of this Earth, but they are things which have been said and will be reiterated by others in many places and at many times. We all knew his quiet wit, the decency with which he always dealt with everyone on all sides of the aisle, and the honor and pride in which he held his State, his Nation, and his heritage. We knew SPARKY and will remember.

But, Mr. President, there is something else about SPARKY MATSUNAGA that I want my honorable colleagues to remember also. Something about which, perhaps, others will not speak, and something I think he would want us all to remember. SPARKY MATSUNAGA was a victim of racial prejudice.

The Members of this body know, how could they not know, that in the 100th Congress, SPARKY MATSUNAGA was the driving force behind the successful battle to right the wrong which was done in the first years of our involvement in the Second World War to tens of thousands of loyal Americans of Japanese origin. Some, I think, voted for that bill but did not realize the true horror of what was done to those American citizens. It would be well for all of us to remember.

Let us remember that people were driven from their homes because of the color of their skins, and the shape of their eyes. Let us remember that we were also at war with Germany and Italy, and that Americans descended from immigrants from those nations were not interned or forcibly deported. Let us remember that the distinction was based on racial bias and stereotyping practiced by the U.S. Government.

Let us remember SPARKY would want us to.

My friends, there will be tributes enough to SPARKY MATSUNAGA, by others. Please join me instead in resolving that we may all profit by what happened to that great American, and to others like him including DAN INOUYE; that we may profit by their example of fortitude, and honor, and decency and patriotism; and that most of all we may profit by learning the lesson SPARKY MATSUNAGA taught us all about turning the other cheek. We are brothers and sisters in this land, and the devotion to freedom which draws us together must be and always is stronger than any hatred or bigotry which threatens to divide us.

There is no better or more fitting tribute I believe, to that fine man who we will all miss on this floor every day.

SENATOR SPARK MATSUNAGA

Mr. ROTH. Mr. President, it is never easy coming to the floor on these occasions, to honor a distinguished colleague who has passed away. Senator MATSUNAGA was a man who brought honor to this Chamber and served the people of Hawaii both wisely and well.

I had the opportunity to serve with SPARKY both in the House of Representatives as well as on the Senate Finance Committee. And through the years I have been impressed by his fairness and straightforward manner. He fought hard for what he believed in and was an eloquent voice for the concerns of his constituents.

But above all, Senator MATSUNAGA's life was marked by service. Like so many other great men of Congress, he began his career as a public servant in the school systems. There, in the forties, as a young public school teacher, he influenced countless lives before going off to serve in the Army during World War II.

With all of my distinguished colleagues, I will mourn his passing. He will be remembered fondly, as a man of consequence and quiet determination, not because of his stature or because he was given to daring feats, but because of his honor—because in this tempting and tumultuous world of politics he could be relied upon. He was honest and trustworthy, and when he said he would do a thing—he did it.

And now he has returned with honor.

IN MEMORY OF SENATOR SPARK MATSUNAGA

Mr. WALLOP. Mr. President, words are inadequate to express my feelings at the loss of my friend and colleague, Senator SPARK MATSUNAGA. I had the great pleasure to serve with SPARKY on both the Finance Committee and on the Labor and Human Resources Committee. His fierce determination and pride for his home State of Hawaii made him a formidable legislator who knew well the subtle art of compromise. SPARKY's quiet pursuit of legislative interests was effective—we all recall his work on behalf of the Peace Institute and the sugar industry. His hardworking nature, sharp intellect, and devotion to public service commanded the respect of his colleagues. He will be deeply missed, and I will be among those who miss him most.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

AN ELOQUENT GENTLEMAN AND SINCERE SPOKESMAN

Mr. MURKOWSKI. Mr. President, I rise on behalf of our good and dear departed friend, Senator MATSUNAGA. I had the opportunity to work with Senator MATSUNAGA as chairman and now ranking member of the Veterans' Affairs Committee.

We worked on many matters. He was an eloquent gentleman, a sincere spokesman for veterans, and of course, served with such distinction in World War II.

Our affinity, of course, was not only on veterans but other issues, being both maritime States. I was proud to join him in pushing for the U.S. portion of the SARSAT-COSPAS system as an international satellite-based search and rescue system, which has no equal. It has been responsible for saving many lives and preventing many maritime accidents from becoming maritime disasters.

SPARK MATSUNAGA was the Senate's most dedicated proponent of completing the U.S. ground-station network for receiving emergency signals for vessels in trouble.

I also worked closely with him on many of the most important priorities which he had, including the Japanese-Americans claims legislation on the treatment of Japanese-Americans during World War II, which involved an issue in my State, and that was the treatment of the Aleuts, those residents, American citizens from the Aleutian Islands, who were removed from their communities during the war. They lost their possessions and basically were dispossessed.

I remember as a small child in Ketchikan a camp out several miles from town in the area called Ward Cove. Many were living in despicable conditions and Quonset-type construction. There was a large evidence of tuberculosis. Others were living in abandoned canneries, mining camps—taken from their homes.

I recall going to school and making friends with the Ohashis and various others, and fine Americans that were absolutely bewildered by this treatment.

I think Senator MATSUNAGA's effort in this regard to right these wrongs is something we are all very proud to be associated with.

I think the question of the Japanese-Aleut claims legislation points to the closeness that Alaskans felt and continue to feel with our neighbors in Hawaii and, of course, between my senior Senator, Senator STEVENS, who has enjoyed a long and close relationship with the late Senator MATSUNAGA.

On behalf of all Alaskans, it is with a great deal of sympathy and compassion that we extend our condolences to Mrs. Matsunaga and their five children, and say it has indeed been a privilege to work and serve with such an extraordinary American.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

SPARK MATSUNAGA

Mr. PACKWOOD. Mr. President, I wish to call something to memory about SPARK MATSUNAGA that I have not seen in any of the obituaries that have been printed so far. This happened in 1985 or 1986 in the Finance Committee upon which Senator MATSUNAGA served.

At that time, President Reagan was interested in initiating talks with the Canadians on the Canadian Free-Trade Agreement, but to do so it required a majority vote to go ahead with talks of the Ways and Means Committee and the Finance Committee. The Ways and Means Committee, by a large margin, voted for the talks.

This was at a time when America was really in the doldrums about its ability to trade, immense trade deficits. We have not yet started to see the fall in the trade deficit that we have seen in the last 2, 3 years. There was great irritation about export barriers overseas to our exports, a general frustration with the issue of trade, and in a surprising vote, the committee voted 10 to 10, which would have prevented the President from going ahead with his negotiations with Canada on the free-trade agreement. SPARKY was 1 of the 10 that voted to not go ahead.

President Reagan had the entire committee down to the White House and pleaded with us to let him simply go ahead with the negotiations. To his credit SPARKY changed his vote and said he would reserve his judgment on the Canadian Free-Trade Agreement when it was done but based on the plea of President Reagan he would change his vote to allow the negotiation to go ahead. It took a great deal of courage to let him do that. None of the other 10 to prohibit the negotia-

tion changed. He had to break from all of those.

Of course, the negotiation went ahead. The agreement has been signed. Canada is far and away our biggest trade partner. We have more trade with the province of Ontario than we do with Japan, and the agreement will be of extraordinary significance to the world.

Already there is talk of extending to Mexico in a North America free-trade agreement. These negotiations never would have started. We would not have taken the step down the road toward this extraordinary agreement had SPARK MATSUNAGA not had the courage to change his vote when he realized that the initial vote had been wrong and that the interests of the country were served by changing.

I think it is a test that many of the rest of us could observe when on occasion we may have set our feet in concrete only to discover we set them early and wrong. It was a courageous act and I have admired him for it ever since. Indeed Canada and the United States and the world are in his debt for that act of courage.

I thank the Chair.

SPARK MATSUNAGA, A STEADY EXAMPLE OF STATESMANSHIP

Mrs. KASSEBAUM. Mr. President, I want to join with others here today in paying tribute to SPARK MATSUNAGA, who served the people of Hawaii with great distinction. In his years here, he also served the Senate by his calm, quiet, steady example of statesmanship. He was a good friend, a valued colleague, and a man all of us will miss.

Like many others, I remember SPARK best as a tireless champion for the creation of a peace institute, where the skills of mediation, reconciliation, and compromise could be taught so that we could resolve conflict rather than sharpen it.

SPARK's tactics and skill in achieving his goal were the mark of the man. His persistent prodding, his thoughtful questions, and his straightforward, common-sense remarks caused me and many others to enlist in the cause.

SPARK was a man who believed that reconciliation was more important than confrontation, that friendship should moderate partisanship, that reason should balance appeals to emotion. he not only believed in these high ideals, he lived by them. In doing so, he assured that his own life and his long, productive career of public service would always stand as his most eloquent and lasting tribute.

A GREAT PUBLIC SERVANT: SPARK MATSUNAGA

Mr. FORD. Mr. President, this past weekend the U.S. Senate—and indeed our Nation—lost a good friend, SPARK MATSUNAGA. I know that I speak for all my colleagues when I say that we were all extremely blessed to have had the unique opportunity to serve in the U.S. Senate with such a great public servant.

Much has been said today about SPARK—the kindness he bestowed on everyone he knew, the unfailing service he provided to his constituents in Hawaii, the daily lunches with constituents in the Senate dining room, his efforts on behalf of Japanese-Americans, his courage in defense of our country, and his commitment to a more peaceful world. The message filling this Chamber today is that SPARK MATSUNAGA was a man who dedicated his life to an enduring dream of a better world for his fellow man.

Mr. President, SPARK MATSUNAGA was a man who never met a stranger. He was a man you could count on to have a warm smile and a kind word every time you saw him. He was a man of courage, compassion, vision, and great qualities of leadership. He was a man who brought a great spirit of humanity to the task of government and taught us all to be better public servants.

Yes, Mr. President, we have lost a good and true friend. He touched us all, and we are better for having known him. I want to join with my colleagues in expressing my sympathies to the Matsunaga family. He has left his mark on me and this entire body, and I know he will be sorely missed.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming [Mr. SIMPSON] is recognized.

TRIBUTE TO SENATOR SPARK MATSUNAGA

Mr. SIMPSON. Mr. President, I thank the Chair.

I just wanted to take a few moments at this select time to extend my deepest sympathy to Helene Matsunaga, and to the children of these two fine people, Karen, Keene, Diane, Merle, and Matthew, and all their loved ones on the passing of our dear friend SPARKY MATSUNAGA.

As the delegation returns from the funeral services in Hawaii, it is well for us to take a moment in these busy lives we have chosen for ourselves to just note that his life was a celebration of humanity which is a shining example to us all.

I got to know him very well. He was a very kind and gentle man. We served together on the Veterans' Affairs Committee, and he always knew what he wanted to accomplish. Usually he persevered. He was a most tenacious man as to the things that he wanted to accomplish. And he accomplished much. He was a strong person. He was a person who was very helpful to me.

His wife, Helene, was of great assistance to my wife, Ann, when we came here in 1979. Helene served and assisted as Ann's "Senator mother." I believe that is the term that they used in those days for the experienced "Senate spouse who assisted the spouse that was new to this world of the Senate. Helene helped smooth the path for Ann. She introduced her to new friends and in general, provided invaluable assistance to my wife. So that was another special aspect of their influence upon us.

He and I gravitated toward each other because of the fact we both previously served in the State legislature as majority leaders. I had been the majority leader of the Wyoming House of Representatives. He has served as the majority leader of the Territorial Legislature of Hawaii before statehood. We used to get a great deal of satisfaction and pleasure talking about the old days when we had "raw power" at our fingertips. We used to chuckle about that.

He has this one remarkable penchant. I would say "When do you sleep?" He said, "Well, Henry J. Kaiser give me some advice when I was a young man—that sleep is really not a necessity in life." I said, "Well, that is a different philosophy than I have had, SPARKY." He said, "Well, watch me do it." He would rest 3 or 4 hours a night, and then he would be up early on that phone. He would be planning his legislative day, his legislative activities, his visits with constituents, and his meals with them in the Senator's dining room. How he loved that.

He had a great phrase when he would introduce you to all of his friends. He would say, "There are really two very great U.S. Senators in this place: my friend here—and then a pause—and myself." And then that big grin would come.

He was a charmer. He was very dear. He will be very missed. Those who have spoken have already talked about his courage, the struggles he had personally, the struggles after he was wounded twice serving his country. He never forgot the suffering that his kinsmen endured in that war. In his gentle, tenacious, and determined manner he engineered the passage of one of his lifetime goals—the offfical apology of the Government of the United States to its fellow American citizens. Not to aliens or other persons—it was to American citizen-internees, and a provision for their compensation. He did that all by himself.

I watched him work with fascination because I had grown up 13 miles away from the Heart Mountain Relocation Center. When I was 12 years old that center suddenly became a part of my life in Park County, WY.

He was hard task master. He expected a lot out of himself and he expected a lot out of others.

He was equally effective in establishing another dream of his, the Peace Institute. We all know how he gathered the cosponsors for that. Whether it was in the subway or the Senate dining room, he would say, "I want you on this. I want you right here as a cosponsor of this." Finally, after about seven requests, you would say, "OK, SPARK, I am ready. I am ready to go." He would say, "Well, when I get ready, you are going to be proud of what I have accomplished." We always were.

He was a vigorous advocate of Hawaii. He loved his State. He doggedly pursued those policies that were important to his State over a wide range of areas including agriculture, trade, education, health, veterans' issues—to benefit his constituents.

Every day we learn lessons in the Senate, so-called tricks of the trade, from one another that assist us in this unique craft which is called legislating. Over time these experiences enhance our effectiveness as legislators. What I learned from SPARKY MATSUNAGA was persistence, absolute persistence, and tenacity. But it also went much further and was much more significant. He enriched my life, and the lives of all who came in contact with his civility, his compassion, his love of art, his love of poetry, and most importantly the love he showed for his fellow man and his abiding faith in the inherent good in all of us.

He seemed to rise above the pettiness, the small things that we sometimes do, and the jealousies which are sadly and too often descriptive of some of our work here. He was an inspiration to all of us. It is a tough place to work. SPARKY made it seem a little more human, a little more compassionate, and that was his magic. It was very moving to me in those last few weeks as suddenly the roll would be called and the clerk would call "Senator MATSUNAGA." He would be right there; that door would open, and he would cast his vote, and then leave in his wheelchair and on into the elevator. Many of us would try to catch him and wish him well before he was spirited away from us. Now he is permanently spirited away from us.

This is a little better place because of him. We will remember that great smile you could see a mile. He will be sorely missed.

Thank you God, for SPARKY. He enlivened and enriched our lives.

Thank you.

IN MEMORY OF SENATOR SPARKY MATSUNAGA

Mr. CRANSTON. Mr. President, we join today in tribute to the memory of our dear friend, SPARK MATSUNAGA.

I know personally that SPARKY's death means a great loss to the Senate. As majority whip and chairman of the Veterans' Affairs Committee, I worked closely with SPARKY in his years as chief deputy whip and as the ranking Democrat on the Veterans' Committee.

From the very beginning of his service on the Veterans' Affairs Committee upon entering the Senate in 1977, SPARK was always a very active and valued member. Over the years, I benefited greatly from his wise counsel and support on behalf of our veterans and particularly the veterans of Hawaii, whom he served with such devotion. I'm confident that his personal efforts will have made the difference in achieving a VA medical center in his beloved Aloha State. Although our committee has always been reluctant to legislate names for VA facilities, I feel confident that we would overwhelmingly support the naming of a new VA medical center in Hawaii after SPARKY, and I certainly intend to urge Secretary of Veterans Affairs Ed Derwinski to do just that.

SPARK MATSUNAGA made a difference in many other areas as well:

SPARK brought to the Senate a deep compassion and understanding of the rights and needs of minorities. From our work together on the Japanese redress bill, I know that it was SPARK's great leadership which helped to pass the historic law which recognized and redressed the injustices and violations of civil liberties against Japanese-Americans during World War II.

SPARK was a man of peace. It was his continuous support and faith in our vision of the future that eventually led to establishment of the U.S. Peace Institute in 1984.

In the years he served as chief deputy whip, I had a special opportunity to get to know even better the man behind the causes: How he managed to achieve his goals with grace, warmth, and wit; how many lives he touched with his determination and his dreams.

He will be sorely missed by us all.

SPARK M. MATSUNAGA

Mr. KENNEDY. Mr. President, I join in honoring the memory of our friend and colleague, Senator SPARK M. MATSUNAGA. His death on Sunday leaves his State and country with a loss all of us mourn together. His dedication to education, civil rights, and the peaceful resolution of international conflicts earned him the respect of Americans in every State and in countless nations across the Earth.

SPARK MATSUNAGA was born on the island of Kauai, HI, in the year 1916. He graduated with honors from the University of Hawaii with a degree in education in 1941. With the outbreak of World War II, he joined the Army's all-Nisei 100th Battalion of the 442d Regimental Combat Team. The regiment served in Italy and became one of the most heavily decorated and illustrious units in the Army's history. Captain MATSUNAGA was decorated with the Bronze Star and two Purple Hearts for his bravery and valor while fighting on the Italian Peninsula.

Educated as a lawyer at Harvard, he returned to Hawaii, first as an assistant prosecutor in Honolulu and then as an attorney in private practice. But he could not resist the call of public service. He entered politics in 1954, as a representative in the Hawaii Territorial House, and rose to the position of majority leader. He served in the House of Representatives for 14 years, and he was with us in the Senate for 14 additional years. Now, he has been taken from us, but we shall never forget his friendship, his leadership, and his statesmanship, and the special blend of courage, humor, and grace in his battle against the illness that finally took his life.

Between the demands he faced as Senator, he took time to host his visiting constituents from Hawaii. He always treated them to lunch in the Senate dining room after a personal tour of the Senate Chamber. He endeared himself to colleagues and constituents alike by always taking time from his busy schedule to show his special brand of personal consideration for others. He truly believed that government should be accessible to the people, and he lived up to his belief.

We served together for many years on the Labor Committee, and no one served there with greater skill or dedication.

He was a tenacious fighter for justice. Throughout his career, he worked with extraordinary commitment to redress the grievances of the loyal Japanese-American citizens who were unjustly interned by the United States Government in World War II because of doubts about their loyalty. His long battle for justice culminated in the Civil Liberties Act of 1988, which proved long-overdue assistance to the surviving internees and their families and has helped to close one of the darkest chapters in our history. Enactment of this measure was one of Senator MATSUNAGA's greatest achievements, and it could not have been accomplished without his brilliant leadership and dedication over a period of many years.

On the Labor Committee, Senator MATSUNAGA has been an effective advocate for programs in all areas of the committee's jurisdiction. In this Congress, he was instrumental in securing action on the National and Community Service Act, which passed the Senate on March 1, and will provide the country with a new vehicle to

foster pride and a sense of service in our Nation. Those were the qualities that our colleague lived by and that was the hallmark of his career, and now those ideals will be carried on in future generations because of his efforts.

Most of all, we honor and remember his commitment to peace on Earth. George Washington said, "My first wish is to see this plague of mankind, war, banished from the earth." This was also the life-long goal of SPARK MATSUNAGA. A quarter century ago, he introduced legislation calling for a U.S. Institute of Peace. He believed, as he often said, that "peacemaking is as much an art to be learned as war." Because of his insight and leadership, the U.S. Institute of Peace became a reality in 1984. Today, it is supporting research on all aspects of the peaceful resolution of conflicts. We will always remember SPARK MATSUNAGA as he would want to be remembered, as a great peacemaker.

TRIBUTE TO SENATOR SPARK M. MATSUNAGA

Mr. DASCHLE. Mr. President, I have lost a dear friend and colleague; America has lost a great legislator; and the world has lost a good man. In this time of grief, permit me to take a few minutes to pay my respects to this kind, gentle man and dedicated, effective public servant, SPARK M. MATSUNAGA.

For 26 years, SPARKY, as he was affectionately known, served the people of the beautiful State of Hawaii and the people of the United States in the U.S. Congress. Serving on the Senate Finance Committee with SPARKY, I came to appreciate and be inspired by his warm disposition, his gracious, generous spirit, his intellect, and his dedication to the causes he believed in and promoted.

His was a life tempered by the ugly side of human nature. As a young man he personally experienced war. A World War II veteran himself, he saw his relatives and loved ones wrongly incarcerated because of that war.

And his life was one tempered by the practical realities of the world in which he worked. One does not serve in the U.S. House of Representatives for 14 years, and in the U.S. Senate for 12 years without mastering the art of the possible.

But his was also a life of optimism and idealism. It was a public life filled with noble causes and crusades, including promoting an institute to study peace instead of war. Of making sure that this great Nation was great enough to acknowledge the harm done to many innocent Americans of Japanese descent during the horrors of World War II. Long before the cold war began its dramatic thaw, SPARKY was calling for American and Soviet cooperation in the exploration of the heavens. And typically, it was this gentle, poetry-writing lawmaker who called for the creation of a national poet laureate.

Foremost, I will remember SPARKY as one of those rare and wonderful persons who not only looked for the best in people, but brought it out of them. You only had to be around him for a few minutes before you were touched and moved by his warm smile, his chuckle, his innate goodness and decency.

The Senate dining room will never be the same without him. As all of us are aware, his affection for the Senate was exceeded only by his love for the people he served—and it was a rare afternoon that you walked into the Senators' dining room without finding him at a table with his constituents—his neighbors and friends. It has been said that the big, round table in the center of the Senators' dining room has served more than half of the people of the State of Hawaii, and no doubt it has.

We will miss SPARKY immensely, and in this spirit I express my condolences to his family, his wife, Helene Hatsumi Tokunaga, and their five children. But I also want to thank them for sharing him with us. The U.S. Senate is richer, and the United States is a better place, because they did.

AMERICA LOST A GREAT LEADER: SENATOR SPARK MATSUNAGA

Mr. GRASSLEY. Mr. President, with the passing of Senator SPARK MATSUNAGA, the Senate lost a close friend, Hawaii lost a strong voice and advocate, and America lost a great leader.

I will always look fondly upon my experiences working with Senator MATSUNAGA during my first 6 years in the Senate as I served with him on the Senate Finance Committee. Senator MATSUNAGA was a selfless man, always concerned about others. He was a great source of guidance and assistance to me as I adjusted to my new role as a U.S. Senator.

Our cars used to be parked side by side in the Senate parking lot, which afforded us many opportunities to visit as we left for the evening. With the pressures of the day behind us, it was a real pleasure to spend some time together. Senator MATSUNAGA was a friendly man, always welcoming a conversation. He was a breath of fresh air; a very personable man in what too often is an impersonal Congress.

Mr. President, I will miss SPARK MATSUNAGA, as I know all our colleagues will. I pray for God's comforting hand to touch SPARK's wife, Helene, and their five children.

SPARK MATSUNAGA

Mr. CHAFEE. Mr. President, with the passing of SPARK MATSUNAGA, every Member of the Senate has lost a dear friend. I doubt if there was in this body a more popular Member than he. SPARKY was an extremely kind and courteous individual, who fought vigorously for those measures that he believed in. However, never did he let a grudge or animosity interfere with his relationships with those who opposed him.

The wide margins by which SPARKY was consistently reelected in his home State of Hawaii bore testimony to the tremendous popularity that he enjoyed there.

Here in the Senate, we recall many of the issues he strongly supported, usually with considerable success. For example, the reparation legislation to compensate those Japanese-Americans who were so cruely interned during World War II. This legislation passed primarily because of SPARK MATSUNAGA's tenacious and diligent efforts.

Mr. President, when my father greatly admired the character and good humor of an individual, he would say that that individual was a "lovely person." SPARK MATSUNAGA was indeed a lovely person, and we shall greatly miss him.

THE PASSING OF SENATOR SPARK M. MATSUNAGA

Mr. PELL. Mr. President, I join my colleagues in the Senate in expressing my grief at the passing of Senator SPARK M. MATSUNAGA of Hawaii.

SPARKY MATSUNAGA was a friend and an ally who worked closely with me since 1983 as a member of the Senate Subcommittee on Education, Arts and Humanities. On that committee he was a tireless champion of education at all levels and for all individuals. He was an unsurpassed advocate of elementary and secondary education, vocational education, postsecondary education, and believed strongly that education in all its forms should be made available to all including those who labored under economic or physical disadvantages.

SPARKY MATSUNAGA was deeply devoted to preservation of world peace and he believed strongly that education had an important role to play in that effort also. It was his idea that just as we have military service academies and war colleges to train experts in how to fight wars, we should have an educational institution providing training in ways to preserve and promote peace and resolve conflicts without war.

His gentle, patient but persistent advocacy of this idea resulted in the passage by the Congress in 1984 of legislation establishing the National Insti-

tute for Peace and Conflict Resolution.

This institute was so close to SPARKY's heart that I believe no more fitting tribute could be made to his memory than to name that institute after him, and I would hope that we would give that idea very serious consideration.

SPARKY MATSUNAGA also believed deeply in the contributions that the arts and humanities make to the enrichment of lives, both personally and nationally. It was to give greater recognition to the creative art of poetry that he proposed the establishment in the Library of Congress of the post of Poet Laureate Consultant in Poetry, and that proposal was enacted as part of the reauthorization of the National Endowment on the Arts in 1985.

Mr. President, SPARKY MATSUNAGA was a very good man, and a very good friend. I will miss him greatly.

IN MEMORY OF SENATOR SPARK MATSUNAGA

Ms. MIKULSKI. Mr. President, I will remember Senator SPARK M. MATSUNAGA not only as a friend and a colleague, but as one whose success and position never carried him away from the people he represented.

Like so many Americans, SPARK MATSUNAGA began life among immigrants, with the Japanese sugarcane workers on the Island of Kauai, Hawaii.

During the Second World War, he served in the Army's famous all-Nisei 100th Battalion of the 442d Regimental Combat team. Wounded twice and decorated three times, he returned to Hawaii determined to bring Japanese-Americans into the political process, and worked tirelessly to empower postwar Hawaii's minority and immigrant communities.

Their work changed the shape of Hawaii's political landscape, bringing into the process thousands who had been ignored or forgotten.

From the Hawaii's territorial House of Representatives he fought for the ultimate empowerment—full citizenship and statehood for the people of Hawaii.

In Washington, SPARKY commanded universal admiration, both as a legislator and as an individual. Indeed, the passage of his historic legislation compensating Japanese-Americans for their shameful treatment during the Second World War, is as much tribute to his personal abilities and the respect he commanded, as to the justice of his cause.

As important as this legislation was, equally important was Senator MATSUNAGA's fight to repeal a frightening McCarthy-era law which might have filled the detention camps once again. Under this law, the Attorney General had authority to detain, without arrest, American citizens and lawful residents in the very same camps in which Japanese-Americans had been detained—and for as little reason.

We in the Senate, and all Americans, owe Senator MATSUNAGA a debt of gratitude for these courageous actions—in fact, for a career spent fighting for the poor, the powerless and the unpopular.

I suspect SPARKY drew more pleasure from the great majority of Hawaiians who returned him to Washington every 2 or 6 years, than from the esteem of his colleagues.

His heart was always with his people.

A poet and Senator, a war veteran who founded a National Peace Academy, and the embodiment of Hawaii's aloha spirit despite 20 years in Washington, Senator MATSUNAGA's loss saddens us all.

SPARK MATSUNAGA

Mr. DODD. Mr. President, on Sunday, we lost a dear friend and close colleague in SPARK MATSUNAGA.

Yesterday, I had the honor and the privilege to travel to Hawaii with the majority leader, Senator GEORGE MITCHELL; the chairman of the Appropriations Committee and President pro tempore of the Senate, Senator ROBERT BYRD; Senator MARK HATFIELD; Senator STEVENS; Senator DECONCINI and his wife Susan; Senator BINGAMAN; Senator DAN INOUYE; Liz Moynihan, the wife of our distinguished colleague from New York; several Members of the House of Representatives; and numerous members of the Senate staff, including the personal staff of Senator MATSUNAGA, to pay our final respects and a farewell to one of our own.

I know, Mr. President, that all of our colleagues in this body would have wanted to be there to say goodbye to a dear friend. The Central Union Church, Mr. President, in Honolulu, was filled to capacity with friends and staff, veterans, officials, family, people who had known SPARKY well for many, many years, and, just as significantly, Mr. President, hundreds of people who did not know SPARKY personally at all but who, nonetheless, were there because they, too, had lost a dear friend. It was a moving ceremony, Mr. President, with poignant readings of Scriptures and eloquent eulogies by a number of our colleagues, including Senator BYRD, Senator MITCHELL, Senator HATFIELD, and, of course, his own colleague, Senator DAN INOUYE, who was a part of the team of MATSUNAGA and INOUYE. The ceremony was punctuated by beautiful and melodic music of SPARKY's beloved Hawaii. It was truly a wonderful ceremony on a clear beautiful day in that glorious island of Hawaii.

Much has been said, and properly so, of SPARKY's numerous accomplishments as a soldier, scholar, poet, as a statesman, as a father, husband and friend. SPARKY has left us with warm memories and a challenging legacy. But for us, we fortunate few, who have been chosen by our respective States to be Senators of the United States there is a special loss when one of us departs, and particularly when the one who leaves us embodies the essence of this institution.

SPARK MATSUNAGA was a Senate man. He loved this body. He was deeply proud to be a U.S. Senator. As importantly, we loved SPARKY. And we were proud to call him colleague.

One of the reasons why SPARKY evoked such unanimous sentiments of affection was, I suspect, our individual and collective regret that too often we, as Senators and as a Senate, were not more like him. Too often we speak too loudly, we lack patience, we do not listen carefully to one another, we are too critical, and we are too harsh and far too often too brittle.

There are many ways, of course, to memorialize a fallen colleague. I would suggest that we can pay no higher tribute to SPARK MATSUNAGA as Senators and as a Senate than to be more like him, to listen to one another more carefully, to be more patient with one another, to be more understanding, to work for the common good, and maybe most important of all to be better friends to one another.

In all the years that I served with SPARK MATSUNAGA, 10 years here in the Senate, 2 or 3 years in the House of Representatives, Mr. President, I never ever heard SPARK MATSUNAGA ever say an unkind word about another human being, colleague, official, or anyone. That is not to say he agreed with everyone or did not have his opinions of other people. But he followed that admonition that we have heard over and over again from the time we were children—"If you cannot say something kind about someone, do not say anything at all."

SPARK MATSUNAGA carried that advice through his entire life.

So, Mr. President, in a way I would like to see us pay tribute to SPARK by carrying those attributes in the conduct of our business here, to be more patient with one another, to listen to one another more carefully, to try to work for the common good, to be better Senators, better human beings, and better citizens of this country. Certainly that is how he conducted his affairs. That is how he served in this body. That is how he treated every one of us, without exception, regardless of party, or ideology of a debate or an issue before this body. He treated everyone as a dear friend. And this institution has lost one of its finest Members.

I hope that in the weeks and months ahead as we debate some of the great

issues of the day, we would not just let the moments of tributes and eulogies pass by without reflecting on this individual, and the attributes and the qualities he brought to public service. He serves as a sound reminder to all of us of how much better we can be individually as Senators and how much better this institution can be as the Senate of the United States.

SPARK MATSUNAGA had an unequaled zeal for fairness. A measure of that commitment was his ceaseless and successful efforts to pass legislation correcting one of this Nation's greatest injustices—the internment of Japanese-Americans during World War II.

For nearly a decade SPARK fought for Americans whose detention violated our Nation's founding principles, who were rounded up solely because of their parentage. He battled those who would have preferred to forget the past. He roused the indifferent from their silence, and proved that the greatest patriotism lies in fighting to make the United States live up to its lofty mission.

It was not the financial reparations to surviving detainees which were so important to SPARK, but rather the apology. Our Government had erred grievously in distrusting its own citizenry. SPARK's goal was to see this travesty of our laws righted.

Few men could have spoken for the internees more eloquently or from a more invulnerable position. A Japanese-American himself, SPARK fought bravely in World War II, invading Italy as part of the all-Nisei 442d Regimental Command Team, the most highly decorated military unit since our Nation's founding. SPARK himself earned two Purple Hearts and a Bronze Star for his bravery.

The man who served with such fortitude in war knew the need for peace. For more than two decades SPARK worked tirelessly to found the U.S. Institute for Peace, an organization dedicated to eliminating the conditions which lead to strife.

It has been my good fortune to have been able to serve most of my time in the U.S. Congress with SPARK MATSUNAGA. SPARK was my "Big Brother" upon my arrival in the House of Representatives. As the Member designated to introduce freshmen to the House in 1974, SPARK taught me the ins and outs of Congress, allowing me to get my bearings quickly.

We worked closely in both the House and Senate, and in the Senate we served together on the Labor and Rules Committees. I have watched the quiet passion of this man who was both cheerful and determined, content and resolute. It is altogether fitting that SPARK was a writer of haiku, a poetry genre the peaceful beauty of which is found within its tightly restricted form.

Mr. President, the Senate as a body will miss SPARK MATSUNAGA, and I will miss him personally. I join my colleagues in expressing my sincere condolences to his wife, Helene, his children, grandchildren, friends, and staff.

TRIBUTE TO A RESPECTED FRIEND AND COLLEAGUE

Mr. SIMON. Mr. President, I join many of my colleagues in pausing a moment to offer a tribute to my friend and colleague, SPARK MATSUNAGA. I had the privilege of serving with SPARK in both the Senate and the House. My first term in the House turned out to be his last; he then moved to the Senate with the resounding support of his constituents.

Our paths continued to cross, however, in conferences and other joint activities. And, when I was elected to the Senate and joined the Labor and Human Resources Committee, SPARK was there to show me the ropes of "the other body."

SPARK felt deeply about a number of issues and, as we all know, when he took an issue on, he did not rest until that issue was settled. While still in the House SPARK was speaking out on behalf of Japanese-Americans interned during World War II. He never wavered, throughout the ensuing 10 years, in his belief that the U.S. Government had to own up to its role in this tragedy and repay those interned for some small part of their financial and emotional costs. And, once Congress approved legislation putting this program in place, SPARK continued to fight for the dollars that would make this program more than an empty promise. SPARK applied the same single-mindedness and fervor, along with our former colleague Jennings Randolph, to the establishment of a national peace academy. Once again SPARK took an idea that was initially viewed with great skepticism and turned it into a reality, never letting go until his goal was achieved. This tenacity was with him until the end, bringing him into the Senate daily to fulfill his responsibilities to the people of Hawaii.

I will treasure many memories of SPARK; one that is very special is our shared admiration for Hubert Humphrey. We each took much from our relationship with Hubert. I know that his relationship with Humphrey was a special one for SPARK and we continued to talk of him throughout the years.

Like Hubert, SPARK was guided in his legislative career by his commitment to the poor, the disabled, the old. As a member of the House Select Committee on Aging, SPARK's rising to the chairmanship of the Subcommittee on the Aging was not only natural, but a real plus for seniors in this country. SPARK was committed to ensuring that the support systems were in place to allow all seniors to live a dignified life.

We have lost a vital and courageous Member of this body and my heart goes out to his wife Helene and their children. His legacy is one that we and they will cherish.

FAREWELL TO OUR FRIEND, SPARK MATSUNAGA

Mr. HOLLINGS. Mr. President, the Senate mourns this week for the passing of one of its favorite sons, SPARK MATSUNAGA. SPARKY won election by 80 percent of the vote in his native Hawaii, but here in the Senate he would have won by 100 percent.

What we remember best about SPARK MATSUNAGA is his simple, deep humanity. We will never forget his determined and successful effort to create the U.S. Institute for Peace—a quixotic quest in the eyes of some, but no one doubted for an instant SPARK's abiding faith in reason and good will as powerful antidotes to conflict and violence. He learned about war the hard way, as an infantryman in World War II with the famed all-Nisei 100th Battalion of the 442d Regimental Combat Team. The young hero SPARK MATSUNAGA earned a Bronze Star and two Purple Hearts fighting on the invasion beaches in Italy. Likewise, history will note his nearly singlehanded success—after 9 years of tenacious advocacy—in gaining passage of a law redressing the injustices committed against Japanese-Americans whose patriotism was questioned and who were interned in camps during World War II.

SPARK MATSUNAGA was a good friend and a shining credit to this body. We will miss him.

THE PASTORE RULE

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia [Mr. BYRD] is recognized.

Mr. BYRD. Mr. President, has the Pastore rule run its course for the day?

The PRESIDING OFFICER. The Pastore rule is still in effect.

Mr. BYRD. I thank the Chair.

Mr. President, I ask unanimous consent to speak out of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR SPARK MATSUNAGA

Mr. BYRD. Mr. President, I join with the distinguished Senator from Connecticut [Mr. DODD] in suggesting that as we pay tribute to our fallen friend, SPARK MATSUNAGA, we attempt to emulate him. I suggest that we ought to emulate him in additional ways to those that have been suggest-

ed by the distinguished Senator from Connecticut.

In all of my time in serving with SPARK MATSUNAGA, I never heard him use God's name in vain. I never heard him tell an off-color joke. And, as Mr. DODD said, I, too, never heard SPARK MATSUNAGA speak ill of any man. We should be like SPARKY.

When I remember all
The friends so linked together,
I've seen around me fall
Like leaves on wintery weather,
I feel like one
Who treads alone
Some banquet hall deserted;
Whose lights are fled,
Whose garlands dead,
And all but he departed.

Now, I have seen another friend fall.

SPARKY fought a long and valiant battle against that grim enemy, death. All of us one day will succumb to that unrelenting and dreaded foe.

But, as Longfellow said, "There is no death! What seems so is transition," Socrates, Plato, Aristotle, Cicero, and other ancient Grecian and Roman philosophers by pure reason and logic concluded that there is a creating, directing, controlling omnipotent divine power; and that man's soul is immortal.

That concept is the basis of all religions, whether pagan, heathen, Mohammedan, Hebrew, or Christian. And it has been believed by all races of men, whether savage tribes, semicivilized, or civilized nations, and whether they believed in many Gods or in one God.

In the Bible we are told that God created man in his own image "of the dust of the ground and breathed into his nostrils the breath of life, and man became a living soul." The Bible does not say that man became a living person. It says man became a living soul.

The serpent that induced Eve to eat of the forbidden fruit of the tree of knowledge said "Ye shall not surely die."

Job asked the age-old question, "If a man die, shall he live again?" And then he answered his own question, as I paraphrase it: Oh, that my words were written and engraved with an iron pen and lead in the rock forever; for I know that my Redeemer liveth, and some day he shall stand upon the Earth.

The Apostle Paul said, "Death is swallowed up in victory." SPARKY can say with Paul, "O Death, where is thy sting? O, Grave, where is thy victory?" So, death is not the sunset; it is the morning. And the grave is not the end of life but the portal to eternal life. We can rejoice for SPARKY. Death is swallowed up in victory.

As we remember SPARKY, we remember him as a quiet, unassuming man, a man who was brave on the far-flung battlefields of his Nation, but who was persistent in the pursuit of peace. As a public official, he was modest in his manner and bearing. He envied no one, but he was ambitious in the interest of justice and humanity.

He worked hard in the service of his people, and the people of Hawaii had in SPARKY MATSUNAGA an ever-faithful servant. We are fortunate here to have served with Hawaii's two fine Senators, DANIEL INOUYE and SPARKY MATSUNAGA, both highly dedicated to their State. Now, SPARKY is gone.

He was my friend. The Bible says, "He that hath friends must show himself friendly." SPARKY showed himself friendly. He wore a perennial smile. Even when he was rolled into the Chamber in a wheelchair to cast his vote in those last days of his life here on Earth, he wore that constant smile. When I think of SPARKY, I shall always think of dedication, loyalty, and integrity. His word was his bond. He was a good man.

I saw the Sun sink in the golden West.
No angry cloud obscured its latest ray.
Around the couch on which it sank to rest,
Shone all the splendor of a summer day.
And long, though lost to view, that radiant light,
Reflected from the sky, delayed the night.
Thus, when a good man's life comes to a close,
No doubts arise to cloud his soul with gloom,
But faith triumphant on each feature glows,
And benedictions fill the sacred room.
And long do men his virtues wide proclaim,
While generations rise to bless his name.

I will never forget this good man. I once said that when SPARKY goes to the hospital, he sends me flowers. He sent us all flowers from his native State and from time to time a pineapple, some macadamia nuts, always seeking to bring a little cheer into the hearts and the lives of others.

My wife, Erma, and I join in extending our sympathies and our condolences to Helene and her children, and to SPARKY'S wonderful staff, all of whom were so faithful to the end, all of whom tried to cheer us up as we called to ask about SPARKY. And we thank Helene and her family for giving to us for these several years this good man.

He was the chief deputy whip on this side of the aisle all during the years that I was majority leader, from 1977 until 1981, and when I was minority leader from 1981 to 1987, and when I was again majority leader in the 100th Congress. He showed the same dedication—always the same fidelity, always forthright, honest, and conscientious.

He enriched the lives of all who knew him for "his life was gentle; the elements so mixed in him that nature might stand up and say to all the world, 'This was a man.'"

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

SPARK MATSUNAGA

Mr. HEINZ. Mr. President, I want to take a moment of the Senate's time to join with many of my colleagues who earlier today have remarked on the great friendship and legacy that we both enjoyed and have been left by our departed colleague, SPARK MATSUNAGA. He has been called a very gentle friend by colleague after colleague. And that is as good a description of as special a person as any of us have had a chance to serve with.

He is indeed an old friend of mine. I served with SPARK in the House for 5 years. We came to the Senate together in 1976. We have all been in this body when we have seen people in the heat of debate or in the heat of argument in the cloakroom say things that they might regret on another occasion. Never so with SPARK MATSUNAGA.

He was always soft-spoken. He was always very thoughtful. We all know how his hospitality for his constituents down at that large table in the Member's dining room was legendary.

He was and will always be considered a cherished colleague. Our hearts go out to his wife Helene and his five children, by whom he is survived. We share their grief. We share their loss. Even if we must necessarily share it less than they do, we share it enormously. It is at times like these that we recognize how clumsy a tool the English language or any language is to express what we feel.

I was privileged to serve on the Senate Committee on Finance with SPARK. We saw him at work on two measures in particular, first his Peace Institute, which I think he worked on even longer than his bill to assist the children of Americans of Japanese background who were interned during World War II. Persistence was his hallmark—gentle persistence, calm, dignified, lovely.

When he finally approached me to support and cosponsor his legislation to apologize and to make a partial restitution for the way we treated Americans who were of Japanese ancestry, I thought back to my upbringing in the years 1945 through 1949 in San Francisco, where my family had ended up toward the end of World War II, and I remember very well what we did to those Americans. We interned them. We interned them in less than human conditions. There came to work in our family a very lovely couple who had been very sadly treated, Rose and George Honamaru, and as I look back on it now, I suppose that it was very unfortunate for us and for them that they had been able to find work. Indeed, they not only found work, but within 2 or 3 years they were earning more because they did other work. They moonlit making more than my stepfather, who was at that point a captain in the U.S. Navy.

SPARK had a great sense of fair play and justice and he would not let us, 40 years later, rightfully not let us 40 years later forget a great wrong. He reminded us that it is more important to be honest than any other quality. He kept our conscience, and it was due to that persistence and kindness and conviction that I think we all owe him a great debt and a great deal to remember him by.

So, I remember a line from Shakespeare. I looked it up to be sure I got it right. And SPARKY, who was something of an amateur poet, might appreciate it, might be a little jealous of it. After all, Shakespeare was pretty good.

His life was gentle, and the elements so mix'd in him that nature might stand up and say to all the world, "this was a man."

Mr. President, that is SPARK MATSUNAGA. So we all remember him a great and wonderful and kind and gentle man.

I yield the floor.

GLOBAL WARMING

Mr. WIRTH. Mr. President, I shall address the issue of the last 2 days of activity in the White House related to global warming.

We are moving 3 days away from Earth Day, a time in which millions of Americans, hundreds of millions of people around the world, are going to be reflecting a sense of urgency about the impact that man is having on the globe. Man is changing this globe through rapidly increased populations, through the activity of burning fossil fuels, destruction of the rain forests, and maybe, most inextricably, in the way we are putting up in the atmosphere a vast number of so-called trace gases causing a change in the so-called atmospheric greenhouse. The world is getting warmer.

The President, during his campaign in 1988, said we would look forward to seeing the White House effect on the greenhouse effect. Since then what we have really heard, and it has been said again and again and again, is a whitewash, and we most recently saw an almost embarrassing attempt by this Government, which I represent, which all of our colleagues here represent, to whitewash this issue to our partners around the world—an embarrassing attempt made.

The White House put out for its delegates a paper—this is from this morning's Washington Post—it said:

It is not beneficial to discuss whether there is or is not warming, or how much or how little warming. In the eyes of the public we will lose this debate.

PR documents are being put out to whitewash this exordinarily important issue, and the administration refuses to look at the scientific evidence.

This administration, Mr. President, is looking at evidence created by people who are absolutely out of the main stream of what is going on. For example, the two most prominent reports cited by this administration, the Marshall Institute report and an unpublished report put out by Dr. Richard Lindzen, of MIT, have not been peer reviewed by colleagues, neither have gone through the legitimate scientific process that good scientific work requires in this country. It goes without saying that neither of these studies is accepted by the scientific community, and it is upon those that the President of the United States and the administration is getting up saying we do not have to act; we just have to do more research.

I wish to put in the RECORD, if I might, at this point an analysis or discussion of the Marshall report done in Science magazine and a discussion of the Lindzen report from the same publication. I ask unanimous consent to print those in the RECORD, and then a very careful analysis of the Marshall report done by the National Center for Atmosphere Research and a distinguished senior scientist, Dr. Stephen Schneider, who goes through in great detail, looks at the Marshall report and blows holes into the Marshall report point by point. Finally, I wish to put in the RECORD at this point an extensive discussion on this issue, written by Dr. Stephen Schneider, describing the overall debate and what is going on.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 19, 1990]

CLIMATE MEETING ENDS IN CONTROVERSY

(By Michael Weisskopf)

The White House conference on global warming ended in controversy yesterday after European participants complained that the United States seemed to be trying to engineer an endorsement of its go-slow approach to the problem.

Minutes after the European delegates protested a "Charter for Cooperation" that was drafted by the Bush administration and stressed the scientific uncertainty of global warming, U.S. officials withdrew it from the closed working session. Later they described its circulation as an unfortunate mistake.

"It was drafted several weeks ago and wasn't meant to be distributed," said Michael R. Deland, chairman of the White House Council on Environmental Quality. "Sometimes in the confusion of a conference, things get passed out that aren't supposed to be."

But some European participants, who contend the meeting was skewed to justify President Bush's position that further research is needed on global warming before any action is taken, did not accept the explanation.

"The United States publicly questioned the seriousness of the European Community, but it backfired," said Pier Vellinga, director of the Dutch National Climate Program. "We Europeans have become a major economic and political power, and it's naive to challenge the integrity of a major power. They haven't done their international diplomacy well."

Jorgen Henningsen of the Commission for European Communities said the document came as a "supreme surprise" to delegates and reflected the "one-sided approach" the administration applied to the conference.

From the start, European delegates criticized the two-day meeting for what they described as its patronizing tone, the near monopoly of speakers favoring the U.S. position and the failure to discuss in open sessions the plans of European governments to curb industrial gases blamed for global warming.

The administration's strategy apparently was based on "Talking Points," a primer prepared by spokesmen for the U.S. delegation and circulated Tuesday to the Cabinet officials who were delegates.

Under the heading "Debates to avoid," the paper advised delegates that it is "not beneficial to discuss whether there is or is not warming, or how much or how little warming. In the eyes of the public we will lose this debate. A better approach is to raise the many uncertainties that need to be better understood on this issue."

As for press strategy, the primer urged the following: "Don't let reporters position this conference as an attempt to delay serious decisions on this issue."

A copy of the paper was obtained by the Sierra Club and vouched for by administration officials.

The conference grew out of a campaign pledge by Bush designed to prove his concern over global warming, which is believed to occur when industrial gases cover the Earth's surface and trap solar heat. In office, however, Bush's emphasis on the uncertainty of global warming theories reflects the concerns of advisers over the economic consequences of curbing gases produced by the burning of coal and oil.

In closing remarks yesterday, Bush mildly scolded the delegates from 17 nations, urging them to "forge solutions without the excessive heat of politics." But he also sought to quiet critics by stressing "our commitment to action, to sound analysis and sound policies."

[From Science Magazine, Nov. 24, 1989]

GLOBAL WARMING: BLAMING THE SUN

A slim, unrefereed report that many scientists have dismissed as biased and misleading is said to be at least partly behind the White House's recent temporizing on climate change.

And that is causing consternation among climatologists and other greenhouse experts, who are dismayed that this 35-page document by the George C. Marshall Institute, a Washington, D.C., think tank—rather than one of the massive, carefully researched and reviewed expert reports of the past several years—seems to be holding sway in the upper echelons of the Administration.

The report, "Scientific Perspectives on the Greenhouse Problem," is by three prominent scientists—William A. Nierenberg, director emeritus of Scripps Institution of Oceanography; Robert Jastrow, founder and former director of Goddard Institute for Space Studies; and Frederick Seitz, president emeritus of Rockefeller University and past president of the National Academy of Sciences. The trio's other major foray into public policy was a vigorous defense of the Strategic Defense Initiative a few years ago.

Summing up the abundant uncertainties that surround greenhouse models and predictions, the authors say it is too soon to take any actions to reduce greenhouse gases. And by their reckoning, there is litle need to. They argue that there is no evidence that the modest temperature rise of 0.5°C that has occurred this century is correlated with emissions of greenhouse gases, and they predict that decreased solar activity in the next century will lead to a cooling trend likely to offset any greenhouse warming. All of this is couched in ample caveats, but the underlying message is that the entire problem has been overblown.

Several scientists are up in arms. Steve Schneider of the National Center for Atmospheric Research, for one, has denounced the report as a political document. Nearly 6 months after its release, he is still arguing about the report's scientific basis with Nierenberg, via letters.

"Noisy junk science," says Jerry Mahlman, director of the National Oceanic and Atmospheric Administration's Geophysical Fluid Dynamics Laboratory, where one of the major greenhouse models was developed.

A number of other respected climate researchers have suggested that the National Academy of Sciences review the study. The Academy is likely to weigh into the ruckus in some way—a couple of committees are looking at the report—though it will stop short of giving the document a formal review.

At the Environmental Protection Agency, Alan Hecht, deputy assistant administrator in the office of international activities, says he has "real problems" with the study and recently passed a critique of it onto EPA administrator William K. Reilly. As part of this informal review, Hecht asked Schneider for his comments on the report; Schneider's less-than-flattering letter is now circulating in the scientific community and on Capitol Hill, where Senator Albert Gore (D-TN), for one, is concerned.

The report does have its scientific supporters, including meteorologists like Jerome Namias of Scripps, and Richard Lindzen and Reginald Newell of Massachusetts Institute of Technology—distinguished scientists whose major work is largely outside the greenhouse field. On 23 September, Lindzen and Namias wrote to President Bush extolling the merits of the Marshall report and citing its conclusion that "current forecasts of global warming for the 21st century are so inaccurate and fraught with uncertainty as to be useless to policymakers."

The message apparently has gotten through, if not to Bush then to his chief of staff John Sununu, who, it is widely believed, is quite taken with the report. Says Schneider; "Sununu is holding the report up like a cross to a vampire, fending off greenhouse warming."

Just what impact the report has had on Administration policy is difficult to pin down, and Sununu's office is mum on the subject. But it has been widely reported that Sununu tried to block EPA head Reilly from attending an international meeting on climate change at The Hague in early November. At that meeting, the United States refused to commit itself to cutting emissions of carbon dioxide.

Nierenberg, for his part, has been working hard to get the message into the White House. He personally briefed senior Administration staff, including representatives from the White House Office of Cabinet Affairs, the White House Office of Policy Development, the Council of Economic Advisers, and the Office of Management and Budget.

"I was impressed with the report," says Juanita Duggan, special assistant to the President in the cabinet affairs office. "Everyone has read it. Everyone takes it seriously. We have a coherent policy in the federal government that is not inconsistent with the Marshall Institute report."

"It is well worth listening to," adds Paul Roelling, a senior analyst in the White House Office of Policy Development. "They are eminent scientists. I was impressed."

But White House Science Adviser D. Allan Bromley, who was not yet in place when the report was released, seems to be distancing himself from it. "It has a distinguished group of authors, but there is no general consensus on the details and it has not been peer-reviewed," he said in a statement to *Science*.

All the critics concede that the first part of the report is a good description of the scientific uncertainties surrounding predictions of greenhouse warming. And everyone, not surprisingly, agrees with the report's plea for $100 million for more research.

Where the report veers from the mainstream is with the assertion that the warming trend of the past century was probably caused by increased solar activity and not by an accumulation of greenhouse gases—and that, ipso facto, the greenhouse warming next century will be small, perhaps 1°C.

The basis of the report is an analysis of this 0.5°C warming trend, which, the authors point out, does not follow the curve of rising emissions of greenhouse gases. Instead, they look for natural causes to explain the rise and find that solar variation mirrors it rather well. The authors' underlying assumption is that if they can break the connection between that 0.5°C rise and accumulating greenhouse gases, then all bets for future warming are off.

No such luck, says Schneider, who thinks they are setting up a straw man. "Could the sun have done it? Sure," he says, adding that a variety of natural phenomena could explain the temperature rise of the last century. But that, he adds, says nothing about the furture greenhouse warming.

"There are uncertainties, but I can't think of any combination of them that could conspire to make the problem go away," says NOAA's Mahlman. Hypotheses are fine, he adds, "but to advise the White House on the basis of this type of argument? Give me a break. That is not responsible."

The reason people are worried about greenhouse warming, Schneider, Mahlman, and others say, is not because of the 0.5°C temperature rise during the past century but because emissions of carbon dioxide, chlorofluorcarbons, and methane are clearly increasing. And it is dead certain that if enough of these greenhouse gases are released into the atmosphere, where they trap heat, global tempertures will rise. The only question is how much, and by when.

Then the Marshall Institute pulls out another card. After analyzing the historical record of solar activity, which can be inferred from carbon-14 in tree rings, the authors predict that solar activity will decrease in the next century, leading to a mini-ice Age that will offset any greenhouse warming.

Preposterous, say solar physicists like John Eddy of the University Corporation for Atmospheric Research in Boulder, who calls their extrapolation "very shaky" at best. We simply don't have the ability to predict future solar activity, he says.

Curiously, Eddy was one of the sunspot experts Jastrow consulted in writing the report. "Bob Jastrow would call me at work and at home on Saturday and Sunday. I would say, 'No, no, you can't make that prediction.' I was shocked when I saw what came out."

Jastrow says the emphasis his colleagues are putting on the solar variability discussion is a "distorted" reading of the report, maintaining, along with Nierenberg, that the solar variation hypothesis is just a minor part of their argument.

"Then why did they put it in?" snaps a senior Academy official.

Their bottom line, Jastrow insists, is simply that no scientific conclusion can be drawn about the future greenhouse warming, "and we have time to find out." They assert that with $100 million for supercomputers, answers to these questions will be forthcoming in 3 to 5 years, so why not wait before taking precipitous policy action?

"No one in his right mind would say that," counters Hecht at EPA, who, along with everyone else Science spoke with, says it will take a decade or more to address these questions.

In 25 years, Mahlman adds, "Congress will still be asking us questions we can't answer. I don't care if you pour $100 billion at the problem."

The biggest gripe people have with the report is that the authors, in summoning uncertainty to their cause, fail to acknowledge that it cuts both ways. Explains Schneider: "What we don't know is just as likely to make it worse as better."

Solar variability is a case in point. Schneider offers a counter scenario to that in the Marshall Institute report: That during the past 100 years, solar energy output was decreasing rather than increasing. And without that natural cooling, which masked the greenhouse signal, the earth's temperature would have warmed up twice as much. "It's pure speculation," he adds, but since no one really knows what the sun as doing 100 years back, "it is just as likely as theirs." Moreover, says Schneider, if the earth warms up 2 ° to 4 °C, as models usually predict, "it will swamp anything the sun has done in the past 100 years."

John Perry, a meteorologist and staff director of the Board of Atmospheric Sciences and Climate at the National Research Council, agrees. "If the report had just said, in an evenhanded way, 'don't rely on the models because there are hellacious uncertainties,' we all would have applauded. But the way it comes across is that all the uncertainties are on the downside. I don't think that is very democratic."—LESLIE ROBERTS.

[From Science Magazine, Dec. 1, 1989]

GREENHOUSE SKEPTIC OUT IN THE COLD

If the long hot summer of '88 sparked the greenhouse revolution, the near normal weather of 1989 is bringing on the counter-revolution. A small but growing cadre of skeptics is now decrying predictions that the greenhouse warming of the next century will surely be severe enough to cause drought, agricultural disaster, and inundation by rising seas.

The computer models producing such doomsday predictions are rife with uncertainty, the skeptics say, the alarm is unwarranted at this point, and the rush to reduce the emissions of carbon dioxide and the other greenhouse gases that cause atmos-

pheric warming is ill-advised. The warming in the next century may well be negligible or even benign, a few maintain.

Richard Lindzen, if not the commander-in-chief of these counterrevolutionary forces, is a top general. His troops, at least the outspoken ones, number less than a dozen and are drawn from the ranks of climatologists, meteorologists, and an assortment of related disciplines. Most have not specialized in greenhouse research and have only recently entered the fray.

The claims of Lindzen and his cohorts have not gone unchallenged, however. They are already drawing return fire from mainstream greenhouse researchers, although even some of these concede that greenhouse warming may be less severe than the worst case predictions.

One reason for Lindzen's prominence among the greenhouse skeptics is his credentials. Educated at Harvard, Sloan Professor of Meteorology at the Massachusetts Institute of Technology, and member of the National Academy of Sciences, Lindzen has made major contributions to the theory of how the atmosphere behaves.

No other U.S. skeptic has such scientific stature. So when he says the greenhouse effect "is the only subject in atmospheric science where a consensus view has been declared before the research has hardly begun," people are going to listen. Among those reportedly listening are President George Bush and White House Chief of Staff John Sununu (Science, 24 November, p. 992). In Spetember, Lindzen coauthored a letter to the President in support of a report by the George C. Marshall Institute, a Washington D.C. think tank. That report, which also dismisses current forecasts of greenhouse warming as useless, may have influenced the recent U.S. decision not to commit itself to reducing carbon dioxide emissions.

People are also listening to Lindzen because his latest volley in the greenhouse war is an extreme and potentially devastating one: he says that the computer models that predict a large greenhouse effect are probably fatally flawed because they neglect to consider that the atmosphere can take care of itself. Greenhouse gases will inevitably increase, he admits. They will even double some time in the next century, but the atmosphere will likely warm by at most a few tenths of a degree, not the 1.5° to 4.5°C that researchers running the models expect.

". . . both the data and our scientific understanding do not support the present level of concern," he has written in a widely circulated, but as yet unpublished, manuscript on the subject. As Lindzen understands the atmosphere, it will in all likelihood react to the warming effect of additional greenhouse gases with a countereffect of its own, a so-called negative feedback, that will neutralize most of the warming.

Researchers in the computer modeling community under attack by Lindzen disagree—some of them vehemently. One of those is Jerry D. Mahlman, the director of NOAA's Geophysical Fluid Dynamics Laboratory in Princeton, New Jersey. When Mahlman reviewed Lindzen's manuscript for the Bulletin of the American Meteorological Society, he "recommended the paper be rejected unless he [Lindzen] wanted to convert it into a paper about science. It came across as a whiny complaint without scientific justification. Dick Lindzen is a friend of mine, so I did not say that lightly. I was very disappointed." The paper is still pending at the Bulletin.

Others who run the big climate models join Mahlman in complaining that Lindzen seems to claim he has a better climate model in his head than they have in their supercomputers. But what Lindzen has now is not so much a complete model as an idea about how control of atmospheric temperature works. Indeed, he describes it himself as an idea of a theological or philosophical nature.

"The most likely area to search for severe problems [with the models] is in the interaction of climate with water (in all its phases)," he wrote in his paper. "The remarkable thermodynamic properties of water almost certainly lead to its acting as nature's thermostat."

Where the big greenhouse models go wrong, Lindzen says, is that their water always responds to a warming by amplifying it through positive feedbacks. Water never tends to counteract the warming. For example, a warming would drive more water vapor into the atmosphere, where it can act as a greenhouse gas to trap more heat and further warm the climate. Lindzen finds the absence of counterbalancing negative feedbacks, in which water would respond by cooling climate, to be "highly unlikely."

If water-related negative feedbacks exist, Lindzen argues, they are most likely to occur in the tropics above an altitude of 5 kilometers near towering columns of cloud. They carry air from the lower to the upper troposphere, which is the weather-generating layer of the atmosphere. As air rises, it cools. This cooling wrings out much of the air's burden of moisture, which falls back toward the surface as rain. Thus dried, the rising air fills the upper troposphere.

Lindzen contends that as carbon dioxide increases and tends to warm the atmosphere, this convention-driven conveyor belt will run faster and more efficiently so that it will carry more and even drier air to the upper troposphere. That would reduce the heat-trapping moisture in the upper atmosphere, allowing more heat to radiate to space. Voila, a negative feedback—the warmer the climate, the dryer the upper troposphere, the greater the heat loss, the more the atmosphere cools. And, crucial to his argument, Lindzen believes the models do not contain this negative feedback.

"When it is recognized that at least some of these [water-related] feedbacks are likely to be negative rather than positive," writes Lindzen in his unpublished manuscript, "it is easy to see that the actual response to a doubling of CO_2 may readily be ⅛ to 1/14—or even less—of what is suggested" by the consensus view. ". . . one may reasonably expect that corrected models may very well end up predicting greenhouse warmings of only a few tenths of a degree Centigrade" for the next century.

The modelers, perhaps predictably, object. "He says water is a negative feedback, but how does he know that?" asks Stephen Schneider of the National Center for Atmospheric Research (NCAR) in Boulder. "Does he have a calculation, or is his brain better than our models? You can't just sit there and build a model of one sector of the atmosphere, then extrapolate to the globe. That's why you build global models."

Lindzen's negative feedback mechanism "is true in a qualitative sense," says Mahlman, "but the magnitude of the effects is tiny. I know of no [obervational] evidence supporting it. I could be wrong; Lindzen is a smart person, but I'm afraid he's confused."

Rebuttals from the modelers might be predictable, but none of Lindzen's meteorology colleagues contacted by Science will take the extreme stance he has. Their reservations about Lindzen's ideas on negative feedback mechanisms harken back to the modelers' complaints. "He's focused on one aspect," says Peter Strone of Lindzen's own department at MIT, "but if you look at the whole of it, I don't think you'd have a negative feedback."

Alan Betts, a respected independent specialist in the mechanics of convection who works near Middlebury, Vermont, agrees that Lindzen's argument ignores too many of the atmosphere's complexities. According to Betts, moisture is transported into the tropical atmosphere at all levels, and not just near the bottom, as in Lindzen's scheme. "His argument depends very heavily on moisture distribution with height and how it would change with a warming," Betts says. "We don't fully understand moisture transport, but the model studies I have done would not support his arguments. I personally doubt they would hold."

At best, meteorologists take a noncommittal stance on Lindzen's ideas. For example, MIT meteorologist Kerry Emanuel points out that currently no one can estimate how much of the water that goes up in clouds precipitates and how much is left over to moisten the upper troposphere. "It's conceivable that the drying effect could outweigh the moistening effect," Emanuel remarks.

Whether this particular negative feedback counteracts the greenhouse warming or not, Lindzen argues, other negative feedbacks must be operating. In another of his philosophical assertions, Lindzen believes that negative feedbacks, whether his drying effect or others, dominate any positive, warming feedbacks. On timescales of a few hundred years and less, he says, even the hardest push from whatever quarter would not drive the relatively insensitive climate system into a distinctly warmer stage.

Lindzen's confidence in the insensitivity and stability of climate is not shared by many modelers. Skeptics "count all the negative feedbacks we don't know about," says Schneider, "and forget about the positive ones we don't know about."

There are a dozen or so potentially positive, warming feedbacks that, even in their current rudimentary forms, have yet to be included in the models. Increased temperatures would, for example, melt permafrost ice, thereby releasing methane (a greenhouse gas). Whether the net effect of such neglected feedbacks will drive the warming beyond even the range predicted by the models, no one knows. And with that kind of uncertainty remaining, the modeling community is in no mood to entertain Lindzen's criticisms, not in their present philosophical guise.—RICHARD A. KERR.

[From Science Magazine, Dec. 1, 1989]

GREENHOUSE SKEPTIC OUT IN THE COLD

TURNING DOWN THE HEAT

Greenhouse researchers may not be willing to accept Richard Lindzen's thesis that atmospheric warming over the next century will be next to nothing (see accompanying story). But some of them are willing to concede right now that things may not turn out quite as badly as some of the models have predicted. If these researchers are proven right, the scenarios that forecast everything for the next century from a new dust bowl in the American West to beachfront properties being swept away by a rising sea would have to be toned down. However, as often is

the case in this business, there is enough lingering uncertainty to give everyone pause.

One major indication that greenhouse warming may be less than expected is the modest rise in global temperatures that occurred during the past 100 years or so. It was only 0.5°C, or perhaps less. And a number of greenhouse skeptics, including meteorologist Lindzen of the Massachusetts Institute of Technology, have argued that the temperature record is so fraught with uncertainties that even this apparent warming is as good as zero. If that is the case, then temperatures are likely to go up only a few tenths of a degree Centigrade by the middle of the next century. Hardly the stuff of cataclysmic drought and coastal inundation.

But even Lindzen has admitted that the observed warming is also consistent with a future temperature increase of as much as 2°C. That still falls in the range predicted by the models, but at the lower end, not the 4° to 5°C increases of the upper end on which the scariest scenarios are based.

This middle ground is becoming more popular. "I agree the past 100 years of warming may not strongly suggest the climate sensitivity is 4°C, but it is consistent with 2°C," says Syukuro Manabe of NOAA's Geophysical Fluid Dynamics Laboratory, where he runs one of the five world-class greenhouse models. Michael MacCracken, who runs another one at Lawrence Livermore National Laboratory in Livermore, California, tends to settle on 2° ± 1°C as well (Science, 6 January, p. 28). A 2°C global warming would still have significant social and ecological effects, however.

But there is a catch to these efforts to use the past to predict the future. The past behavior could be misleading because the mechanisms capable of amplifying an increase in global temperatures can be slow to take hold. And so, a big warming could be awaiting us in the next century without having revealed itself up until now.

We may know soon. The models that predict the largest warmings call for the upward trend to become obvious by the early 1990s, barring non-greenhouse changes in climate.—R.A.K.

NATIONAL CENTER
FOR ATMOSPHERIC RESEARCH,
Boulder, CO, September 1, 1989.

Dr. ALAN HECHT,
Office of International Activities, Environmental Protection Agency, Washington, DC.

DEAR ALAN: Congratulations on your new job. I predict it will be stimulating both for you and the people you interact with. As you requested, here is my brief analysis of the recent Marshall Institute report (Scientific Perspectives on the Greenhouse Problem, 1989, George C. Marshall Institute, Washington, DC.)

The Marshall Institute report is really three reports in one. The first part is a fairly standard review of the greenhouse science problem. It is typical of that in most National Academy of Science reports, and reflects the caveats normally given in the presentations of most of the climatic modelers that talk or write on this issue. There is an impression in the Marshall report that somehow these caveats have been underrepresented by some members of the community, but this is not strongly argued. In any case, up to page 14, I have few disputes with the narrative, other than its constant focus on uncertainty and its omission of the primary reasons that climate modelers are concerned for the future: validation of the models' performance against actual climatic changes. There is insufficient mention of model validation in the Marshall report. For example, the authors do not mention the excellent performance of most General Circulation Models in simulating the vary large seasonal cycle of surface temperature, or the successes in simulation of neighboring planets, Mars and Venus, each of which has radically different greenhouse properties than earth, nor is there mention of the daily variability validation studies that have recently been published. While these validations do not remove the uncertainties focused on in the first 14 pages, the absence of the mention of the substantial degree of model validation of climate sensitivity suggests a bias.

On page 15 begin what I believe to be the major problems with this report. First of all, the authors note, citing my Science articles (S.H. Schneider, Science 243,771, 1989), that the global temperature response to CO_2 doubling is in the range of 1° to 5°C. They correctly point out that a temperature drop of roughly 1°C relative to today's temperatures occurred in the Little Ice Age. That episode occurred between about 1400 and 1850 in various parts of the world at various times and differing degrees. Thus, a natural cooling of 1°C would, the Marshall authors argue, completely compensate for the lower end of any greenhouse warming if such a Little Ice Age-like event recurred in the next century. Indeed, this is correct, but it fails to mention that the upper range of the CO_2 warming limit, (i.e. 5°C), would totally swamp any natural fluctuations of the type that have occurred in the past 10,000 years, the time since the end of the last ice age. Moreover, natural centuries-long fluctuations on the order of 1° warming (e.g., the so-called Medieval Optimum around 1,000 years ago) are just as likely to occur, and could add to any anthropogenic greenhouse warming in the next century. Indeed, what is absent in the remainder of the Marshall document is any statement, even intuitive ones, about the relative probabilities of the greenhouse warming being at the low end of the range and comparable natural cooling occurring relative to the probabilities that more middle or upper severity warming scenarios could occur. (e.g., see "Current Issues in Atmospheric Change," National Academy of Sciences, 1987 for statements of the high probability of warming greater than 1°C in the 21st century.)

In section four the authors delve into the very complicated and long debated controversial issues of potential solar effects on climate. They cite the fact that sunspots have been relatively absent for certain century long periods, which have typical recurrence intervals of hundreds of years. The coincidence between the last such minimum, the "Maunder Minimum" between 1650 and 1700, and the "Little Ice Age" is cited. But what is not cited by the Marshall authors is the fact that before and after this 50 year long minimum the so-called Little Ice Age was in full force in many parts of the world. Furthermore, the coolest periods during this time did not necessarily occur in all places at the same time nor was it fully coincident with Maunder Minimum. In addition, a 10,000 year look at tree ring evidence shows many other such minima, but does not reveal consistent correlation of these sunspots minima with glacial advance periods, and therefore, no firm correlation can be established. This is why this area of research is still controversial, a point not adequately stressed in the Marshall document. Finally, the magnitude of natural, several century long global climate fluctuations during the past 10,000 year inter-glacial period is on the order of 1°C, which is at the low end of the 1° to 5°C range the Marshall authors concede as the consensus estimate for the next century.

Therefore, the higher probabilities are that whatever nature does on the sun or earth to cause natural fluctuations is likely to be swamped by manmade influence of greenhouse gases sometime between now and the first few decades of the 21st century. These relative probabilities get no prominent attention. Rather the lower probability scenarios are what the Marshall Institute authors focus on. Moreover, they cite recent evidence that some stars have been observed to have energy output changes on the order of a few tenths of a percent to explain recent global warming trends. By no means can this be cited to explain with high confidence the observed approximately 0.5°C warming trend of the past century. It is equally likely, as not mentioned by the Marshall Institution report, that a solar constant decrease from our sun could have been in progress during the past 100 years, and therefore, any greenhouse warming that has taken place could have been masked by such an event. Since the solar constant has not been well observed, except in the past decade, both scenarios are equally likely.

Furthermore, if only a few tenths of a percent change in solar energy were responsible for the 0.5°C century long trend in climate over the past century, then this would suggest a planet that is relatively sensitive to small energy inputs. The Marshall Institute simply can't have it both ways: they can't argue on the one hand that small changes in solar energy output can cause large temperature changes, but that comparable changes in the energy input from greenhouse gases will not also produce comparable large signals. Either the system is sensitive to large scale radiative forcing or it is not, another factor not mentioned by the Marshall authors. Although they argue that a 33 year running average of sunspot numbers superficially resembles the temperature record of the past 100 years, they do wisely admit that this could well be a coincidence.

The Marshall authors go on to claim that "scientists' concern for offering sound advice on the greenhouse problem have tended to rely on the observed temperature increase of 0.5°C since 1880 as their best evidence that the greenhouse effect is already here and that steps should be taken now to cope with its full development in the next century." (Marshall Institute, page 28).

However, only very few people have made such a claim. Most scientists I know argue that it is not the performance of the planet in the past century, which only in the last decade is at the margin of the noise level of natural climate fluctuations, that motivates their concerns for the next century. Rather, our concerns are grounded in the very well validated understanding of how radiative trapping by important trace gases like carbon dioxide, methane and chlorofluorocarbons can heat the surface. Further concern is based on the (less well) validated modeling sensitivity studies which suggest that something between 1° and 5°C warming is the most probable prediction for the next century, (e.g., NAS, 1987). Indeed, it will take another decade or two of observations,

with a presumed continuing of the record heat of the 1980s, to establish to a high degree of confidence that the greenhouse forcing of the past century is finally unambiguously detected. But, if we follow the Marshall Institute's advice and wait for such certainty before implementing actions we will then have to adapt to a much larger dose of change than if we attempt to slow it down now. That decision, of course, is a value judgement, not a decision that can be made based solely on any scientific method.

Herein is my principal objection to the Marshall report, and in fact, an objection so serious as to make me doubt the capability of the authors to provide a balanced scientific view. They claim "current forecasts of the manmade greenhouse effect do not appear to be sufficiently accurate to be used as a basis for sound national policy decisions." (Marshall Institute, page 23). Furthermore, they argue that "it is our judgement that if a prudent investment is made in computing power, observing programs and added manpower, answers that have a usable degree of reliability can be provided to policy makers within three to five years." Thus, they recommend no current policy response to the present debate, other than more research. What I find so objectionable in these statements, particularly the former one, is that it is not a scientific judgement, but their value judgement, which they do not explicitly claim as their personal views of how to respond to the range of uncertainties. The second statement is technically inaccurate, I believe, in that virtually all knowledgeable scientists would never claim that we will have a strong consensus of atmospheric researchers as to the reliability of the regional distribution of time evolving climate changes in 3 to 5 years, regardless of the level of research effort. If left to its own devices, the climate community is likely to take 25 years to provide such information. If the kinds of "prudent investments" that the Marshall Institute authors do wisely call for were implemented, then it is my opinion, and one I believe is widely shared in the scientific community, that we could accelerate substantially the rate of building such consensus. But, a decade or so would still be needed before which high resolution, coupled models of atmosphere, ocean, sea ice, land hydrology, ecosystems, and chemistry could be adequately run, tested and validated to provide credible regional forecasts. Of course, it is better to produce such forecasts in ten years than in 25 and the costs are small relative to the potential risks. Thus, I agree with the advice to invest in such research. But to claim answers will be clear within three to five years and therefore, policy should wait for them, is in my opinion a scientifically erroneous judgment as well as a value judgement with which I personally disagree strongly. People may legitimately disagree about values, but scientists must always make this explicit, and the absence of this is what has me so disturbed about the Marshall Report.

Finally, the authors provide no cost/benefit analysis of the risks or benefits of alternative actions now versus the risks and benefits of delay. In the absence of such studies, or even the citation to the few such studies that exist, the Marshall report's primary conclusion to delay policy actions has little merit.

Alan, I hope this is useful to you and that you can use it to good purpose.

Warm regards and best wishes in your new position.

Sincerely,

STEPHEN H. SCHNEIDER,
Head, Interdisciplinary Climate Systems.

THE GLOBAL WARMING DEBATE HEATS UP, BUT NOTHING HAS REALLY CHANGED

(By Dr. Stephen Schneider)

As the nation celebrates the 20th birthday of Earth Day, the daunting prospect of unprecedented climate change has grabbed center stage. It has also generated a confusing, noisy and sometimes bitter debate among industrialists, environmentalists, Administration officials, members of Congress, scientists and, of course, columnists. Opponents of immediate actions (such as emissions limits) to curb the human activities that boost the greenhouse effect write stinging op-ed critiques of global warming science and scientists, trumpeting each new study that softens the global warming spectre as proof that the problem is waning. For example, Forbes magazine ran a large ad in The New York Times, patting itself on the back for a cover story that allegedly debunked the global warming "hype" ("No Guts, No Story"). Forbes claimed that recent studies show global warming to be "at worst, minimal". (As I'll address momentarily, this is, at best, seriously misinformed.) Administration officials, trying to ward off Congressional attempts to limit U.S. industrial pollution that enhances the greenhouse effect, have also resorted to citing recent studies that dropped the projected amount of warming and lowered the estimates for how much sea level rise will take place. These officials also cited recent economic model studies to the effect that it will cost trillions to abate even a fraction of U.S. greenhouse gas emissions from coal and oil combustion. While it is always legitimate to examine new studies, what is dismaying is the fact that listing only those which lower concern (sometimes exaggerating their conclusions at the same time), is a political tactic, not a fair assessment of the overall scientific debate. Recent Administration witnesses to Congress have focused on good news in their written testimonies whereas the actual spectrum of new scientific results in the past year or so contained as much bad news as good news. No wonder environmentalists are becoming disenchanted with the Bush-Sununu "go slow" rhetoric on global warming. Of course, the bad news is not left in the pages of obscure scientific journals either, but is selectively quoted on opinion page pieces by environmentalists as proof that we must act urgently to avert otherwise certain disaster.

Needless to say, the public gets confused, because so much of the media debate conveys the (false) impression that experts believe global warming is either the end of the world or a hoax. In reality, most knowledgeable scientists—not all, of course, as one can always find someone with a Ph.D. willing to say anything, no matter how ridiculous—agree that these two extremes are the least likely future outcomes. In other words, any scenario between "no problem" and "total catastrophe" is much more likely to happen. The confusing media debate has, as some of the debaters probably intended, slowed down action in the Congress to constrain what I have termed our growing commitment to a Greenhouse Century (after the subtitle of my recent book, "Global Warming: Are We Entering the Greenhouse Century?")

So if the visible debate doesn't represent well the actual scientific arguments, what then do we know for sure? What is possible? And what is speculative?

We know for sure that certain gases, water vapor and carbon dioxide, principally, trap heat near a planet's surface (this explains why the thin atmosphere around the planet Mars makes it frigid and the thick atmosphere of Venus makes it an oven). We also know for sure that growing human populations demanding more coal and oil burning, chlorofluorocarbon chemical use or agricultural conversion of forested areas, have led to an unprecedented increase in carbon dioxide and other heat-trapping greenhouse gases since the industrial revolution. Scientists also think (but not for sure) that the earth has apparently warmed up about 1° F over the last century and that the 1980's was the warmest decade in the history of the thermometer. So why do doubts linger? Nature causes climate change on her own, so the problem is determining whether the recent warming is our doing or an improbable natural fluctuation. Scientists split on this issue. My personal view is that the pollution and warmth are probably cause and effect to a considerable extent, but that it will take another decade or two of taking the Earth's temperature to be absolutely sure. The problem is that this argument is not a graduate school exercise, for we are performing our experiment on Laboratory Earth, with us and all other living things along for the ride. Moreover, if we take the Administration's or Forbes magazine's advice and do more studies to be sure there really is a serious problem before taking any actions solely for the purpose of slowing global warming (the Administration has called this the "no-regrets" strategy), then this gamble could commit the Earth to a much larger dose of change occurring much faster than if we took actions today to limit the activities that we know for certain enhance the greenhouse effect.

Whether to act on any uncertain issue is not a scientific judgment that more studies will, ipso facto, resolve, but rather is a value tradeoff about taking risks: investment costs today versus environmental risks tomorrow. Moreover, few scientists believe that any level of research will provide reliable projections about details of what will happen to local climates in less than 10 to 20 years. To me there is a big regret in the so-called "no regrets" ideology, namely, what if future climate change turns out to be as bad or worse than is currently projected—an outcome equally as likely as there being less of a problem than is currently believed. Do we wait until we get sick before buying health insurance? Does the Administration advocate that we only do studies rather than pump hundreds of billions annually into defense as a strategic hedge against possible, but not certain, threats to our security? The no-regrets plan to postpone specific actions until we know for sure about global warming, if applied to fire insurance, health insurance or defense spending would almost certainly hog-tie the "good hands" of Allstate or crumble the "rock" of Prudential, as well as whittle away the Department of Defense.

The U.S. National Research Council, an independent quasi-governmental body charged with making non-partisan scientific assessments, has studed and restudied global warming half a dozen times over the past 15 years, always with the same fundamental conclusion: There is a better than even odds chance of unprecedented climatic

changes unfolding in the decades ahead. Despite the back and forth of the recent noisy debate, nothing has been uncovered by recent research to alter the solid consensus projection of 3 °F to 9 °F warming sometime in the next century. Nor have any new findings eliminated the substantial chances that sea levels can rise, hurricanes could become stronger, heat waves will get more intense, cold waves become less frequent and local and regional climates grow more unpredictable. To summarily dismiss all this, as an Administrative official recently did ("a rise of a few degrees Celsius would be similar the change from moving from Boston to Washington"), is to ignore the obvious fact that the forests and ecosystems of Virginia can't simply phone the van lines to carry them back to their old climate conditions newly resident in Massachusetts.

Finally, we hear from many industrialists and economists that it is too costly to abate our emissions, even by only 20%. This cost fear is based on very speculative economic models, which, unlike climate models, have not been validated by the different greenhouse effects of Mars, Earth and Venus. Even worse, these economic models often cited by Administrative officials don't even attempt to factor in the climatic and other benefits (e.g., reduced acid rain, fewer acute air pollution episodes or balance of trade deficit reduction) of pollution controls or energy efficient investments. One exception is Yale economist William Nordhaus, who has estimated that the climate benefits alone from reducing carbon dioxide emissions by 10% to 47% would outweigh in the long run the immediate capital cost of such controls.

Accelerating research and development of less polluting renewable energy systems and improving the energy efficiency of our homes, cars, offices and factories can pay for itself over time. Fortunately, after eight years of policy stagnation in the Department of Energy, President Bush's appointment of Admiral Watkins as Secretary of Energy has revitalized federal desire to make the U.S. more energy efficient and independent. But as of now Administrative policy only endorses energy efficiency expenditures that are justified as if global warming were a non-problem (i.e., the Administration's "no-regrets" ideology). What I believe is a much more prudent policy is to accelerate the implementation of energy efficiency and renewable energy sources beyond the slow rates of improvement now envisioned by the Administration. Such as acceleration is a form of added insurance against the better-than-ever-odds chance of unprecedently fast climatic changes building up in the decades ahead—odds not overthrown by recent scientific results or the debate over them. In my value system, modest premiums paid now may yield big dividends in averted environmental disturbances later on, disturbances that could be loaded with big regrets had they not been averted by timely and cost-effective actions when we had the chance. It is usually too late to buy insurance after you get sick.

Mr. WIRTH. Mr. President, there should be a sense of urgency. The American people are feeling it, the world is feeling it. Unhappily that sense of urgency is not being translated by the leadership of the United States. We ought to be seeing that and not this whitewash that continues to go on.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. WIRTH. I thank the Chair.

(The remarks of Mr. WIRTH pertaining to the introduction of S. 2462 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. I thank the Chair.

(The remarks of Mr. HEINZ pertaining to the introduction of S. 2462 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Chair recognizes Senator DURENBERGER.

MEDICARE

Mr. DURENBERGER. Mr. President, 6 weeks ago I spoke on the Senate floor about the fiscal crisis that is certain to confront the hospital insurance—Medicare—trust fund before this decade is over. And I noted in that speech that the experts agree that the Medicare hospital insurance trust fund will be bankrupt within 15 years.

Yesterday, the experts revised their projections, and the bad news they are reporting is that Medicare will be insolvent 2 years sooner—by 2003. And, according to the trustees of the Social Security and hospital insurance trust funds, the Medicare trust funds will start being depleted in barely 5 to 7 years.

Mr. President, we owe it to every citizen of this country to ensure the fiscal integrity and financial soundness of Medicare. We should not, and need not, wait until a crisis befalls the Medicare system. We should do something this year to restore integrity to the Medicare promise.

That is why I introduced legislation last month—S. 2249—that would reallocate the composition of the Social Security and hospital insurance payroll tax to ensure that the Medicare trust fund will be solvent for the next 25 years. Under my legislation, the 7.65-percent payroll tax paid by employers and employees would neither be increased nor decreased. Instead, beginning as late as the year 2000, the Social Security portion of the tax would be reduced from 6.2 percent to 5.9 percent and the Medicare portion of the tax would be increased by 0.3 percent. A further small reallocation between the trust fund taxes would occur early next century with the result that by the year 2007, the Social Security portion of the payroll tax paid by employers and employees would be 5.65 percent, and the hospital insurance portion would be 2 percent.

Mr. President, I want to emphasize that this small shift in the payroll tax will not endanger the Social Security trust fund. In fact, these tax rates were arrived at after consultation with the professional actuaries at the Social Security Administration and the Health Care Financing Administration who advised that these rates would provide safe reserve margins for both the Social Security and the Medicare hospital insurance trust funds.

I urge my colleagues to join me in this effort to assure the workers who are today paying Medicare taxes that Medicare will be able to provide comparable, and affordable, benefits when they retire.

The PRESIDING OFFICER. The Chair recognizes the Senator from Missouri [Mr. BOND].

A HOUSING BILL THIS YEAR

Mr. BOND. Mr. President, I rise today to discuss the prospects for a housing bill this year. I think that this should be one of the highest priorities for Congress this session. Senator CRANSTON and Senator D'AMATO both deserve a great deal of thanks and credit for the tremendous amount of work that they have done on S. 566, the National Affordable Housing Act.

I have discussed this legislation with city officials, housing authority directors, the State housing finance agency, housing advocates, developers of low-income housing, and others in the State of Missouri and they are supportive of the general thrust of this bill. There is broad agreement that a flexible housing program driven by local needs is necessary and that S. 566 moves in this direction.

There are some changes, though, that I think would improve S. 566, certainly ensure my support, and make Senate passage of the legislation easier. I have written to Senator CRANSTON and Senator D'AMATO today outlining my compromise suggestions, and I will briefly discuss a few of them for the benefit of my colleagues.

As it is currently drafted, S. 566 layers the H.O.P. or HOP Program on top of the existing housing programs such as the Rental Rehabilitation Program. It would make sense to me to fold together the existing programs, some of which are duplicative, and increase the authorization by an appropriate amount.

Cities and States should be able to access one simple housing program with clear, straightforward rules. Decisions about housing policy are best made at the State and local level and a consolidation of housing programs would make it easier for cities and States to access the Federal housing funds to carry out local housing strategies.

I believe that it is equally important for the housing bill to include provisions improving the management of public housing, an area where we have seen too many problems in the past. I have introduced legislation, S. 2301, to develop a management system for public housing that is both more flexible and more accountable. Under this legislation which builds on some of the fine concepts in the Cranston-D'Amato bill, HUD would be given more tools to enforce standards. Right now if a housing authority does not perform and the tenants in that particular development, the residents in that development are not adequately served, the only remedy HUD seems to have is to be able to cut off all funds. Therefore, the development deteriorates further and the residents of the development are the ones who suffer.

Under the approach that we have set forth, HUD would be given a series of actions requiring the working agreement to improve conditions or, if that did not work, the ability to take over development, move it out of the administration of a local housing authority and turn it over to some other group that could administer. That way, the people who live in the public housing development would not suffer if the local housing agency does not do the job.

On the other hand, for the vast majority of housing authorities which are well run and which would meet the objective goals set forth under the legislation, they would have much more freedom to plan and they would be entitled to their rehabilitation, their modernization funds and would not have to compete for them and would not have to go back to a HUD regional office and argue why their priorities, rather than the priorities of those who happen to be in the regional HUD operation, are better for the particular development they are concerned with.

I think these kind of changes would ensure that all residents living in public housing would have a decent and safe place to live.

In addition, I also support some of the fine ideas put forth in Secretary Kemp's proposal. I particularly approve of and support his desire to empower residents to be able to manage and then purchase their developments. I think we ought to start off at a slower speed and improve the concept before we jump into it all the way.

I also suggest that that emphasis on State and local decisionmaking, which is the hallmark of S. 566, be extended to the administration's HOP proposals to the greatest extent possible. I think experience has shown that the Federal Government is not usually very successful in making decisions about local housing needs and that local housing authorities and officials can play a very positive role in making the joint Federal, State, and local programs work.

Mr. President, I have a number of other additional ideas, but I ask unanimous consent the full text of my letter to Senators CRANSTON and D'AMATO be printed in the RECORD. I encourage my colleagues to consider these compromise ideas as we work out a bipartisan housing bill.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, April 18, 1990.

HON. ALAN CRANSTON,
Chairman, Subcommittee on Housing and Urban Affairs, U.S. Senate, Washington, DC.

DEAR ALAN: You and Senator D'Amato both deserve a great deal of thanks and credit for the tremendous amount of work that you've done on S. 566, the National Affordable Housing Act. I have discussed your legislation with city officials, housing authority directors, the state housing finance agency, housing advocates, developers of low income housing and others in the State of Missouri and they are supportive of the general thrust of your bill. There is broad agreement that a flexible housing program driven by local needs is necessary and that S. 566 accomplishes this goal.

There are some changes, though, that I think would improve S. 566, ensure my support, and make Senate passage of the legislation easier. As it is currently drafted, S. 566 layers the HOP program on top of the existing housing programs such as the rental rehabilitation program. It would make sense to fold the existing programs which are duplicative together and increase the authorization by the appropriate amount. Cities and states should be able to access one simple housing program with clear straightforward rules. Decisions about housing policy are best made at the local level and a consolidation of housing programs would make it easier for cities and states to access federal housing funds to carry out local housing strategies.

I believe that it is equally important for the housing bill to include provisions improving the management of public housing. I have introduced legislation, S. 2301, to develop a management system for public housing that is both more flexible and more accountable. With my legislation, HUD is given the tools to enforce standards, but at the same time Public Housing Authorities are given incentives to improve by freeing them from the burdensome requirements of the current system if they are well managed. In this way we can ensure that all residents living in public housing have a decent and safe place to live.

The housing bill should also include some limited exceptions to the one for one replacement requirement for public housing demolitions. I believe that this requirement is good public policy in most cases because it prevents viable public housing from being destroyed to make way for gentrification. There are cases, however, when this inflexible requirement does not make sense. For example, if a housing project has been vacant living environment for families and children, and the city government can come up with a plan for the public housing site which includes low income housing, then limited exceptions to the one for one rule should be allowed. However, these exceptions should only be allowed in cases where the city has held a series of open meetings on the subject and taken the opinions of the residents of the area into consideration.

Some additional changes to S. 566 that I would submit for your consideration would be to eliminate the guarantee authority for the HOME corporation. I believe that there are too many unanswered questions about the potential costs of this provision and it should be dropped. In addition, we should leave the current Section 8 program in place rather than moving to a system of rental credits. I also have concerns about the provisions of S. 566 which create several new Assistant Secretary positions at the Department of Housing and Urban Development. Decisions about the creation of new positions should be left to the HUD Secretary rather than Congress.

Finally, I am very pleased that you are planning to include much of Secreatry Kemp's HOPE initiative in the revised committee print. I am very supportive of Secretary Kemp's ideas about empowerment and a concerted attack on urban poverty. Resident ownership of public housing has a great deal of potential, although I do think that at first it should be tried on a smaller scale than Secretary Kemp suggests. Nevertheless, we should include this promising innovation in the Senate bill.

Operation Bootstrap, which requires housing assistance to be coupled with other social services is also a good idea which could help housing programs become a ladder out of poverty, rather than a trap. I believe that Operation Bootstrap should include early childhood education programs as well. There are many successful, innovative early childhood/parent involvement programs run by state governments (such as the Parents as Teachers program in Missouri) which should be easily available to the residents of public housing.

I would also suggest that the emphasis on state and local decision making which is a hallmark of S. 566 be extended to the HOPE proposals to the extent possible. Experience has shown us that the federal government is not very successful in making decisions about local housing conditions, and that local officials can play a very positive role in making federal programs work.

Thank you for your consideration of my ideas. I look forward to working with you on the housing bill.

Sincerely,

CHRISTOPHER S. BOND.

HOUSING LEGISLATION

Mr. CRANSTON. Mr. President, I want to say I am tremendously grateful to the Senator from Missouri for the leadership he is showing in the effort to win enactment of sound and effective housing legislation. I admire greatly the Senator's knowledge of housing issues and his determination to transfer his knowledge into a sound housing program for all Americans, and one that we can work together upon in the Senate.

KIT BOND listens carefully to the housing concerns of his own State, and he is very effective in making those concerns heard as Congress considers the future of housing policy. I have come to value Senator BOND's insight and counsel on affordable housing very highly as we have worked togeth-

er on the Senate Housing Subcommittee and the Banking Committee in the Senate and as we have discussed these issues together. He brings his experience as Governor of a major State that is affected by the country's housing problem in all of its aspects. He brings knowledge of what can be accomplished by imaginative partnerships among States, local government, private industry, and nonprofit organizations, including community groups and tenant organizations, and he brings a desire to make sure that Federal policy is built on what works.

Since he came to the Senate, KIT BOND has moved steadily in the forefront of Senators who are shaping national housing policy. Senator BOND and I have discussed housing legislation on a number of occasions. I know that he has given the matter a great deal of careful thought. We both share the conviction that Senators have to rise above considerations of partisan advantage and must work on a bipartisan basis if we are to achieve legislation that will make housing more affordable for America's families.

The need for action has become even more urgent. Millions of families, many of them with jobs, many of them with small children have become homeless or are living just one paycheck or one personal crisis away from becoming homeless. In addition, far too many working men and women cannot afford good homes for their families. Young families find it harder and harder to buy their first home, and elderly people do not have sufficient access to the housing and services they need to live with independence and dignity as they become more frail.

I believe we have a rare opportunity this year to set a new course for Federal support of affordable housing. I am confident that Senators on both sides of the aisle can work together to win enactment of a housing bill that will make a real difference, a housing bill we can be truly proud of. Over the past 3 years, leaders from around the country have worked with many of us in Congress to turn the country's best housing ideas into sound legislation. The product of that effort is S. 566, the National Affordable Housing Act, which was developed from the beginning on a bipartisan basis.

In recent weeks, the administration has also come forward with major housing proposals of its own. Secretary Jack Kemp deserves great credit for winning administration approval of a significant housing initiative. My colleagues and I want to work very closely with him. In recent weeks, the Housing Subcommittee staff has met for many hours with the staff from HUD to analyze the administration's HOP initiative. I want to find ways to accommodate these proposals in a Senate housing bill as much as possible.

I have also been seeking ways, Mr. President, to rethink S. 566 and make the bill more compatible with the administration's thinking without weakening the important housing initiatives that have emerged over the past 3 years. I have been confident that the best parts of the National Affordable Housing Act, the best parts of the HOP initiative, and some additional proposals of other Senators can all be merged into a sound piece of legislation.

Now, today, Senator BOND is proposing a framework on which a Senate housing bill can be built. I believe his leadership greatly increases his chances of achieving an effective bipartisan housing bill this year. He offers a way to arrive at a consensus housing bill that measures up to the housing challenge. I believe that I can support virtually every specific proposal that Senator BOND has made.

The Banking Committee markup is scheduled for May 2, less than 2 weeks away. I intend to work cooperatively and intensely in the next few days with Senator BOND, with other Senators, and with the administration to draft a housing bill that deserves the strong support of the administration, of Senators on both sides of the aisle—Republicans and Democrats alike—and of the American people.

I yield the floor.

EXTENSION OF MORNING BUSINESS

Mr. ADAMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington is recognized, and also reminded that the time for morning business has expired.

Mr. ADAMS. Mr. President, I ask unanimous consent that morning business be extended until 1:30 p.m., with Senators permitted to speak for up to 7 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BREAUX). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. REID). Without objection, it is so ordered.

TRIBUTE OF LT. COL. DONALD GENE GOFF, U.S. ARMY, ON THE OCCASION OF HIS RETIREMENT

Mr. THURMOND. Mr. President, I rise today to recognize the military service of Lt. Col. Donald Gene Goff on the occasion of his retirement from the U.S. Army.

Colonel Goff's current assignment is as chief of the research branch, programs division, Office of the Chief of Legislative Liaison. In addition to overseeing the office's legislative research efforts, he serves as speechwriter for the chief of legislative liaison and monitors the Army's budget. In his latter responsibility, he interfaces with the House and Senate Budget Committees and the Congressional Budget Office.

As did many of the fine officers in our Army, Colonel Goff graduated from the U.S. Military Academy in 1970. He completed airborne and ranger training. Following his initial tour in Europe, he attended flight school where he distinguished himself as an honor graduate.

Following aviation tours in Korea and Fort Carson, Colonel Goff earned a master's degree in education and counseling from Duke University. He subsequently served as an associate professor at West Point.

Colonel Goff's last overseas assignment was at Headquarters III Corps Forward in the Netherlands. In 1987, he was assigned to the Office of the Deputy Chief of Staff for Personnel, Department of the Army. In 1988, he was reassigned to the Office of the Chief of Legislative Liaison.

Throughout his distinguished career, the Army has recognized Colonel Goff's contribution to our Nation by twice awarding him the Army Commendation Medal, twice awarding him the Meritorious Service Medal and, most recently, the Legion of Merit.

I join his many colleagues in wishing Colonel Goff and his family well as he embarks on a new career in the civilian community.

Thank you, Mr President.

MOTION PICTURE COPYRIGHT PROTECTION ACT OF 1990

Mr. KOHL. Mr. President, during the 1980's the videocassette recorder [VCR] revolutionized the way Americans entertain themselves. Over the past decade, it has become easier and less expensive to watch a movie at home than in a movie theater. In fact, revenues for cassette rentals—nearly $7 billion in 1989—actually surpassed earnings from theatrical exhibitions and television sales.

For the most part, the development of videocassettes has benefited American society. It has enhanced our motion picture industry, which holds copyrights on the motion pictures. It has fostered entrepreneurialism and created hundreds of thousands of new jobs. And it has given consumers—those of us who go to the local store to rent movies—unprecedented choice

and unsurpassed convenience at moderate prices.

But the success of the video industry is threatened by "pirates" who make illegal copies of protected works. According to the Motion Picture Association of America [MPAA], this illegal copying costs the film industry over $100 million every year. The MPAA estimates that nearly 10 percent of all U.S. video stores peddle some counterfeit videos.

Unauthorized copying harms the motion picture industry, which receives no income from "bootleg" cassettes. Honest video dealers suffer as well because their unscrupulous competitors can offer more videos at lower prices. But the biggest loser from illegal copying is the consumer, who too often rents or buys pirated tapes of inferior sound and picture quality.

During the past few years, motion picture companies have taken steps to combat unauthorized duplication—and to protect their copywright works—by treating videocassettes with an anticopying process. This process adds a series of electronic pulses to the vertical blanking interval of a video signal. These pulses do not affect the picture or sound quality of the original cassette, but they ensure that no watchable copies can be made from that original. More than half of all new motion pictures released on videocassette are protected by this process.

Unfortunately, technology that undermines this copy protection has also been developed. These devices, often called "black boxes," effectively neutralize the anticopy process and allow counterfeiters to make clean copies.

Though there are criminal laws on the books to punish this type of illegal copying, law enforcement does not have the resources to catch the vast majority of video pirates. And current copyright law is inadequate to solve the problem. While a video dealer who uses a black box to duplicate a copyrighted movie will be found guilty of copyright infringement, the manufacturer of the same black box can often escape liability for contributory infringement. Unless we provide a sufficient deterrent to the production of copyright-defeating technologies, we will not be able to halt the flood of bootleg videotapes.

To protect the consumers' in high-quality video products, the video dealers' interest in fair competition and movie industry's interest in the integrity of this copyrights, I have introduced the Motion Picture Copyright Protection Act of 1990 (S. 2441). Identical legislation has been introduced in the House by my colleagues, HOWARD BERMAN and CARLOS MOORHEAD.

Our bill is straightforward, effective, and limited in scope. It would modify the Copyright Act to make it infringement to import, manufacture, sell, or distribute any equipment, the "primary use" of which is to defeat anticopy protection. And it also would make clear that the copyright holder has the exclusive right to treat its works with anticopy protection. The bill would address both tangible technologies, like a black box, and intangible processes that undermine copyright. Simply put, it would allow the motion picture industry to go after illegal copying at its source.

However, our bill would neither circumscribe legal VCR use nor limit emerging VCR technologies. And it would not affect equipment with a legitimate primary purpose—only those devices whose stated purpose is a mere protect for piracy.

Mr. President, the Motion Picture Copyright Protection Act is not a panacea for the complex problem of illegal copying. But it does help respond to the very real threat that unauthorized reproduction poses to the video marketplace.

The United Kingdom has already enacted similar legislation banning black boxes. And the U.S. Register of Copyrights has stated that "the fundamental approach of the bill is compatible with U.S. copyright policies." I urge my colleagues to follow their lead, and swiftly enact this important measure.

I ask unanimous consent that a copy of the Motion Picture Copyright Protection Act of 1990 be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2441

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Motion Picture Copyright Protection Act of 1990".

SEC. 2. SCOPE OF EXCLUSIVE RIGHTS.

(a) PROCESS OR TREATMENT OF COPIES OF MOTION PICTURES TO INHIBIT REPRODUCTION.—Chapter 1 of title 17, United States Code (relating to the subject matter and scope of copyright), is amended by adding at the end the following new section:

"§ 120. Scope of exclusive rights: Use of copies of motion pictures that have been processed or treated to prevent or inhibit reproduction

"The exclusive right to reproduce a copyrighted motion picture under section 106 includes the right to protect the copies of such motion picture from reproduction, through a process or treatment of such copies which prevents or inhibits reproduction.".

(b) CONFORMING AMENDMENTS.—(1) The table of sections at the beginning of chapter 1 of title 17, United States Code, is amended by adding at the end the following new item:

"Sec. 120. Scope of exclusive rights: Use of copies of motion pictures that have been processed or treated to prevent or inhibit reproduction.".

(2) Section 106 of title 17, United States Code (relating to exclusive rights of copyrighted works), is amended by striking out "119" and inserting in lieu thereof "120".

SEC. 3. MOTION PICTURE REPRODUCTION EQUIPMENT.

Section 501 of title 17, United States Code (relating to infringement of copyright), is amended—

(1) in subsection (a) by striking out "119" and inserting in lieu thereof "120", and

(2) by adding at the end the following new subsection:

"(e)(1) A person is an infringer of the copyright in any motion picture that has been processed or treated for the purpose of preventing or inhibiting the facsimile reproduction of such motion picture, if—

"(A) that person imports, manufactures, sells, or distributes any equipment the primary use of which is to make, assist in, or permit facsimile reproductions, in whole or in part, of copies of any such copyrighted motion picture; or

"(B) that person imports, manufactures, sells, or distributes any equipment which he or she intends or has reason to believe will be primarily used to make, assist in, or permit facsimile reproductions, in whole or in part, of copies of any such copyrighted motion picture.

"(2) As used in this subsection, the term 'equipment' includes materials, circuitry, processes, and the technology (including services) used to design, produce, manufacture, use, or reconstruct such materials, circuitry, or processes.".

SEC. 4. IMPORTATION.

Section 603(a) of title 17, United States Code (relating to importation prohibitions), is amended by inserting before the period at the end the following: ", including the provisions of subsection 501(e) relating to the importation of certain equipment".

MEDICAL RESEARCH DAY

Mr. HATCH. Mr. President, we enter the last decade of the 20th century with an astounding body of knowledge about illness and medicine. Spectacular breakthroughs similar to the virtual elimination of polio in the United States and the worldwide eradication of smallpox await us. Yet, our Federal Government can do more to support medical research, to move America forward toward new treatments and prevention methodologies. The potential losses from a failure to support such research are all too imaginable.

Strong evidence suggests that when it comes to medical research, spending money leads to saving money. One study indicates that from 1900 to 1975, the rate of return on every $1 invested in medical research was $13. The expense averted by the polio vaccine discovery exceeds the cumulative total of all Federal funds ever given to medical research.

What kind of investor would turn down a chance for profits like these? Yet, over the past several years, there has been a continual decline in the percentage of research grant proposals that receive Federal dollars.

The effects are potentially disastrous. Already, the Nation's pool of young researchers is shrinking; the unstable nature of research support

has diminished the attractiveness of medical research careers. Laboratories are showing signs of deterioration because of scarcity of funds does not allow for replacement and renovation.

Countries such as Japan and West Germany are devoting considerably higher proportions of their resources to life sciences than we are. In the 1980's, over 45 percent of drug and medicine patents in the United States have been granted to foreign inventors. This by itself is an alarming fact.

Our Nation has always been a leader in science and medicine. Whatever the political climate, we could always count on being first in advancing humanitarian causes through promoting universal release from illness and unnecessary death. We are perceived as a strong nation not just through our military might but also through our labors to improve the quality of life for every human being. It would be devastating to our Nation's pride to see prestige slip away in one of America's areas of greatest achievement.

Decreasing competitiveness would, of course, cost us far more than prestige. As we look for answers to our deficit, we must look at the entire financial picture. With medical costs making up so much of the GNP, we should remember the significant amount of those dollars going to foreign investors. We should remember that spending on medical research will keep down future expenses. The answer to our deficit problem will not come from any one miraculous fix. The answer will come through a number of sensible steps such as investing in research.

We would be investing in our future well-being and our children's well-being, too. What price could we ever place on a child's life? Look at the dramatic successes made in the area of childhood cancer. The National Cancer Institute estimates that the number of children living at least 5 years after a diagnosis of cancer is 63 percent—up from 24 percent in 1950. Mortality rates have declined from 8.3 per 100,000 in 1959 to 3.5 in 1986. Mr. President, these are my kind of statistics.

More than 40 years ago, acute lymphoblastic leukemia [ALL] was uniformly fatal for children. Today, the survival rate is 70 percent. Before the 1970's, fewer than 30 percent of children obtained long-term disease-free survival from non-Hodgkin's lymphomas. Currently, about 60 percent of children with this disease are considered curable.

Increased understanding of these diseases and new therapies, such as bone marrow transplantation and immunotherapy, have made these advances possible. These successes have created new challenges and are generating new research. Care for the child with cancer now focuses on psychosocial and survivior issues such as compliance with treatment regimens and long-term pain and anxiety control. Money spent on research will continue to create successes and offer lives to those coping with and cured of disease.

We have not even begun to reach our limits of capability and potential. Clearly, we must continue to support and expand our commitment to medical research. We must work to fulfill both the need and the promise.

Private industry, academia, and the voluntary health community contribute billions of dollars each year to medical research and will continue to contribute more. But success in the past has come from a public-private partnership, and the Federal Government must do its share.

Americans can be proud of the results from our Nation's support of medical research; indeed, they benefit from it in many ways. Our public policy goals must include medical research as a high-level national priority.

Generous Government funding for medical research will allow us to enter the 21st century prepared to meet emerging health care problems as well as the challenges of increasing research competition from abroad and deficit reduction. We can ensure that American medicine in the next century continues to achieve the remarkable successes it has made in this one.

PROFILE IN COURAGE AWARD

Mr. HELMS. Mr. President, Parade magazine recently invited nominations for its annual Profile in Courage Award, sponsored by the children of the late President John F. Kennedy.

William J. Hopwood, from Miami, FL, has nominated Mrs. Lillian Baker, a fine lady and prominent historian from Gardena, CA.

Mr. President, I will ask unanimous consent that the text of Mr. Hopwood's nomination letter be printed in the RECORD at the conclusion of my remarks.

In addition to her other accomplishments, Mrs. Baker's latest book, "American and Japanese Relocation in World War II: Fact, Fiction, and Fallacy," has recently been published. In it, Mrs. Baker clarifies much of the misinformation that has been circulated about a particularly emotional time in our history.

I ask unanimous consent that the letter to which I referred be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MIAMI, FL,
March 9, 1990.

THE PROFILE IN COURAGE AWARD COMMITTEE,
John F. Kennedy Library Foundation, Boston, MA.

TO THE COMMITTEE: It was once my privilege to have a long conversation with Joseph Kennedy, Jr., shortly before Pearl Harbor. We met at Naval Air Station, Jacksonville, Florida, where I was stationed and he, as a Naval Aviator, was flying through. Now, half a century later, I can see and hear him in my mind, as if it were yesterday. I believe he would have concurred with my reasons for the nomination I am about to make.

I wish to nominate for the John F. Kennedy Profile in Courage Award a lady who has, through dedication, determination, and personal courage—often in the face of mob harassment and the threat of physical violence—taken upon herself the burden of organizing the considerable opposition to P.L. 100-383 (The Japanese Money Bill) which became law in 1988.

The Act calls for payment of $20,000 each, with an apology, for "human suffering", *only* to persons of Japanese ancestry who were interned, evacuated, or relocated during the early days of World War II, despite the fact that persons of other nationalities were similarly situated but were ignored by the law. In addition to certain Congressmen of Japanese descent, who were small children during WWII, payments and apologies will go to former enemy aliens now living in Japan, former U.S. citizens who renounced their citizenship and returned to Japan, and to thousands of Japanese-Americans who spent the war years in colleges or were born in the relocation centers.

The lady I nominate is Mrs. Lillian Baker, of Gardena, California, an award-winning author, historian, and lecturer (background data attached). Mrs. Baker has, for almost two decades, researched the circumstances surrounding the necessity for internment, and/or evacuation and relocation of enemy aliens and other possible security risks in Hawaii and the U.S. West Coast at the beginning of World War II. She has written three books on the subject, the latest now in the process of release.

Mrs. Baker appeared before U.S. Congressional committees, the Commission on Wartime Relocation, and the California Landmarks Commission on this subject. During the latter two appearances—and in other, non-official hearings—she either was in a wheel-chair or assisted by a walker because of physically disabling conditions. She was not allowed to enter such hearings except under guard for her own protection against Japanese-American racial dissidents and other radical elements.

When in Seattle, before appearing on a radio talk show at KOMO, Mrs. Baker was advised to avoid public areas for her own safety, and was escorted to and From the radio station by security personnel. When at Fullerton University, Mrs. Baker was requested to move from the university auditorium to a smaller room in order to guarantee her personal safety. And all of this for defending historical truth!

Lillian Baker has opposed redress and reparations from the beginning. She was not alone, but she was the LEADER. Because of this lady's aggressive volunteer direction of the coalition group, Americans for Historical Accuracy, composed of various World War II individual veterans, veteran groups (including ex-POW's), and other concerned

citizens, the constitutionality of this law is now being challenged in the D.C. Federal Court because it clearly discriminates on the basis of our national origin.*

Syndicated columnist Charley Reese has accurately described the redress and reparations movement as: ". . . a gratuitous insult to American wartime leaders who (were) unjustly branded racist and hysterical. It is an insult to the 300,000 American war dead for whom there is no compensation, and for whom World War II was not a government-supported inconvenience but a hard death. It is an Orwellian re-write of history . . . a monstrous lie concocted by radicals who have been at this project since 1981."

President Kennedy was one for whom World War II was more than an inconvenience. It was suffering and near-death. His brother, Joseph Kennedy, Jr., was one of our 300,000 American war dead.

I believe Joe Kennedy, Jr., would have admired Lillian Baker, and so, too, would his brother, the President-to-be. They would not have admired the Congressional law now under constitutional challenge which was written on the basis of a discredited Commission report** branding the World War II administration of Franklin Roosevelt as guilty of "race prejudice, war hysteria, and a failure of political leadership." They knew better. So does Lillian Baker.

Thank you for considering my nomination of Mrs. Lillian Baker.

Sincerely,

WILLIAM J. HOPWOOD,
CDR USNR (ret.).

HIGH TAXES AND BEWILDERING TAX LAWS LEADING TO REVOLT?

Mr. HELMS. Mr. President, at this time of year, many Americans are understandably furious after paying their income taxes—for two reasons: First, they resent the enormous burden that taxes, at all levels, take from their family income; and second, they are increasingly frustrated by the complex maze of forms and procedures required to fill out even the simplest tax return.

Mr. President, in an article in the February 1990 edition of Tax Features, the Tax Foundation provides an analysis of the tax burden that will face a typical moderate-income family of four in 1990. The Tax Foundation reviewed the financial frustration for a family with two workers earning a total of $45,000, who have two dependent children.

That family's total Federal tax bill, including both direct and indirect Federal taxes, will be $12,938. And that does not include State and local taxes.

The Tax Foundation also announced recently that in 1990, Tax Freedom day will fall on May 5. That means that everything the average taxpayer earns from January 1 until May 5 goes to the Federal, State, and local government.

Mr. President, I am sure that the tax experts at the Tax Foundation are confident in their estimate of the amount of taxes owed by the average taxpayer and the typical family. Unfortunately, even tax experts do not always agree on the correct determination of taxes owed. Why? Because our tax laws have become unnecessarily complex.

Recently, I received a couple of excellent articles written by Tom Camp of Shelby, NC, in which he explains the frustrations faced by taxpayers. Mr. Camp refers to a study conducted with 50 professional tax preparers. Each was given an identical financial scenario for which each was to determine the correct tax. It is appalling that no two of the tax preparers came up with the same answer.

Mr. President, I will ask unanimous consent that the text of the Tax Foundation articles and the articles by Mr. Camp be printed in the RECORD at the conclusion of my remarks.

Mr. President, I receive thousands of letters throughout the year from citizens who are fed up with both the amount of taxes they have to pay and the complexity of the tax laws. Our tax laws make otherwise well-intentioned, law abiding citizens feel like criminals when they make a mistake in their taxes and then face enormous fines and penalties.

Furthermore, I hear from hundreds of corporate executives who warn that because of the tremendous cost and difficulty they face in trying to comply with the tax laws regarding employee benefits, they will be forced to abolish their companies' employee benefits plans.

Mr. President, this is an absurd situation approaching a crisis stage. It is high time that Congress come up with a genuine tax reduction and simplification effort before tax revolt breaks out in America.

I ask unanimous consent that the material to which I earlier referred to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AN APPEAL TO WASHINGTON
(By Tom Camp)

Why?

One good reason is all we ask.

Why are tax laws so many and so complex the average citizen can not come close to correctly figuring his own taxes?

Why is preparing tax forms so complicated that even professional tax consultants demand immunity from penalties charged for mistakes and miscalculations?

Why can't we have a tax code so simple every educated taxpayer can get the annual chore over with in a matter of minutes?

Why?

If frustration is the vanguard of revolt, then this country is just a short form away from revolution. The victims of an impossible burden have become the accused. And they are fed up, angry.

The typical tax cheat is an ordinary citizen who commits his crime with a pencil while trying not to.

A friend tells me he is being "investigated" by the Internal Revenue Service. Not audited, investigated. Each year he has paid a reputable accounting firm to prepare his taxes. Each year, he says, he has provided the accountant with all bank statements, deposit slips, cancelled checks, and all other materials necessary for preparing a tax form. He has tried to abide by the tax laws.

Recently, an IRS agent left a calling card at his house, and with it warning that he was being "investigated." My friend is scared. An IRS calling card naturally scares the hell out of people. Tax investigators have been known to boast they can indict anybody, anytime, because taxes are never filed absolutely without error.

The situation is worthy of a banana republic, where nothing is right unless the dictator says it is.

A tax accountant tells me of a study in which 50 professional tax preparers were given identical sets of documents from which to complete a tax filing. No two preparers completed the task the same way. Only two prepared the forms close enough to correct that the phantom taxpayer would not have been hit with stiff penalties.

Two out of 50 is a rotten score, but it's better than average citizens can do.

A taxpayer who can't possibly get his tax forms filled out correctly is a taxpayer who can't possibly comply with the tax laws. Law-abiding citizens are being forced into criminal acts. And whose fault is it? Not the taxpayer's. April 15th is an annual bog of quicksand he can't avoid.

The essential duty of government is protection of the people from government. That's why our Founding Fathers wrote a Constitution—to get the government off the backs of the governed. But today, the tax code is a giant foot on the public's neck which wounds us all, some tragically.

Any citizen who is "investigated" by the IRS loses something in reputation. The very fact that an investigation occurs cast a shadow of doubt that lasts a lifetime. You can't heal a broken reputation by covering it with a bandaide that says "he was not guilty after all."

Too much law creates criminals just as much as too little law does.

We citizens can bring this criminality forced on us to a screeching halt by simply banding together and refusing to file tax forms until we can do so under laws we understand and with which we, ourselves, can comply. We can refuse, collectively, to even make an effort to figure our taxes until we feel we can do it correctly.

Or, our elected representatives in Washington can get busy, get smart, forget the special interest groups, forget who contributed what to whose campaign fund, and write some simple tax laws.

An illustration of simplicity: If you made less than $15,000 last year, you owe no taxes. If you made $15–30,000 you owe 10 percent of what you made. If you made $30–50,000 you owe 12 percent of what you made. And so on, making the salary ranges and percentages whatever is fair.

With such a simple system, everybody would pay, right up to the billionaires. There would be no long forms, no deductions, no loopholes. And every taxpayer with the ability to multiply could figure and file his own taxes.

The IRS could afford to audit everybody with half the work force it has now. April 15th would cease to have a bad name. We would probably see a drop in violence and heart attacks and blood pressure.

As it now stands, the government is only preserving disorder. Guys and gals, we are

frustrated. We might be only an April or two away from damn mad. And tax revolt.

It has happened in this country before, you know.

GUESS WHO DOESN'T UNDERSTAND THE TAX LAWS

(By Tom Camp)

An incompetent person, reads the law, does not have the mental capacity to fully comprehend legalities, to make contracts, or to control and dispose of property.

Thanks to the current tax laws, we all have a fair chance of being declared incompetent.

Figuring and filing taxes is one of the most complex, regulated activities in which any American citizen takes part. Since every taxpayer is bound by law to figure and file income taxes annually, the tax laws should be reasonable, understandable, and workable. At present, they meet neither of those criteria.

According to the American Payroll Association, more than $2 billion in penalties will be paid by United States companies this year for improper filing of payroll taxes. That's $2 billion in errors made by professional tax experts, not by individual taxpayers who are not trained and educated to perform the function.

If the experts can't get it right, what chance does John Doe the Ditchdigger have?

But here's the clincher: A recent study revealed that nearly half—HALF!!—of the 36 million letters the Internal Revenue Service mailed to taxpayers last year, demanding additional taxes and penalties, contained errors and miscalculations. As a consequence, taxpayers coughed up $7 billion in taxes they did not owe.

If the Internal Revenue Service can't get it right, what chance does Jim Smith the Salesman have?

People in this country live out their lives in fear of the IRS. It is the kind of relationship government agents enjoy. It has been nurtured into present almighty proportions.

Taxpayers, already confused and frustrated by the tax laws, are simply afraid to challenge claims and demands made by IRS agents, who have the capability of ruining reputations and careers. The IRS has become one of the most feared, if not despised, police and regulatory bodies in history.

Internal Revenue agents have a job to do, sure. We can all respect that. But respect does not automatically flow through to their methods or competence.

The Watergate scandal revealed that federal officials had attempted to use the IRS to punish their political enemies. Witnesses at the congressional hearings testified that some officials had arranged special audits of Capitol Hill opponents, for no other reason then harassment and humiliation.

If you have an enemy and want to impose some legal punishment, while you remain under the cloak of anonymity report the bastard to the IRS. At best he'll find the experience bad.

The first income tax was levied in 1862, to pay for the Civil War. It was dropped 10 years later. A second income tax was levied in 1894, but the Supreme Court declared it unconstitutional. In 1909, Congress passed a law providing for the collection of corporate income taxes, but again the Supreme Court declared such laws unconstitutional.

Finally getting the message, Congress worked for and got passed the 16th Amendment, which legally gives Congress the right to levy income taxes. From there, the laws have grown into monsters which pay our governmental bills but at tremendous loss in freedom and peace of mind.

When governmental regulations go wrong, we the citizens have the right and the duty to oppose them and to battle for change through our individual and collective actions.

The tax laws have us frustrated and angry. Unless the government comes to terms with the problem it created, those people in eastern Europe we see parading in protest across our television screens might be turning on their televisions to watch us.

Maybe we should all declare ourselves incompetent to understand the tax laws, and therefore unable to dispose of property.

AVERAGE FAMILY FACES TAX BILL OF $12,938 IN 1990

President Bush has released the Administration's budget to an uproar of criticism and commentary from interest groups all along the political spectrum, but few people are asking the most basic, down-to-earth question: How much will the government tax the average American family and how will that money be spent? According to Tax Foundation economists, a moderate-income family—two workers earning $45,000 with two dependent children—faces a tax bill of $12,938 for 1990. That covers the family's direct and indirect federal taxes. Add to this its $718 "share" of the federal deficit and the average family will contribute $13,656 to support the estimated $1.23 trillion Uncle Sam plans to spend in the new budget.

Assuming that the $12,938 tax bill is allocated to cover the typical family's entire share of federal spending, the following expenditures stand out:

Income security tops the list at $418.5 billion. This comprises primarily Social Security, federal retirement, and unemployment, extracting 33 cents for each $1 the American family sends to Washington, for a per-family total of $4,237.

National defense will cost $303.3 billion—or 24 cents out of each tax dollar. For the moderate-income family, this amounts to $3,070 per year.

Interest payment on the federal debt ranks third at $173 billion, costing a family 13 and ½ cents of its tax dollar, or a whopping $1,751 per year.

Health outlays, mainly Medicare and Medicaid, will take 13 cents of each tax dollar. The typical family will send Uncle Sam $1,643 in 1990 to pay for the $162.3 billion national health bill.

These four items alone will claim 83 percent of all federal spending and will cost the moderate-income family $10,701, or 83 cents of each tax dollar. Compared to these big four items, spending on all other programs is relatively small. With the remaining 17 cents, Uncle Sam will spend 3 cents of the family's tax dollar on education, and less than 3 cents each on environment, transportation, science, and administration of justice.

THE FAMILY TAX BILL

Direct federal taxes—individual income and personal Social Security taxes—will cost this family $8,219 in 1990. However, direct levies do not explain the whole tax burden, accounting for only about three-fifths of what the government takes in. To these must be added such indirect taxes as the employer's share of Social Security taxes; corporate income taxes; excise taxes on such items as gasoline, liquor, and tobacco; and miscellaneous levies. These will take another $4,719 from the average family's income.

Direct and indirect federal taxes will claim 28.8 percent of this family's annual income, but even that does not tell the whole story. All told, current federal taxes and borrowing will add up to nearly 30 percent of the moderate-income family's earnings.

HOW THE FEDERAL GOVERNMENT WILL SPEND A FAMILY'S TAX DOLLAR IN 1990 [1]

Function	Family's share		Spending (billions)
	Amount	Percent of total	
Income security [2]	$4,237	32.75	$418.5
National defense	3,070	23.73	303.3
Net interest	1,751	13.54	173.0
Health [3]	1,643	12.70	162.3
Education, training, employment, social services	415	3.21	41.0
Veterans benefits and service	307	2.37	30.3
Transportation	302	2.33	29.8
Environment and natural resources	184	1.42	18.2
International affairs	184	1.42	18.2
Commerce and housing credit	174	1.35	17.2
General science, space and technology	168	1.30	16.6
Agriculture	151	1.17	14.9
Administration of Justice	128	.99	12.6
General Government	114	.88	11.3
Community and regional development	79	.61	7.8
Energy	30	.23	3.0
Total	12,938	100.00	1,233.3

[1] This example uses a two-earner family earning $45,000 per year with two dependent children.

[2] Primary social security. Includes federal employees retirement, unemployment compensation, and nutrition assistance. Exclude veteran's income security.

[3] Primary Medicare and Medicaid. Excludes veteran's health care.

[4] After deducting $44.7 billion in undistributed and offsetting receipts not classified by function.

TAX FREEDOM DAY 1990 IS MAY 5: TWO DAYS LATER THAN 1989—LATEST DATE EVER

WASHINGTON, DC, April 16, 1990.—As Americans scramble to comply with the April 16 IRS filing deadline, they may think they will be free from the tax collector at the end of the day, but Tax Freedom Day doesn't come until May 5 this year. The Tax Foundation has calculated that to be the day when the American taxpayers will have earned enough money to pay this year's total taxes.

That means the average taxpayer will labor 125 days—from January 1 to May 5—to satisfy all federal, state and local tax obligations, with every cent earned from the beginning of the year going to the tax collectors. Finally, on May 5, he will heave a sigh of relief and start pocketing some of his hard-earned money.

Especially bad news is that May 5th is the latest Tax Freedom Day ever. Last year this task required 123 days and Tax Freedom Day fell on May 3. The Tax Foundation attributes the two-day advance to several important factors:

The base-broadening provisions in the Tax Reform Act of 1986 and other legislation have subjected a greater percentage of income to taxation.

The January 1, 1990, increases in the Social Security taxable earnings base and tax rate will cost taxpayers over $10 billion this year alone.

Many state and local taxes have increased sharply due to demand for higher spending.

The slowdown in economic growth has reduced the growth in individuals' incomes.

Among these factors, the most significant is the projected slowdown in income growth for 1990. The nation's nominal income is es-

timated to grow only 5.7 percent while the total tax take is projected to increase 7.2 percent. Stated simply, tax increases will outpace the growth in dividuals' incomes during 1990.

TAX FOUNDATION TO UNVEIL STATE-BY-STATE TAX FREEDOM DAY AT APRIL 16 PRESS CONFERENCE

Tax Freedom Day has always been calculated using nationwide data. The Tax Foundation has analyzed each state's tax burden and for the first time coputed a 1990 Tax Freedom Day for each state and the District of Columbia. A Tax Foundation Special Report with this information will be distributed the morning of April 16 in the Zenger Room of the National Press Club from 10:00 a.m. to 12 noon. Tax Foundation economists will be on hand to answer questions and give interviews.

THE TAX BITE IN THE EIGHT-HOUR DAY

Another way to graphically express the tax burden's effect on the average worker's paycheck is the Tax Bite in the Eight-Hour Day. In 1990, Tax Foundation analysts estimate that the average worker will spend 2 hours and 45 minutes of an 8-hour day working to satisfy federal, state and local tax collectors—three minutes more than in 1989. One hour and 47 minutes will go towards federal taxes while 58 minutes will be devoted to state and local taxes.

TAX BITE IN THE 8-HR DAY, 1989–90

[Hours: minutes]

	1989	1990
Total taxes	2:42	2:45
Federal	1:46	1:47
State and local	:56	:58
Total personal consumption expenditures	5:18	5:15
Housing and household operations	1:26	1:25
Food and tobacco	:58	:57
Health and medical care	:46	:46
Transportation	:39	:39
Recreation	:25	:25
Clothing	:23	:22
All other	:41	:41
8-hr day	8:00	8:00

Source: Tax Foundation.

So with the bulk of his workday, 2 hours and 45 minutes, spent working for the tax collector, where does the average worker spend the remaining 5 hours and 15 minutes of earnings? The largest portion is spent on housing and household operations: 1 hour and 25 minutes. Food and tobacco take 57 minutes while health & Medicare costs absorb 46 minutes. Taxpayers will then work 39 minutes for transportation expenditures, 22 minutes for clothing, and 41 minutes for "all other" expenditures (personal care, personal business, private education, religious and welfare activities, foreign travel, and net savings). The typical worker spends the money he makes during the last 25 minutes of the day on recreation.

TAX FREEDOM DAY HISTORY

The May 5, 1990, Tax Freedom Day is the latest date on record, continuing the decades-long trend of rising tax obligations. The early 1980s saw Tax Freedom Day at an all-time high of May 4 in 1981. The Reagan tax cuts under the Economic Recovery Tax Act of 1981 (ERTA) helped reduce the federal tax burden and we witnessed a temporary decline in the date of Tax Freedom Day to April 28 in 1984. Since then, major tax legislation has boosted the date to its present high of May 5. Except for the Tax Reform Act of 1986, the major drive behind tax legislation after 1981 was purely and simply to increase tax revenues. Fifteen separate tax bills passed since ERTA have resulted in net tax increases.

The state and local tax burden peaked in the 1976–1977 period before Proposition #13 in California set off a successful round of tax limitation measures in the states. The state/local tax burden dipped until 1981, then resumed its steady long-term rise. Continued fiscal pressures in many states indicate that this trend is likely to continue.

TAX FREEDOM DAY AND TAX BITE IN THE 8-HR DAY

	Tax freedom day		Tax bite (hours minutes)		
	Day	Number of days	Total	Federal	State/local
Year:					
1984	Apr. 28	119	2:36	1:42	:54
1985	May 1	121	2:38	1:44	:54
1986	May 2	122	2:40	1:44	:56
1987	May 4	124	2:43	1:47	:56
1988 [1]	May 2	123	2:41	1:45	:56
1989	May 3	123	2:42	1:46	:56
1990 [2]	May 5	125	2:45	1:47	:58

TAX FREEDOM DAY OUTLOOK

Although the average American will work until May 5 and forfeit over 34 percent of his total income in 1990, the government will spend all that money and more. It should be noted that Tax Freedom Day does not reflect the estimated $124 billion in federal deficit spending for 1990. It can be argued, of course, that the average worker does not have a definite "share" of this deficit and will feel its effect through future increases in the tax burden and/or a weaker economy.

Spending a record 125 days until May 5 to pay off the tax collectors may come as a shock to many Americans. However, the combined pressures of a persistent federal budget deficit, demands to expand funding for new and existing programs, budget crises in numerous states and the slowdown in income growth could easily make Tax Freedom Day even later on our calendars.

The Tax Foundation is a nonprofit, nonpartisan research and public education organization founded in 1937 to monitor tax and fiscal activities at all levels of government.

[From the Tax Foundation, April 1990]

MAY 5 TAX FREEDOM DAY IS LATEST EVER: STATE-BY-STATE TAX FREEDOM DAYS VARY NEARLY 5 WEEKS

(By Paul G. Merski)

National Tax Freedom Day for 1990 falls on May 5. Tax Foundation economists estimate that the average American will work 125 days—from January 1 to May 5—to satisfy all federal, state and local tax obligations, with every cent "earned" from the beginning of the year going to the tax collectors.

While National Tax Freedom Day is May 5, the tax freedom dates for individual residing in various states will depend on their specific tax and income situations. In order to examine how the tax burden of the fifty states and the District of Columbia compare, the Tax Foundation has calculated state-specific estimates of Tax Freedom Day.

Table 1 presents 1990 Tax Freedom Day by state and rank. Tax Freedom Day estimates are calculated to represent "tax burdens" and should not be confused with tax collections. The tax burden is defined as total taxes as a percentage of total income for each state. The Tax Freedom Day by state methodology is designed to determine the geographic incidence of taxes.

THOSE WHO PAY TAXES THE LONGEST

Compared to the May 5 National Tax Freedom Day which requires 125 days, the residents of fifteen states and the District of Columbia will need to work 125 days or more before reaching their specific Tax Freedom Day (see map). Tax Freedom Day arrives the latest in the following "top ten" taxpaying states:

State	Number of days	Tax freedom day	Rank
District of Columbia	143	May 23	1
New York	143	May 23	2
Delaware	138	May 18	3
Hawaii	137	May 17	4
Connecticut	132	May 12	5
Maryland	132	May 12	6
New Mexico	130	May 10	7
Alaska	129	May 9	8
New Jersey	129	May 9	9
Massachusetts	128	May 8	10

Individuals in these top ten states will spend, on average, 9 extra days working to pay off their total tax liabilities when compared to the national average. At the top of this list, residents of New York and the District of Columbia will work an extra two and one-half weeks more than the average American before fulfilling their tax obligations.

THOSE WHO PAY THEMSELVES FIRST

On the early end of the 1990 Tax Freedom Day Calendar are the residents of the following ten states:

State	Number of days	Tax freedom day	Rank
New Hamsphire	109	Apr. 19	51
South Dakota	109	Apr. 19	50
Mississippi	110	Apr. 20	49
Idaho	114	Apr. 24	48
Oregon	115	Apr. 25	47
Nebraska	115	Apr. 25	46
Arkansas	115	Apr. 25	45
Montana	116	Apr. 26	44
Iowa	116	Apr. 26	43
Indiana	117	Apr. 27	42

Individuals in these states will satisfy their total tax obligations an average of 11 days earlier than the national average.

The residents of New Hamsphire and South Dakota, for example, will finish paying off their taxes more than two weeks earlier than the average American and a month earlier than the residents of New York and the District of Columbia.

FEDERAL VS. STATE/LOCAL BURDEN

The Tax Freedom Day by state and type of tax is presented in Table 2. Here the effects of federal and state/local taxes are examined separately. Individuals in the State of Hawaii, for example, will finish paying off their federal tax burden five days earlier than the average American but will spend an extra 17 days to pay state and local taxes. Therefore, the average Hawaiian will spend 60 days working to pay state/local taxes and 77 days to satisfy federal collectors. Combined, the 137 days an average Hawaiian will spend working to pay off all taxes puts his 1990 Tax Freedom Day at May 17.

TAX BITE IN THE EIGHT-HOUR DAY

How much time does the average American work each day to pay all taxes? How does the eight-hour tax bite differ from state to state?

Measuring the bite that taxes take from the typical worker's eight-hour day provides another prespective on the weight of government on the private production of the nation. In 1990, the average American will spend 2 hours and 45 minutes of an 8-hour-workday to satisfy federal, state and local revenue collectors. The federal government will claim 1 hour and 47 minutes while state/local needs will take a 58-minute chunk.

Table 3 provides a state-by-state comparison of the Tax Bite in the Eight-Hour Day for federal and state/local taxes. The residents of Connecticut, for example, will need 2 hours and 5 minutes of the workday to pay their federal tax burden—about one half-hour more each day than resident in Mississippi who will work about one and one-half hours to pay Uncle Sam. Looking at the variation in the tax bite at the state/local level, at the low end, individuals in New Hampshire will spend 23 minutes each workday to pay state/local tax obligations while, at the high end, the residents of Hawaii will need a full hour to finish this task.

TABLE 3.—TAX BITE IN THE 8-HOUR DAY: STATE-BY-STATE COMPARISON

[Calendar year 1990]

	Hours: Minutes		
	Total taxes	Federal taxes	State/local taxes

TAX FREEDOM DAY CALCULATION

Tax Freedom Day represents the nation's "effective" tax rate or total taxes as a percentage of total income. For 1990, the Tax Foundation estimates that rate to be 34.1 percent. The associated 1990 tax and income figures for the U.S. as well as each state's share of these totals are presented in table 4. In the state of Missouri, for example, total taxes are $32.1 billion and total state income is estimated at $96.9 billion. Therefore, Missouri's ratio of taxes to income is 33.1 percent—1 percent lower than the 34.1 national average. While the National Tax Freedom Day is May 5, Missouri's lower overall tax rate causes their Tax Freedom Day to occur four days earlier on May 1.

The 1990 estimated totals for federal and state/local tax and income amounts are based on National Income and Product Account (NIPA) data produced by the U.S. Department of Commerce, Bureau of Economic Analysis. The Tax Foundation, in cooperation with other organizations, has developed a special allocation methodology to distribute the total federal and state/local tax burden by state.[1] This allocation determines the geographic origin of taxes to show where the burden of taxes is actually borne. Total income in the Tax Freedom Day analysis is represented by Net National Product (NNP).[2] Each state's share of this income total is allocated based on its specific state product and personal income.

While the results presented in this report are useful in making broad state-by-state comparisons, caution should be used in drawing conclusions from any one table.

A single analysis cannot fully reveal the entire story about a state's taxation. While this analysis specifically examines each state's total tax revenues, states may collect significant amounts of revenues from non-tax sources.

Despite the allocation of each state's tax and income amounts based on their geographic origin, the exact degree of tax burden that a state may export to nonresidents is not quantifiable. For example, a portion of sales tax in a high tourist state will be paid by nonresidents.

Finally, relatively small differences in the tax and income figures between states may cause big differences in rankings.

TAX FREEDOM DAY OUTLOOK

Although the average American will work until May 5 and forfeit over 34 percent of his total income in 1990, the government will spend all that money and more. It should be noted that Tax Freedom Day does not reflect the estimated $124 billion in federal deficit spending for 1990. It can be argued, of course, that the average worker does not have a definite "share" of this deficit and will feel its effect through future increases in the tax burden and/or a weaker economy.

Spending a record 125 days until May 5 to pay off the tax collectors may come as a shock to many Americans. However, the combined pressures of a persistent federal budget deficit, demands to expand funding for new and existing programs, budget crises in numerous states and the slowdown in income growth could easily make Tax Freedom Day even later on our calendars.

TABLE 4.—TAXES AS A PERCENTAGE OF INCOME: STATE-BY-STATE COMPARISON, TOTAL, FEDERAL AND STATE/LOCAL TAXES

[Calendar year 1990]

	Taxes as a percent of total income (billions)			Income (NNP)	Taxes (percent)

EARTH DAY 1990

Mr. KENNEDY. Mr. President, two decades ago, America witnessed one of the largest peaceful nationwide demonstrations in the country's history. In 1970, the first Earth Day brought together over 20 million Americans in a call to protect our fragile planet and to ensure the preservation of our natural resources.

In response to the widespread concern for the environment demonstrated on that historic day, Congress established the Environmental Protection Agency and enacted a far-reaching series of measures designed to reduce the pollution of our lakes, rivers, and oceans, and to clean up dangerous toxic wastesites. We were also spurred to take the first important steps in addressing the increasingly serious problem of air pollution.

Today, as we pay tribute to the successes of the past 20 years, we also recognize the major challenges that lie ahead. We must do a better job of addressing urgent contemporary environmental problems such as smog in our cities, toxic waste dumps leaching poisons into our ground water, pesticides contaminating our food supply, the solid waste disposal crisis, the acid rain destroying our forests and lakes, oil spills threatening our coastlines, the continuing depletion of our wetlands, and the overdevelopment of our public lands. And we know now, better than we realized in 1970, that many of the critical environmental challenges we face are global in scope. Ozone depletion, global warming, destruction of the rain forests, and the greenhouse effect have captured the public consciousness. They are universal threats to all of us and to all future generations, because they jeopardize the very future of our planet.

To deal effectively with these concerns, we need a bold and creative vision, strong leadership, and a national and international commitment to make greater progress toward our goals. As America moves from a cold war economy to a peacetime economy, we have an unprecedented opportunity to take the lead in devoting greater national attention and resources to cleaning up our environment. Doing so is a wise investment in our Nation's future. It is sound environmental policy, and sound economic policy too. As just one example, more and more firms are finding that energy efficiency improvements mean not only reduced air pollution but also lower operating costs, thereby enabling the firms to create new jobs and expand their facilities.

The environmental challenges we face must be addressed at every level—in the legislative arena, in the corporate boardroom, in educational institutions, and in the everyday choices each citizen makes.

Earth Day 1990 is both a celebration of the achievements of the past 20 years and a blueprint for the next 20 years. It promises to lay the foundation for a new generation of environmental awareness and progress. The 100 million people in 122 countries participating in Earth Day events this week are sending a strong signal of broad global support for urgently needed environmental measures.

I am proud to be a sponsor of the Senate resolution designating April 22 as Earth Day 1990, and I salute all those in Massachusetts and across the Nation and the globe for their efforts. We have set the stage for the progress we must achieve together if we are to be faithful to our stewardship of our common planet Earth. The challenge we face is clear. It is up to us to meet it.

PROGRESS SEEN IN HOSTAGE SITUATION—THE CAPTIVITY OF TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,860th day that Terry Anderson has been held in captivity in Beirut.

I make this announcement today—indeed, as I do every day—with a heavy heart, knowing of the hostages' suffering and of their families' grief. But on this day, the burden seems not so heavy as in days past. Real progress concerning the hostage situation appears to be taking place.

As my colleagues now know, the pro-Iranian group, the Islamic Jihad for the Liberation of Palestine, has declared that they would release by Friday one of the three Americans they are holding hostage. Those Americans are Jesse Turner, Robert Polhill, and Alann Steen.

Mr. President, we have been encouraged by such news before, but never by any so seemingly lucid and forthright. We can only hope for the sake of the hostages and their families that this time the reports prove true. We wait.

I ask unanimous consent that the New York Times article concerning the statement by the Islamic Jihad as well as the text of the statement be printed at this point in the RECORD. I would also think it appropriate at this time to include in the RECORD the names of all the American hostages in Lebanon.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 19, 1990]

MILITANTS PROMISE TO FREE AMERICAN—A PRO-IRANIAN GROUP PLEDGES "GOOD WILL" ACT IN BEIRUT

(By Youssef M. Ibrahim)

PARIS, April 18.—A pro-Iranian group believed to be holding three American hostages in Beirut said today that it would release one of them within 48 hours.

The group, the Islamic Holy War for the Liberation of Palestine, said it was acting in response to "urgent appeals by officials of the Islamic Republic of Iran for a good-will initiative in order to close the hostage file."

News agencies in Beirut said the group's handwritten statement was delivered to the Beirut newspaper Al Nahar and to a Western news agency.

BAKER REACTS CAUTIOUSLY

The statement was accompanied by a photograph of Jesse Turner, 42 years old, who was a professor at Beirut University College when he was taken hostage in January 1987. Islamic Holy War has also said it is holding Alann Steen, 50, and Robert Polhill, 54, both of whom were professors at the University College. Experts on Iranian affairs speculated that the hostage to be released was Mr. Turner.

In its statement, Islamic Holy War said that it would like John H. Kelly, the United States Assistant Secretary of State for Near Eastern Affairs, to be on hand in Damascus, Syria, to "coordinate final measures necessary for the success of the release within 48 hours."

In Washington, Secretary of State James A. Baker 3d reacted cautiously to the reports and said there were no plans to send Mr. Kelly, who is in Bonn, to Damascus.

Iranian affairs experts said the formal linking of Iran's name to the pro-Iranian groups said to be holding hostages, and the positive reference to resolving the matter, was a notable change. Iran has previously denied all formal ties to the pro-Iranian groups, who are believed to be holding 18 Western hostages, including 8 Americans.

SYRIAN EFFORTS NOTED

Senior Arab government officials said the move also underlined Syria's wish to improve its ties to the West and its role in the release of hostages held by pro-Iranian militias.

In its statement, Islamic Holy War emphasized "the permanent Syrian efforts in this line," and a senior Palestinian official said tonight that "the whole thing has been cooked up by the Syrians."

Irfan Parviz, the editor of the Teheran Times, the first Iranian publication to call for the release of foreign hostages, also said Syria had helped bring about the development.

"I am really happy," Mr. Parviz said in a telephone interview from his home in the Iranian capital. "I can say it is the beginning and there will be more good news in the pipeline." The Teheran Times is known for its close ties to the Iranian Foreign Minister and President Hashemi Rafsanjani.

The move by Islamic Holy War gives support to the view that the so-called pragmatic faction of the Iranian Government led by President Rafsanjani may have settled a long-running power struggle in Teheran to its advantage.

"I think it does in fact mean that Rafsanjani and company are winning," said Gary Sick, an Iranian affairs expert formerly on the United States National Security Council who handled the first hostage crisis when American diplomats were taken prisoner in Teheran in 1979.

"A HUMANITARIAN GESTURE"

Mr. Parviz said the expected release of American hostages was because of Mr. Rafsanjani's efforts. He dismissed all notions of opposition to the Iranian President's decision to end the hostage question as a "fiction" of the Western press.

"Everything has always been under his control," Mr. Parviz said, adding, "It is a humanitarian gesture to which America can respond by ending its hostile attitude towards Iran."

Mr. Rafsanjani and his supporters in the Iranian Government have long advocated a resolution of the hostage issue to allow Iran to pursue the normalization of relations with Western countries, a process that began with France in 1988 when all French hostages held by pro-Iranian militias were released.

On March 21, Iran began a five-year development program for which it says it needs $27 billion in foreign credits and in hard currency.

Mr. Sick said the Bush Administration should respond to the potential release of an American hostage with "a gesture, but only a small one," adding that the Iranians have begun a long process of negotiations.

"The bottom line is that Rafsanjani wants to see the hostage business ended, not for humanitarian reasons, but so as to get on with his economic programs and to get access to United States technology, particularly in the area of improving Iran's oilfields," Mr. Sick said in a telephone interview tonight.

Arab diplomats noted that the goodwill gesture toward the West comes when Iraq, an enemy of Iran and Syria, finds its relations with the West deteriorating after a long period of improvement that started when the Iraq-Iran war began in 1980.

Virtually all Iranian affairs experts consulted said the offer to release an American hostage and the way it was announced strongly suggested that Iran expects countersteps by the United States.

The United States has repeatedly vowed not to bargain over the release of hostages. For its part, Iran has often asked for the return of Iranian Government funds frozen in the United States.

The statement by the terrorist organization strongly suggested that the move came after negotiations it described as assuring "a fruitful solution for all parties." It said that "all those who should be consulted were unanimous that fruitful and convincing formulas should be sought."

"AN IMPLICIT BARGAIN"

The group also said it was moving to liberate an American hostage "on the basis of reciprocal positive action from the other party to speed the issue toward a happy ending," suggesting that some bargaining over Iranian demands had taken place or was expected.

Mr. Sick and a number of other Iranian affairs experts said they felt some kind of talks between the Bush Administration and the Iranian Government must have taken place. "I don't really know, but I feel there is here an implicit bargain," Mr. Sick said.

Although little is known about Islamic Holy War, it is generally acknowledged that all the pro-Iranian groups holding hostages fall under the umbrella of a Shiite Muslim Lebanese organization known as the Party of God. The group is financed by Iran, but also has ties with Syria, which controls some of Iran's access to Lebanon.

Islamic Holy War said today that it had proposed a way for the United States to respond to its offer in a "a verbal message which will be carried to President Bush."

The statement added, "We wish the humanitarian aspect of this move to be balanced from both sides as a condition for it to move forward, otherwise there is no point in advancing from one side."

On March 15, Islamic Holy War threatened in a statement in Beirut to kill all three hostages unless the United States met its demands. It also threatened to blow up planes carrying Jewish Russian immigrants to Israel.

The group previously offered to trade the three professors for 400 Arabs held in Israeli jails. Israel rejected the proposal.

[From the New York Times, Apr. 19, 1990]

HOSTAGE STATEMENT ISSUED BY MILITANTS

BEIRUT, LEBANON, April 18 (Reuters).—Following is the text of a statement received today by a Western news organization in Beirut, as translated from the Arabic by Reuters. The statement was accompanied by a photograph of an American hostage, Jesse Turner.

The Islamic Holy War for the Liberation of Palestine organization continues the struggle to accomplish its sacred aims.

To achieve the goals for which the captives were held, after the hostage issue was set on an overall positive path to reach a fruitful solution for all parties and all those who should be consulted were unanimous that fruitful and convincing formulas should be sought, Islamic Holy War for the Liberation of Palestine announces the following:

First, in response to the wishes of Islamic leaders and urgent appeals by officials of the Islamic Republic of Iran for a good-will initiative in order to close the hostage file, and without forgetting the permanent Syrian efforts in this line, we have decided to free one American hostage within 48 hours on the basis of reciprocal positive action from the other party to speed the issue toward a happy ending.

Second, we wish the humanitarian aspect of this move to be balanced from both sides as a condition for it to move forward, otherwise there is no point in advancing from one side. We only responded to such wishes from a belief in reaching the solution as it has been proposed and on the basis of the verbal message which will be carried to President Bush. We are ready for either a positive response or escalation and the other party has to choose.

Third, to coordinate final measures necessary for the success of the release within 48 hours, John Kelly should come to Damascus to coordinate some final steps.

Peace on he who serves the right for the sake of right.

The Islamic Holy War for the Liberation of Palestine.

[From the New York Times, Apr. 19, 1990]

THE AMERICAN EIGHT

Terry A. Anderson—Chief Middle East correspondent of The Associated Press; missing since March 16, 1985.

Thomas M. Sutherland—Dean of agriculture at the American University of Beirut; missing since June 9, 1985.

Frank Herbert Reed—Director of the Lebanon International School in Beirut; missing since Sept. 9, 1986.

Joseph James Cicippio—Deputy controller of the American University of Beirut; missing since Sept. 12, 1986.

Edward Austin Tracy—Author and book salesman; missing since Oct. 21, 1986.

Robert Polhill—Assistant professor of business at Beirut University College; missing since Jan. 24, 1987.

Alann Steen—Journalism professor at Beirut University College; missing since Jan. 24, 1987.

Lieut. Col. William R. Higgins, a Marine officer who had headed an observer group attached to the United Nations Interim Force in Lebanon, is believed dead. He was taken hostage Feb. 17, 1988.

"REPEAL OF THE ZIONISM RESOLUTION"

Mr. MOYNIHAN. Mr. President, on March 30 the Subcommittee on Near Eastern and South Asian Affairs of the Committee on Foreign Relations held a hearing on the infamous United Nations resolution equating Zionism with racism. For a decade and a half that Resolution 3379 has tarnished the image of the United Nations in the eyes of the world and rendered the General Assembly totally incapable of playing any constructive role in the search for peace in the Middle East.

It is an unfortunate fact that this resolution was adopted with the support of a large number of nations which receive financial assistance from the United States. Is it possible that the depth of anger Americans feel concerning this resolution has not been explained to these erstwhile friends of the United States, the recipients of our aid? Mr. President, Resolution 3379 must go. I believe that there has been some movement towards its repeal and I encourage the administration to continue to work with our friends and allies—and nations receiving United States aid—to repeal what Andrei Sakharov rightly called an abomination.

Mr. President, following the March 30 hearing, Assistant Secretary of State for International Organizations John Bolton provided me with a list of nations which voted in favor of Resolution 3379 and which presently receive U.S. foreign aid. I ask unanimous consent that this list be printed in the RECORD at this point along with an excellent article on this subject written by Mr. Stephen S. Rosenfeld which appeared in the Washington Post on April 13 under the title "The Zionism Card."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Response to Senator Moynihan's March 30 question to Assistant Secretary of State Bolton: List of countries receiving USG assistance in FY 90 (including Development Assistance, PL-408, Economic Support Funds, FMS and IMET) that voted for the 1975 UN Resolution 3379 equating Zionism with racism.

THE ZIONISM CARD

(By Stephen S. Rosenfeld)

If there was ever to be any redeeming quality to the United Nations' Zionism-is-racism resolution of 1975, it lay in undoing this little emblem of political antisemitism at a moment when the reversal might make its own contribution to Middle East peace.

Not that the grim mischief of 15 years can be whited out: the self-blinding of Arab minds to the requirement of coming to terms with Israel, the hardening of Israeli hearts against the requirement of coming to terms with Palestinian nationalism, the wasting of the United Nations as a forum where serious people would bring serious problems and the continuing incapacity of the U.N. to deal with the Arab-Israeli dispute.

Nonetheless, it was worth hoping, once the current international thaw started touching the edges of the still largely frozen Mideast, that the principal keepers of the anti-Zionist flame would find some ways to limit the damage.

The answer so far is that it isn't happening. Collectively, the Arab states and the bureaucrats and intellectuals who have invested some part of their careers in waging the struggle against Zionism have shrunk from their evident responsibility to help the PLO negotiate a settlement with Israel.

More Catholic than the pope, they have allowed a gap to develop between their positions and those of the PLO. In the case of the Zionism resolution, for instance, the PLO itself has already formally accepted the idea of a two-state solution. This is a result obviously inconsistent with the ideological rejection of the Jewish state that is the essence of this unhappy resolution. But it makers refuse to let it go.

The Israelis have their own mistakes to answer for. In this matter, however, it is notable that so much of the Arab establishment seems caught in a 1970s time warp. To signs of gathering American interest in reversing the resolution, representatives of this establishment respond 1) with abuse for the motives of interested Americans and 2) with threats to rehearse and update the whole dreary litany of complaints of 1975. Rather than review their own position, they attempt to put the onus on those in Congress and the Bush administration who want to set matters straight.

Right now the United States is consulting with other governments to see if the votes are there to overhaul the resolution in the General Assembly next fall. Some help is expected in the countries of the old Soviet bloc, although the Soviet Union itself, notwithstanding its smiles and promises, has yet to take a forthright stand against the resolution—a particularly reprehensible lapse when you consider the Kremlin's responsibility for giving this resolution currency and political thrust 15 years ago.

In the Third World, some governments, especially in Latin America, are now embarrassed by their contribution to the anti-Israeli frenzy of the 1970s, but hesitate to concede they acted foolishly. Many of the 40-odd African states are still allowing themselves to be manipulated by '70s-style Arab pleadings and blandishments. Sen. Daniel Patrick Moynihan has sent a useful chill through some of these precincts by raising the question of the continuance of American aid.

Discreet to an extent that practically invites Arab huff and puff, the Americans don't want to charge into battle unless they're sure of a comfortable victory. Ditto the Israelis. In the U.N. Secretariat can be heard the quiet suggestion that an effort to waken this particular sleeping dog could end up simply rousing an excitable American public to start bashing the U.N. again.

But why should the Palestinians, who are otherwise in the historic process of taking their destiny into their own hands, leave this particular U.N. issue in the hands of others? If they applied a little imagination, they would realize that they had a pretty good card to play—certainly a card too important to be left in the hands of ostensible patrons who have their own fish to fry. They could hold this card for a prospective negotiating endgame with the Israelis, in which case its value would considerably diminish. Better, I think, to play it now.

These months of global, regional and national transition constitute a moment of truth for Israelis. Can they pull themselves together and join the Palestinians in seeking a compromise way? This is one of those occasions where adversaries must see their interest in reaching out to build confidence in each other.

The Zionism resolution has symbolized Israel's rejection, abandonment and isolation by the full community of nations. To be ushered back into that community, by the Palestinians no less, could be a gesture of peace for which they could expect to be repaid many times.

DOCUMENTS UNCOVERED BY THE YIVO INSTITUTE

Mr. MOYNIHAN. Mr. President, my good friend New York State Attorney General Robert Abrams has recently shared some exciting news with me that I think will be of interest to the Members of the Senate.

One of the most significant pre-war archives documenting Jewish life in Eastern Europe was collected by the YIVO Institute for Jewish Research during the 1920's and 1930's in Vilnius,

Lithuania. About half of the materials were recovered after the war, and restored to YIVO in New York. The other half was long thought by YIVO to have been destroyed by the Nazis. Only recently the remarkable news was received that a substantial portion of all the missing files have recently been located in Vilnius.

The YIVO Institute of Jewish Research is a major center for the study of the history and culture of Jews in Eastern Europe and America. Founded in Vilnius in 1925, it quickly brought together the largest library and archives in the world documenting the life and creativity of contemporary Jewry. When World War II began, YIVO moved its headquarters from Vilnius to New York. The few YIVO scholars who escaped occupied Europe found refuge in New York but without managing to bring the archives; they watched helplessly as the Jews of Europe were destroyed, and with them, the institution the scholars had built in Vilnius.

In 1945, about half of YIVO's Vilnius library and archives was found in the ruins of Frankfurt. The Germans had confiscated the materials for a planned Nazi "Institute for Research on the Jewish Questions." With the help of our State Department, which recognized YIVO's right to materials, some 50,000 books and 30,000 files of archival documents were returned to YIVO's headquarters in New York.

Jewish survivors from Vilnius told of other parts of YIVO's collections that had been smuggled out of YIVO, and hidden in the ghetto. These were taken in the custody of a newly created Jewish Museum in Vilnius in 1945. Four years later, Stalin's orders closed the museum and other Jewish institutions. In 1953, during the last days of Stalin's terror, when an order was given to destroy Jewish books and documents, local non-Jewish librarians and archivists saved them. But the fate of the collections was hidden, and nothing more was heard of these materials.

The awakending that has swept the Soviet Union and Eastern Europe has produced a startling revolution: most of the "other half" of YIVO's prewar library and archives have survived, and YIVO is taking steps to recover its archives. The Jewish community of Vilnius invited Mr. Samuel Norich, YIVO's executive director, for several visits during the past year. In February, Mr. Norich and Mr. Mark Web, YIVO's chief archivist, were shown Jewish books and documents, and among them Mr. Web found the "other half" of the YIVO collections, including missing parts from manuscripts and documents which had been restored to YIVO from Frankfurt. YIVO was offered copies of collections, but it was refused its basic request: that its collections be returned. YIVO was prepared to leave its books and newspaper files at a soon-to-be-reestablished Jewish Museum in Vilnius, when it brings its documentary collections to New York, for integration into its pre-war archives. YIVO was prepared to microfilm those archives in their entirety, and to give a microfilm of the integrated archives, along with ongoing technical assistance, to archives in Vilnius.

Mr. Norich and Mr. Bruce Slovin, the next chairman of YIVO, are now traveling to Vilnius, with Moscow's permission. YIVO hopes—and we strongly join them in that hope—that a historic agreement can be reached during this visit which enables YIVO to reclaim promptly the other half of its archival collections.

I ask unanimous consent that Attorney General Abrams' letter concerning the YIVO archives be reprinted at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF NEW YORK,
DEPARTMENT OF LAW,
New York, NY, March 21, 1990.

Hon. DANIEL PATRICK MOYNIHAN,
U.S. Senator, Russell Senate Office Building, Washington DC.

Dear PAT: It gives me great pleasure to bring to your attention a unique and historic opportunity for the Yivo Institute for Jewish Research located today in New York City. Founded in Vilna in 1925, Yivo was the preeminent intellectual center for documenting contemporary Jewry before World War II. This remarkable cultural institution was destroyed by the Nazis and it was presumed that at least half of its original holdings perished in the Holocaust.

Last year Yivo was stunned to learn that large portions of the institute's original collection had been preserved in Lithuania. As a result of the political changes in the Soviet Union, those aware of the existence of these enormously important archives contacted Yivo. Yivo has now entered into negotiations with the new leaders of Lithuania. It is my fervent hope that these historic documents will be returned to their original owners, the Yivo Institute, which will truly be a hallmark symbolizing a new era of freedom and cooperation.

I would appreciate your bringing this exciting and historic opportunity to the attention of your colleagues. This cultural exchange of great significance is yet another example of what can happen as a result of the changes taking place in Eastern Europe and the Soviet Union.

With warmest personal regards.

Sincerely,

ROBERT ABRAMS.

THE 57TH ANNIVERSARY OF THE CIVILIAN CONSERVATION CORPS

Mr. THURMOND. Mr. President, I rise today to recognize a group of men and women whose hard work and accomplishments from 1933 to 1942 are still being felt by virtually every American. I am referring to the Civilian Conservation Corps [CCC] which was established by President Franklin Roosevelt in March 1933. It was the first New Deal agency specifically charged with providing relief for unemployed young people and veterans as a result of the Depression of the 1930's. Gov. Carroll Campbell of my State of South Carolina has formally proclaimed the month of April 1990 as "National Civilian Conservation Corps History Month."

Between 1933 and 1942, more than 4 million men and women were enrolled in the CCC. Enrollees ranged from age 17 to veterans of World War I in their thirties and forties. Camps were in every State plus Puerto Rico and the Virgin Islands, working on over 100 different kinds of projects. These men and women were responsible for building, rebuilding, planting, protecting and restoring our Nation's natural resources. Some 4,000 fire observation towers were constructed, 3 billion trees were planted, miles of telephone lines were installed, and many forest trails were constructed. The enrollees planted nearly 3 billion trees, constructed over 150,000 miles of trails and roads, stretched over 85,000 miles of telephone lines, erected 4,000 fire towers, and built approximately 45,000 bridges and many buildings. Enrollees, who usually lived in camps of 200 people each, were paid $30 monthly for their work, $25 of which was sent home to their families. The Civilian Conservation Corps was abolished in 1942, not because of unpopularity, but because growing reemployment caused by World War II and the end of the Depression rendered its continued existence unnecessary. The CCC gave many unemployed Americans the opportunity to work due to the adverse effects of the Depression. The accomplishments of the CCC are still being experienced today.

Mr. President, I ask unanimous consent that the text of the proclamation of "Civilian Conservation Corps History Month" be printed in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

PROCLAMATION BY GOVERNOR CARROLL A. CAMPBELL JR., ON CIVILIAN CONSERVATION CORPS HISTORY MONTH

Whereas the Civilian Conservation Corps was an Act of Congress signed into law by President Franklin Delano Roosevelt on March 30, 1933; and

Whereas April 1990 is the 57th anniversary of the CCC, in which nearly four million men and women were enrolled from 1933 to 1942; and

Whereas enrollees of the CCC ranged from youths under the age of 18 to veterans of World War I in their 30s and 40s, with camps in every state plus Puerto Rico and Virgin Islands, working on over 100 different kinds of projects; and

Whereas by recording the potency, power and spirit of the CCC our national fibre, morals, conduct, beliefs, patriotism, and

character may be influenced and strengthened.

Now, therefore, I, Carroll A. Campbell, Jr., Governor of the state of South Carolina, do hereby proclaim April, 1990 as "Civilian Conservation Corps History Month" in the state of South Carolina.

DISCLOSURE OF 1989 FEDERAL AND STATE TAX RETURNS

Mr. CRANSTON. Mr. President, in keeping with my practice of making my income tax returns public, I am placing my 1989 Federal Form 1040 and California Form 540 returns in the CONGRESSIONAL RECORD. I ask unanimous consent that my returns be printed at this point in the RECORD.

There being no objection, the returns were ordered to be printed in the RECORD, as follows:

FORM 1040—U.S. INDIVIDUAL INCOME TAX RETURN 1989

Your first name and initial: Alan Cranston.

Your [redacted] xxx-xx-xxxx.

PRESIDENTIAL ELECTION CAMPAIGN

Do you want $1 to go to this fund? Yes.

FILING STATUS

1. Single.

EXEMPTIONS

6a. Yourself.

6e. Total number of exemptions claimed, 1.

INCOME

7. Wages, salaries, tips, etc., $90,488.

8. Taxable interest income (also attach Schedule B if over $400), $25,485.

9. Dividend income (also attach Schedule B if over $400), $9,711.

13. Capital gain or (loss) (attach Schedule D), ($3,000).

17a. Total pensions and annuities, $66,256.

17b. Taxable amount, $65,886.

18. Rents, royalties, partnerships, estates, trusts, etc. (attach Schedule E), $92,810.

21a. Social security benefits, $18,636.

21b. Taxable amount, $9,318.

22. Other income (list type and amount) schedule attached, $1,500.

23. Add the amounts shown in the far right column for lines 7 through 22. This is your total income: $292,198.

ADJUSTED GROSS INCOME

31. $292,198.

TAX COMPUTATION

32. Amount from line 31 (adjusted gross income), $292,198.

33a. Check if: You were 65 or older.

34. Enter the larger of: Your standard deduction (from page 17 of the Instructions), or your itemized deductions (from Schedule A, line 26), $37,320.

35. Subtract line 34 from line 32. Enter the result here, $254,878.

36. Multiply $2,000 by the total number of exemptions claimed on line 6e, $2,000.

37. Taxable income. Subtract line 36 from line 35. Enter the result (if less than zero, enter zero), $252,878.

38. Enter tax. Check if from: b. Tax Rate Schedules, $71,366.

40. Add lines 38 and 39. Enter the total, $71,366.

46. Add lines 41 through 45. Enter the total, 0.

47. Subtract line 46 from line 40. Enter the result (if less than zero, enter zero), $71,366.

53. Add lines 47 through 52. Enter the total, $71,366.

55. Add lines 53 and 54. This is your total tax and any supplemental Medicare premium, $71,366.

PAYMENTS

56. Federal income tax withheld, $18,733.

57. 1989 estimated tax payments and amount applied from 1988 return, $68,660.

63. Add lines 56 through 62. These are your total payments, $87,393.

REFUND OR AMOUNT YOU OWE

64. If line 63 is larger than line 55, enter amount overpaid, $16,027.

66. Amount of line 64 to be applied to your 1990 estimated tax, $16,027.

SCHEDULES A&B (Form 1040) Schedule A—Itemized Deductions, 1989

Name(s) shown on Form 1040: Alan Cranston.

Your [redacted] xxx-xx-xxxx.

TAXES YOU PAID

5. State and local income taxes, $28,603.

6. Real estate taxes, $2,196.

8. Add the amounts on lines 5 through 7. Enter the total here. Total taxes, $30,799.

INTEREST YOU PAID

9a. Deductible home mortgage interest (from Form 1098) that you paid to financial institutions. Report deductible points on line 10, $4,623.

12a. Personal interest you paid $4,490.

12b. Multiply the amount on line 12a by 20% (.20). Enter the result, $898.

13. Add the amounts on lines 9a through 11, and 12b. Enter the total here. Total interest, $5,521.

GIFTS TO CHARITY

14. Contributions by cash or check. (If you gave $3,000 or more to any one organization, show to whom you gave and how much you gave.), $1,000.

17. Add the amounts on lines 14 through 16. Enter the total here. Total contributions, $1,000.

JOB EXPENSES AND MOST OTHER MISCELLANEOUS DEDUCTIONS

20. Unreimbursed employee expenses—job travel, union dues, job education, etc. (You must attach Form 2106 in some cases. See instructions.), $3,348.

21. Other expenses (investment, tax preparation, safe deposit box, etc.) List type and amount. Schedule attached, $1,373.

22. Add the amounts on lines 20 and 21. Enter the total, $4,721.

23. Multiply the amount on Form 1040, line 32, by 2% (.02). Enter the result here, $5,842.

24. Subtract line 23 from line 22. Enter the result. If zero or less, enter 0.

TOTAL ITEMIZED DEDUCTIONS

26. Add the amounts on lines 4, 8, 13, 17, 18, 19, 24, and 25. Enter the total here. Then enter on Form 1040, line 34, the larger of this total or your standard deduction from page 17 of the Instructions, $37,320.

SCHEDULE B—INTEREST AND DIVIDEND INCOME

PART I: INTEREST INCOME

2. Other interest income. (List name of payer.) Schedule attached, $25,485.

3. Add the amounts on lines 1 and 2. Enter the total here and on Form 1040. line 8a, $25,485.

PART II: DIVIDEND INCOME

4. Dividend income. (List name of payer—include on this line capital gain distributions, nontaxable distributions, etc.) Schedule attached, $9,711.

5. Add the amounts on line 4. Enter that total here, $9,711.

8. Add the amounts on line 6 and 7. Enter the total here, $0.

9. Subtract line 8 from line 5. Enter the result here and on Form 1040, line 9, $9,711.

SCHEDULE D (FORM 1040) CAPITAL GAINS AND LOSSES, 1989

Name(s) shown on Form 1040: Alan Cranston [redacted] xxx-xx-xxxx

PART II LONG-TERM CAPITAL GAINS AND LOSSES—ASSETS HELD MORE THAN ONE YEAR

9a. Stocks, Bonds, and Other Securities (Include all Form 1099–B transactions. See Instructions.): Partnership liquidations—Schedule attached, $5,733.

16. Add all of the transactions on lines 9a, 9b, and 9d and lines 10 through 15 in columns (f) and (g), $5,733.

17. Net long-term gain or (loss), combine columns (f) and (g) of line 16, ($5,733).

PART III SUMMARY OF PARTS I AND II

18. Combine lines 8 and 17, and enter the net gain or (loss) here. If result is a gain, stop here and also enter the gain on Form 1040, line 13. If the result is a (loss), go to line 19 ($5,733).

19. If line 18 is a (loss), enter here and as a (loss) on Form 1040, line 13, the smaller of: a. The (loss) on line 18; or b. ($3,000) or, if married filing a separate return, ($1,500). ($3,000).

PART IV FIGURE YOUR CAPITAL LOSS CARRYOVERS FROM 1989 TO 1990

Section A.—Figure Your Carryover Limit

20. Enter taxable income or loss from Form 1040, line 37. (If Form 1040, line 37, is zero, see the instructions for the amount to enter.)

Note: For lines 21 through 36, treat all amounts as positive, $252,878

21. Enter the loss shown on line 19, $3,000.

22. Enter the amount shown on Form 1040, line 36, $2,000.

23. Combine lines 20, 21, and 22. If zero or less, enter zero, $257,878.

24. Enter the smaller of line 21 or line 23, $3,000.

Section C.—Figure Your Long-Term Capital Loss Carryover

(Complete this section only if there is a loss shown on line 17 and line 19.)

30. Enter the loss shown on line 17, $5,733.

32. Enter the amount shown on line 24, $3,000.

34. Subtract line 33 from line 32. If zero or less, enter zero, $3,000.

35. Add lines 31 and 34, $3,000.

36. Subtract line 35 from line 30. If zero or less, enter zero. This is your long-term capital loss carryover from 1989 to 1990, $2,733.

SCHEDULE E (FORM 1040) SUPPLEMENTAL INCOME AND LOSS, 1989

Name(s) shown on return: Alan Cranston.

INCOME OR LOSS FROM RENTALS AND ROYALTIES

1. Show the kind and location of rental property: A. Schedule attached.

2. For each rental property listed on line 1, did you or your family use it for personal purposes for more than the greater of 14 days or 10% of the total days rented at fair rental value during the tax year? N/A.

3. For each rental real estate property listed on line 1, did you actively participate in its operation during the tax year? (see instructions.) Yes.

RENTAL AND ROYALTY INCOME

4. Rents received, $164,360.

20. Add lines 6 through 19, $42,589.

21. Depreciation expense or depletion (see Instructions), $6,081.

25. Income. Add rental and royalty income from line 23. Enter the total income here, $115,690.

27. Combine amounts on lines 25 and 26. Enter the net income or (loss) here, $115,690.

29. Total rental and royalty income or (loss). Combine amounts on lines 27 and 28. Enter the result here. If Parts II, III, and IV on page 2 do not apply to you, enter the amount from line 29 on Form 1040, line 18. Otherwise, include the amount from line 29 in the total on line 42 on page 2, $115,690.

INCOME OR LOSS FROM PARTNERSHIPS AND S CORPORATIONS

30(a). Name: Simi-Moorepark Freeway.

(d). Employer identification number: 95-6230970. Investment At Risk, (e) All is at risk.

Nonpassive Income and Loss

(k). Nonpassive income from Schedule K-1: $14.

32. Add amounts in columns (h) and (k) of line 31a. Enter the total income here, $14.

34. Total partnership and S corporation income or (loss). Combine amounts on lines 32 and 33. Enter the result here and include in the total on line 42 below, $14.

INCOME OR LOSS FROM ESTATES AND TRUSTS

35(a). Name: Alan Cranston Qualified Blind Trust.

(b) Employer identification number: 95-6386948.

Passive Income and Loss

(c) Passive deduction or loss allowed from Form 8582, $22,894.

36b. Totals, $22,894.

38. Add amounts in columns (c) and (e) of line 36b. Enter the total here, ($22,894).

39. Total estate and trust income or (loss). Combine amounts on lines 37 and 38. Enter the result here and include in the total on line 42 below, ($22,894).

SUMMARY

42. Total income or (loss). Combine amounts on lines 29, 34, 39, and 41. Enter the result here and on Form 1040, line 18, $92,810.

FORM 2106, EMPLOYEE BUSINESS EXPENSES, 1989

Your name: Alan Cranston.

[redacted]

Occupation in which expenses were incurred: United States Senator.

EMPLOYEE BUSINESS EXPENSES

Step 1—Enter Your Expenses

1. Vehicle expense from line 28 or line 34, $43.

3 Travel expense while away from home overnight, including lodging, airplane, car rental, etc. Do not include meals and entertainment, $8,898.

4. Business expenses not included on lines 1 through 3. Do not include meals and entertainment, $9,462.

5. Meals and entertainment expenses. (See the separate Instructions), $299.

6. Add lines 1 through 5 and enter the total expenses here, $18,403 plus $299.

Step 2—Enter Amounts Your Employer Gave You For Expenses Listed in Step 1

7. Enter amounts employer gave you that were not reported to you on Form W-2 (See Instructions), $16,279 plus $299.

9. Add the amounts on lines 7 and 8. Enter the total here, $16,279 plus $299.

Step 3—Figure Expenses To Deduct on Schedule A (Form 1040)

10. Subtract line 9 from line 6, $2,124.

12. Subtract line 11 from line 10, $2,124.

13. Add the amounts on line 12 of both columns and enter the total here. Also enter the total on Schedule A (Form 1040), line 20. (Qualified performing artists and handicapped employees, see the separate Instruction for special rules on where to enter the total), $2,124.

FORM 4562, DEPRECIATION AND AMORTIZATION, 1989

Name(s) as shown return: Alan Cranston.

Business or activity to which this form relates: Real Estate Rentals.

DEPRECIATION

Section A—Election To Expenses Depreciable Assets (Section 179)

1. Maximum dollar limitation, $10,000.

3. Threshold cost of section 179 property before reduction in limitation, $200,000.

Section B—MACRS Depreciation

13h. Nonresidential real property (g) Depreciation deduction, $6.

Section C—ACRS and/or Other Depreciation

18. ACRS and/or other depreciation (see instructions), $6,075.

19. Total (Add deductions on line 11 and lines 13 through 18.) Enter here and on the appropriate line of your return (Partnerships and S corporations—see instruction), $6,081.

FORM 6251, ALTERNATIVE MINIMUM TAX—INDIVIDUALS, 1989

Name(s) shown on Form 1040; Alan Cranston [redacted].

1. Taxable income from Form 1040, line 37 (can be less than zero), $252,878.

2. Net operating loss deduction, if any, from Form 1040, line 22. (Enter as a positive amount), 0.

3. Add lines 1 and 2, $252,878.

4. Adjustments: (See Instructions before completing):

b. Personal exemption amount from Form 1040, line 36, $2,000.

e. Taxes from Schedule A (Form 1040), line 8, $30,799.

g. Personal interest from Schedule A (Form 1040), line 12b, $898.

i. Combine lines 4a through 4h, $33,697.

u. Combine lines 4j through 4t, 0.

5. Tax preference items: (See Instructions before completing.):

d. Add lines 5a through 5c, 0.

e. Accelerated depreciation of real property placed in service before 1987, $1,308.

i. Add lines 5e through 5h, $1,308.

6. Combine lines 3, 4i, 4u, 5d, and 5i, $287,883.

7. Alternative tax net operating loss deduction. (Do not enter more than 90% of line 6.) See Instructions, 0.

8. Alternative minimum taxable income (subtract line 7 from line 6). If married filing a separate return, see Instructions, $287,883.

9. Enter: $40,000 ($20,000 if married filing separately; $30,000 if single or head of household), $30,000.

10. Enter: $150,000 ($75,000 if married filing separately; $112,500 if single or head of household), $112,500.

11. Subtract line 10 from line 8. If the result is -0- or less, enter -0- here and on line 12 and go to line 13, $175,383.

12. Multiply line 11 by 25% (.25), $43,846.

13. Subtract line 12 from line 9. If the result is -0- or less, enter -0-. If completing this form for a child under age 14, see the Instructions for the amount to enter on this line, 0.

14. Subtract line 13 from line 8. If the result is -0- or less, enter -0- here and on line 19, $287,883.

15. Multiply line 14 by 21% (.21), $60,455.

16. Alternative minimum tax foreign tax credit. See Instructions, 0.

17. Tentative minimum tax (subtract line 16 form line 15), $60,455.

18. Enter your tax from Form 1040, line 38, minus any foreign tax credit on Form 1040, line 43. If an amount is entered on line 39 of Form 1040, see Instructions, $72,906.

19. Alternative minimum tax (subtract line 18 from line 17). Enter on Form 1040, line 49. If the result is -0- or less, enter -0-. If completing this form for a child under age 14, see the Instructions for the amount to enter, 0.

FORM 8582 PASSIVE ACTIVITY LOSS LIMITATIONS, 1989

Name(s) shown on return: Alan Cranston [redacted].

PART I COMPUTATION OF 1989 PASSIVE ACTIVITY LOSS

Rental Real Estate Activities With Active Participation (For the definition of active participation see Active Participation in a Rental Real Estate Activity in the Instructions.):

Activities acquired before 10-23-86 (Pre-enactment):

1a. Activities with net income (from Worksheet I, Part 1, column(a)), $115,690.

1c. Combine lines 1a and 1b, $115,690.

1g. Net income or (loss). Combine lines 1c and 1f, $115,690.

1i. Combine lines 1g and 1h, $115,690.

Activities acquired after 10-22-86 (Post-enactment):

2e. Activities with net loss (from Worksheet 2, Part 2, column (b)), $22,894.

2f. Combine lines 2d and 2e, ($22,894).

2g. Net income or (loss). Combine lines 2c and 2f, ($22,894).

2i. Combine lines 2g and 2h, ($22,894).

3. Combine lines 1i and 2i. If the result is net income or -0-, see the Instructions for line 3. If this line and line 1c or line 1i are losses, go to line 4. Otherwise, enter -0- on lines 8 and 9 and go to line 10, $92,796.

PART III COMPUTATION OF PASSIVE ACTIVITY LOSS ALLOWED

19. Total losses allowed from all passive activities for 1989. Add lines 17 and 18, $22,894.

TAXABLE YEAR 1989, CALIFORNIA LONG TAX FORM, 540

STEP 1 NAME AND ADDRESS

Alan Cranston, 578-38-1722.

2024 Camden Avenue, Los Angeles, CA 90025.

STEP 2 FILING STATUS

1. Single.

STEP 3 EXEMPTIONS

7. Personal: If you checked box 1 or 3 above, enter $55. If you checked box 2, 4 or 5, enter $110, $55.

9. Senior: If you or your spouse is 65 or older, enter $55. If both are 65 or older, enter $110, $55.

11. Total exemption credits. Add lines 7 through 10. Enter here and on line 20 below, $110.

STEP 4 TAXABLE INCOME

12a. State wages from your W-2 form, box 18, $90,488.

12b. Federal adjusted gross income from line 31 of your Form 1040, line 13 of your Form 1040A, or line 3 of your Form 1040EZ, $292,198.

13. California adjustments—subtractions. Enter amount from Schedule CA, line 15, $9,349.

14. Subtract line 13 from line 12b. If less than zero, enter the result in brackets. See instructions, $282,849.

15. California adjustments—additions. Enter amount from Schedule CA, line 23, 0.

16. California adjusted gross income. Combine line 14 and line 15. If $20,900, or less, see instructions, $282,849.

17. Enter the larger of Your standard deduction (see instructions), OR Your itemized deductions (from Schedule CA, line 28), $8,717.

18. Taxable income, Subtract line 17 from line 16. If less than zero, enter zero, $274,132.

STEP 5 TAX

19. Enter tax. Check if from Tax Table, $24,202.

20. Exemption credits. Enter amount from line 11 above, $110.

21. Subtract line 20 from line 19. If less than zero, enter zero, $24,092.

22a. Add line 21a and line 21b. Continue to Side 2, $24,092.

STEP 6 CREDITS

22b. Amount from Side 1, line 22a, $24,092.

25. Enter credit name Political code no. 84 and amount, $6.

29. Total credits. Add lines 23 through 28, $6.

30. Subtract line 29 from line 22b. If less than zero, enter zero, $24,086.

STEP 7 OTHER TAXES

31. Alternative minimum tax. Attach Schedule P (540), $0.

33. Total tax. Add lines 30 through 32, $24,086.

STEP 8 PAYMENTS

34. California income tax withheld. Enter told from your 1989 W-2 and 1099-R forms, $5,348.

35. 1989 California estimated tax and amount applied from 1988 return. Include amount paid with any extension request (from FTB 3502), $22,000.

38. Total payments. Add lines 34 through 37, $27,348.

STEP 9 OVERPAID TAX OR TAX DUE

39. Overpaid tax. If line 38 is larger than line 33, subtract line 33 from line 38, $3,262.

40. Amount of line 39 to be applied to your 1990 estimated tax, $3,237.

41. Amount of overpaid tax available this year. Subtract line 40 from line 39, $25.

STEP 10 VOLUNTARY CONTRIBUTIONS

California Election Campaign Fund

49. Your political party Democratic amount ($25 max), $25.

51. Total contributions. Add lines 43 through 50, $25.

STEP 11 REFUND OR AMOUNT YOU OWE

16. Alternative nimimum tax other state tax credit. See instructions, 0.

17. Adjusted tentative minimum tax. Subtract line 16 from line 15, $19,406.

18. Regular tax before credits (Form 540, line 19) minus other state tax credit. See instructions, $24,202.

19. Alternative minimum tax. Subtract line 18 from line 17. If zero or less, enter zero, 0.

PART II CREDIT LIMITATIONS

Section A—Tax in excess of tentative minimum tax

1a. Regular tax from Form 540, line 19 minus tentative minimum tax from Part I, line 15. Not less than zero, $4,797.

b. Exemption credits. Do not enter more than the amount on line 1a. If your exemption credits are greater than line 1a, you must reduce the amount shown on Form 540, line 20, to the amount shown on line 1a, $110.

2a. Enter the amount from Form 540, line 22a (use refigured amount if exemption credits are limited by line 1a, $24,092.

b. Tentative minimum tax from Part 1, line 15, $19,406.

3. Subtract line 2b from line 2a. This is the amount of tax that you may reduce with Section B credits, $4,686.

Section B—Credits that may not reduce excess tax below tentative minimum tax

	(a) Credit amount	(b) Credit used this year	(c) Tax balance	(d) Credit carry-over
4. Enter the amount from line 3			4,686	
5. Child and dependent care credit from Form 540 instructions worksheet				

	(a) Credit amount	(b) Credit used this year	(c) Tax balance	(d) Credit carry-over
6. Credit for taxpayers with military income from Form 540 instructions worksheet				
70–7. Joint custody head of household credit from Form 540 instructions worksheet				
73–8. Dependent parent credit from Form 540 instructions worksheet				
65–9. Credit for public retirees under 65 from Schedule RP (540), or credit for the elderly or disabled from statement				
66–10. Jobs credit from form FTB 3524				
67–11. Pollution abatement equipment credit from form FTB 3522				
68–12. Vehicle conversion to alcohol fuel credit from statement				
69–13. Enterprise zone employee credit from form FTB 1046				
71–14. Ridesharing credit: Carryover from form FTB 3518, Part I				
91–15. Ridesharing credit: Large employer program from form FTB 3518, Part II				
92–16. Ridesharing credit: Small employer program from form FTB 3518, Part III				
93–17. Ridesharing credit: Transit passes from form FTB 3518, Part IV				
94–18. Ridesharing credit: Vanpool program from form FTB 3518, Part V				
76–19. Enterprise zone hiring/sales and use tax credit from form FTB 3805Z				
77–20. Program area hiring/sales and use tax credit from form FTB 3805Z				
78–21. Water conservaiton credit carryover from statement				
79–22. Solar pump credit carryover from statement				
82–23. Energy conservation credit carryover from form FTB 3514				
84–24. Political contributions credit from statement	6	6	4,680	0
86–25. Residential rental and farm sales credit from form FTB 3529				
89–26. Employer child care program credit from form FTB 3501				
90–27. Employer child care contribution credit from form FTB 3501				
74–28. Recycling equipment credit from form FTB 3527				
75–29. Agricultural products credit from form FTB 3534				
80–30. Solar energy credit carryover from form FTB 3805L				
81–31. Commercial solar energy credit carryover from form FTB 3805L				
83–32. Research credit from form FTB 3523				
85–33. Orphan drug credit from form FTB 3528				
72–34. Low-income housing credit from form FTB 3521				
88–35. Credit for prior year alternative minimum tax from form FTB 3510			4,680	
36. Subtotal. Add column (b) of lines 7 through 35		6		

Section C—Credits that may reduce tax below tentative minimum tax

37. If line 3 is zero, enter the amount from Form 540, line 22a (use refigured amount if exemption credits are limited by line 1a). If line 3 is more than zero, enter the total of line 2b and line 25, column (c), $24,086.

YEAR 1989, PASSIVE ACTIVITY LOSS LIMITATIONS, CALIFORNIA FORM 3801

Name(s) as shown on return: Alan Cranston, xxx-xx-xxxx.

PART I COMPUTATION OF 1989 PASSIVE ACTIVITY LOSS

Rental Real Estate Activities with Active Participation

Activities acquired before 10–23–86 (Pre-enactment):

1a. Activities with net income from Worksheet 1, Part 1, column (a), $115,618.

1b. Activities with net loss from Worksheet 1, Part 1, column (b), 0.

1c. Combine line 1a and line 1b, $115,618.

1g. Net income or (loss). Combine line 1c and line 1f, $115,618.

1h. Prior year unallowed losses from Worksheet 1, Parts 1 and 2, column (c) (see instructions), 0.

1i. Combine line 1g and line 1h, $115,618.

All Other Passive Activities

Activities acquired after 10–22–86 (Post-enactment):

2e. Activities with net loss from Worksheet 2, , Part 2, column (b), $22,853.

2f. Combine line 2d and line 2e, $22,853.

2g. Net income of (loss). Combine line 2c and line 2f, ($22,853).

2h. Prior year unallowed losses from Worksheet 2, Parts 1 and 2, column (c) (see instructions), 0.

i. Combine line 2g and line 2h, ($22,853).

3. Combine line 1i and line 2i. If the result is net income or -0-, see the instructions for line 3. If line 3 and line 1c of line 1i are loses, go to line 4. Otherwise, enter -0- on line 8 and line 9 and go to line 10 (see instruction), $92,765.

PART III COMPUTATION OF PASSIVE ACTIVITY LOSS ALLOWED

19. Total losses allowed from all passive activities for 1989. Add line 17 and line 18, $22,853.

TAXABLE YEAR 1989, DEPRECIATION AND AMORTIZATION ADJUSTMENTS, CALIFORNIA FORM 3885A

Name(s) as shown on return: Alan Cranston xxx-xx-xxxx.

1. Passive Activities (see Instruction C): Real estate—Schedule attached:

(g) Depreciation for this year, $6,154.

Total passive dep'n or amortiz'n. Add column (g) and column (j) amounts of line 1, $6,154.

ST. CLAIR COUNTY CELEBRATES ITS BICENTENNIAL

Mr. DIXON. Mr. President, next week, my home county in Illinois, St. Clair County, will celebrate its bicentennial. St. Clair County is the oldest county in Illinois. I was born there. I was raised there, and I have lived there all of my life. It was a wonderful place to grow up; it was and is a truly special place to live.

I want to take this opportunity to congratulate all the residents of St. Clair County, and particularly all of my friends from my hometown of Belleville, on the county's bicentennial.

Several years ago, I authored an article for the St. Clair County Historical Journal. I do not pretend to be a great author, but I want my colleagues to know that I am very proud of this article because it is about my home town, a place that I will always continue to love.

Mr. President, I ask unanimous consent that a copy of the article be included at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

It is a particular pleasure for me to be asked to contribute a few words to the *Journal* of the Saint Clair County Historical Society.

From the day of my birth on July 7, 1927, to the present, Saint Clair County has been my home. I have been privileged to serve its people in the Illinois General Assembly in Springfield, in the offices of Illinois State Treasurer and Illinois Secretary of State, and now as United States Senator.

As I began to gather my recollections for this essay, it occurred to me again that Saint Clair County was a wonderful place to grow up.

I hope readers of the Journal will indulge me this brief reminiscence—not because I am a historical figure (or even, old, for that matter), but because it is always useful for us to remember where we came from, and where we've been.

I came from the east end of Belleville. I lived the first few years of my life at 1034 Forest Avenue, and then through high school at 616 Forest Avenue.

The east end was a great place for youngters, with parks and vacant lots to play ball in, to roam in, to be a boy in.

In those days, there was an open field in the 500 and 600 blocks of Forest Avenue, which, for some peculiar reason, was known as "West Pasture," even though it was in east Belleville.

We would swim there when the creek had enough water, and we would sled down the pasture's hills in winter, both of which I found to be at least as much fun as going to my classes at the old Douglas school at Douglas and East Main.

Oliver Muser was the principal. He was a great educator, and a wonderful man who, happily, is still alive and well and living in Belleville. I remember being a boy in the 6th grade, and Mr. Muser predicting that somebody named Adolf Hitler would plunge the world into war.

By the time I became a senior at Belleville High, that war was still raging. I recall going to the home of John Karsh to take extra courses in summer so I could graduate early and join the service.

Belleville was always a working town. Its people worked hard for what they had. When I was growing up, some folks didn't have much, but they still enjoyed life.

All the kids worked, too. At various times, I worked for my dad's delivery service and later for the Rock Meat Market on East Main. There I made hamburgers from a recipe, as I recall, which called for about one-third hearts, one-third fat, and one-third beef. It was cheap, but it was what the average worker could afford in those days.

While in high school, I sold shoes at Lerner's, earning four dollars for a Saturday and a commission on shoe polish and ribbons. I worked at J.C. Penney's for Clarence Manring and as a "card boy" at the Elks Club, bringing the men their drinks. At Christmas time, Mel Price got me a job at the post office delivering holiday mail.

Well, times have changed since then, of course. You aren't a kid forever. I haven't picked peaches in the summer at Waterloo in a while, haven't packed tomatoes for the Brooks Company, haven't trucked freight on weekends for the Terminal Railroad.

That was a formative time, though. I remember the day they let us out of school to go hear Wendell Wilkie talk from the back end of a train at the Lebanon Avenue overpass. He was so good I took off my Roosevelt button for a few days, until my dad converted me again.

It was a boyhood of feather beds and coal stoves at my grandparents' house, and white radish sandwiches that my grandmother would spread thick with country butter pulled up in a bucket from out of the well in back. It was also a boyhood of running down to Meyers tavern on Mascoutah Avenue to bring back beer for the men, and listening to Art Reinbold from the hardware store play the banjo and sing with my father.

That kind of childhood is special. It makes a person secure and not afraid to try things out in adult life. How else could a 21-year-old kid still in law school have the nerve to run for police magistrate on a "reform" ticket with H.V. Calhoun at the top?

How else would a 23-year-old kid working for the state's attorney's office decide to run for the state legislature against an experienced, highly-favored legislator such as Jack Wellinghoff?

I don't want to sound as if my life story might have been written by a combination of Booth Tarkington and Horatio Alger, but I do not think I am idealizing Saint Clair County as I recall growing up there.

We all live in the present and, happily enough, the present still centers for me on Belleville and Saint Clair County and my family, as it has for 56 years.

Some things in Saint Clair County have changed for the better in those 56 years, and some haven't. It does us all good, I think, to try to figure out which things fall into which category.

That is the way we must go about improving the quality of life in Saint Clair County for the greatest number of people—if it's possible to improve on icicle radish sandwiches on homemade bread spread thick with country butter.

THE GOLDMAN PRIZE—WELCOME BOOST TO ENVIRONMENTALISTS

Mr. PELL. Mr. President, I rise to share with my colleagues the welcome news that the first Goldman Environmental Prize has been awarded to six environmental activists around the world.

This prize, which is to be an annual award, recognizes the environmental efforts of individuals from six continents and awards $60,000 to each winner. It is a most welcome recognition and reward for the tireless efforts of individual environmentalists.

The awards were announced this week by Richard N. Goldman, an insurance executive, and Rhoda H. Goldman, an heir of the founder of Levi Strauss & Co. The couple established a family foundation in 1951 to support environmental organizations.

Lois M. Gibbs, who founded the Love Canal Homeowners Association and lead the successful fight to close the hazardous waste dump in that section of Niagara Falls, NY, was the winner for North America.

Mr. President, the details of the other recipients and some background about the Goldman Prize are included in an article that appeared in the New York Times of April 17.

I ask unanimous consent that this article be reprinted in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Lois M. Gibbs, who founded the Love Canal Homeowners Association in 1978 and emerged as a community leader in a successful fight to close the hazardous waste dump in that section of Niagara Falls, N.Y., was one of six winners of the first Goldman Environmental Prize. The prize recognizes the environmental efforts of individuals from six continents and awards $60,000 to each winner. Mrs. Gibbs was the North American recipient.

An Audubon Society volunteer, Janet Patricia Gibson, was the chosen from the Latin America-Caribbean region, for her work in establishing the Hol Chan Marine Reserve preserving a reef off Belize. Janos Vargha, a Hungarian biologist whose criticism of a government dam project on the Danube helped get it stopped, was the Eurpoean winner.

Harrison Ngau was recognized for his fight to save Malaysian rain forests, enduring arrest and surveillance. In Kenya, Michael Mayeku Werikhe worked to create sanctuaries for the endangered black rhinoceros. And Dr. Bob Brown gave up his medical practice to help preserve the Franklin River and start the Tasmanian Wilderness Society. He is a Green Party member in the Tasmanian Parliament.

The awards were announced yesterday in San Francisco by Richard N. Goldman, an insurance executive, and Rhoda H. Goldman, an heir of the founder of Levi Strauss & Company. The couple established a family foundation in 1951 to support environmental organizations. The Goldman Prize is to be an annual award. The winners are selected from nominees of environmental organizations.

FARGO'S FINE MAYORS

Mr. BURDICK. Mr. President, a good friend of mine, Jon Lindgren, was just elected to his fourth term as mayor of my hometown of Fargo. Another good friend and former mayor of Fargo, Herschel Lashkowitz, recently announced he is retiring from public service. On behalf of every citizen of Fargo, I would like to take this opportunity to thank both men for their strong leadership, hard work, and dedication.

Jon collected 62 percent of the vote in this week's election and will serve as mayor of our fine city for another 4 years. Before Jon took office 12 years ago, Herschel served as mayor from 1954 to 1974. Herschel has since served as a State senator for Fargo's 21st District, retiring now because of poor health.

I ask unanimous consent that an editorial from the Fargo newspaper about Herschel's retirement be printed at this point in the RECORD.

There being no objection, the editorial was ordered printed in the RECORD, as follows:

LASHKOWITZ BIDS FAREWELL TO PUBLIC LIFE

For some people in public life and politics, power is the end. Not so for the man who bowed off the public stage on Wednesday after 36 years as a major player in Fargo.

Herschel Lashkowitz, Fargo's scrappy and dedicated mayor from 1954 to 1974 and a Democratic state senator from Fargo's District 21 since 1975, said farewell to government and politics. Slowed by illness, Lashkowitz demonstrated he still is able to play his part in North Dakota's political drama: He waited almost until the last minute to announce he would not seek re-election to the state Senate.

If a common thread can be traced through Lashkowitz's public service (other than controversy) it is commitment. As mayor and as senator he was motivated by service to his constituents, especially to those people he believed were sometimes forgotten or ignored by the political process.

He liked to characterize himself as the champion of "the little guy," but he understood how to apply political power and use back-room persuasion to get things done for his city. He might have been elected in 1954 as the anti-establishment candidate, but he knew how to work with the establishment to stimulate Fargo's growth.

His tenure as mayor is the stuff of legend. Locked out reporters, locked in city commissioners, threats to arrest his opponents, clandestine meetings in the dark of night, bending (shattering?) rules to accomplish his goals.

Through it all, Fargo grew and prospered. Some contend the city did well in spite of Lashkowitz, but we think that's too harsh a judgment.

Lashkowitz didn't need to be mayor. A lawyer, he could have done without public office and made a bundle practicing law. Instead, he relished the politics, controversy and significant accomplishments of his office. And he did it without enriching himself, other than securing the admiration and respect of the people he worked with and the people he served.

Through the turbulent Lashkowitz years at City Hall, this newspaper often opposed the mayor's approaches to conducting the public's business. If we found his methods objectionable, however, we always understood he was motivated to do what he believed was best for Fargo.

It's ironic Lashkowitz ends his public life in the midst of a hard-hitting Fargo mayoral campaign. We suspect he'd love to be in the thick of it. Indeed, candidates for city office ought to seek his advice and counsel.

We wish the former mayor the best in retirement. He served his city and his state with honor for a long time.

THE CHANGING NATURE OF UNITED STATES-CAPE VERDE RELATIONS

Mr. PELL. Mr. President, last October an important conference was held in Warwick, RI, to examine United States trade and investment prospects in the island nation of Cape Verde.

Located off the west coast of Africa, Cape Verde began its unique relationship with the United States in the late 18th century. Our ties to Cape Verde

developed gradually into full-fledged diplomatic relations and the assignment of a resident United States Ambassador in 1983. I represent a large and active Cape Verdean community in my State of Rhode Island, and I have held a keen interest in Cape Verde's development during my tenure in the Senate and in my chairmanship of the Foreign Relations Committee.

It is evident that Cape Verdeans are a proud and industrious people, who have overcome nearly insurmountable obstacles in their path toward development. Because it relies very heavily on foreign aid and foreign remittances for its economic well-being, Cape Verde has now embarked on a program to encourage foreign trade and investment. It is an effort that warrants our full support.

Mr. President, I was scheduled to deliver a speech to the Cape Verde-United States Trade and Investment Conference in Warwick, RI. Regrettably, Senate business prevented my appearance, but I did address the conference via telephone. I ask unanimous consent that the full text of my remarks and a letter I received from Cape Verdean Prime Minister Pedro Pires be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REPÚBLICA DE CABO VERDE.

HON. CLAIBORNE PELL,
United States Senate, Washington, DC.

DEAR SENATOR PELL: I take this opportunity to convey to you my gratitude for the warm welcome and assistance granted to my delegation and myself during my recent visit to the United States.

I want also to stress our sincere appreciation for your continuous encouragement and support of Cape Verde's endeavours to surmount the constraints and move toward a viable market economy, responsive to the priorities and needs of our country. As we proceed with the development of the private sector in areas as fisheries, transshipment, tourism, coastal resource development as well as other private-sector related fields of development, we know that American expertise and experience are a matter of vital interest to us.

During my stay in the U.S.A., I was very pleased to notice a growing interest of private sectors in New England—both Cape Verdean, American and others—in availing themselves of the possible investment and trade development that are emerging in Cape Verde. I highly appreciate the participation of representatives from the University of Rhode Island and the Narragansett Bay Port Authority at the Cape Verde-U.S. Investment and Trade Conference held in Warwick at the time of my visit. It is for reasons like these and on account of your sustained and active support to Cape Verde—so clearly articulated in your address to the above mentioned Conference—that I am pleased to stress our renewed optimism in the strengthening of the traditional links of friendship and cooperation between our two countries.

In extending to you my warmest season's greetings, I am pleased to take the opportunity to invite you, on behalf of our Government and on my own, to visit Cape Verde at your best convenience during the current year of 1990.

Sincerely yours,

PEDRO PIRES,
Prime Minister.

CAPE VERDE—U.S. TRADE AND INVESTMENT CONFERENCE

(Remarks by Senator Claiborne Pell)

I appreciate the opportunity to join you today at this important meeting. It would appear that we are beginning a new phase in the relationship between the United States and Cape Verde, and I am delighted to be a part of this conference.

The bond between the United States and Cape Verde is deeply rooted in history and extends to a time long before the date when the United States recognized Cape Verde's independence from Portugal. In the late 18th Century, New England whalers began to man their crews with native Cape Verdeans, and initiated a connection that stands to this day. In 1816, an American Consul General was established in Cape Verde to facilitate the steady flow of emigration from Cape Verde to the United States. In 1983, I was an active participant in the confirmation process of and was pleased to cast my vote for our country's first resident Ambassador to Cape Verde.

The New England-Cape Verde axis, now firmly established, is perhaps best exemplified by the schooner *Ernestina*. The *Ernestina* is believed to have been the last ship in regular service to have carried immigrants to the United States. It was donated by Cape Verde to the United States in 1976, and now lies in New Bedford as a tribute to the maritime connection between our two countries.

Of the more than 300,000 Americans of Cape Verdean descent, the vast majority make their home in Rhode Island, Connecticut and Massachusetts. The Cape Verdean-American community is one of the most important fixtures in New England, and Cape Verdeans have contributed significantly to our cultural heritage.

I consider myself a long-time friend of Cape Verde. I have held a special interest in Cape Verde's economic development since it attained independence in 1975. Although it is not particularly endowed with natural resources, Cape Verde has demonstrated time and time again that its most important resource is its people. Cape Verdeans are truly in a class by themselves, as they have faced hardship after hardship with intelligence, pragmatism, and dignity.

It is the typical Cape Verdean traits of initiatives and resiliency that bring us here today. Cape Verde, in a concerted effort to achieve a greater degree of economic health, has set its sights on encouraging foreign direct investment. This new emphasis would change the focus of the U.S.-Cape Verde relationship from economic assistance to economic partnership. In this regard, Cape Verde stands out as a model for developing countries in Africa. It is an example for other countries to emulate and to admire.

By no means do I intend to suggest that the United States should re-examine its aid commitments to Cape Verde. Those commitments reflect the reality that Cape Verde is a developing country that faces continually the threats of drought, famine and flood. After more than a decade of severe drought, Cape Verde finally encountered decent rainy seasons in 1986 and 1987. Regrettably, the cycle was reversed again last year and Cape Verde was hit by yet another drought. The simple fact remains that foreign assistance is necessary as Cape Verde strives to overcome the obstacles in its path toward development.

Our aid program in Cape Verde is comprised of several types of assistance, but consists mainly of flood and developmental assistance. When the total aid package began to decline in recent years, I worked actively to reverse the trend. In the current fiscal year and in fiscal year 1987, the Senate Foreign Relations Committee reported foreign assistance authorization bills. In both of these bills, I pressed successfully for language expressing the Congress' belief that the total level of assistance for Cape Verde should be, at a minimum, equal to the total of the previous year. I am happy to say that the Bush Administration's request for assistance to Cape Verde in fiscal year 1990 is slightly above last year's total of $4,926,000.

In addition to foreign assistance from the United States, the European Community, and other countries, Cape Verde's economy relies very heavily on private funds from Cape Verdeans overseas. In a remarkable display of the devotion Cape Verdean-Americans hold for their native country, Cape Verde receives as much as $25 million per year from Americans of Cape Verdean descent. This is an important source of revenue for Cape Verde, and one that is likely to continue into the future.

Because of its proud and independent tradition, Cape Verde looks toward a future of greater economic self-sufficiency. As part of its overall economic plan, the government hopes to increase markedly the amount of foreign investment in Cape Verde. Keeping in mind the close association between our two countries, the United States can and should play an important role in helping Cape Verde achieve this goal.

For the sake of Cape Verde's future, the United States has a real interest in seeing Cape Verde succeed in this endeavor. Yet we in the United States must also recognize that Cape Verde has already taken some important first steps, suggesting that investment in Cape Verde could advance U.S. economic and commercial interests.

Cape Verde has enjoyed a degree of political stability that no other former Portuguese colony has equalled. Out of its revolutionary beginnings, the government of Cape Verde has demonstrated true respect for human rights and has made a genuine effort to guarantee individual freedoms. In recognition of Cape Verde's dire economic position, the government has adhered to strict, conservative fiscal and monetary policies. And, perhaps an anomaly in developing African nations, corruption is virtually nonexistent in Cape Verde.

In its conduct of foreign affairs, Cape Verde maintains a policy of non-alignment. Cape Verde has close ties with the nations of southern Africa—particularly those that speak Portuguese—as well as with Portugal itself, France, Brazil, and the United States. Cape Verde holds membership in a number of international and regional associations, and it has taken a responsible and active interest in promoting peace in Southern Africa. Cape Verde proved to be particularly helpful in facilitating the lines of communication between nations interested in bringing about the long overdue independence of Namibia.

As a gesture of its moral strength, Cape Verde supported the enactment of the U.S. 1986 Anti-Apartheid Act. Cape Verde's actions in this regard have come at great cost

to its own economy. Once a logical stopping point for flights between the United States and South Africa, Cape Verde has witnessed a significant decrease in South African air traffic because of existing U.S. sanctions against South Africa. Accordingly, Cape Verde has lost, by some accounts, as much as $7 million per year from the reduction in South African flights. This situation has made the need for increased foreign assistance and foreign investment an imperative.

Economically, Cape Verde is actively confronting the serious threats that it faces. While unemployment in Cape Verde remains extremely high, the government has instigated its Second National Development Plan, which includes provisions to reduce unemployment over time to an acceptable level. Cape Verde's fiscal and monetary policies have kept inflation low and growth steady. According to the U.S. Department of Commerce, the Gross National Product of Cape Verde has increased by an average of roughly 6 percent over the last five years.

One of the chief components of Cape Verde's economy is its agricultural sector. Without question, the greatest danger to Cape Verde's agriculture lies in the critical lack of desalinized water. Because of last year's drought, agriculture production fell by half from the previous year; production of staple crops fell by a third, and fruit and other cash crops declined significantly. In an effort to increase further agricultural productivity, the government recently initiated a program of agrarian reform. This program has been coupled with an ambitious construction plan to curb erosion and to increase water retention. If continued on their present course, it is estimated that these steps will do much to preserve Cape Verde's threatened agricultural sector.

The fact remains, however, that almost all of Cape Verde's capital investment is comprised of foreign assistance grants and concessionary loans. Cape Verdeans and Cape Verdean-Americans understand well the need to move beyond these types of aid relationships. To this end, Cape Verde is taking steps to make its investment climate more favorable. As an additional thrust to the Second National Development Plan, Cape Verde has enacted new, liberalized development policies in a number of key economic sectors. In 1985, the Ministry of Industry and Energy established the Industrial Promotion Unit to promote foreign investment. Just this year, the Government of Cape Verde enacted legislation to establish Cape Verde's first entreport, a free-trade zone of sorts, where goods can be shipped and stored and assembled without the payment of duties or taxes. It should be noted that goods manufactured in Africa receive favorable treatment in many European countries.

In view of the stable government and the favorable incentives for investment, the time is auspicious indeed for us to examine a new era of trade relations with Cape Verde. While current trade between our two countries is virtually nonexistent, both the Cape Verdean government and private sector are seeking to establish exports to new markets, including the United States. Furthermore, there is already a large demand for U.S. Products and services in Cape Verde.

Potential U.S. investments lie in a number of sectors, including light industry, offshore banking, agriculture and fishing, and perhaps most notably, tourism. It occurs to me that one of the few natural resources on which Cape Verde could capitalize is its raw, indigenous beauty. There have been contracts with other countries to construct additional tourist facilities on Cape Verde, and it would seem that there is much room for expansion in this sector. I understand Cape Verde is endowed with a healthy climate and magnificent beaches and mountains. Even on the flat islands, there is a perfect breeze for windsurfing and other sport activities.

It is my sincere hope that this conference will add impetus to the drive toward a strong trade relationship between the United States and Cape Verde. Already there is an atmosphere in Cape Verde that would invite and reward American investment. Cape Verde could accordingly refine its infrastructure and address with greater resources the crucial problem of drought. It could work further to bolster its educational system and combat the onslaught of AIDS. Most importantly, in strengthening its overall economic position, Cape Verde would be able to look to the day when it crosses the threshold of development.

This is a venture that truly could be beneficial to both of our countries. In the spirit of the *Ernestina*, we should begin the journey with an appropriate sense of anticipation, and the knowledge that we are contributing to the ultimate well-being of the United States and Cape Verde. Our ties are firmly established and will remain strong; and it is only proper that they should evolve in this direction.

Thank you.

GEN. BUD WATTS TAKES COMMAND AT THE CITADEL

Mr. HOLLINGS. Mr. President, on April 6, Gen. Claudius E. Watts III was formally inaugurated as the 17th president in the history of The Citadel. Wherever he has served, Bud Watts has excelled: As an undergraduate at The Citadel, class of 1958, as a Fulbright scholar at the London School of Economics, at Stanford Business School, in Vietnam, in the top ranks at the Pentagon. Small wonder that he was unanimously selected for the job from a field of 128 candidates. I congratulate General Watts on his new responsibilities. Even more, I congratulate The Citadel for its good sense and good fortune.

Mr. President, in his inaugural address, General Watts presented his vision of The Citadel's unique role in American higher education. It is an eloquent, compelling speech, and I request unanimous consent that it be reprinted in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

CITADEL PRESIDENT'S INAUGURATION ADDRESS, APRIL 6, 1990

Good morning, friends of The Citadel. Please allow me to extend my sincere welcome to all of you and to express my special gratitude to those who sit here on the dais and symbolically represent the essence of our beloved college and its ties to the world. I thank my cousin Charles, a man of God; Colonel Risher and our Board of Visitors; Senator Hollings, who, along with General Johnson, represent our nation and its military might; Lt. Governor Theodore on behalf of our state; Mayor Riley for Charleston; Julian Frasier for the alumni; Mr. Ludlum for the corps and all Citadel students; and Dr. Briggs, representing our superb faculty and staff. Thank you for your well-wishes. I am touched by the support of my classmates, for whom Larry McKay has spoken so well. I am heartened at seeing my predecessors, Generals Seignious and Grimsley, whose presence indicates survival in this position is possible. Last, but first with me, I cherish the confidence and support of my family, sitting in front of me.

Now as a first official act, so we all start with a clean slate—For those eligible—I hereby grant amnesty to the corps of cadets.

I am honored by the opportunity to lead this great institution. I also approach this morning's address to you with great humility and some trepidation, for I am painfully aware that Horace Mann once remarked that the surest and fastest way to disperse a crowd was to give a speech on education.

A visitor entering The Citadel or an alumnus returning after an absence of many years is at once struck by a sense of permanence. The imposing building surrounding the parade field exude an aura of timeless serenity as they look down upon the seemingly changeless routine of cadet life. The ritual and panopoly of parade, the bark of a sergeant's command, and the cries of the exultant victors of some intramural event are the voices of the past, present, and future. But I caution that observer. Casual impressions can be misleading; they are often hasty, and the glimpse is rarely all-encompassing.

So much here has changed. For someone of my generation, there are new buildings: Daniel Library, Jenkins Hall, Seignious Hall and Deas Hall to name only a few; and others have been renovated, most recently and visibly this field house. The faculty have changed; each year the percentage of those possessing doctorate degrees increases. Their specialization has resulted in new departments and new fields of study. And, of course, the tools of instruction are vastly different. Vacuum tubes have metamorphosed through transistors into silicon chips. In 1958 only gigantic corporate entities or the federal government needed, or could afford, computers. Today, the ubiquitous PC winks and blinks in many of our classrooms and offices, and many cadets bring their computers and CD players to college instead of the hi-fi's brought by my generation.

In spite of such dynamism, I assure you we still hold to that more difficult road, the less traveled one, but the one which, as Robert Frost noted, makes all the difference. The Citadel's philosophy is unchanged. The Citadel's pedagogical compound of a rigorous education within a structured environment that challenges our students to master themselves as they grow intellectually, physically, and spiritually endures. That compound has two noteworthy components.

First is the core curriculum, imparting to all students a bond of common knowledge. The core curriculum acquaints all students with their intellectual heritage and exposes them to disciplines in addition to their major fields of study and produces in our students an unrivaled depth. Cadets in technical fields, for example, understand man's ceaseless drive to synthesize function and beauty, knowing that Winckelmann's superb definition of classicism, "noble simplicity and quiet grandeur," came from his

contemplation of Hellenic architecture. Liberal arts cadets become conversant with black holes, genetic engineering, the rigor of numbers, and the harmony of nature, and at the same time they gain an understanding of the limitations of empiricism and glory in that spark of genius that sets our souls soaring.

The second component of our compound is the military lifestyle. A cadet undergoes the rigors of the 4th class system which teaches the importance of detail and how to cope with the stress so prevalent in our world. Later, as an upperclassman, he learns to share and to accept responsibility. He discovers how to lead. Above all, he learns the importance of integrity.

By the time he graduates, a cadet knows himself, his strengths, his weaknesses, and what he can accomplish and what he cannot. With that self-knowledge comes the self-mastery and confidence so characteristic of the graduates of this institution. The Citadel's approach is not novel; "know thyself" was inscribed over twenty-six hundred years ago on the doors of the Temple of Apollo at Delphi. But the Citadel's approach is unique, and as president, I intend to keep it that way.

Having said that, let me share with you my vision for The Citadel in the coming decade as we approach the year 2000. First, she will remain an institution where quality and excellence are prized and nurtured. Our mission is unchanged since our beginnings 147 years ago: we seek to instill a life-long love of learning in all our students along with an ability to think critically, coupled with an eloquence of expression. We seek to teach that diversity of opinion is not chaos but rather a challenge to the intellect to ascertain and impose a reasoned order. We seek for our students to understand and appreciate the heritage of our rich culture, while acknowledging that other cultures have much to offer.

Second, the corps of cadets will remain the centerpiece of the college. Educating young men within the structure of a military environment will continue as our central mission. In addition, we will continue to broaden and expand our evening college and graduate programs.

As a third goal, we must transcend our walls to share our expertise in those areas where we are uniquely qualified to enrich our community, state, and region. Three areas come readily to mind. First, we have launched an ambitious undertaking with Burke High School to enrich the curriculum of that school, showing inner-city youngsters that there is an open door to higher education and a future. Called "Project Challenge", that efforts has already garnered national foundation support. A second area in which we have unique credentials and much to offer relates to our traditional mission—producing the citizen soldier. The Citadel is not a service academy, but since its inception, Citadel men have always answered the call of state and country, and many serve today in our reserve components. It is highly appropriate that in this state, whose National Guard and reserve component forces are rated the best in the nation, that this institution should take the lead in studying and providing policy recommendations concerning reserve component forces to our state and national leader. Last, I want to see The Citadel's faculty take the lead and become the vanguard of the vital link between "town and gown" so essential to our region's economic development and prosperity. The Citadel has grown and prospered with the Lowcountry; it is our turn to carry our share.
